[From our own correspondent.]

LONDON, Saturday, April 23.

Mr. Lowe delivered his financial statement on Thursday evening, and his proposals for meeting the deficiency caused by the increased army and navy expenditure have produced disappointment. Many persons thought that the Chancellor of the Exchequer would have done all that was in his power to prevent an increase in the income tax, but in order to meet the increased expenditure he has suggested an increase in that tax from four pence, its present amount, or £1 13s. 4d. per cent, to £2 4s. per cent. This is calculated to produce £1,950,000, but as the whole deficiency is not more than £2,713,000, it is manifest that the expense of rendering the country secure against attack will have to be borne chiefly by the payers of direct taxes. Mr. Lowe also proposes some changes in the rates for legacy and succession duties, by which it is expected that that year's revenue will be benefited to the extent of £300,000, and it is contemplated to levy a tax on matches, viz.: half-penny per box of 100 wooden matches, and one penny per box of 100 wax lights or fusees, estimated to produce £550,000 per annum. The Continental war and the outcry which has been made, forcing upon the Government the necessity of reorganizing and thoroughly equipping our military and marine establishments and forces have naturally upset Mr. Lowe's estimate of expenditure; but, at the same time, the country is to be congratulated, notwithstanding the war, that the receipts from customs and excise have largely increased. From tea, for instance, the revenue has been augmented by £592,000: from wine, by £108,000; from malt, £431,000; and from spirits, £481,000. Indeed, it is more than probable that the increase in the revenue from customs is due, in a great measure, to the war, for a large quantity of dutiable produce, originally destined for France, has found its way to our own ports, and has been consumed here.

We have just passed through a week of excellent weather for the growing crops. Rain has fallen abundantly, and the weather being warm, vegetation has made much progress. In fact, we are now having real April weather, and there is every prospect of an abundant yield of grass and roots. Large crops of cattle food are most desirable, as we may then anticipate a reduction in the price of meat and of dairy produce, both of which have been very dear for a long time past. So far as meat is concerned, the immediate effect of abundant pasturge will, if I mistake not, be to enhance its price. And for this reason: The graziers instead of hurrying their cattle to market before it is thoroughly matured, will keep it back so as to increase its weight, and thereby secure a higher price. The immediate result of dry weather and scanty food is to cheapen the price of meat, as the graziers are compelled to part with much of their stock owing to the difficulty of obtaining an adequate supply of food. In dry seasons, therefore, large supplies of stock, but a deficiency in weight, are the characteristics of our cattle markets; as soon, however, as the drought has ceased, and the pastures have again abounded with food, the consumer begins to feel the effect of the dry season by the enhancement in the price. It is satisfactory to notice that the fall of lambs this year has, in most parts of the country, been above the average. With increased supplies and with abundance of food we may hope, therefore, that when due time has elapsed there will be an increased weight of meat and lower prices.

The effect of the fine weather on the corn trade has been to cause an increase of caution on the part of buyers. For all descriptions of grain, the trade has been very slow, and previous quotations have been with difficulty supported. With the season approaching its close, and with a good export demand for wheat and several other cereals, holders are not disposed to accept lower prices, and consequently very little alteration has taken place during the week. The state of the weather will now be keenly watched. I have mentioned that there are indications of a good grass crop, and it frequently happens that when the weather is favorable to the growth of grass, the wheat crop proves to be below an average.

The following statement shows the imports and exports of breadstuffs, &c., into and from the United Kingdom, during last week and since the commencement of the season, compared with the corresponding periods in 1869–70:

FOR THE WEEK ENDING APRIL 15.

	1870'71. Imports.	1870'71. Exports.	1869'70. Imports.	1869'70. Exports.
Wheat.....cwt.	376,867	134 899	555,952	5,500
Barley	74,221	8 376	245,344	360
Oats	78,986	71,936	91,355	196
Peas	8,927	3,838	26,301	149
Beans	41.747	1,843	28,334	....
Indian corn	124,653	684	284,863	460
Flour	101,977	8,850	155,952	172
SINCE THE COMMENCEMENT OF THE SEASON (AUG. 28).				
Wheat.....cwt.	20,415,197	2406,971	27,467,842	183,567
Barley	5,088,032	70,691	5,117,509	15,917
Oats	4,821,090	1120,359	6,080,549	75,536
Peas	473,273	44,705	815,828	10,398
Beans	1,153,688	15,983	1,227,498	1,225
Indian corn	9,485,745	56,980	12,863,694	13,604
Flour	2,961,506	1285,708	4,216,034	13,733

For the corresponding periods in 1868–'69 the figures were as under:

	Imports. For the week.	Imports. Since Sept. 1.	Exports. For the week.	Exports. Since Sept. 1.
Wheat.....cwt.	463,913	18,294,116	152	136,904
Barley	121,873	7,610,580	200	88,393
Oats	62,514	3,974,227	3,583	76,331
Peas	11,309	824,366	153	12,472
Beans	29,088	1,917,761	....	4,196
Indian Corn	223,444	8,693,205	....	881
Flour	102,693	2,632,308	344	22,334

There has been a somewhat better inquiry for accommodation during the week, but the rates of discount remain easy, owing to the abundant supplies of capital seeking employment. There is now some talk of foreign loans. It is very probable that before

Digitized by Google

many weeks have elapsed Spain will be borrowing in this market. Her finances are represented as being in an improved condition, and it is stated that the government has notified all parties having claims on them to forward them for immediate settlement. Italy also is spoken of, and advices from Germany state that there were rumors at the leading financial centres of a new Turkish loan. I think that Spain and Italy are the more likely countries to be successful in this market at the present time, as the other countries are viewed with some distrust. So far as France is concerned, it is difficult to form an opinion as to when she will be able to borrow out of her own country. The news received to-day indicates either that a great conflict is at hand or else that the military advisers of the government have resolved on starving the Commune into submission by a close investment of the city after the German fashion. Both are evils, but the latter is the milder of the two, although it will entail unheard of suffering on the civil population of Paris. At present, there is nothing to indicate the prospect of an improving money market, the supplies seeking employment here being much more than adequate to the requirements of trade, even of such a satisfactory character as that which is now being carried on.

The quotations at Bank and open market are as follows:

	1870. Per cent.	1871. Per cent.		1870. Per cent.	1871. Per cent.
Bank minimum	3 @...	2½@..	4 months' ba'k bills	2½@3	2½@2½
Open-market rates:			6 months' ba'k bills	3½@3¾	2¾@2¾
30 and 60 days' bills	2½@3	2½@...	4 and 6 trade bills..	3¾@4	3 @3¼
3 months bills	3 @....	2½@...			

The rates of interest allowed by the joint stock banks and discount houses for deposits are as under:

	1870.	1871.
Joint stock banks	2	1½
Discount houses at call	2	1½
Discount houses with 7 days' notice	2½	1½
Discount houses with 14 days' notice	2½	1½

The following statement shows the present position of the Bank of England, the Bank rate of discount, the price of Consols, the average quotation for English wheat, the price of Middling Upland Cotton, and of No. 40 Mule Yarn, fair, second quality compared with the four previous years:

	1867. £	1868. £	1869. £	1870. £	1871. £
Circulation, including bank post bills	23,546,921	24,412,917	24,122,990	23,795,544	24,785,633

No 40 mule yarn	1s. 5d.	1s. 3½d.	1s. 3d.	1s. 3½d.	1s. ½d.

The following are the quotations at the leading Continental cities:

	B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.		B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.
At Paris	2½	6	2	—	Brussels	2½	4	2½	3¼
Vienna	5	6	5	5	Madrid	5	5	5	5
Berlin	4	4	3½	3¼	Hamburg	—	—	2½	3½
Frankfort	4	3½	2¾	2¾@3	St. Petersburg	5	8	4¼	7
Amst'd'm	3½	3½	3½	3					
Turin	5	6	5	6					

Bills on Spain, Holland, Germany and Belgium have been in request. On other countries, however, they have been more offered. There is no demand for gold for export, but Mexican dollars have been eagerly purchased for shipment to China,

In the Stock Exchange, business has been very quiet. Foreign Government securities have been rather more freely dealt in; but British Railway shares have receded in price, owing to numerous realisations. Consols are rather flatter on Mr. Lowe's proposals American securities are steady. The following figures show th highest and lowest prices of consols and the principal American securities on each day of the week:

	Monday.	Tuesday.	Wed'ay.	Thu'ay	Friday.	Sat'day.
Consols	93 -93⅛	93⅛-93⅝	93 -93⅛	92¾-93	93 -93⅛	93 -93⅛

The cotton trade has been dull, and prices are rather weaker The following relates to the trade of Manchester:

This market opened quietly in the beginning of the week, and has continued so ever since. Nevertheless, prices on the whole continue pretty steady, and both yarns and goods made from the better qualities of American cotton are extremely firm. Owing to the large arrivals of cotton the Liverpool market has been flat during the entire week, and spinners of low and medium counts of yarn have been induced to extend their contracts whenever they met with favorable opportunities for doing so. Compared with the prices current last week, buyers have had a slight advantage afforded them, and a fair business has been done for forward delivery at prices which spinners declined to take last Friday. Producers continue to keep themselves well under contract, and some descriptions of shipping yarns are engaged two or three months in advance. Indeed, sales have been made this week for August delivery. No doubt this large business for forward delivery is stimulated by spinners being able to make contracts for cotton at favorable prices to cover their engagements. With such large arrivals in the Mersey, the imports this week amounting to fully 177,000 bales, and the stock in Liverpool having increased to 933,000 bales, spinners are encouraged to sell freely. Superior stapled cotton, however, remains comparatively scarce and is strongly held, so that spinners of fine yarns are not so easy to deal with as those who produce yarns from inferior cotton.

This week the still unsettled dispute at Oldham between the master spinners and their operatives has not been without some effect on prices in this market. Many of the Oldham spinners have been so indifferent about selling that they declined to give quotations. Nevertheless this reluctance on their part has not prevented cop yarns from becoming rather weaker and worse to sell since last Friday. Manufacturers have not been frightened into buying, in consequence of the anticipated turnout, and the general impression at present seems to be that, if the hands really do go out, or are locked out, the mills will not remain long closed.

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS

The following are the changes in the Redeeming Agents of National Banks since the 20th of April, 1871. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency.

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
Iowa— Dubuque	The Commercial National Bank	The National Park Bank of New York and the Third National Bank of Chicago, approved.
New York— North Granville	The North Granville National Bank	The Ninth National Bank of New York, approved in place of the Metropolitan National Bank of New York.
Tennessee— Pulaski	The National Bank of Pulaski	The Fourth National Bank of New York, approved.
North Carolina— Charlotte	The Merchants' and Farmers' Nation'l Bank	The National Park Bank of New York, approved.

New National Banks.

The following national banks have been organized since the 20th of April, 1871:

Official No.

1,813—The First National Bank of Anamosa, Iowa. Authorized capital, $50,000; paid in capital, $30,000. H. C. Metcalf, President; Thomas W. Shapley, Cashier. Authorized to commence business April 22, 1871.

1,814—The First National Bank of Montgomery, Alabama. Authorized capital, $100,000; paid in capital, $50,000. William O. Baldwin, President; Edward R. Mitchell, Cashier. Authorized to commence business April 28, 1871.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show an increase in both dry goods and general merchandise. The total imports amount to $10,382,026 this week, against $7,359,839 last week, and $5,813,857 the previous week. The exports are $3,910,936 this week, against $5,168,728 last week, and $3,810,849 the previous week. The exports of cotton the past week were 13,297 bales, against 23,246 bales last week. The following are the imports at New York for week ending (for dry goods) April 28, and for the week ending (for general merchandise) April 29.

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
Dry goods	$1,143,940	$1,880,467	$1,693,265	$3,615,118
General merchandise	4,251,875	7,823,485	5,746,265	6,766,908
Total for the week	$5,395,815	$9,703,925	$7,438,520	$10,382,026
Previously reported	76,067,682	98,793,574	94,223,967	118,846,520
Since Jan. 1	$81,463,497	$108,497,596	$101,662,487	$129,228,546

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports, for the week ending May 2:

EXPORTS FROM NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
For the week	$3,188,021	$2,809,834	$3,439,671	$3,910,936
Previously reported	58,489,965	52,761,008	54,323,425	78,337,908
Since Jan. 1	$61 677,986	$55,570,842	$57,763,096	$82,248,844

The following will show the exports of specie from the port of New York for the week ending April 29, 1871:

April 24—Brig Thomas Farrall, Mayaguez— American silver	$15,000	Ponce, P. R.— American gold	$30,0 0
April 25—Str. Westphalia, London— American gold	150,000	April 28—Schr. William Deming, St. John's, P. R.— American silver	15,000
For Hamburg— Silver bars	10,900	April 29—Str. Rising Star, Aspinwall— American silver	5,000
April 25—Str. Minnesota, London— American gold	550,000	April 29—S r. City of London, Liverpool— American gold	887,225
April 26—Str. China, Liverpool— Silver bars	106,403	Silver bars	180,008
April 26—Schr. Israel Snow, Port au Prince— American silver	10,000	Gold bars	53,148
April 27—Str. Hansa, London— American gold	500,000	April 29—Str. Deutschland, Southampton— Gold bars	29,060
April 28—Brig Castilian,		Foreign gold	1,750
		Foreign silver	165,178
		American gold	673,800
Total for the week			$3,332,493
Previously reported			20,001,685
Total since Jan. 1, 1871			$23,334,178
Same time in 1870	$8,097,853	Same time in 1867	8,670,624
1869	10,345,162	1866	5,838,966

New Orleans, Mobile and Texas.—This railroad, which the New Orleans, Mobile and Chattanooga Company is constructing, and which has been generally known as the "Chattanooga Road," is completed from a point opposite New Orleans nearly due west up the Mississippi about 49 miles, and is to be completed to Donaldsonville, 57 miles from New Orleans, by the 1st of May, and the road-bed is ready for the ties 20 miles further. The road will probably be opened for business to Donaldsonville in July or August. For 20 miles west of New Orleans it is close to the Opelousas road.

The New United States Loan.—The reduction of debt, principally by the purchase of 5-20 6 per cent bonds of the United States, has amounted to about $118,000,000 in the year ending May 1, 1871. The Government has also negotiated in the past two months over $62,000,000 of the new 5 per cent bonds, which are to be exchanged for 5-20s, or the proceeds applied to the payment of 5-20s, and this will make a total of about $160,000,000 of 5-20s withdrawn or to be withdrawn from the market by the operations of the Treasury in the past year. The Government is now purchasing at the rate of $8,000,000 to $10,000,000 per month, or upwards of $100,000,000 per year; and this enormous sum of money must seek investment in some other standard securities. A large portion of it must seek investment again in United States Goverament bonds, and sooner or later there seems every prospect that the new 5 per cents must become a most favorite security, and in fact the leading Government bond of the market. In addition to all the usual advantages pertaining to Government securities, which are well known to be far above those of any other bonds, the new 5 per cents have the special and important features that the interest upon them is payable quarterly, and that holders of registered bonds may obtain their interest in a Treasurer's check, sent directly to them by mail, without any of the trouble usually attending the collection of interest on registered bonds. This is a very important feature, and makes the new registered bonds much more desirable than those of other issues. A very complete statement in regard to the loan and its progress, and the reduction of the United States debt every month since March 1, 1869, will be found in another column.

The German Bank of London (Limited).—The increasing commercial relations between England and Germany, and the certainty of their continued expansion, make the commencement of business by the German Bank of London an event of no small importance in the financial and mercantile world. The bank is established in a most central and convenient position—namely, in Bartholomew house, Bartholomew lane, and it is under the direction of some of the most competent men to be found in England or Germany. The capital is £2,000,000, in 200,000 shares of £10 each, of which £600,000 has been issued, and within six months the whole of this will be fully paid up. The bank has no branches on the Continent or abroad. It is, as its name expresses, the German Bank of London, and will be engaged in negotiating approved securities, and in transactions appertaining to foreign banking business. Established upon the solid basis just described, with wide and powerful connexions, and administered with all the skill and prudence that experience can command, the institution cannot fail to be of eminent service to the public, whose confidence it will certainly command.

—The interest due May 1, on the bonds of the Port Huron and Lake Michigan Railroad Company—common and endorsed- is paid by Messrs. Drake Brothers, Bankers, 16 Broad street. They state in regard to the road: "We are progressing rapidly with the road, and shall have it done to Lapeer, in Michigan, by May 6; we have the iron purchased, and all the necessary appurtenances to make an early connection with the town of Flint, where we shall have the advantage of a business connection with the Flint and Pere Marquette Railroad coming from the northern part of the State, and have no doubt whatever of being able to make our final connection at Owosso with the Detroit, Milwaukee and the Jackson, Lansing and Saginaw Railroads by early Fall."

—The attention of capitalists and investors is directed to the first mortgage seven per cent gold bonds of the Walkill Valley Railway Co., which are offered for sale at 90 and accrued interest in currency, by Messrs. Mead & Clark, Bankers, 141 Broadway. The railway is situated on the west side of the Hudson River, and is now running for 20 miles to New Paltz, and is under contract to be in working order to Kingston next fall. The bonds are therefore a home investment, and are worthy of the investigation of parties having money to invest. The coupons are paid semi-annually in this city, on the first days of April and October, free of Government tax, and the issue of bonds is limited to $20,000 per mile of completed road.

—Messrs. Morton, Bliss & Co., No. 30 Broad street, the bankers of the Union Pacific Road, write that the new president of the company, Col. Thomas A. Scott, after a survey of the prospect of traffic and expenses of the present year, estimates the gross earnings at Nine millions of dollars, and the net income, exclusive of sales of and collections from lands, at $4,500,000.

—Attention is invited to the banking card of Messrs. Fanshawe & MacDougall. This firm succeeds to the business of Lounsberry & Fanshawe and H. C. Hardy & Son, which latter had a large number of Southern correspondents. Mr. Hardy retired on account of ill health, turning over his business to the new firm, who have every facility for conducting it.

BANKING AND FINANCIAL.

BANKING HOUSE OF HENRY CLEWS & Co., 32 WALL ST., N. Y

Our business is the same as an incorporated bank.

Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed on all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make tele graphic transfers of money to any desired point, and transac every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upward on.

The Imperial Bank, and Messrs. Clews, Habicht & Co., London.

The Provincial Bank of Ireland, The National Bank of Scotland, and all their branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Government and other investment securi ties; also Gold and Exchange.

Advances made on approved collaterals and against Merchan dise consigned to our care.

We make collections of Notes, Drafts, Coupons and Dividends with promptness on all points, and are fully prepared to offer banking facilities upon either currency or gold basis.

HARVEY FISK. A. S. HATCH.

FISK & HATCH,
BANKERS AND DEALERS IN GOVERNMENT SECURITIES,
NO. 5 NASSAU STREET, NEW YORK, May 1, 1871.

The recent advance in the SIX PER CENT GOLD BONDS OF THE CENTRAL PACIFIC RAILROAD CO. to a premium above par, affords an illustration of the popular demand both in this country and Europe for reliable six per cent securities having a long and fixed time to run, and paying a fair rate of interest on their cost; and it further shows that the first mortgage bonds of honorably managed railroads, when known and appreciated, will command public confidence, and must to a large extent take the place of the Government Five-Twenties (as the latter are purchased or called in by the Government), and thus command higher prices than heretofore.

THE CHESAPEAKE AND OHIO RAILROAD, under substantially the same Financial and Executive management as that which has rendered the Central Pacific so great a success, is being rapidly extended to the Ohio River, in response to the demands of commerce for enlarged transportation facilities between the Great West and New York and other important points on the Atlantic seaboard.

The present successful operation of the 227 miles of completed road, the value of the property upon which they are secured, the certainty of a very large and remunerative traffic for the road, and the very high character of the Company and of its Officers and Directors, commend the SIX PER CENT GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD CO. to public confidence as a superior, safe and reliable security.

We personally recommend them to our friends and customers desiring to make new investments, or to fund their Five-Twenties

Price 90 and accrued interest.

A difference of about 20 PER CENT may now be realized with entire safety by exchanging Five-Twenties for these Bonds.

FISK & HATCH.

The Capital of the German Bank of London Limited is £2,000,000, divided into 200,000 Shares of £10 each: of which 60,000 Shares, representing a capital of £600,000, have been issued, subscribed for, and allotted, and are intended to be fully paid up within six months.

The bank is established in London and has no branches on the Continent or abroad. It is now prepared to open business, to negotiate approved securities, and generally to attend to transactions appertaining to Foreign banking business.

Bartholomew House, Bartholomew lane, London, E. C., April, 1871.

☞ NEW FIVE PER CENT. BONDS OF THE UNITED STATES.

The Treasury Department is now able to promise that the registered Certificates of Stock, and a good part of the Coupon Bonds of the New Loan of the United States bearing Five per Cent. interest, payable quarterly in gold, will be ready for delivery early in the present month. The subscriptions to the loan now amount to $62,000,000, and it is expected that the subscriptions and sales will progress more rapidly when the certificates and bonds are ready for market abroad as well as at home. The whole sum of Five per Cents offered to the public generally, and to the holders of United States 5-20 Bonds, without qualification, is $200,000,000. When this amount, to which preference is thus given, is taken up, the remainder of the Five per Cents, $300,000,000, embraced in the new loan of July 14, 1870, for refunding the public debt, will be offered in connection with $300,000,000 Four and one-half per Cents, and any part of $700,000,000 of Four per Cents, the one running fifteen years and the other thirty years.

The following is a copy of the New Five per Cent. Bond, under and pursuant to the New Loan Act of Congress:

FORM OF FIVE PER CENT. BOND.

INTEREST | FUNDED LOAN OF 1881. | FIVE PER CENT.

UNITED STATES OF AMERICA

ARE INDEBTED TO THE BEARER IN THE SUM OF ..... DOLLARS.

THIS BOND is issued in accordance with the provisions of an Act of Congress entitled "An Act to authorize the refunding of the National Debt," approved July 14, 1870, amended by an Act approved January 20, 1871, and is redeemable at the pleasure of the United States after the first day of May, A. D. 1881, in coin of the standard value of the United States on said July 14, 1870, with interest in such coin from the day of the date hereof, at the rate of FIVE PER CENTUM per annum, payable quarterly, on the first day of February, May, August and November in each year. The principal and interest are exempt from the payment of all Taxes or Duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority.

WASHINGTON, ..., 18....

Entered ..... Recorded .....

.....

Register of the Treasury.

Registered bonds will be issued of the denominations of $50, $100, $500, $1,000, $5,000 and $10,000, and coupon bonds of each denomination except the last two. The interest will be payable in the United States at the office of the Treasurer, any Assistant Treasurer, or designated depository of the Government, quarterly, on the first days of February, May, August and November in each year.

The interest on the registered stock of this loan, it is determined by the Treasury Department, will be paid as conveniently to the holder as on the Coupon Stock, and personal attendance, or attendance by proxy at the Treasury, to draw and receipt for the interest will be dispensed with *whenever the check of the United States Treasurer, mailed punctually to the address and order of each holder on or before every quarter-day, is preferred to such attendance.* This check, payable in gold coin at the Treasury in New York (or such other office as the Stock is registered at), will be negotiable or collectable on the indorsement of the owner or owners of the Stock. In pursuance of this arrangement, the subscribers to, or purchasers of the Stock in its registered form (which is a complete protection against theft or other losses incident to Coupon Bonds payable to bearer) are advised to give their Post-office address in full, and to notify of any change in the address between quarter days.

The whole proceeds of the new loan will be applied to the payment or redemption and cancellation of the 5-20 years six per cent. bonds, and in addition to these proceeds the 5-20s are now being reduced by purchase at the rate of $10,000,000 per month.

The entire effect, therefore, of the new loan, in connection with the existing Sinking Fund process of the Treasury, is to reduce both principal and interest of the Public Debt of the United States. *The loan creates no additional supply of Government stocks*, while the application of the surplus revenues derived in gold from Customs is constantly lessening, as it has been doing for two years past, the Funded Stocks bearing six per cent. gold interest.

The 1st of May schedule of the Public Debt, which has just been published by the Secretary of the Treasury, shows a reduction in these stocks since the April schedule of $12,215,700 and a further lessening of the yearly interest charge thereon of $732,942. This leaves the total yearly interest charge in gold $111,982,031. In the same month the Treasury paid and canceled $2,470,000 of the Three per Cent. Currency debt, reducing the whole of this debt bearing interest to $51,023,000, and the yearly interest charge thereon to $1,537,470.

The proposed further reduction of the annual interest charge upon the Public Debt by refunding is as follows:

By exchange of $500,000,000 United States six per cents for new five per cents of 1861	$5,000,000
By exchange of $300,000,000 United States six per cents for four and a half per cents of 1866	4,500,000
By exchange of $700,000,000 United States six per cents for four per cents of 1901	14,000,000
Total saving per annum by refunding	$23,500,000

The large and rapid accumulation in the last few years of private capital now retired from active business, and of the cash Savings and Life Insurance premiums deposited with or intrusted to the provident institutions of the country all seeking the most undoubted security, pledged to be kept free of all taxes, under national or local authority, and content, provided this object be assured, with moderate rates of interest—will no doubt ultimately absorb so much of these New Stocks as may not be taken in voluntary conversion of United States 5-20s, or marketed abroad.

C. C. NORVELL,
In charge of United States loan advertising.
TREASURY OFFICE, NEW YORK, May 2, 1871.

FRIDAY EVENING, May 5, 1871.

The Money Market.—Money has been very easy during the whole week, at 4@6 per cent, and yesterday and to-day the leading government dealers have obtained large amounts at 3 per cent.

The stock market has been rather less active, with a consequent diminution in the demand for money to be used in speculative operations, and as there is a growing confidence in a continuously easy market for some months to come, the tendency has been towards easier rates, as above noted, the same tendency being also shown by time engagements, which have been made at 4@5 per cent for 60 days. The glut of national bank notes is again becoming very apparent, and they sell at a disconnt of ¼@½ per cent; the greater part of the Treasury balance, amounting to about twelve millions, consist of these notes, and the payment for five-twenties bought this week was made entirely in this currency, but as the payments into the Treasury for gold sold were made in the same, the Treasury operations of the week have not been such as to affect materially the legal tender reserve of the banks. On Saturday last, the redemption of $2,000,000 3 per cent legal tender certificates called in by order of March 6, was commenced, and notice was given on the 2d instant that $1,250,000 more will be called in after June 30, upon which, interest will cease at that date; this makes the total amount called in to date $14,400,000. In order to obtain legal tenders to redeem the certificates, it has been suggested that the Secretary of the Treasury may have to resort to unusual measures, such as selling a large amount of gold. The Treasury Schedule for May embraces the sale of $2,000,000 gold every Thursday, and the purchase of $2,000,000 bonds every Wednesday.

The national banks have received notice from the Comptroller of the Currency calling for an exhibit of their condition at the close of business on Saturday, April 29.

The bank statement of Saturday 29th ult., showed the banks to be $5,230,320 stronger in their excess of legal tender reserve, the whole excess being $13,570,692.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	April. 29, 1871.	April 30, 1870.	May 1, 1869.
Loans and discounts	$287,554,538	$269,304,000	$280,485,000
Specie	15,597,189	28,817,000	9,267,000
Circulation	31,461,929	35,506,000	33,972,000
Net deposits	222,349,225	203,789,000	183,948,000
Legal Tenders	60,426,291	59,944,000	56,495,000

The demand for first class commercial paper has continued tolerably good, but with the actual and prospective ease in money, rates are easier and we have heard very choice names quoted as low as 5½ to 6 per cent. This however is so low as to check the demand, and a limited business has been transacted.

United States Bonds.—Government securities have been firm on a moderate business. The foreign bankers, particularly the

Digitized by Google

German houses, seem to have been among the principal purchasers, as the high rates of exchange have stimulated their inquiry for bonds to send abroad. There have been no special influences bearing upon the market and the tone throughout has been unusually steady. The Treasury purchases for May will be $2,000,000 every Wednesday, making $10,000,000 for the month, the announcement of the programme had little effect upon prices. Pursuant to the notice $2,000,000 were purchased on Wednesday at prices between 110.98 and 111.11, the total offered being $5,716,350.

Nothing new has yet been developed in regard to the negotiation of the 5 per cent. loan, although it had been expected that the Secretary of the Treasury would make some changes in his arrangements for disposing of the bonds, after the first of May; Mr. Boutwell has just returned to Washington after an absence at the West, and it is possible that he may now take some action in the matter. The last public debt statement shows a further large reduction of the public debt; and this, together with the present high price of our government bonds—about par in gold, and the rapid purchases of the 6 per cents, also tend in favor of the new bonds. The market to-day was the firmest of the week and prices close at a fractional advance on our last quotations.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, April 29.		Monday, May 1.		Tuesday, May 2.		Wednesd'y May 3.		Thursday, May 4.		Friday, May 5.

State and Railroad Bonds.—Southern state bonds have been unusually dull the past week with scarcely any speculative movement. There has been little intelligence of importance from the Southern States, of such character as to influence the price of their securities, beyond the reports from South Carolina of the meeting on Tuesday, 9th inst., of the tax-payers' convention at Columbia. The delegates to this convention are said to represent the conservative element of the State, and the proposed meeting is considered favorable to bondholders interests.

Railroad bonds have been more active, both for the regular list sold at the stock board, and for the first mortgage bonds of several new roads now offered in this market by different banking houses. There is also a large class of bonds which have been negotiated within a few years past, but are not on the stock board list, and the dealings in these through private bankers and brokers are carried on to a very considerable extent. The inquiry for all kinds of first-class railroad bonds is stimulated by the large amount of funds released by the government purchases of 5-20 bonds, as these funds naturally seek investment in other safe and profitable securities.

Central Pacific railroad bonds have been in good demand and close firm at 100½@100¾.

Union Pacific first mortgage bonds closed at 89⅞ to 90; Land Grants, 81⅞ to 81⅝; Incomes, 83 to 83½.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

Railroad and Miscellaneous Stocks.—Stocks have been very quiet, compared with the immense business and wide fluctuations of the previous two weeks. It can hardly be said that there have been any definite signs of weakness, but the temporary lull in speculative business has apparently been a pause, rather than a change in the tone of the market. The principal reason for this comparatively quiet market, is found in the fact that several of the leading operators, who have recently been most prominent in the "bull" cliques, have been absent from the city, attending the annual election of directors of the Lake Shore and Michigan Southern Railroad, and with their return to the city the coming week it is anticipated that there will probably be another upward movement in the market. In other stocks which were not affected by the circumstances above referred to, there has been some activity and an advance in prices. Rock Island closes at 115½, Northwest at 86½, do. preferred at 98½, and Reading at 113⅜, all materially higher than last week's closing prices.

It is considered an evidence of much strength in stocks, that prices have been so firmly maintained, and in several cases even advanced to higher figures than before, on a dull market; and based upon this strong tone and the almost universal expectation of easy money, the opinion seems to be generally held that another upward movement will probably occur very soon. On the other hand it is to be remembered that prices are now much higher than they were six weeks ago, and it is almost a certainty that when they have reached a point sufficiently high to satisfy the controlling cliques, the stocks will be distributed upon outside purchasers in the same manner that they have been "unloaded" so frequently in the past.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

The Gold Market.—Gold has been very steady at 111@111¼ throughout the week, closing at 111¼. There have been no disturbing elements in the market, camparatively little speculation, only a moderate export demand, and the amount of Treasury sales for the month are the same as in April—$2,000,000 each week—so that there has been no good basis for wide fluctations in the premium or for speculative manipulations. The total export for the week will not probably exceed $1,200,000, which is less than had been anticipated by many, and the customs receipts have been only $2,622,000, against nearly $3,000,000 the previous week. There is still an important short interest in the market, probably based upon the general idea that 110 is about the natural figure for gold, aside from any extraordinary customs or export demand or other disturbing influences, and that the tendency of the market in the long run will be towards that level.

In the gold loan market rates have ranged from "flat" to 1-32 of one per cent a day for borrowing, and "flat" to 3 per cent for carrying; to-day the rates paid for carrying were 1, 1½ and 2 per cent.

The following table will show the course of the gold premium each day of the week past:

	Quotations. Opening.	Lowest.	Highest.	Closing.	Total Clearings.	Balances. Gold.	Currency.

Foreign Exchange.—Rates have been pretty firmly maintained at 110@110¼ for best bankers 60 days sterling, and 110⅛@⅜ for short sight, but at these rates there has not been much business transacted. To day a leading house was drawing demand bills at 110¼ less commission, with the effect of checking other transactions to some extent, and probably also of diminishing the exports of specie. The latter have been retarded, too, by the unpopularity of the new bill of lading adopted by the steamship lines, which exempts the ship-owners from almost every sort of liability, including theft. Although it is believed that these sweeping exemptions could not be held valid in a court of law, there is always a disinclination on the part of merchants to enter into engagements where an appeal to the courts will be necessary to secure their rights. Cotton exports of the week amount to 71,087 bales against 36,275 bales in the same week of 1870.

Quotations are as follows:

	60 Days.	8 Days.
London prime bankers	110 @ 110⅛	110¼@ 110¼

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES.

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3. The Table of Railroad, Canal and Other Stocks, on the next page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column *x=extra; s=stock or scrip.*

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q —J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name

Marietta and Cincinnati Railroad.—The earnings of this road for the years ending Dec. 31, 1869 and 1870, were as follows:

	1869.	1870.
Through passengers	$43,041 11	$74,072 38
Local passengers	340,274 92	346,706 95
Through freight	247,402 74	284,583 79
Local freight	6 2,199 52	617,693 83
Mail	23,737 44	23,737 44
Express	38,454 09	37,359 91
Telegraph	6,235 83	6,191 25
	$1,391,345 65	$1,420,345 55
Expenses, viz:		
Road department	$394,019 62	$431,787 69
Bridge department	97,057 57	91,994 72
Machinery department	380,302 60	439,765 93
Transportation department	240,403 08	238,357 37
Mileage of cars	31,758 41	40,398 90
Telegraph	13,971 39	18,763 17
General expenses	86,151 76	78,088 49
	$1,243,664 33	$1,342,156 27
Net earnings	$147,681 32	$78,189 28

Compared with the previous year the gross earnings show an increase of $28,999 90, with an increase in expenses of $98,491 94, making a decrease in the net earnings of $69,492 04. The ratio of working expenses is 94¼ per cent., an increase, compared with the previous year, of 5¼ per cent. The President in his report says:

The increase in through freight traffic of $37,181 05, being fifteen per cent., is very gratifying.

The stockholders of the Ohio and Mississippi company, at the annual meeting in October, authorized the Board of Directors to change the guage of the road to 4 feet 9 inches, which will conform to the Marietta and Cincinnati track. It is believed that the consummation of this plan, by which cars can be transported between St. Louis and Louisville and the Seaboard via Parkersburg without change will result in a very great increase of through business.

The distance from Cincinnati to Baltimore is 589 miles, or 240 miles less than the average distance from Cincinnati to New York, by the New York Central, Erie and Pennsylvania roads. From St. Louis to Baltimore via Cincinnati and Parkersburg the distance is 929 miles, or 210 miles less than the average distance from St. Louis by the same roads to New York. These advantages, affording by the same parallel, the shortest and cheapest as well as the most direct route to the seaboard, will certainly develop an immense traffic between those Western regions and Baltimore, which will prove a source of great profit to the Baltimore and Ohio, and the Ohio and Mississippi as well as the Marietta and Cincinnati Company.

An improvement in the freight business to and from the Indianapolis, Cincinnati and Lafayette road is noted.

The Columbus and Hocking Valley road was completed to Athens in July. A considerable traffic, principally in iron from the Marietta and Cincinnati road, and coal from Nelsonville on the Hocking road has been established. A through passenger car runs daily between Portsmouth and Columbus, furnishing facilities, long needed, for easy communication between Southern Ohio and the capital of the State.

The increase in equipment, made in the autumn, enabled the company to earn during the last quarter of the year larger receipts than for any similar period.

In the expenses are included many items properly belonging to "Extraordinary Renewals" or "Construction," which, on account of the difficulty of accurate adjustment in the incomplete condition of the road, have been charged to "repairs."

The policy which had governed the Board for two years previously, of placing the road in superior order as rapidly as the company's resources would permit, was continued in 1870.

The following statements will indicate the large amount expended in improving the condition of the road and adding to its equipment and facilities.

Four thousand six hundred and two tons, or nearly fifty miles of new rails were laid.

One hundred and twenty-six thousand seven hundred and eighty-two cross-ties were used.

Fifty-one miles of road, never ballasted hitherto, were ballasted and eighteen miles re-ballasted. Five construction trains were run, and a great improvement effected in the surface of the road bed, while a large amount of ditching was also accomplished.

Fifty-five thousand three hundred and one dollars and forty-eight cents were expended in repairing and renewing bridges.

A new iron bridge one hundred and sixty feet in length, was built over the canal at Chillicothe. A superior iron bridge of two spans, each one hundred and twenty-six feet in length, at Lee's Creek, and one at Sycamore Creek of one hundred and twenty-two feet, with substantial masonry at both points, were nearly completed at the close of the year, and will be ready for use in January, 1871. The amount expended on these valuable, permanent improvements was $64,934 54.

Ten locomotives, costing $116,682 54, were purchased and paid for.

106 box, 50 coal, 25 flat and 25 stock cars, costing $135,167 82, were in part built at the company's shops at Zaleski, and in part purchased.

Three passenger cars and three baggage cars were built at an aggregate cost of $23,073 68.

About one and one-fourth miles of sidings were added.

A new station house was commenced at Chilicothe, and $11,-931 69 expended on this account. A new station at Loveland was commenced. These buildings will be completed in March next.

A new machine shop was built at Chillicothe at a cost of $16,-313 63, and $18,152 86 expended for new and improved machinery.

About 12½ miles of new fencing were added.

The Ferris' Branch was completed at a cost of $18,863 67.

$160,840 73 was advanced in cash to the Cincinnati and Baltimore road.

FINANCES.

The stockholders having approved the recommendation of the board in regard to a third mortgage for three millions of dollars, the bonds bearing eight per cent. interest were placed upon the market on July 1st. and two millions sold at seventy per cent. net, realizing a much higher rate than the average obtained for the second mortgage bonds.

Upon the commencement of the war in Europe, the bond market at home and abroad became greatly depressed, and it was found to be impossible to dispose of the million remaining without sacrifice. The Board, therefore, continued to carry a considerable floating debt, which by the assistance of the Baltimore and Ohio Company, it was able to do upon fair terms.

It is hoped that, by the sale of these bonds at improved rates, and of the real estate belonging to the company not required for Railroad purposes, the floating debt can be kept within reasonable limits.

By the former reports of this company, the amount of outstanding or issued capital stock and scrip of all classes appeared to be $14,620,865 92. Of this, 7,000 shares, equal to $350,000, were held in trust for the company to meet certain contingencies which have not arisen; and the occasion for the use of said stock having passed, the Board of Directors have ordered the certificates for said stock to be canceled and a corresponding reduction in the amount of capital stock to be made.

It also appeared, on examination of the books, that $306,887 41 of the common or deferred stock of this company had not, in fact, been issued to parties entitled thereto, but remained with the company, to be issued when called for. The Board, therefore, ordered the correction of the capital stock account so as to show the true amount of outstanding stock, which is $13,903,978 51, and it so appears in the General Balance Sheet published herewith.

BRIDGE AT PARKERSBURG.

It is with great gratification the Board announces the completion by the Baltimore and Ohio Company, at the close of the year, of the great iron bridge at Parkersburg. This splendid structure, one mile and 1,762 feet in length, including the approaches, was erected at a cost of over one million of dollars. It is difficult to estimate the great value of this magnificent work to the permanent interests of the Marietta and Cincinnati Company. The tedious delay, which heretofore attended the transfer of passengers and freight interchanged between the two companies, will be obviated, and the route established as first class in speed, comfort, and safety between Cincinnati and Baltimore.

CINCINNATI AND BALTIMORE RAILWAY.

The litigation in reference to crossing Spring Grove Avenue and Colerain Turnpike, having been decided in favor of the company in June, 1870, the work was renewed with vigor, and the line is nearly completed as far as Harrison Turnpike. It will be finished throughout at the close of 1871.

The company was obliged to pay very high prices for right of way, but has secured all required for the line. The cost of the work will, it is now estimated, reach nearly one million of dollars for a single track road. Negotiations are in progress for the use of the Cincinnati and Baltimore road by the Cincinnati and Springfield road, which, it is expected, will be consummated at an early day. The Marietta and Cincinnati Company has subscribed and paid for $200,000 of the stock of the Cincinnati and Baltimore road, and, to secure rapid progress, has advanced $133,769 73 in cash, additionally.

$124,000 of the bonds, and $258,550 of the stock have been sold, and it is expected that the remainder of the securities will be placed during 1871.

BALTIMORE SHORT LINE RAILWAY.

The improper location of the road between Warrens and Belpre has, since the opening of the road, always been a source of great expense in maintenance and loss in revenue of the company.

It is difficult, at this day, to understand the motives which governed the managers of the road, in its early history, in locating it over ravines, requiring very long and high trestles, and

Digitized by Google

across a most rugged country, while the natural and more economical route, both as to original cost and subsequent maintenance, through the valley of the Hocking, by a line about ten miles shorter than the existing, could have been secured. With the view of remedying this grave error in location, the Baltimore Short Line Railway Company has, during the past year, been incorporated under the laws of Ohio, and proposes, with the assistance of the Marietta and Cincinnati Railroad Company, to construct a road in as direct a line as practicable from Warrens to Belpre. Its completion is regarded as essential to the establishment of a perfect line between Cincinnati and Baltimore.

GENERAL REMARKS.

During the last three years large sums have been expended in extraordinary improvements of the Marietta and Cincinnati road, and in adding largely to its facilities for general business.

The Baltimore and Ohio Company has also expended a heavy amount in arching tunnels, improving the Parkersburg Branch, and in building the great bridge over the Ohio river at Parkersburg. Both companies have been impressed with the belief that this vast outlay was necessary in order to secure a full share of the large and valuable traffic between the West and Southwest and the Atlantic seaboard, and in order to attain that position which their geographical advantages should command. The wisdom of this policy is now apparent. The line is attracting attention as a favorite route for passengers, and the indications are very decided that the receipts of the Marietta and Cincinnati road for the year 1871, will far exceed those of any previous year, while the expenses for extraordinary repairs may now be diminished.

The Company have 62 locomotive engines, viz.: 19 passenger and 43 freight; of these, 38 are first class, 17 second class, and 7 third class. The engines are all burning coal, and their condition has been fully maintained.

The number of through passengers transported during the year was 15,407; do. local do, 340,184—total, 355,591. Number of tons of through freight, 120,024; do. local do., 272,421—total, 392,445. This shows an increase in number of passengers carried, 27,092; and in tons of freight transported, 4,378.

President—John King, Jr. Treasurer—Wylie H. Oldham. Secretary and Auditor—Charles F. Low.

Directors—John King, Jr., Johns Hopkins, Thos. Whitridge, Allan A. Chapman, John Donnell Smith, Baltimore, Md.; Nathaniel Wright, R. M. Bishop, W. W. Scarborough, James D. Lehmer, Cincinnati, Ohio; William T. McClintick, John Madeira, Chilicothe; Wylie H. Oldham, Marietta, Ohio; J. N. Camden, Parkersburg, W. Va.

Lake Shore and Michigan Southern Railroad—Annual Election of Officers.—CLEVELAND, Ohio, May 3—At the annual meeting of the stockholders of the Lake Shore and Michigan Southern Railway, held in this city to-day, Vice-President Schuyler Colfax presiding, and the following gentlemen were elected directors for the ensuing year: Horace F. Clark, James H. Banker, Augustus Schell, Ezariah Boody, New-York; William Williams, Buffalo; Henry B. Payne, Amasa Stone, Jr., Stillman Witt, Cleveland; William L. Scott, Milton Courtwright, John A Tracy, Erie; Albert Keep, Chicago; William D. Bishop, Bridgeport, Conn. There is but one change from the Board of last year—William D. Bishop in place of Alanson Robinson, of Buffalo, deceased. There was but one ticket in the field, and the election went off smoothly.

Cleveland and Pittsburg.—The Philadelphia *Ledger* says: Upon inquiry as to the truth of the statements contained in the Pittsburg papers relative to the Baltimore and Ohio and Lake Shore Railroads controlling the Cleveland and Pittsburg Road, we find the following to be the facts: 1. That no such offer as that recited was ever made to the Pennsylvania Railroad Company. 2. That the contract is not terminable in one year, but continues for seventeen years, and cannot be terminated without the joint consent of both companies. 3. That the contract is enforceable in either Pennsylvania or Ohio. 4. That the Pennsylvania Railroad Company, the lessee of the Fort Wayne, has no desire whatever to purchase the stock. 5. That they will not lease it for the next seventeen years, unless it can be made very largely to their interest to assume the responsibility. 6. That all the speculations in that stock recently have been upon the stories of adventurers in Wall street and elsewhere. 7. That neither the Baltimore and Ohio Railroad Company nor the Lake Shore is likely to buy the stock of a company situated by contract as the Cleveland and Pittsburg is at present. The managers of both lines are far too prudent to indulge in any such enterprise.

—LOUISVILLE May 3.—At a meeting of the stockholders of the Louisville and Nashville Railroad to-day, the president and directors were authorized to lease the Nashville and Decatur Railroad, and make such contracts for the completion and control, of the North and South Alabama, as is best for the interests of the Louisville and Nashville road. A resolution was also adopted to guaranty and endorse $3,500,000 seven per cent thirty year bonds of the Memphis and Ohio Railroad.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, May 5, 1871.

Trade in foreign merchandize has rather improved the past week, and for some leading articles higher prices have been obtained, but in Domestic Products there has been great irregularities, with an unsettled closing, and some days must elapse before normal influences can be re-established.

The following is a statement of the stocks of leading articles of merchandise at dates given.

	1870.	1871.	
	May 1.	April 1.	May 1.
Beef.....tcs. and bbls.	23,602	40,902	27,359
Pork.....bbls.	34,383	109,246	124,826
Tobacco, foreign.....bales.	17,908	19,493	20,196
Tobacco, domestic.....hhds.	13,750	13,645	17,370
Coffee, Rio.....bags.	16,757	37,213	45,036
Coffee, other.....bags.	50.132	13,887	50,607
Coffee, Java.....mats.	51,447	30,184	....
Sugar.....hhds.	84,684	26,589	43,362
Sugar.....boxes.	96,880	38,497	50,775
Sugar.....bags, etc.	323.234	206,036	168,559
Sugar.....hhds.	1,927	3,284	5,056
Melado.....hhds.	20,550	9,114	6,843
Molasses.....bbls.	345	5,000	7,600
Molasses.....No.	76,000	151,200	172,850
Hides.....bales.	50,000	111,000	87,000
Cotton.....bales.	29,400	31,015	34,710
Rosin.....bbls.	1,715	3,047	955
Spirits Turpentine.....bbls.	33,873	11,263	11,025
Tar.....bags.	2,200	3,800	8,100
Rice, E. I.....casks.	3,857	610	540
Rice, Carolina.....bales.	7,200	14,400	17,050
Gunny Cloth.....bales.	5,000	12,000	14,275
Gunny Bags.....bags	117,300	98,900	66,700
Linseed.....bags.	10,000	16,600	17,700
Saltpetre.....bales.	11,150	13,050	15,500
Jute and Jute Butts.....bales.	23,200	30,216	38,331

Provisions have been fairly active, but Mess Pork has declined and closes at $17 25; prime Mess is offered at $16, with some buyers for export at $15 50; the sales below this price noted last week were of inferior and mixed brands. Some 2,500 boxes Bacon have been taken for the Continent at 9@9¼c. for long clear. Lard closes at 11⅜c. for Prime Steam on the spot; 11½c. for June; 11¾c. for July, and 12c. for August. A line of extra Mess Beef sold at $13 75. Butter has declined, and Cheese is nearly nominal.

Tobacco has been active, but the market is entirely without new feature. Prices seem to have declined to a point at which buyers are disposed to operate, and the market is simply steady. In Kentucky Leaf the sales of the week amount to 1,100 hhds., of which 900 hhds. for export, at 5¼@5¾c. for lugs, and 9½c. for low to good leaf. In Seed Leaf no special feature is reported; the sales have been 300 cases Pennsylvania, 500 cases Connecticut and Massachusetts and 238 cases Ohio, all new crop, on private terms; also, 150 cases old wrappers in various lots at 35@60c. Spanish Tobacco in fair demand with sales 500 bales Havana at 85c.@$1 05.

Cotton has advanced, closing at 15¼c for Middling Uplands. Flour and Grain are firmer, but closed very unsettled. Groceries show a slight but pretty general improvement.

Freights have been unsettled; rates for cotton and grain by the British steamers have been depressed by a disagreement respecting bills of lading. A break in the Erie Canal has also had some effect. To day shipments were large, and the close was firm at 6d for grain to Liverpool by steam, with Cotton at a farthing. Vessels to British outports are plenty at 6s direct, or 6s 3d to Cork for orders. Considerable shipments of Provisions to German ports have been made at 30s by sail, and Flour to London 2s 6d.

There has been a large movement in Tallow—some 1,500 hhds. here and in Philadelphia being taken for export at 8⅞@9c. There is some revival of export demand. Clover seed for the Continent at 9½@10c. Whiskey has declined to 91c.

Petroleum has been firm throughout the week, with a fair demand for Refined, which closes at 23½c on the spot, and Crude quiet at 13½c in bulk. Rosin has been quiet and closes rather week, owing to an advance in ocean freights. The stock of Spirits Turpentine is all in one or two hands, and the price has advanced, closing with 58c bid.

Metals have been without variation. Hops have been dull at former prices. Wool is in good demand and with stocks still small; prices remain firm.

Linseed oil has advanced; 60,000 gallons sold on Wednesday, and the closing price for crushers is 94c.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles from the port of New York since January 1, 1871, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show *total values*, including the value of all other articles besides those mentioned in the table.

ARTICLES.	Great Britain.	France.	Holland & Belg.	Germany.	Other N. Europe.	Spain.	Other S. Europe.	China & Japan.	Australia.	Br. N. A. Colonies.	Cuba.	Hayti.	Other W. Indies.	Mexico.	British Guiana.	Brazil.	Other S. American.	All oth. Ports.	Total this week.	Total since January 1, 1871.	Same time 1870.

COTTON.

FRIDAY, P. M., May 5, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening May 5. From the figures thus obtained it appears that the total receipts for the seven days have reached 51,433 bales against 56,685 bales last week, 63,042 bales the previous week, and 64,156 bales three weeks since, making the total receipts since the first of September, 1870, 3,623,373 bales against 2,637,253 bales for the same period of 1869-70, showing an increase since September 1 this year of 986,120 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	18,986	28,703	Florida bales.	42	133
Mobile	3,229	4,549	North Carolina	973	715
Charleston	2,997	4,071	Virginia	3,455	1,969
Savannah	6,440	6,969			
Texas	7,529	7,316	Total receipts	51,482	57,836
Tennessee, &c	7,748	3,461	Decrease this year	6,404	....

The exports for the week ending this evening reach a total of 71,087 bales, of which 42,273 were to Great Britain, 6,532 to France and 22,282 to rest of the Continent, while the stocks as made up this evening, are now 426,944 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Week ending May 5.	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans	16,610	17,863	34,503	18,788	156,928	142,860
Mobile	7,718	350	8,068	6,430	35,747	47,206
Charleston	....	746	746	....	19,214	11,605
Savannah	8,548	5,112	8,660	3,674	40,247	45,667
Texas	....	729	729	1,074	62,813	34,750
New York	14,989	3,964	18,303	5,934	82,000	51,000
Other ports	28	50	78	880	30,000	17,000
Total	[illegible]	28,814	71,087	36,275	426,944	353,068
Total since Sept. 1	[illegible]	[illegible]	2,687,962	1,790,806	....	....

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 34,812 bales, while the stocks to-night are 73,876 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to April 28, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1. 1870.	1869.	EXPORTED SINCE SEPT. 1 TO— Great Britain	France	Other Foreign	Total.	Northern Ports.	Stock.

The market the past week has developed considerable strength. The movement during the previous week to corner the "shorts," put prices up so that at the close Middling of all growths were quoted at 15½c. The next day, however (Saturday), the contracts maturing in April having been mainly covered, the market fell off, and on Monday had gone back to its natural position, with Middling Uplands at 14¼c. and Middling Texas at 15½c. Since then holders have shown more confidence, and the market has exhibited increased strength day by day, the result of the decided falling off in the receipts at our ports, together with a growing belief that less land has been put down to cotton this year in our Southern States, and in part, also, the result of a disposition on the part of those having cotton to receive under May contracts to insist upon a delivery rather than a settlement. Thursday, under these influences, and with the sales at Liverpool reported at 18,000 bales, and an improvement of ⅛d. in prices, there was an advance here to 15⅝c. for Middling Uplands and 10⅜c. for ordinary. To-day there has been a further advance of ⅛c., and at the advance holders have been very firm, sales have been fair for both export and consumption, restricted, however, by the limited offerings. For future delivery the inquiry has been good, and the changes in prices have, in the main, followed those for spot cotton. Low Middling closed to-night at 14½c. for May, 14½c. for June, 14½c. for July, 14¾c. for August, and 14¾c. for September. The total sales of this description for the week are 48,004 bales, including 604 free on board. For immediate delivery the total sales foot up this week 21,330 bales, including 12,245 for export, 4,598 for consumption, 1,962 for speculation, and 2,525 in transit. Of the above, 726 bales were to arrive. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	10¾@....	10¾@....	11 @....	11¾@....
Good Ordinary	13⅛@....	13¼@....	13⅝@....	13⅝@....
Low Middling	14⅜@....	14⅜@....	14⅝@....	14⅝@....
Middling	15⅜@....	15⅝@....	15⅞@....	15⅞@....
Good Middling	16⅛@....	16⅜@....	16⅝@....	16⅞@....

Below we give the total sales of cotton and price of *Uplands* at this market each day of the past week:

	Total sales.	Ordinary.	Good Ordinary.	Low Middling.	Middli g
Saturday	2,513	10¼@....	13⅜@....	14 @....	14⅜@...
Monday	2,509	10½@....	12⅝@....	14 @....	14⅜@....

				200	14 5-16	For December.	
						600	14¼

The sales during the week of free on board have reached 604 bales. The particulars of these sales are as below:

100 free on board at Savannah p. t.
204 free on board at Baltimore p. t.
500 free on board at Charleston p. t.

The following exchanges have been made during the week:

¾c. paid to exchange 800 May for 800 September.
¼c. paid to exchange 100 May for 100 August.
¼c. paid to exchange 200 May for 200 September.
1-16c. paid to exchange 300 May for 300 June.
5-16c. paid to exchange 200 May for 200 July.
800 May for 800 June, even terms.

WEATHER REPORTS BY TELEGRAPH.—Our telegrams to-night report unfavorable weather throughout the South during the past week. Cold rains appear to have prevailed over a large section of the cotton belt. The most serious complaints come from the West, our correspondents at Memphis stating that planting is two weeks late, and the weather very wet and cold; it has rained three days this week, and is raining to-day, with the thermometer at 52; while at Nashville it has rained two days, and the remaining days have been cloudy and very cool. There have been three rainy days also at Macon, Columbus, Montgomery, Selma, &c., r

Digitized by Google

It is feared that in some sections replanting may become necessary as the cold and wet have prevented the seed from coming up. At Galveston the weather has continuad favorable. The thermometer has averaged at Galveston 75; at Selma, 69; at Montgomery, 66; at Mobile, 74; at Macon, 73; at Columbus, 71; at Charleston, 74.

INDIA COTTON MOVEMENT.—What is likely to be the total India movement this year appears still to be a doubtful problem. There is certainly a manifest disposition to hold back the crop, present prices not being acceptable; and yet so much cotton has been raised, the arrivals and total afloat from all India ports is largely in excess of last year. For instance, the following will show the arrivals at London and Liverpool up to April 25, and the amount afloat for those ports about that date:

From	1871. Arrivals.	1871. Afloat.	1871. Total.	1870. Arrivals.	1870. Afloat.	1870. Total.
Bombay	170,130	106,240	277,405	112,399	85,281	201,100
Kurrachee		1,035			3,420	
Madras	32,535	16,090			15,197	
Ceylon and Tuticorin		11,438	60,063	33,058	12,876	61,131
Calcutta	38,668	39,430			9,972	
Rangoon		500	78,598	34,886	....	44,858
Tot. London & L'pool	241,333	174,733	416,066	180,343	126,746	307,089

We have here an increase in the supply for Liverpool and London of 108,977 bales, and if we were to add the figures for the continent (about 60,000 bales more than last year), we should find that the total excess this year of shipments from India up to April 25 was about 170,000 bales.

But notwithstanding this increase, the movement in 1869 was, up to this date, larger still by over 100,000 bales. In 1869, however, the total European supply from India was 640,000 bales in excess of 1870. If, therefore, we make a comparison with the totals for those years, and take the movement thus far as an indication of the result for this year, we should find that the supply from India during 1871 would reach about 400,000 bales in excess of 1870. Yet, of course, it is by no means certain that the proportionate increase thus far maintained will be continued.

EUROPEAN CONSUMPTION.—We have received the past week, from M. Ott-Trumpler, his interesting circular, giving the consumption of cotton in Europe since Oct. 1, 1870, up to April 1, 1871, and the probable consumption for the balance of the year. His statement for the half year is as follows:

	American.	Indian.	Other ports.	Total.
Stock 1st October in all Continental ports, excluding Russia and Spain	100,000	55,000	45,000	200,000
Direct importation to ditto	222,000	50,000	141,000	413,000
Export from England to ditto	152,000	263,000	29,000	444,000
Total	474,000	368,000	215,000	1,057,000
Stock 31st March	98,000	26,000	42,000	166,000
Consumption for the six months	376,000	342,000	173,000	891,000
Or per week, 34,269 bales.				
It will be seen that they amount per week to				bales. 34,269
Against, for quarter, 1st July to 30th September, 1870				21,692
Against nine months, 1st October to 30th June, 1870				34,489
Against three seasons—1866-1869				34,814

In remarking upon these figures, the circular states:

The smallness of deliveries during the months of July to September last is easily understood. Everybody was frightened, the demand for fabrics was stopped, and spinners did not buy cotton except when in the last extremity. They thus reduced their stock almost to nothing by the 1st October; whereas to-day they may have an average supply, but probably not more than an average. * * * The present appearance is that from now till the end of the season the consumption of Europe, except in case of an advance in price intervening, will require (without including direct imports into Russia and Spain) at least 92,000 bales per week, which, with a total American crop of 4,100,000 bales, and with an importation from all other producing countries not greatly exceeding that of 1869-70, would leave us at the end of September with a stock in the ports of Europe equal at the most to about 30 per cent of the annual consumption. This you will not find excessive, when compared with that of previous years.

GUNNY BAGS, BAGGING, &C.—The market for cloth and b gs continues as dull as ever. There has been nothing done since our last report. As this is the between seasons period, there is no actual consumptive demand. Besides there have been considerable lots of wheat sacks imported and although they are less durable than Gunnies they sell at such a low price there is an object in buying them. No improvement is anticipated immediately and prices are merely nominal. We quote cloth, 18@18½c. for India and 19@20c. for Domestic Rolls. Bags are quoted 15@15½c. Manila Hemp has been rather quiet, but the advance is maintained and the tendency is still upward. At the close 11c. is said to have been bid and refused. The sales are 2,000 bales here at 10½c., gold, and 200 bales in Boston per "White Swallow" at 10½c. In other kinds we only hear of 549 bales Sisal on private terms. Jute is dull, no business being reported. The price is firm at 6½c.; Jute Butts have ruled quiet owing to the firmness of holders, but at the close paper manufacturers have had to pay the prices demanded by holders and we note the sale of 500 bales on spot at 4½c., cash.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	Week ending May 5, 1871. Receipts.	Shipments	Stock.	Week ending May 5, 1870. Receipts.	Shipments.	Stock.
Augusta	928	2,415	17,430	1,273	1,293	16,024
Columbus	386	456	5,635	498	1,417	9,398
Macon	179	1,045	4,461	393	1,164	9,482
Montgomery	421	1,311	5,214	346	471	6,870
Selma	473	478	2,384	287	216	4,813
Memphis*	5,189	4,832	19,000	3,811	5,417	17,107
Nashville	1,241	2,022	4,498	1,342	806	6,215
	8,767	12,559	58,632	7,950	10,774	69,909

*A recount of stock at Memphis to-day has increased the stock 5,240 bales over the running count.

These totals show that the interior stocks have increased during the week 1,358 bales (being now 11,277 bales less than for the same period of last year), while the aggregate receipts are 817 bales more, and the shipments 1,785 bales more than for the corresponding period of 1870.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons:

	1871.	1870.
Stock in Liverpool.....bales.	994,000	540,000
Stock in London	85,395	40,545
Stock in Glasgow	450	300
Stock in Havre	30,200	78,800
Stock in Marseilles	2,400	12,500
Stock in Bremen	28,895	14,307
Stock rest of Continent	45,000	30,000
Afloat for Great Britain (American)	230,000	180,000
Afloat for France (American and Brazil)	31,168	73,065
Afloat for Bremen (American)	76,093	21,018
Total Indian Cotton afloat for Europe	275,223	178,113
Stock in United States ports	426,944	353,068
Stock in inland towns	58,032	69,909
Total	2,284,400	1,591,625

These figures indicate an *increase* in the cotton in sight to-night of 692,775 bales compared with the same date of 1870.

Below we give our usual table of exports from New York for the week:

Exports of Cotton (bales) from New York since Sept. 1, 1870

EXPORTED TO	WEEK ENDING April 8.	April 15.	April 22.	April 29.	Total to date.	Same time prev. year.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 86,267 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in THE CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night:

	Total bales.
NEW YORK—To Liverpool, per steamers Minnesota, 3,310....China, 1,098....Virginia, 2,012....Batavia, 923....Helvetia, 2,512....City of London, 800...per ship Princeton, 2,036	12,691
To Continent via Glasgow, per steamer Europa, 65	65
To Havre, per steamer Pereire, 493	493
To Antwerp, per bark Fresh Breeze, 48	48
NEW ORLEANS—To Liverpool, per ships Wm. M. Reed, 4,080....Virginia, 3,447...Lady Cartier, 2,349....Oswego, 2,804....Maid of Orleans, 2,729....Eastern Light, 3,870....Jamestown, 5,618....per bark Agincourt, 1,163....per brig Formica, 244	26,254
To Cork for orders; per bark Agair, 1,288	1,288
To Havre, per steamer Atlas, 2,509....per ships Armstrong, 2,610....Idaho, 3,786	8,905
To Bremen, per barks Deborah, 2,301...Memento, 1,382	3,683
To Amsterdam, per bark J. S. Winslow, 1,520	1,520
To Barcelona, per barks Jaruco, 1,293....Aquedita, 1,196....per brigs Eva, 580....Carolina, 100	3,169
To Venice, per brig Fruttajolo, 570	570
To Cadiz, per bark Concertina, 502	502
To Vera Cruz, per steamer Tobasco, 476....per brig Hope, 430 and 2½ half do	907
SAVANNAH—To Liverpool, per ships Fredericks, 813 Upland....Peter Maxwell, 3,856 Upland and 103 Sea Island....Theobold, 2,900 Upland and 66 Sea Island....per bark Jerome Jones, 1970 Upland	9,708
To Cronstadt, per ship Arracan, 3,300 Upland	3,300
To Barcelona, per brig Columbus, 375 Upland	375
TEXAS—To Liverpool, per ship Coldstream, 2,360....per barks Elgira, 1,112....C. E. Jayne, 2,283... Olive Mount, 1,648....Wanderer, 1,209... per brig M. L. Miller, 965	9,197

Digitized by Google

To Amsterdam, per schooner Wapella, 1,063	1,063
BALTIMORE—To Liverpool, per bark Haminzia, 971	971
To Bremen, per steamer Ohio, 353	353
BOSTON—To Liverpool, per steamer Tarifa, 905	905
Total	86,267

The particulars of these shipments, arranged in our usual form are as follows:

	Liverpool.	Cork.	Havre.	Bremen.	Cronstadt.	Amsterdam.	Barcelona	Venice.	Total.
New York	12,691	....	493	....	....	....	....	....	13,297

Total	60,126	1,288	9,398	4,036	3,200	2,583	3,544	570	86,267

Included in the above totals are from New York 65 bales to Continent via Glasgow and 48 bales to Antwerp; from New Orleans, 502 bales to Cadiz, and 907 bales to Vera Cruz.

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 111 and 111½, and the close was 111½. Foreign Exchange market is strong. The following were the last quotations: London bankers', long, 110@110¼; short, 110½@110¾, and Commercial, 109¼@109¾. Freights closed at ¼d. by steam and ¼d. by sail to Liverpool.

BY TELEGRAPH FROM LIVERPOOL.—LIVERPOOL, May 5, 4-30 P. M.—The market opened dull and closed quiet, with sales of the day footing up 12,000 bales, of which 3,000 bales were taken for export and speculation. The sales of the week have been 82,000 bales, of which 17,000 bales were taken for export and 11,000 bales on speculation. The stock in port is 994,000 bales, of which 607,000 bales are American. The stock of cotton at sea bound to this port is 400,000 bales, of which 230,000 bales are American.

	April 14.	April 21.	April 28.	May 5.
Total sales	51,000	47,000	81,000	82,000

BREADSTUFFS.

FRIDAY P. M., May 5, 1871.

The markets for flour and grain the past week have been wholly unsettled by a serious break in the Erie Canal, which occurred on Sunday night last, near Fairport, about four days' towing east of Buffalo, and nine days from New York. The break is estimated to require at least two weeks to repair but the work has been delayed by severe rains, and yesterday a "strike" occurred among the laborers employed upon it, so that it will be nearly the 1st of June before any supplies can be received except such as come to us from the Oswego branch of the Canal and by rail from Buffalo.

Flour has slightly improved. The receipts have been small, and stocks are light, but buyers do not operate beyond their immediate wants. The most considerable business has been about 6,000 bbls. old and low extras for London at $6 10@6 20. It is considered somewhat remarkable that while flour has declined 50c. per bbl. in the last month, wheat is little, if any, lower. At to day's market holders were disposed to ask an advance, but it could not be readily obtained, and with a severe rain storm prevailing there was not much done.

Wheat sold before the break at $1 48@1 50 for New Spring afloat, $1 45 to arrive by canal and $1 52 for Amber Winter; but since that event, favored by a decline of 2d. in ocean freights, and a recovery of last week's decline at Liverpool, prices are fully 8c. higher. Receipts have been liberal by rail, but they were sold previous to arrival, and had freight engaged for them. To day the first boatload of No. 2 Spring, through by canal from Oswego, sold to a city miller for $1 57½, and Amber Winter brought $1 60 but the tone of the market is very unsettled.

Corn advanced 5c. on the combined influence of the interruption of canal navigation, an advance abroad, and a decline in ocean freights, closing quiet at 80@81c. for Western mixed; other descriptions being nearly nominal. Rye is very unsettled. Barley has been closing out at $1 10@1 12 for prime Canada West. Two loads of Canada Peas sold to arrive at $1 16, free, equal to about 90c, gold in bond. Oats have been firm, but with only a moderate trade—prime Western sold to-day at 64c. in store.

The following are the closing quotations:

Flour—		Wheat, Spring, bush	$1 40@ 1 58
Superfine	$ bbl. $5 50@ 6 00	Red Winter	@
Extra State	6 10@ 6 31	Amber do	1 58@ 1 60
Extra Western, common	6 10@ 6 40	White	1 60@ 1 90
Extra and double extra Western & St. Louis	6 50@ 8 50	White California	1 70@ 1 80
Southern shipp'g extras	6 75@ 7 15	Corn, Western Mix'd	79@ 81
Southern, trade and family brands	7 50@ 9 00	Yellow, new	82@
Rye Flour, super & extra	5 00@ 6 10	White	80@ 85
Corn Meal, Western and Southern	3 70@ 4 80	Rye	1 00@ 1 18
		Oats	64@ 69
		Barley	85@ 1 14
		Malt	90@ 1 15
		Peas, Canada	1 05@ 1 30

The movement in breadstuffs at this market has been as follows:

GROCERIES.

FRIDAY EVENING, May 5, 1871.

With the single exception of Coffee the various goods covered by this review have retained the tone of firmness noted in our last, while in some cases the feeling has improved, and on Sugars some speculation was developed. The distribution to the interior has not altogether met the expectations of the Trade, but still the movement is in proportion to that of all other goods, and the prospects favor an increase rather than a falling off. The caution of buyers continues and as before few are taking invoices likely to exceed their early wants, but this very cause insures greater safety to the seller, and with comparatively small stocks accumulated and not many additions expected holders as a rule speak hopefully of the future.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black....	8,721 pkgs.	Laguayra ..	671 bags.	Sugar, Brazil.	350 bags.
Green.....	11,136 pkgs.	Other.....	4,749 bags.	Manila, &c..	9,837 bags.
Japan.....	2,990 pkgs.	Sugar, Cuba..	2,523 boxes.	M'las'es, Cuba	2,529 hhds.
Various....	6,771 pkgs.	Cuba	1,867 hhds.	Porto Rico.	1,220 hhds.
Coffee Rio....	4,812 bags.	Porto Rico	476 hhds.	Demerara..	33 hhds.
Java	300 mats.	Other.....	1,617 hhds.	Other.....	186 hhds.
Maracaibo..	2,112 bags.				

*Hhds. include bbls. and tcs. reduced

Imports this week at this port have included 6,610 bags of Ceylon Coffee, 16,753 do. of Maracaibo do., 2,126 do. of St. Domingo do., and 827 do. of sundry kinds. The receipts of sugar are 6,288 boxes, 6,534 hhds. and 1,100 bags. Of Molasses 2,043 hhds. have arrived. In Tea the arrivals embrace 143,344 lbs. of Black and 7,960 do. of Green.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at date.		Imports at leading ports since January 1.

TEA.

A very fair amount of stock has again changed hands, and the market retains a pretty steady feeling for desirable goods. Indeed, on the best lots there is, if anything, greater firmness and quite a number of holders have commenced withdrawing samples in anticipation of an early increase of values, as the amount taken during the present month have reduced the stock considerably, a great many of the sales made never having appeared in print. Greens still appear to be the favorites, and good chops are quite difficult to find, while with some odd competing parcels now out of the way, Oolongs are looked upon with confidence, and Japans are said to be no worse than simply dull. Jobbers are hardly distributing to the extent of their purchases, but feel justified in preparing for a better consumptive call. Sales of 10,800 pkgs Greens, 9,200 Oolongs, and 5,500 Japans.

The imports this week include 106,944 bbls of black, and 7,960 do of green, per "Maori," from Whampoa, and 36,400 bbls of black per "Competitor," from Hong Kong.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871.....	11,083,553	11,255,840	4,998,081	25,797,196
1870.....	10,143 275	9,038,934	4,240,360	24,412,847

The indirect importations, including receipts by Pacific Mail steamers via Aspinwall, have been 9,867 pkgs. since January 1, against 26,643 last year. The receipts of Tea overland by railroad have this week amounted to 2,655 pkgs.

COFFEE.

Except to note a continued dull tone and the disappearance of even the few favorable indications of last week, the market really presents no interesting features not already set forth in this column. Interior buyers seem as far from operating with freedom as at any time within the past five or six weeks, and with simply no outlet for their supplies, holders are obliged to make the best of the position and await quietly an increase of the demand whenever it may develop itself. Neither prices or assortments are objection able to jobbers and the trade generally, the whole trouble laying in the caution of small dealers and consumers who appear determined to take absolutely nothing for which they have no immediate use. Brazils have not varied in price here to any extent, as figures are already too low to admit of a margin for profit, and all the recent concessions resulted merely in temporary activity, and the stocks are comparatively small. A number of holders, however, are not unwilling to realize, and a liberal buyer could in all probability operate on easier terms than quoted figures represent. At the outports there has been a very good business, owing to the attraction of low prices and cheap freight charges to the interior, and this distribution has undoubtedly interfered to some extent with trade here. Java has remained comparatively steady, with a fair business from second hands, and reports prevail that a few invoices of Singapore have sold to arrive. West India styles have been in larger supply and under recent negotiation, but sellers on the whole were as anxious as buyers, and the tendency of prices rather toward a lower range. Sales of 4,966 bags Rio, 3,300 bags Maracaibo, 900 bags Laguayra, 400 bags Costa Rica, 123 bags Java, 784 bags Jamaica. At Hampton Roads, to go to Baltimore, 3,500 bags Rio, at Baltimore, 10,882 bags Rio, and at New Orleans, 9,500 bags Rio.

Imports this week have included 6,610 bags Ceylon coffee per "Syringa;" 168 do St. Domingo per "Issac Oliver;" 6,996 do Maracaibo per "Allemania" and "M. B. Nickerson," and 2,500 do Laguayra per "A. B. Patterson."

The stock of Rio May 4, and the imports since Jan. 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.
Stock.....	43,788	4,900	[illegible],994	8,998	9 000	2,500	55,[illegible]82
Same date 1870.....	21,801	....	11,427	4,000	3,000	....	40,228
Imports.....	226,010	14,805	19[illegible],68	101,[illegible]05	86 0:9	5,500	586,662
" in 1870.....	202,477	....	155,[illegible]6	70,827	17,302	3,045	448,987

Of other sorts the stock at New York, May 4, and the imports at the several ports since January 1, 1871, were as follows:

SUGAR.

The demand for raws from regular sources has been fair, grocers wanting a little stock nearly every day, and refiners, though taking only such quantities as they could use at once, finding their production going out with such rapidity as to necessitate increased purchases. This, with small stocks, was of itself an influence to hold the market steady, but the speculative feeling noted at the close of our last report becoming more decided, values were increased on desirable grades. We find a great many of the trade, however, who, while considering the position on raw sugars as strong, and not likely to suffer any decided reaction, have serious doubts as to a material improvement being established either by force of speculative combinations or from purely legitimate causes. All other groceries are low, it is claimed, and sugars must be kept in proportion to insure a steady consumption, while the caution which has so long characterized the movements of all buyers is likely to prevent free purchases beyond known wants. On the part of those who look for an advance they claim, as a basis of their opinion, the reduced crop of Cuba, and the buoyant tone of the markets on that island, and the probability of our interior buyers being compelled to handle supplies freely at an early day. The crevasse in the bank of the Mississippi and the injury to the domestic crop, together with indications of an immense fruit crop, have also been put forward as strengthening influences. Refined have continued in quick demand, and everything made was readily sold at full and advancing figures, with reports of a few export orders and a speculative feeling developed here, as well as on Raw Powdered, and choice white A have sold best for consumption. The transactions in Raws embrace 8,186 hhds. Cuba, 800 hhds. Porto Rico, 990 hhds. Demerara, 270 hhds. Martinique, 250 hhds. Barbadoes, 7,651 boxes Havana, 506 baskets Batavia, 350 bags Brazil, 9,837 bags Manila, and 937 hhds. Melado.

Imports at New York, and stock in first hands, May 4, were as follows:

MOLASSES.

The demand for foreign descriptions has continued, but business has been less active, and the market at times quite dull. This may in part be attributed to the advanced pretensions of holders consequent upon the stimulating advices from the point of production, but in the main to the absence of really desirable supplies, the activity recently noticed having taken off about all the best cargoes, and the arrivals since proving moderate. Grocers and Refiners both appear to have gained much confidence within the past few weeks, and show no great hesitation in securing stock ahead of their wants whenever anything suitable offers. No market value can be placed on the ordinary grades for the present, as they are entirely neglected, and current arrivals all go into store for want of an outlet. Domestic has been in fair demand for choice grades, and the stock of these is gradually working down at full prices, but common sorts are still plenty and quite irregular. Syrups are firmer and in very good demand, especially qualities ranging from 45c. up to 60c. per gallon. Sugar House Molasses is a little more active and values stiffening, closing at about 18c. in hhds. and 22c. in barrels. Sales during the week of 923 hhds. Cuba Muscovado, 855 hhds. Porto Rico, 75 hhds. English Island, and 680 bbls. New Orleans.

*Including tierces and barrels reduced to hhds.

SPICES.

There has been no unusual activity, but still there is more doing, and the general tone of the market is better. For some time past jobbers have been distributing in small lots to a very fair extent, and now commence to find assortments broken up somewhat, and desire to replace, with one or two indications of a slight speculative feeling. The amount of goods in first hands is not large, and is under very fair control, and the previous slack tone being merely the result of the extreme dulness rather than of any loss of confidence on the part of holders; a very slight influence serves to stimulate the position at once. An attempt was made to buy up the supply of Nutmegs and Mace, but holders, with everything already pretty well concentrated, refused to entertain bids, and not much was accomplished. Sales have been made of about 5,000 mats Cassia, 2,000 bags Pimento, 100 cases Mace, 200 do Nutmegs, 500 bales Cloves, and 1,000 bags Pepper.

FRUITS, &c.

The market still continues very quiet for layer Raisins, and, with continued free arrivals, prices have further declined. Sales in a jobbing way at $2 55, and full lots can be had at $2 50. Even at the decline the trade do not seem willing to buy, except in a few instances, more than they need to supply their almost daily wants. Prunes, at the concession, have sold fairly and are rather more steady, but still holders are free sellers, and a fair business is going on, largely in French. Currants are still meeting with a moderate demand, and owing to their comparative cheapness, sell to a considerable extent for export. Sardines are more inquired for, but buyers want to have lower prices named, which as yet sellers have been unwilling to do; very few sales have been made in consequence. Nuts have sold freely, but generally at easier prices. At the close, Brazils are held at 7¼c; but less would undoubtedly buy. Firecrackers have arrived freely, but with a steady fair demand, firm prices rule for whole boxes; halves and quarters are dull.

The foreign green market has been fairly active for Mediterranean fruit at advanced prices. Sales of best Lemons at $5@5 50 per box, and Oranges at $4@4 50, all repacked. The supply of West India kinds is full, and there have been free sales at easy prices. Sales of Baracoa Bananas at $1 50@2 50 per bunch; $2 50@3 for Aspinwall do. Baracoa Cocoanuts $35 per thousand. Pineapples $15@16 per hundred.

Domestic Dried are inactive. Early this week there was considerable done in State apples at 5@6c. for quarters; the sales comprised some 800 bbls., about all there were to be had at these prices, and since then the market has been more steady. The poorer qualities of Southern are still pretty dull at no improvement in prices. Prime pared peaches are in fair demand, but grades little off in quality are very slow of sale. Unpeeled are dull and irregular; holders ask former prices, but to sell must accept a decline. Blackberries sell only in a small way at 13½c., holders of prime have refused to accept less for a round ot. Plums and Raspberries are slow and easy in price. Peanuts are in better demand, but holders are unable to obtain the high price at which they were held some time since. Pecans are quiet, but with a small stock rule steady in value.

Domestic Green are firmer for Apples selling from ice-house at $6 per bbl for Russetts. Cranberries are dull and nominal. Strawberries are increasing in supply, and sell at 20@30c for Norfolk.

ADVICES FROM PRODUCING MARKETS.

Rio Coffee.—Messrs. Wright & Co.'s telegram, dated Rio de Janeiro, April 17, 1871, says:

Sales of Coffee for United States since 6th inst.	85,000 bags.
Shipments " " "	61,000 "
Loading "	9,000 "
Stock " at date	150,000 "
Price of Coffee	6$050
Exchange, 25½d.	

Manila Sugar.—From the Manila market dates are to the 1st March, and for the fortnight previous there had been a good market contracts, amounting to 32,000 piculs at $5 25@$5 for super. current, the advanced price in most cases being obtained. Of extra 3,900 piculs had been sold at $5 50 per picul. In Taal sugar but a very limited quantity had come forward, so that the market for this description had hardly opened.

The following shows the quantity of Sugar afloat for the United States at last advices, and which has not yet arrived:

Ship.	For.	Piculs (139 lbs.)
Dec. 31..Aberdeen.....	" "	19,000

Feb. 23..Archer.....Boston....		7,500
Feb. 12..S. D. Carleton..	" "	14,400
Total piculs (of 139 lbs.).....		89,157

Java Coffee and Sugar.—From Messrs. Dummler & Co.'s market report, bearing date March 9, we learn the condition of the Batavia markets:

COFFEE—The old crop was entirely disposed of, the sales last quoted were ƒ34 for small parcels. The new crop has not been dealt in, planters refusing the offers made. The market is very firm, and ƒ32 50 for ordinary Java has been refused. The Padang sale, it is thought, will comprise about 40,000 piculs.

SUGAR—During the past month there has been an excited market; transactions have taken place at ƒ16@ƒ16 25.

At date the market was more quiet; the latest contract was for 10,000 piculs; low numbers only for immediate delivery at ƒ17 50 for No. 14. It was estimated that three-quarters of the growing crop had been contracted for:

The following shows quantity afloat and not yet arrived.

THE DRY GOODS TRADE.

FRIDAY, P. M., May 5, 1871.

There has been no animation in the trade during the past week and the market begins to appear as deserted as is usual during the period between seasons. There have been a few buyers in the city from the interior making their first purchases, or laying in small assortments to replenish broken stocks. Orders are coming in slowly, as stocks have not been sufficiently reduced as yet to necessitate general replenishing, and the sorting up trade is not likely to be very active for some time yet. In the city there has been a moderate retail trade doing, but the annual moving day has interrupted the demand, and the sales have scarcely been so heavy as during the previous week. All classes of dealers report the trade as being very satisfactory thus far, the volume having been large while the market has been remarkably free from anything calculated to depress business, or result in the unsettling of values which is always attended with considerable loss. Only two failures have occurred lately, those of Messrs. S. Lederer & Co., and Mr. J. B. Willian, a calico printer, near Philadelphia. Collections are coming in with fair freedom from all sections.

DOMESTIC COTTON GOODS.—There has been a moderate trade in progress in brown and bleached cottons, both with agents and jobbers. These goods are held in unusually small supply for this season of the year, and prices are fully sustained in all makes. Colored cottons sell in small lots to replenish assortments, but the trade is not remarkably spirited. The demand for prints continues fairly active, and all tasteful styles of light work are placed freely at full prices. The market for printing cloths is firm, with a continued upward tendency in all grades. Speculators have evidently succeeded in establishing a "corner" in these goods again, and sales have been made to printers, as far ahead as January next, at 7c., while October deliveries are selling at 7⅛@7¼c. At these prices there can, of course, be little probability of a decline in prints for the Fall trade; but, on the contrary, manufacturers claim that they must obtain an advance of ¼@1c. per yard in order to clear all expenses.

DOMESTIC WOOLEN GOODS.—There is a continued inquiry for desirable styles of light weight cassimeres, and jobbers have reduced their stocks considerably, while agents are entirely sold out. There is a good demand for heavy weights from early buyers and the sales thus far have been considerably larger than is usual at this season of the year. The high prices current on wool, and the prospects of their being maintained late in the season, has a stimulating effect upon the demand for all classes of woolens, and buyers are taking stocks freely in anticipation of higher prices later in the season. Heavy faced goods are in fair request and sales are made of liberal amounts at full prices. An advance has been established on many woolen fabrics, which is likely to be general before the opening of the regular fall trade. Flannels are selling fairly, and are bringing higher prices than were asked this season. The demand at present is chiefly for the lower grades, but little inquiry being reported for the finer qualities.

FOREIGN GOODS.—The foreign goods trade has been dull throughout the week, the only sales being of small assorted lots of goods especially adapted to the present wants of consumers All desirable fabrics are freely taken at full prices, while the least popular goods are slow of sale even at a material reduction from the opening prices. Importers are putting more goods into the auction houses but the active demand is over for the season, and there is no demand for goods other than such as are required to supply the immediate wants of retailers here and in the interior. No important changes have occurred in values. Desirable goods bring full prices, while on other styles the usual concessions are made.

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of leading Jobbers:

BROWN SHEETINGS AND SHIRTINGS are in fair request at full prices, with a good degree of firmness in all grades: Amoskeag A 36 12, do B 36 11¼ Atlantic A 36 12½, do D 36 10½, do H, 36 12, Appleton A 36 12½, Augusta 36 11, do 30 10, Bedford R 30 8 Boott O 34 9½, Commonwealth O 27 8, Grafton A 27 7½, Great Falls M 36 11 do S 33 9½, Indian Head 36 12½, do 30 10, Indian Orchard, A 40 13, do O 36 10½, Laconia O 39, 12 do B 27 11, Lawrence A 36 11, Lyman O 36 10½, do E 33 12, Medford 36 11, Nashua fine O 33 11½, do R 36 13, do E 40 14½ Newmarket A 36 10, Pacific extra 36 12, do L 36 11, Pepperell 7-4 22½, do 8-4 25, do 9-4 27½, do 10-4 32½, do 11-4, 37½, Pepperell E fine 39 12½, do R 36 11½, Pocasset F 30 8, Saranac fine O 33 11½, do R 36 13, Stark A 36 12, Swift, River 36 8, Tiger 27 8.

SPENCERIAN

STEEL PENS,

Manufactured by the Original Inventor of Steel Pens.

THE CELEBRATED durability and perfection of action of these Pens are owing to a peculiar process of Carbonizing, and to the great care taken in their manufacture by the most skilled and experienced workmen in Europe.

They are a nearer approximation to the real **SWAN QUILL** than anything hitherto invented.

For sale by Dealers generally.

☞ **SAMPLE CARD**, containing all the **14 Numbers**, artistically arranged and securely inclosed, sent by mail on receipt of **25 Cents.**

A summary of the daily transactions at the SUB-TREASURY, the GOLD EXCHANGE BANK, and the CLEARING-HOUSE.

A full table of quotations of STERLING and CONTINENTAL EXCHANGE.

THE CHANGES IN THE REDEEMING AGENTS OF THE NATIONAL BANKS, AND THE OFFICIAL PERIODICAL STATEMENTS OF THE NATIONAL BANKS IN EACH STATE, as furnished by the Comptroller of the Currency—published by no other daily paper.

2d. The most accurate and the ONLY DAILY report of the DRY GOODS MARKET, including a full PRICE CURRENT of staple and domestic fabrics, which is corrected daily.

3d. A carefully prepared report on the PRODUCE MARKETS, much fuller in its details than that of any other daily journal, embracing a full Price Current semi-weekly.

4th. A daily statement of the RECEIPTS OF PRODUCE, the IMPORTS FROM FOREIGN PORTS, and the MANIFESTS OF VESSELS CLEARED AT THE CUSTOM HOUSE.

5th. Its CITY COMMERCIAL and FINANCIAL NEWS is fuller than that of any other journal.

6th. In its EDITORIAL DEPARTMENT the BULLETIN gives a fuller discussion of current commercial and financial topics than any other journal in the United States; and in this especially its influence ranks second to that of no other paper in the country.

7th. Its PRICE IS ONLY ABOUT ONE-HALF that of other leading commercial papers, and yet its information is fuller and in all respects as valuable.

N. Y. DAILY BULLETIN ASSOCIATION,
79 & 81 William St., New York,
P. O. BOX 3,906.

PRICE $8 00 PER ANNUM

THE Commercial AND Financial Chronicle

HUNT'S MERCHANTS' MAGAZINE,

A Weekly Newspaper,

REPRESENTING THE INDUSTRIAL AND COMMERCIAL INTERESTS OF THE UNITED STATES.

VOL. 12. NEW YORK, MAY 13, 1871. NO. 307.

Advertisements.

Advertisements will be inserted at the following prices per line for each insertion:

If ordered less than 4 times			20 cents per line.
"	5 times or more		16 "
"	9 "		14 "
"	13 "		12 "
"	26 "		10 "
"	52 "		8 "

If the advertisement occupies one column or upwards, a discount of 15 per cent on these rates will be allowed.

Space is measured in agate type, 14 lines to the inch.

Advertisements will have a favorable place when first put in, but no promise of continuous insertion in the best place can be given, as all advertisers must have equal opportunities.

MR. BOUTWELL AND THE DOUBLE EAGLES.

Much dissatisfaction is expressed by our merchants at Mr. Boutwell's new arrangements this week relative to the gold disbursements of the Government. He has given orders to the Assistant Treasurer at this port that no double-eagles are to be paid out to the creditors of the Government, but that all gold disbursements of every kind are to be made solely in small coin. The object Mr. Boutwell has in view is said to be to discourage the export movement of gold, which is now so lively as to carry off some three millions a week. The complaints of this unpopular and almost unprecedented arrangement are founded in its injustice, and in the injury it inflicts on the depositors who have placed their gold in the Treasury in full faith that when they needed it for exportation or for any other purpose they could obtain it in large or small coin, just as they might choose. Now they say that although they deposited double-eagles in the Treasury, they are required to receive in return small coin, contrary to the implicit contract on which the deposit was made.

They further urge that this innovation inflicts losses upon them, for the double eagles now command a premium of about 5-16ths per cent in the market. Some persons have supposed that this preference indicates that the smaller coins are at a discount, and argue from it some unknown disturbance of our anomalous currency system. It is easy to see, however, that this is a mistake and that no such trouble can possibly occur. The small coins by abrasion have lost a fractional part of their true numismatic weight. They are, therefore, not available for exportation, except at their real value as bullion. This value is relatively less than that of double eagles which, from not having passed so frequently from hand to hand, have not suffered from abrasion but retain their full weight of gold. The scarcity of the large pieces shows the effect of the heavy export movement to Europe and the Orient which has taken place since the beginning of March to offset the heavy adverse balance of trade which has been accumulating against us. In all probability the export movement will continue till the end of June and forty millions of foreign indebtedness are expected to be liquidated in this way during the ensuing six weeks. Of this sum about one half will probably be made up in bonds of the government and of various corporations, and about twenty millions more of gold will have to be sent abroad. It is said that the prospect of so large an export has influenced Mr. Boutwell to watch with anxiety his rapidly diminishing hoard of double-eagles, and to check the drain he has resorted to the plan which is so loudly complained of.

On reflection Mr. Boutwell will see that it is due to himself and to the Treasury of which he is the financia chief, that nothing be done which will impair the credit or good faith of the government. Except as a temporary precaution and to subserve some permanent public object, the people will not submit to any injury as this, and they ought not to be asked to submit to it. By paying his gold notes in coin of light weight he really pays the gold depositor less than the face of his note; and although for domestic circulation, the light weight coin be as valuable as that of full weight; still, when as at present, the demand for coin is almost exclusively for exportation the depositors lose on every million $2,500, or more. To this Mr. Boutwell responds that the gold deposits in question are held for the convenience of the depositor without charge, and that it is not fair that the government should lose by the transaction, especially as many of the gold notes were not issued on a deposit of double-eagles, but of the small light weight coins. It is impossible to discriminate which of the notes were so issued, and the Treasury has always exercised the privilege of paying out small coins when the demand for double eagles outran the demand for the smaller pieces.

To the question, What amount of double-eagles are actually in the Treasury, and whether there is an actual scarcity of these large coins? no answer has yet been given. But a Congressional inquiry will probably elicit the required information hereafter, though it will then be too late for such facts to be of much use except as a guide for the future and

Digitized by Google

as part of the financial history of the past. In the absence of official explanation, we are bound to give Mr. Boutwell credit for some better arguments for his new policy than any which have yet been put forth from semi-official sources. Until he himself explains those reasons, we incline to think that the arrangement is only temporary. As a partial compromise, and to cut short some of the mischiefs which are daily inflicting unjust losses on our merchants, it has been proposed to make the Treasury gold payments partly in gold eagles if desired, and partly in the small coins, giving as large a proportion of double eagles as possible to the holders of the gold notes. As a temporary expedient this plan has advantages. But strictly speaking, the Government has no right to pay out light coins to its creditors. It is one of the functions of the Treasury to coin money, and to keep the coinage of the country at the full value prescribed by law. As soon as any coins paid into the Treasury are found to be light weight, they are to be recoined. It is one of the results of our paper money system that the proper attention has not been given to our coinage. Hence have originated the present difficulties, which demand Mr. Boutwell's prompt attention, and will probably be satisfactorily adjusted during the coming week.

Some unnecessary stress has been laid on the fact that the Government derives no advantage from the holding of these gold deposits, and that as the depositor is the person obliged he ought not to complain of the inconvenience which is now under discussion. If true, this argument is valid against the policy of passing such a law as that of the 3d of March, 1863, which authorizes the gold notes, but it is of no force to impair a contract made under protection of the law or to release the Treasury from its obligations to pay on demand in coined dollars of full weight any note it may issue. Surely our currency is sufficiently anamolous already. Our laws authorize four different kinds of money, each of which is a legal tender; first, gold coin which is the standard currency of the country; secondly, silver coin which is worth 4 or 5 per cent. less than gold; thirdly, greenbacks which are worth less still; and lastly, national bank notes which are often at a discount below greenbacks. The confusion hence arising is surely enough, as established by law, without any gratuitous embarassment of the trouble by Mr. Boutwell's double eagle arrangement, which if it were not opposed by the law would perplex us with a fifth sort of currency, and divide our gold coinage into two parts, one of which would be at a permanent variable discount, while both would be legal tenders.

THE NEW TREATY AND OUR FOREIGN CREDITORS.

The past week will be memorable in the history of international law. On the day the Joint High Commission completed our new treaty with England, extending and establishing the principle of Arbitration, the long pending negotiations between France and Prussia were also closed with a treaty which exacts heavier damages than have ever been demanded in previous modern wars, and gives substantial guarantees to secure the peace of Europe for a long term of years. Both these treaties are anxiously discussed in Wall street, and both are likely to have financial results which are too important to be disregarded.

The first interest attaches, of course, to our own treaty, which marks a new epoch in diplomacy, investing as it does the principle of arbitration with a wider scope and a more sovereign power than have ever been conferred upon it by any convention or treaty or compact heretofore recorded in the diplomacy of ancient or modern nations. The aspect of the treaty of Washington which is chiefly discussed, arises from the fact that it settles everything but adjudicates nothing. It creates a new international mechanism by which everything can be finally settled and adjudicated. It enthrones a beneficent tribunal between this Continent and the peoples of Europe, by the future action and interposition of which all disputes between us and them can be amicably adjusted, so that almost all danger of war, from disputes past present or to come, may be avoided without sacrificing either the honor or the true interests of this country or of sister nations. This being granted, the argument is that the ratification of the treaty at Washington and London, with the recommendation that its beneficent provisions be incorporated in the great body of international law throughout Europe, will be followed by an accession of greater activity in all departments of our domestic and foreign trade. Especially will an immediate impulse be given to the investment of English capital in our best and safest securities. From various causes the English money market has not been so accessible to these securities as the money markets of the Continent. It was not until the Franco-Prussian war caused so vast an amount of idle capital to concentrate itself in London, and closed at the same time many of the old channels for European investment, that the large masses of English capital were driven here, which have conduced so much to our financial tranquility and ease during the last year. It must be remembered, however, as a notable drawback to the benefits thus accruing to us, and a serious danger in connection with this English capital, that it can at any moment be withdrawn without giving us time to supply its place in our financial mechanism. A considerable part of these British funds are earning but a low rate of interest here, because they are lending on call, or assume otherwise such forms as to be "available" or liable to be called home at short notice. With the new guaranties and the improved state of international security which the treaty of Washington is expected to inaugurate, new confidence will, it is supposed, develop itself, which will make more available to us the rich accumulations of the London money market, and will thus tend to give more reliable constancy and permanence to the supply of floating capital from that source which will seek investment in our loan market.

A second and important result which is expected is the improved prospect of Mr. Boutwell's new loan from the demand which cannot fail to spring up among English investors for our government securities. With the Alabama claims satisfied, the boundary question closed, the fishing difficulties adjusted, the navigation of the St. Lawrence conceded, there will remain no threatening spectre of discord to prevent a fair investment of capital here in more remunerative and more permanent forms than the mere lending of it at 3 or 4 per cent on call. Or if any such international difficulties should arise, the great pacificator—arbitration—will be ready with the sovereign power and with the prestige of former success to negotiate, and find a way to keep the peace. The potency of such a guarantee it is impossible to over estimate. In presence of doubts and apprehensions capital is proverbally timid—and British capital especially so. But in proportion as the causes of international trouble are removed, the impediments will disappear which make our Five-Twenties so much less in favor in England than their relative safety and remunerative value have justified. In Amsterdam, Frankfort and other Continental money marts, our securities are more popular because their true value is known by the people as well as in the financial circles. Let the frugal multitudes of English investors once become equally well instructed, and hundreds of millions of dollars wait to invest themselves in securities which pay double profits as compared with British consols. Let Mr. Boutwell get his new bonds ready for delivery promptly,

Digitized by Google

that he may not lose the first impulse of the rising tide of feeling which will be evoked by the ratification of the new treaty. In England, as elsewhere, the tardy movements of the bonds are largely ascribed to the fact that not a single bond as yet is ready for delivery. Still the aggregate reaches 64 millions, and five-twenties are fully up to par in gold. Hence it is anticipated by some of our more sanguine bankers that when the new movement comes, which is inevitable, and has been kept in check so long, it will sweep off the whole of the 36 millions which remain to be subscribed, with a rapidity like that which rendered memorable the last days of the old subscriptions for seven-thirties, when the excitement was so great that 5 millions were subscribed in one day by a single Wall street banking firm.

Without approving fully these anticipations, we concede that the prospects of the new loan will be greatly improved by the ratification of the treaty of Washington. It is equally obvious that the field will be enlarged for the sale abroad of our best railroad bonds. Indeed, the demand for some of these bonds which are best known and stand in the highest credit, has been gradually increasing ever since the appointment of the Joint High Commission.

There is, however, an influential class of our moneyed men who deny that the European demand for government securities is likely to spring up so rapidly as is supposed. In illustration of their argument, they point to the impoverished condition of France. A prodigious amount of capital will be wanted to repair the ravages of war and to fill up the great void made by the sword in the productive powers of the French people; Germany also will for a year or two absorb for similar reasons such vast sums of money that there will not be in the depleted currents of loanable capital any considerable European surplus available for investment here. Rather it is argued the German holders of five-twenties will sell them and buy railroad bonds and securities which pay better, or will invest their money in some of those promising business enterprises which returning peace will develop so rapidly on all sides. Hence there may be a withdrawal of some of the European capital, of which we have had the temporary use in consequence of the war. Since Wednesday last this opinion has been brought into prominence by the signature of the Franco-German treaty. As the indemnity has been reduced to 900 millions of dollars, and as about one-half of this sum has been subscribed by Rothschild, by Erlanger, and by Hahn, while the railroads of Alsace and Lorraine have been purchased by Germany at an abatement of 65 millions of dollars, the success of the French loan is assured, and there will for a brief season be a sharp competition in the English market between our new Fives and the French Indemnity loan. How far Mr. Boutwell's operations will be impeded thereby cannot be foreseen till the terms of the French loan are more fully known. In any case, however, it must be admitted that the negotiation of the treaty of Washington just at this moment multiplies greatly the advantages and facilities we can command in the British money market, and is equally gratifying in a financial and a philanthropic point of view.

A MEMORABLE CONTEST ENDED.

In the first edition of "Maud," Mr. Tennyson permitted his hero to rejoice that "The long, long canker of peace" was over and the Crimean war begun. But the sentiment was so severely criticised that he altered the line, and ever since it has read, "For the peace, that I deemed no peace, is over and done." Readers in general accept the passage now as suggestive and probably just; for every one must admit that a peace may be so completely destitute of the friendship, the security and the progress which makes peace desirable; may be so embittered by contention, hatred and all evil passions, or by national dishonor, that men of sincere philanthrophy will echo the poets cry:

"Better war, by land and by sea—
War with a thousand battles, and shaking a
Hundred thrones!"

The peace which has been maintained for the last eight years between Great Britain and the United States, if not quite of this worthless character, has seemed at times to be little better; and the immense differences of opinion which separated statesmen on both sides, equally with the persistent antagonisms of feeling which divided the nations one from the other, led many patriotic men to grow weary of all efforts at reconciliation, and to say that since a trial of the issues at stake by force is inevitable, it had better come without delay.

It was under such circumstances as these that the Joint High Commission of the two Governments, which has just concluded its labors, met at Washington. The purpose of its constitution was to frame a plan upon which the disputes between each country and the Government and people of the other might be amicably settled. A great number of persons in both nations regarded the attempt as hopeless, from the fact that the real disputes pending were not those of pecuniary claims for damages, or for fishing rights, or demands for certain fixed boundaries, all of which may reasonably be made subjects of arbitration, but are chiefly questions involving deep feeling, and, as Americans believe, involving principles of justice and honor. There is a deep sense in the minds of our people that Great Britain seized the opportunity of our distress and national peril to do us an injury which was meant to be fatal; that her Government and ruling classes rejoiced in what they supposed to be the ruin of this country, and strove covertly to hasten it; and that thus the nation of all others in the world to which we looked most confidently for sympathy and aid cruelly betrayed us. It is the friendship of England in which we trusted, and which we lost just when we needed it, that the American people feel the want of; and yet, after one such disappointment, they are very slow indeed to believe in its restoration. The task set for the High Commission, then, was to find such a solution of the pending issues between the two nations as should remove the sense of wrong from the American mind, or, at least, prepare the way for its removal, and for the restoration of such friendly relations between them as seemed before our war to be rapidly making them one people. It is idle to argue that statesmanship deals only with material interests and lets feelings take their course; these feelings, when deeply rooted in a nation, become facts of the most definite and momentous character. For generations hereditary hatred controlled the foreign policy of Jews and Philistines, of Athens and Sparta, of France and England; and to-day similar unreasoning passions, aroused between the French and Prussians, threaten to become one of the most dangerous elements with which the statesmanship of Western Europe has to deal. So it is in the questions before the High Commission. It mattered not what solution of them was obtained, had it been the concession of every demand or wish ever expressed by our Government or by our injured shippers and fishermen, yet if it did not come in such a form as really to contribute to the good feeling of the people in each country towards the other, it would be utterly worthless.

How was it possible for the Commissioners to meet this great difficulty; and to satisfy the American people that Great Britain means to be just towards us, and that she has a right to the respect and cordial good will which she seemed

Digitized by Google

to us to forfeit eight years ago? There was but one course by which this could be effected; and that was for the British to lay aside all indirection, all technicality, all narrow adhesion to form and precedent, and meet the United States fairly on the broad basis of equity between independent powers. England must abandon such pitiful defences against our complaints as she has permitted to run through her diplomatic correspondence for so long; pleas that her municipal law was in fault, but that we have nothing to do with her municipal law; or that building and selling ships of war, and then selling armaments for them, is not giving aid to a belligerent, unless the ship and her armament are united when sold; or that a prohibition to fit out and to harbor naval expeditions against a friendly power, while it ought to be a part of international law, is not yet formally made so—as if international law were anything but the opinion of the civilized nations as to what ought to be; and many more arguments of the kind. She must abandon the jealous reserve with which she has hitherto insisted that important parts of the case on which our claims rest shall be withheld from arbitration; and must agree not to prejudge the case herself, by insisting which of the facts shall and which shall not be made known to the arbitrating tribunal. She must show, by the manner in which the decision is brought about, that she esteems peace and friendship with this country worth even the sacrifice of a little wilful pride, and that she is willing to join us in securing peace and harmony, at the risk of being required, should impartial justice so determine, to make concessions as well as to receive them. There has been no period at which the American people would not have welcomed the friendship of Great Britain with delight, if they could have believed it attainable; but there has been a long period in which they have believed that no such friendship could be theirs, because the British people were so blind and obstinate, to use the plainest language, in their misunderstanding of ours. But that time has passed away. Every day brings to each people a better understanding of the other; and we are now far more ready to accept the strong evidence given by the Commission of the chance for renewing the old friendship of these nations than for many a year. For, in its proceedings, the British Government has done exactly what was necessary, as was said above, to satisfy us of its own sincerity and good wishes towards us.

It is not necessary to review at length the detailed provisions of the proposed Treaty of Washington; as soon as the outlines of it were made public, minute discussions of every feature were given in the daily press, with a vast amount of documentary evidence bearing upon the wisdom of each clause, and now that the treaty has been published in full, the whole nation is engaged in its study. It is enough to indicate in general the decision it has devised for each leading issue. There are four principle causes of dispute between the two nations to which it refers:

1. The claims of the United States for compensation for injuries done to our shipping during the war, by Southern cruisers built, manned or equipped in England. This is the most important question of all, because it concerns the claims for the very wrong out of which the alienation of feeling between the nations has mainly grown. It is by the proposed settlement of these claims that the treaty will be chiefly or solely judged by most citizens of the United States.

Now on this point Great Britain has substantially conceded all that has ever been desired by the people of the United States. There is, in the first place, a distinct admission of a wrong done to this country by the British nation or government, in diplomatic language indeed, but still sufficiently strong not to be misunderstood or forgotten. It is of the same nature and effect, in international affairs, as a civil apology, coupled with a disavowal of any intention to injure, in the private relations of gentlemen. Further, Great Britain accepts as a principle of international law all that we have claimed, as to the duty of a neutral not only to forbid but actually to prevent hostile expeditions from her ports; and agrees that she shall be responsible for every violation of this principle during our civil war as fully as if it had occurred after the distinct formulation of the principle by treaty. And, finally, all questions of injury and of damages under this head are to be referred to an international tribunal of the very highest dignity and character—a commission composed of the representatives of five independent nations, including, besides, the two directly interested in the awards, Switzerland, Italy and Brazil. These provisions secure entire justice to this country and its citizens in the settlement of the Alabama and kindred claims; they concede to us every principle on which we have hitherto insisted; and it is safe to say that they will be satisfactory to every American, unless he be so extreme in his demands that he cannot be contented without the actual humiliation of our mother country—an event almost as undesirable for us as for her.

2. The claims of British subjects for the loss of property seized or destroyed by our government during the war are referred to a mixed commission of the two governments with a suitable umpire. There has been a vast deal more discussion upon this branch of the treaty than it deserves. There is no objection in any quarter to the tribunal, which will doubtless decide justly; and this is all we want. Whatever claims of this character are just ought to be paid without any hesitation.

3. The fisheries question has been settled in a peculiarly wise way, which, however, seems to be quite original with the Commission itself; we have not seen it suggested by any of the voluminous writers on the subject in the daily papers. It is simply by abolishing a great part of the restrictions on both sides, the forced observance or the occasional violation of which, by either nation, has hitherto been the source of endless disputes. Larger privileges are granted, both to our fishermen and to those of Canada; and a Commission is to determine how much, if anything, the United States shall pay for the greater concessions made to them than they have granted. On this point, again, this country may seem to have gained a great advantage; but since, if so, we shall pay for it, Canada will lose nothing in the end. Both countries will be immensely the gainers, however, not only by renewing what has long been a cause of dissension, but still more by an opportunity to test, in one important trade, the benefits of cordial reciprocity.

4. The San Juan Island question is also to be referred to arbitration; but instead of a commission, the Emperor of Germany is to decide it. As it is simply a question of the interpretation of the treaty of 1846, determining our Northwestern boundary, and depends solely on the inquiry which of two channels, that east of the island or that west of it, is the main channel along the middle of which the boundary line is to run, it is not believed that there will be much difficulty or delay in the decision; and as it is susceptible of a definite and certain answer, no one doubts that such an answer will be rendered by the sovereign to whom it is referred, and cheerfully accepted by all parties concerned.

Thus every question at issue between these two nations has been put in the way of an easy and peaceful settlement and this has been done as quietly and rapidly as if a number of years of constant and irritating debate had not been spent upon them. Surely there must have been some great change, either in the aspect of the disputes themselves or in

Digitized by Google

the temper of the disputants to make such an arrangement possible. All who read the treaty, in the light of the diplomatic correspondence which preceded it, will observe that there has been no previous period in the negotiations at which such a settlement would have been seriously entertained, and that almost altogether because of the positive refusal of Great Britain to consider some points in it at all. Even so lately as 1869, when the Clarendon-Johnson treaty was rejected, the British press was nearly or quite unanimous in insisting that in any future negotiations England must insist on excluding entirely from the settlement any considerations of disposition or *animus* on the part of her Government, as shown by the proclamation of neutrality or by other official acts or neglect of duty; and that she must refuse to admit, as applicable to her conduct during our war, any rules of public law which had not received her distinct sanction before that time. But under the present treaty there is no reservation whatever as to the case which the United States may present before the tribunal of arbitration. Provision is expressly made for adjudging a sum in gross to be paid by Great Britain to the United States in satisfaction of national damages, if the tribunal should deem it just, in spite of the persistent assurance of the British heretofore that nothing but the actual injuries done to private claimants would ever be regarded by them; and the rules of international law on which our claims are founded, and which Great Britain has hitherto regarded as desirable in themselves but not established, and therefore not applicable to the past, are expressly made applicable to the case before the tribunal. Doubtless the British Commissioners know their own people and act under instructions from their own Government. It therefore may be assumed as certain that public opinion in England has undergone a remarkable change in reference to this subject, and that the British Government no longer represents, as it did in 1863, and even in 1868, a community bitterly prejudiced against everything American, and resolved to regard every American view of things as necessarily extravagant and overreaching; but a community disposed to treat with respect and esteem the rights and the opinions of the American people, and to join with us in striving to secure peace and friendship between the two nations, and the common good of both.

What has brought about this change it is unnecessary to inquire. The evidence of the fact which we have in the treaty of Washington is what makes the treaty chiefly valuable to us. We believe the change to be as sincere, as thorough, and as lasting as the concessions are just and important. They will doubtless be accepted by the people of this country in the same spirit of conciliation, and we trust that the Senate will not delay to give its sanction to the agreement which blots out all the old score of grievances we have so long felt, and enables us to enter on a new career of progress, in perfect amity with the nation which most of our people still delight to call "the mother country."

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS

The following are the changes in the Redeeming Agents of National Banks since the 4th of May, 1871. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency.

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
South Carolina—Columbia	The Central National Bank	The Fourth National Bank of New York, approved.
Kentucky—Somerset	The National Bank of Somerset	The Third National Bank of New York, approved in addition to the Planters' National Bank of Louisville, Ky.
Iowa—Osceola	The First National Bank	The Third National Bank of Chicago, approved.
Iowa—Albia	The First National Bank	The Union National Bank of Chicago, approved.
Illinois—Bushnell	The Farmers' Nat'l Bank	The Importers' and Traders' National Bank of New York and the Fifth National Bank of Chicago, approved.
West Virginia—Charleston	The First National Bank	The Merchants' National Bank of New York, approved.

New National Banks.

The following national banks have been organized since the 4th of May 1871:

Official No

1,815—The First National Bank of Elkader, Iowa. Authorized capital, $50,000; paid in capital, $31,614. H. B. Carter, Esq., President; F. H. Carter, Esq., Cashier. Authorized to commence business May 11, 1871.

1,816—The Rockford National Bank, Ill. Authorized capital, $100,000; paid in capital, $50,000. Gilbert Woodruff, President; Duncan H. Ferguson, Cashier. Authorized to commence business May 11, 1871.

[From our own correspondent.]

LONDON, Saturday, April 29.

The proposals enunciated by the Chancellor of the Exchequer for supplying the deficiency in the revenue, have been vigorously opposed, and the Government have considered it their duty to withdraw from them, but, at the same time, without departing from the principles originally set forth. The proposed tax on matches has encountered much opposition out of doors, and the match makers of the east end of London devoted a greater part of their time on Monday to processions, or rather to an endeavor to march *en masse* to the Houses of Parliament to present a petition. The leaders of that movement, however, were informed that the course they were pursuing was illegal, and the matter resulted in a demonstration of match makers and roughs on the Thames Embankment, and in the parks. In the evening, the Premier announced that in the state of public opinion on the tax, the proposal would not be pressed, but would be withdrawn. The match question, therefore, has had a very brief existence. On Thursday, speculation was very active as to what other proposals the Government would make. In the Stock Exchange many rumors were circulated, and among other things it was stated that a tax on railway tickets was probable. Shortly after the assembling of Parliament, however, the matter was set at rest, as the Premier announced that in addition to the tax on matches being withdrawn, the proposed increase in legacy and succession duties would not be persisted in, but, at the same time, the income tax would be raised to 6d. in the pound, in lieu of the percentage charge of 5 1-5d. in the pound. In this position the matter stands at present, and there will be no further discussion upon it in Parliament until Monday next, when a great and important debate will unquestionably take place. No doubt it will be thought abroad to be strange that a wealthy country like this should dispute over the circumstance of meeting a deficit of nearly £3,000,000, incurred for purposes of self-defense. It is, however, by no means owing to a disinclination to pay the debts which have been incurred, but the opposition is to the plan devised by the Government for raising the sum required. Equality of taxation, as far as that can be carried out, is a desirable end to arrive at, but now that the match tax, and the increased tax on legacies and successions have been abandoned, and the income tax has been augmented to 6d. in the pound, the inequality of taxation has been aggravated, and there is every indication that the opposition will increase in strength. The present Government opened its career with a majority of about 115; on the division which resulted on the match tax, the majority was only 27. It is by no means improbable that the Budget will have to be reconsidered, and it is more than probable, if such should prove to be necessary, it will have to be undertaken by a different ministry.

The question at issue is as to the means to be adopted for raising

Digitized by Google

the money to meet the deficit. The suffrage has been extended, and the working classes have a large share in the representation of the country. Are the working classes, who earn good wages and live well, to sanction expenditure and not to meet their fair proportion of the burden? This is the question which is before the country, and on which the Government must stake its existence. At this stage of the debate, the speech of Mr. Fawcett, "an extreme democrat," deserves to be recorded:

As it might be supposed that the new Budget just introduced would be popular among persons of advanced Liberal opinions, he wished to enter his earnest protest against the principle in it. He had never concealed from the House that held extreme democratic opinions. Nevertheless, he had not lost sight of the dangers of democracy, and no one who had considered the subject could doubt that, among the many advantages enjoyed by democratic institutions, there was this advantage—that, if not properly checked, they sometimes tended to make government expensive. Now, the House would remember the debates two or three years ago. The Chancellor of the Exchequer and the Prime Minister fought nightly over that historic animal, the Trojan horse; and the Chancellor of the Exchequer warned the House that inside it there was a great democracy, which, if once let loose, would issue forth and sway the Government, regardless of the true principles of finance, and involve the country in unwonted extravagance. Well, three years had passed; but it was the extravagance of the Government, not the extravagance of the democracy, that the country had to fear. (Hear, hear.) There was a large exceptional expenditure of £3,000,000 this year, and the house was asked to provide the whole of it out of direct taxation. (Cheers.) Now, who paid direct taxation? A small minority in each constituency. (Hear, hear.) If, therefore, the new Budget were sanctioned, we said, in effect, to the democracy:—

"Be as extravagant as you like, sanction any expenditure you choose, there will be a Government who will tell you the expenditure is transitional, and you the majority, will not pay the bill, but every farthing of additional taxation will be thrown upon the minority." (Cheers.)

The authority of Ricardo, Mill and other writers on political economy might be quoted against him to show that taxation, whether direct or indirect, in the end fell to a great extent upon the working classes. But the great fact you wanted to bring home to the people was, that if they desired extravagant armaments the money must not come first out of other people's pockets, but must come directly out of their own. (Hear, hear.) He, therefore, protested earnestly and solemnly against the plan for throwing the additional expenditure entirely on the income-tax. (Hear, hear.) In this country no doubt the workingman was heavily taxed. But still more heavily taxed than the skilled artisan with £2 or £3 a week were the clerk and the poor widow, struggling to bring up a family and maintain a certain appearance on £100 or £150 a year. (Hear.) Upon these persons the pressure of local taxation was constantly increasing, and now that the working classes had a majority in almost every constituency, were you to lay down the doctrine that additional expenditure should be paid by the minority out of direct taxation? (Hear.) Owing to the encouragement given to a wicked rivalry in armaments, country after country was running straight towards financial embarrassment, and it was the duty of this House, now that we had a democratic suffrage, to relax not a single check which might tend to prevent extravagance. The Government had withdrawn their Budget. Let them now revise their estimates. (Hear, hear.) The country did not accept the doctrine that because some votes in supply had been passed the House therefore stood pledged to the whole of the proposed expenditure; and if the Government attempted to carry out any policy involving an outly of £72,000,000, they would find they were not fulfilling the wishes of the country. (Hear, hear.) He should be unworthy of a seat in this House if he did not do everything in his power in opposition to a fatal doctrine, which would lead to disaster and ruin—the principle that additional expenditure should be thrown entirely upon direct taxation. (Cheers.)

But apart from all this squabble in Parliament, upon what may be an error of judgment, and which might, if pride did not stop the way, be speedily rectified, the prosperity of the country is daily increasing. The weather for the growing crops is all that can be desired, a good yield of grass is now certain, and we shall only require a favorable time for harvesting it. The prospect before the grazier, and consequently for the consumer of meat, is more satisfactory than for a long time past, and we hope that during the summer months the grass-fed beasts will come to market in excellent condition. Dairy produce of all descriptions will soon be affected, to the benefit of the consumer, by this abundance of grass in the pastures. At present there is nothing to indicate that the wheat crop will be beneath the average. In the money market, too, there is a large supply of unemployed capital ready to find a profitable outlet, and, consequently, there are many schemes before the public, and many more will undoubtedly follow. In consequence of the partial revival of fresh enterprise, and of the steadiness of trade, money has been rather more inquired for this week, but the abundance which exists entirely checks any upward movement. The position of the Bank of England gains daily in strength, and nearly all the gold we receive is sent there for the want of an export demand. The quotations, compared with those of last year, are as follows:

	1870. Per cent.	1871. Per cent.		1870. Per cent.	1871. Per cent.
Bank minimum	3	2½	4 months' ba'k bills	3 @3½	2½@2½
Open-market rates:			6 months' ba'k bills	3½@3¾	2¾@2¾
30 and 60 days' bills	2½@3	2½@...	4 and 6 trade bills	3½@4	3 @3½
3 months bills	3 @...	2½@...			

Annexed is a statement showing the present position of the Bank of England, the Bank rate of discount, the price of Consols, the average quotation for English wheat, the price of Middling Upland Cotton, and of No. 40 Mule Yarn, fair, second quality compared with the four previous years:

	1867. £	1868. £	1869. £	1870. £	1871. £

Amst'd'm	3½	3½	3½	3					
Turin	5	6	5	6					

* Nominal.

There has been an average demand for foreign bills of exchange and the quotations show very little alteration.

There is no demand for gold for export, and as our importations have been considerable, there has been a great increase in the supply stored at the Bank. In the silver market the chief feature is a demand for Mexican dollars of the old issue for shipment to China. The following prices of bullion are from the circular of Messrs. Pixley, Abell, Langley & Blake:

GOLD

	s.	d.	s.	d.
Bar Gold per oz. standard	77	8¾	@77	9

Mexican Dollars per cz. last price.	4	10¾	@ 4	11¼

The parliamentary contest on the Budget propositions has had little or no influence in the Stock Exchange. The principal feature is a demand for Continental Government stocks, in which there is a marked tendency to improvement. American stocks have been firm, and Five-Twenties are rather higher in price. In Atlantic and Great Western Railway securities there has been considerable activity, and a further advance has been established. The Certificates of Debenture closed to-day at 45½ to 46½; the Consolidated Mortgage bonds, 42½ to 43, and the Reorganization stock, 13 to 14, firm. The following have been the highest and lowest prices of consols and the principal American securities on each day of the week:

	Monday.	Tuesday.	Wed'day.	Thu'day	Friday.	Sat'day.
Consols	92⅞-93⅛	92⅞-93⅛	93 -93⅛	93⅛-93⅜	93⅛-93⅜	93 -93⅛
U. S. 5-20's, 1883	90⅛-90⅝	90 -90⅛	90⅛-90⅜	90⅜-90⅝	90⅜-90⅝	90⅛-9.⅝

Messrs. Robinson, Fleming & Co. announced that they are instructed to receive subscriptions for $2,000,000 eight per cent Louisiana Levee bonds:

The bonds form part of $3,000,000 issued under the authority of a special act of the Legislature of the State of Louisiana, approved by the Governor of the State the 25th of February, 1870. The bonds are to bearer, and of $500 each, bearing interest at the rate of 8 per cent. per annum, due 1st of September and 1st of March of each year, and made payable either at the office of the State Treasurer in the City of New Orleans or in the City of New York, at the option of the holder. The coupon next falling due, and attached to each bond, is payable 1st of September, 1871; and the principal is made payable in five years from the date of the bond, viz., on 1st of March, 1875, both in the currency of the United States. For the payment of the principal and accruing interest of these bonds the special act of the Legislature pledges the faith of the State of Louisiana unconditionally, and levies a special tax of one-quarter of one per cent upon the estate, real and personal, throughout the State, subject to taxation, to continue until the principal and interest of these bonds are fully paid. The price of subscription is 75 per cent (the dollar calculated at the rate of 4s. 6d.), including interest from the 1st of March last, or £84 7s. 6d. per bond of $500, payable as follows:

£5	0s.	0d. for each bond on application.
15	0	0 for each bond on allotment.
25	0	0 for each bond on 5th of June.
39	7	6 for each bond on 5th of July.
£84	7s.	6d.

The London and San Francisco Bank are inviting subscriptions for £500,000 Omaha Bridge eight per cent bonds, issued by the

Digitized by Google

Union Pacific Railroad Company, secured by mortgage authorized by act of Congress of the United States:

The bonds, the principal and interest of which are payable clear of all taxes in the United States, are to bearer, each representing £200 sterling or $1,000 gold, with half-yearly interest coupons attached, each coupon being for £8 5s. 9d. sterling, or $40 gold. The interest runs from 1st of April, 1871, and is payable half-yearly on 1st of October and 1st of April at the option of the holder, in London at the London and San Francisco Bank (limited), and in New York at the office of Messrs. Dabney, Morgan & Co. The bonds will be paid off by annual drawings by an accumulative sinking fund within 25 years at par, with a premium of 10 per cent on the nominal value, viz., at the rate of £220 sterling or $1,000 gold per bond. The repayment of the drawn bonds will, at the option of the holders, be made in London or in New York.

It is understood that a new Spanish loan will be introduced next week. The price of issue will, it is stated, be 82½, and the bonds will bear 6 per cent interest per annum.

The wheat trade has been dull, owing to the fine growing weather, and prices have had a drooping tendency.

The following statement shows the imports and exports of bread and feeding stuffs into and from the United Kingdom, during the week ending April 22, and since the commencement of the season, compared with the corresponding periods in 1869–70:

FOR THE WEEK ENDING APRIL 22.

	1870–71. Imports.	1870–71. Exports.	1869–70. Imports.	1869–70. Exports.

The following relates to the trade of Manchester:

This market has remained quiet and inanimate throughout the present week. Quotations are nominally the same as they were last Friday; but in order to sell, both spinners and manufacturers are obliged to make a concession, and prices have been accepted to-day which were refused a week since. The large contracts which producers have on hand have been of great advantage to them, and enabled them to maintain prices which, under less favorable circumstances, they would have been unable to adhere to. Stocks of both goods and yarns still continue light in first hands, and for early delivery full prices can be obtained. Spinners are encouraged to go on selling, because they can secure cotton to cover their renewed and extended contracts. This week the arrivals of cotton in Liverpool have again been large, amounting to 99,000 bales; and the stock has slightly increased, amounting to 951,000 bales.

The undecided dispute between masters and operatives at Oldham has had considerable influence in certain departments of this market. Spinners have been quite willing to sell under certain conditions about delivery. On the other hand, it has not suited manufacturers to buy yarns in order to cover contracts for cloth which they have entered into, unless they have been guaranteed delivery within a stipulated period. The consequence is that a good deal of uncertainty and irregularity prevails, and there is a feeling of uneasiness and doubt throughout the whole market. Should the mill operatives turn out and the factories be closed after to-morrow (Saturday), then there will be endless disputes about the non-delivery of yarns, and consequently cloth. Again, should the master spinners yield to the demands of the hands, the probability is that the movement begun in Oldham may extend to the other districts throughout Lancashire. The immediate consequence of the impending strike or lockout is that business remains in a state of abeyance. Producers are willing to sell at present prices, but afraid to undertake engagements which they may be unable to fulfil. Buyers, on their part, are ready to make purchases, provided they can be ensured delivery within a stipulated time.

English Market Reports—Per Cable.

The daily closing quotations in the markets of London and Liverpool for the past week have been reported by submarine telegraph, as shown in the following summary:

London Money and Stock Market.—The market for American securities has been quiet throughout the week, closing steady but without noticeable firmness.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show a decrease in both dry goods and general merchandise. The total imports amount to $7,846,227 this week, against $10,382,026 last week, and $7,359,839 the previous week. The exports are $3,846,933 this week, against $3,910,986 last week, and $5,168,728 the previous week. The exports of cotton the past week were 17,844 bales, against 13,297 bales last week. The following are the imports at New York for week ending (for dry goods) May 5, and for the week ending (for general merchandise) May 6.

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
Dry goods.....	$1,125,659	$1,485,736	$1,433,476	$2,461,531

Canada Southern Railroad.—A COMPETING LINE IN CANADA.—The Chicago *Railway Review* of March 30 states that Wall street (New York) is about, or was then about, to be offered the last good thing Canada had to give, namely, the right to provide capital for the construction of the Canada Southern Railroad; and remarks that hitherto John Bull has had a monopoly of Canadian "good things," including the Grand Trunk.

We are not at all jealous. On the contrary we think it is quite fair that Brother Jonathan should take his turn in helping Canada to railways, but if he is looking out for profit we could have wished him better luck than the adoption of a competing line anywhere, much less in Canada. We always thought it was hard enough for a railway in Canada to earn a living when it had the monopoly of traffic. Canada must indeed have acquired sudden wealth if a competing line can live and thrive there! Our opinion has long been that Canada would get on, but we were hardly prepared for so great a blaze of prosperity as is indicated by the projection of a long competing line of railway!

Noting its competitive characteristics our Chicago contemporary observes, "Now this proposed Canada Southern will not come near any of these places, (important local ones named,) and will simply have to depend upon the through traffic for existence. How will it stand for this? The Great Western, by its Air Line, will have a line exactly the same length, on exactly the same grade, being close alongside; therefore, as to cheapness, can do the traffic on exactly the same terms. But further than this what connections has this proposed line?" The Chicago paper then proceeds to point out the very inferior position of the intended competing line in this important respect. Evidently Chicago is not a large subscriber to the capital of the new Canadian railway. That boon seems to be preserved for New York. Perchance Chicago is in dudgeon at not getting a slice of the cake!

A competing line in Canada! In one sense, it would produce an increase. It would not, for the best of all reasons, knock down the premiums on existing Canada railways, but if established—we say if—it might increase their discounts.

Of all places in the world we should have supposed Canada would remain free from competing lines. We never believed the many bitter things said of the severity of Canadian winters, statements which went the length of intimating that a railway in Canada, though it had never so much traffic, could not pay; that the climate was so intensely cold that it would snap any rails laid down, and break up the ground from under the best permanent way that could be formed; three parts of this we know to be bosh, but at the same time we always admitted that railway working in Canada was difficult, and therefore expensive. We did not, however, know that Canada was so favorable for railway construction and working that a competing line would arise!! On the bare mention of such a thing the first observation that would have risen to our lips would be—"Impossible!—people only compete to obtain a share of good things, not to go snacks in discounts!—a competing line in Canada is simply absurd, since there is not a line in Canada whose shares command a premium." However, we read in American papers of the fact that a competing line *is* projected, yclept as above, and that New York is to be offered the advantage of providing a part of its capital! Heaven bless them!—*Herapath's Railway Journal.*

Finances of Arkansas.—The following statements with reference to the finances and progress of railway construction in the State of Arkansas are copied from a recent letter of Hon. Henry Page, Treasurer of that State: The old debt of the State, so far as funded up to the present time and now drawing interest, is $2,750,000. The whole of the old debt, if funded, will amount to $4,430,000. But this total will probably be largely diminished by the amicable adjustment of certain claims held by the State of Arkansas against the United States Government, which is the holder of over one million of the unfunded bonds. The total debt which may be created by the loan of the State's credit to railroad companies is $10,000,000. Of this sum bonds to the amount of $3,150,000 have been issued, as follows:

Memphis and Little Rock Railroad	$1,050,000
Little Rock and Fort Smith Railroad	900,000
Little Rock, Pine Bluff and New Orleans Railroad	750,000
Mississippi, Ouachita and Red River Railroad	450,000

These are the only roads entitled under the law to receive State bonds; and, so far as I can discover, the aid heretofore given has been honestly and judiciously expended. Now, as reported to me by the officers of the several roads, and as I know, also, from other official sources, and from personal observation as well, the following is an exact showing of their condition:

	Miles.
Memphis and Little Rock Railroad:	
Completed and in running operation	131
Little Rock and Fort Smith:	
In running operation	60
Graded and ready for track	50
Cairo and Fulton:	
In running operation	20
Graded and ready for track	20
Little Rock, Pine Bluff and New Orleans:	
In running operation	18
Graded and ready for track	62
Mississippi, Ouachita and Red River:	
In running operation	18½
Graded and ready for track	22
Graded but not finished	68

Railroads in Arkansas.—The Cairo and Fulton road is completed 20 miles north of Little Rock. The thirty miles beyond will be ready by the 15th of May. Iron for twenty miles of track is in New Orleans to be shipped at once.

The Little Rock and Fort Smith road is in operation for a distance of 50 miles (to Lewisburg). Grading from that point to Van Buren is nearly completed. The iron is on hand at Huntersville, opposite Little Rock, for between 30 and 40 miles, and iron for 20 miles more has been shipped to New Orleans.

— We are informed that Clews, Habicht & Co., the London branch of Henry Clews & Co., of this city, have vacated their old quarters at 5 Lothbury, London, and taken the elegant and commodious offices formerly occupied by "The National Bank of Scotland," at 11 Old Broad street.

BANKING AND FINANCIAL.

BANKING HOUSE OF HENRY CLEWS & CO., 32 WALL ST., N. Y

Our business is the same as an incorporated bank.

Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed on all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make telegraphic transfers of money to any desired point, and transac every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upward on.

The Imperial Bank, and Messrs. Clews, Habicht & Co., London.

The Provincial Bank of Ireland, The National Bank of Scotland, and all their branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Government and other investment securities; also Gold and Exchange.

Advances made on approved collaterals and against Merchandise consigned to our care.

We make collections of Notes, Drafts, Coupons and Dividends with promptness on all points, and are fully prepared to offer banking facilities upon either currency or gold basis.

HARVEY FISK. A. S. HATCH.

FISK & HATCH,

BANKERS AND DEALERS IN GOVERNMENT SECURITIES,
No. 5 NASSAU STREET, NEW YORK, May 4, 1871.

THE SIX PER CENT GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD CO. are secured upon a property which, when the extension to the Ohio River, now in process of rapid construction, is completed and fully equipped, will represent a cost of nearly $30,000,000, and an actual value in Roads, Franchises, rights of way, &c., of not less than $50,000,000. The total amount of the loan is $15,000,000, of which nearly one-half, or over $7,000,000 have already been sold.

The CENTRAL PACIFIC BONDS negotiated by us, amounting to $25,885,000, have a ready market everywhere, being favorably known and actively dealt in at all the principal Stock Exchanges of this country and Europe, and are readily salable at all times at quoted market price, which is now above par.

The Bonds of the CHESAPEAKE AND OHIO RAILROAD CO. we believe to be of equal value and security, and must in time take a like rank in market value and salable character.

Holders of Five-Twenty Bonds, desiring to fund them otherwise than in the new Five Per Cent Government Loan, may do so with entire safety, at a profit of about 20 per cent, and without reduction of interest, by an exchange for the Bonds of the CHESAPEAKE AND OHIO RAILROAD CO.

Present price 90, and accrued interest from May 1.

We also buy and sell Government Securities, and the Bonds of the Central Pacific Railroad Co., and as agents of the U. S. Government, will attend to the funding of Five-Twenties into the new United States Bonds.

FISK & HATCH.

GERMAN BANK OF LONDON (Limited).

DIRECTORS.

George Albrecht, Bremen.
Edward Henry Green, London.
Carl Klotz, Frankfort-on-the-Main.
Victor Freiherr Von Magnus, Berlin.
Julius May, Frankfort-on-the-Main.
Adolph Vom Rath, Cologne.
Charles Ferdinand Rodewald, London.
Frederick Rodewald, London.
Thomas Sellar, London.
Rudolph Sulzbach, Frankfort-on-the-Main.
L. Joseph Speyer, Frankfort-on-the-Main.
Managing Director—Otto Nestle.
Assistant Manager—Leopold Bonn.
Auditor—George Thomas Brooking.
Bankers—The London Joint Stock Bank, London.

The Capital of the German Bank of London Limited is £2,000,000, divided into 200,000 Shares of £10 each; of which 60,000 Shares, representing a capital of £600,000, have been issued, subscribed for, and allotted, and are intended to be fully paid up within six months.

The bank is established in London and has no branches on the Continent or abroad. It is now prepared to open business, to negotiate approved securities, and generally to attend to transactions appertaining to Foreign banking business.

Bartholomew House, Bartholomew lane, London, E. C., April, 1871.

GREAT NATIONAL LOAN.

☞ NEW FIVE PER CENT. BONDS OF THE UNITED STATES.

The Treasury Department is now able to promise that the registered Certificates of Stock, and a good part of the Coupon Bonds of the New Loan of the United States bearing Five per Cent. interest, payable quarterly in gold, will be ready for delivery early in the present month. The subscriptions to the loan now amount to $62,000,000, and it is expected that the subscriptions and sales will progress more rapidly when the certificates and bonds are ready for market abroad as well as at home. The whole sum of Five per Cents offered to the public generally, and to the holders of United States 5-20 Bonds, without qualification, is $200,000,000. When this amount, to which preference is thus given, is taken up, the remainder of the Five per Cents, $300,000,000, embraced in the new loan of July 14, 1870, for refunding the public debt, will be offered in connection with $300,000,000 Four and one-half per Cents, and any part of $700,000,000 of Four per Cents, the one running fifteen years and the other thirty years.

The following is a copy of the New Five per Cent. Bond, under and pursuant to the New Loan Act of Congress:

FORM OF FIVE PER CENT. BOND.

INTEREST | FUNDED LOAN OF 1881. | FIVE PER CENT.

UNITED STATES OF AMERICA

ARE INDEBTED TO THE BEARER IN THE SUM OF ..... DOLLARS.

THIS BOND is issued in accordance with the provisions of an Act of Congress entitled "An Act to authorize the refunding of the National Debt," approved July 14, 1870, amended by an Act approved January 20, 1871, and is redeemable at the pleasure of the United States after the first day of May, A. D. 1881, in coin of the standard value of the United States on said July 14, 1870, with interest in such coin from the day of the date hereof, at the rate of FIVE PER CENTUM per annum, payable quarterly, on the first day of February, May, August and November in each year. The principal and interest are exempt from the payment of all Taxes or Duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority.

WASHINGTON, ..., 18....

Entered ..... Recorded .....

..... Register of the Treasury.

Registered bonds will be issued of the denominations of $50, $100, $500, $1,000, $5,000 and $10,000, and coupon bonds of each denomination except the last two. The interest will be payable in the United States at the office of the Treasurer, any Assistant Treasurer, or designated depository of the Government, quarterly, on the first days of February, May, August and November in each year.

The interest on the registered stock of this loan, it is determined by the Treasury Department, will be paid as conveniently to the holder as on the Coupon Stock, and personal attendance, or attendance by proxy at the Treasury, to draw and receipt for the interest will be dispensed with *whenever the check of the United States Treasurer, mailed punctually to the address and order of each holder on or before every quarter-day, is preferred to such attendance.* This check, payable in gold coin at the Treasury in New York (or such other office as the Stock is registered at), will be negotiable or collectable on the indorsement of the owner or owners of the Stock. In pursuance of this arrangement, the subscribers to, or purchasers of the Stock in its registered form (which is a complete protection against theft or other losses incident to Coupon Bonds payable to bearer) are advised to give their Post-office address in full, and to notify of any change in the address between quarter days.

The whole proceeds of the new loan will be applied to the payment or redemption and cancellation of the 5-20 years six per cent. bonds, and in addition to these proceeds the 5-20s are now being reduced by purchase at the rate of $10,000,000 per month.

The entire effect, therefore, of the new loan, in connection with the existing Sinking Fund process of the Treasury, is to reduce both principal and interest of the Public Debt of the United States. *The loan creates no additional supply of Government stocks,* while the application of the surplus revenues derived in gold from Customs is constantly lessening, as it has been doing for two years past, the Funded Stocks bearing six per cent. gold interest.

The 1st of May schedule of the Public Debt, which has just been published by the Secretary of the Treasury, shows a reduction in these stocks since the April schedule of $12,215,700 and a further lessening of the yearly interest charge thereon of $732,942. This leaves the total yearly interest charge in gold $111,982,034. In the same month the Treasury paid and canceled $2,470,000 of the Three per Cent. Currency debt, reducing the whole of this debt bearing interest to $51,028,000, and the yearly interest charge thereon to $1,537,470.

The proposed further reduction of the annual interest charge upon the Public Debt by refunding is as follows:

By exchange of $500,000,000 United States six per cents for new five per cents of 1861	$5,000,000
By exchange of $300,000,000 United States six per cents for four and a half per cents of 1866	4,500,000
By exchange of $700,000,000 United States six per cents for four per cents of 1901	14,000,000
Total saving per annum by refunding	$23,500,000

The large and rapid accumulation in the last few years of private capital now retired from active business, and of the cash Savings and Life Insurance premiums deposited with or intrusted to the provident institutions of the country all seeking the most undoubted security, pledged to be kept free of all taxes, under national or local authority, and content, provided this object be assured, with moderate rates of interest—will no doubt ultimately absorb so much of these New Stocks as may not be taken in voluntary conversion of United States 5-20s, or marketed abroad.

The Official Schedule of the Treasury affords the following classification of Funded Stocks (in Gold) of the United States as outstanding on the 1st of May:

FUNDED STOCKS (IN GOLD) OF THE UNITED STATES.

Date.	Coupon.	Registered.	Total.
5-20s, 1862	$383,401,050	$107,564,600	$490,965,650
5-20s, 1864	45,700,000	56,781,600	102,481,600
5-20s, 1865	125,313,550	54,605,800	179,919,350
5-20s, 1865 (new)	182,966,600	72,476,900	255,463,500
5-20s, 1867	244,099,500	91,299,100	335,398,600
5-20s, 1868	28,539,950	11,414,500	39,654,450
Total 5-20s	$1,010,040,650	$393,842,500	$1,403,883,150
Sixes, 1881	93,538,600	190,139,500	283,678,100
Fives, 10-40's	57,374,.00	137,192,600	194,567,300
Fives, 1874	13,965,000	6,035,000	20,000,000
Total	$1,174,918,950	$727,209,600	$1,902,128,550
Total March 4, 1869			2,107,846,150
Reduction of funded debt			$205,717,600
Yearly gold interest charge, March 4, 1869, amounted to			$124,255,320
Present yearly charge			111,982,034
Reduction in interest charge			$12,273,316

PUBLIC DEBT—JULY, 1865, TO MAY, 1871.

Miscellaneous.			
Central Petroleum Co.	1	May 18.	May 12 to May 18.
Adams Express Co.	2	June 1.	May 19 to June 2.

FRIDAY EVENING, May 12, 1871.

The Money Market.—The excessive abundance of money this week has surpassed anything heretofore reported, and has been the most salient feature of the financial markets. Call loans on miscellaneous collateral have been made at 4@5 per cent, and on governments at 3 per cent, while large amounts have in some cases been offered to the heaviest Government dealers at even lower rates. This extraordinary plethora of money seems to be the result of the large bond purchases by the Government, and of a rather conservative condition of trade in commercial circles, assisted, also, by the usual flow of national bank currency towards this centre at the present period of the year, which being practically irredeemable is not returned to the interior, but accumulates in our city banks in very large quantities. National Bank notes are consequently at a discount of ⅛@¼ per cent where holders wish to obtain greenbacks for them, and this periodical excess of national bank notes has led as usual to much discussion upon the subject of instituting some practical system of redemption.

There is no space to discuss so broad a question in these columns, but without going into details it seems tolerably clear: 1. That an efficient system of redemption is greatly needed. 2. That such a system is chiefly desired by the banks of New York, Boston, Philadelphia and Baltimore, and is not generally desired by the other banks of the country. 3. That the movement towards establishing an assorting or redeeming agency, when made at all, should be made by combined and harmonious action between the banks of the above named cities and the Secretary of the Treasury. It is to be hoped that the evident need now existing for a practical method of redemption may direct so much attention to the subject, that this important defect in our national banking system will soon be remedied.

The last statement of the associated banks of this city showed the following changes from the previous week:

Loans, increase, $1,758,240; Specie, increase, $210,105; Circulation, decrease, $67 624; Deposits, increase, $5,232,315; Legal tenders, increase, $1,672,920. The result of these changes was, to leave the banks $591,852 stronger in their excess over legal reserve.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	May 6, 1871.	May 7, 1870.	May 8, 1969.
Loans and discounts	$283,312,779	$275,200,000	$263,500,000
Specie	15,807,234	31,500,000	16,000,000
Circulation	31,384,545	33,400,000	34,000,000
Net deposits	227,521,540	217,400,000	193,900,000
Legal Tenders	62,099,211	56,100,000	55,100,000

There has been little change in commercial paper, the great abundance of money on call at low rates, stimulates the demand, and very choice names have sold at 5½, though 6@6¼ per cent is a fair quotation.

United States Bonds.—Government bonds have been extremely quiet throughout the week at steady prices, the fluctuations having been hardly more than ¼@⅜ per cent on any issue. There have been no disturbing elements upon the market, as gold has been quite steady and the Treasury operations have not been varied from the published programme. At the purchase of $2,000,000 Five-Twenties on Wednesday, offers amounted to $7,437,200, and the bonds accepted were at prices from 110.96 to 111.26, making an average of about 111.17, while gold was selling at 111.25; it was reported that the Assistant Treasurer was instructed to purchase *at or under par in gold*, but no confirmation or denial of the report could be obtained, and the policy of the Government upon this point is not yet definitely known. The purchase of Five-Twenties at prices above par in gold would, of course, involve a slightly greater outlay than if the same bonds were paid off; but on the other hand it is believed that nothing would more certainly assist the negotiation of the new five per cents than to have our old sixes sell considerably above par, and it would seem to be the best policy for Mr. Boutwell to continue his regular purchases, and stimulate the advance of governments by every legitimate means.

Subscriptions to the new loan have somewhat increased, and it is expected that the readiness of the bonds for delivery, by the 15th to 20th inst., will furnish a new stimulus to investors.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, May 6.		Monday, May 8.		Tuesday, May 9.		Wednesd'y May 10.		Thursday, May 11.		Friday, May 12.

State and Railroad Bonds.—The dealings in Southern State bonds have been active at prices generally higher, Tennessees showing an advance of about 1½ per cent, while Virginias, new South Carolinas and Missouris are all quoted better than last week. The convention of taxpayers in South Carolina is considered favorable to the interests of the holders of State bonds, as the tone developed has been conservative and against increasing the debt, and the action of the convention is expected to have much weight in the State. There is evidently more confidence felt in the soundness of the Southern State bonds generally, as the extravagance which was shown in increasing the debts of several States immediately after the war has to a great extent worked its own cure, and during the past year there has been a much more conservative spirit shown, and a strong party in favor of economical administration is now to be found in every State.

Railroad bonds have been more active in consequence of the great ease in money. First class bonds are higher, the Pacific Railroad issues having been especially conspicuous for activity and higher prices. The Centrals sold up to 102⅝, and the Union Pacifics closed at 94½ for firsts, 85 for land grants, and incomes 87@87½.

In the present condition of the money market, when it is sometimes difficult to get even 3 per cent on call loans, our numerous issues of first mortgage railroad bonds offer superior inducements to investors for placing their funds where full rates of interest can be obtained on sound securities.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

Railroad and Miscellaneous Stocks.—The Stock market has continued rather dull, and prices of nearly all the leading speculative favorites are off from the quotations of our last report. There has been no "bear" attack upon the market, and the slight decline noticed has apparently been the result of dullness rather than of a decided tendency to a lower range of quotations.

The appearance of the market has been such as to convey the idea that the leading speculative cliques are quietly absorbing such stocks as weak holders sell out from day to day, with the purpose of coming in soon to force another sharp upward movement that will carry prices above the highest figures of April.

The extreme ease in money favors this supposition, as it is considered almost sufficient to prohibit a "bear" movement.

The principal activity to-day was in Union Pacific, which closed at 35¼ against 33⅝ last week. The earnings of leading roads for April so far as they have yet been received compare quite favorably with the same month of 1870.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

The Gold Market.—Gold has been quite firm at 111 and 111⅛, but without much activity in business. The price has been supported by extreme firmness in foreign exchange and the consequent export demand for specie, assisted, also, by the usual "short" interest, which continues to be held to a greater or less extent most of the time. The precise amount of exports for the week cannot be known till the shipments of to-morrow have been ascertained, but they will probably be from 1½ to 2 millions, and with the higher rates of exchange made to-day, the exports of next week may be larger. Double-eagles are worth about ¼ premium for shipment, but cannot be obtained from the Treasury. At the Government sale of $2,000,000 on Thursday, bids amounted to $8,459,000. Customs receipts for the week ending to-night amount to $2,852,000. The statement of exports of specie from the whole country in the eight months ending February 28, 1871, is given by the bureau of statistics at $50,198,089 against $27,036,520 in the previous year. The rates paid for carrying have ranged from flat to 3 per cent, and to-day 2, 1½, 1 to flat.

The following table will show the course of the gold premium each day of the week past:

	Quotations. Opening.	Lowest.	Highest.	Closing.	Total Clearings.	Balances. Gold.	Currency.

Specie thalers	1 04	@	1 06
Mexican dollars	1 03¾	@	1 04¼
Spanish dollars	2@3 p.c. premium.		
South American dollars	par.		

Foreign Exchange.—We have to record a further advance in the rates of exchange, which were quoted to-day by one leading house at 110¼ for 60-day bills, and 110½ for short-sight—higher quotations than have been made before in the past four years.

The immediate cause of this extreme firmness is to be found in the scarcity of double-eagles for shipment, as these are worth ¼ more for export than small coin. The Treasury has not exhausted its supply of double-eagles, but having paid out more than an ordinary proportion of them on gold certificates during the past few months, declines to make further payments in these exclusively.

The demand for bills has naturally been checked by the high prices, and transactions have been comparatively limited. Shipments of specie for the week will probably not exceed $2,000,000. Cotton exports from all ports amount to 76,630 bales, against 51,240 bales in the same week of 1870.

Quotations are as follows:

	60 Days.	3 Days.
London prime bankers	110¾@	110¼@ .....
" commercial	109¾@	.....@ .....
Paris (bankers)	.....@	.....@ .....

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES.

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3. The Table of Railroad, Canal and Other Stocks, on another page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column x=*extra*; s=*stock or scrip*.

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q.—J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name

Central Railroad Company of New Jersey.—REPORT FOR THE YEAR ENDING DECEMBER 31ST, 1870:

TRANSPORTATION ACCOUNT.

The following is a statement of the ordinary receipts and expenses for the year 1870, compared with 1869.

RECEIPTS.

	1870.	Inc. or Dec. from 1869.	
Passengers	$1,118,147	Inc.	$160,389
Merchandise	1,172,870	Dec.	7,728
Coal	1,964,550	Inc.	216,558
Mail	15,772	....	....
Express	28,786	Dec.	21,493
Rents	80,900	Inc.	39,522
Miscellaneous	22,486	Dec.	3,856
Total	$4,393,514		$383,392

EXPENSES.

Running expenses	$799,906	Inc.	$57,448
Wood consumed	47,961	Dec.	27,886
Coal consumed	240,117	Dec.	49,123
Repairs of road	405,582	Dec.	48,378
Repairs of engines	216,211	Dec.	44,494
Repairs passenger cars	39,657	Dec.	23,795
Repairs freight cars	23,150	Dec.	17,541
Repairs coal cars	40,705	Dec.	35,485
Repairs docks, Elizabethport	20,269	Dec.	1,783
Repairs buildings, bridges, &c.	175,486	Inc.	28,792
Repairs tools and machinery	18,875	Dec.	3,147
Expense account	103,811	Inc.	4,980
Miscellaneous expenses	105,341	Inc.	34,958
Ferry running expenses	106,556	Dec.	9,349
Ferry boat repairs	41,995	Inc.	9,788
Ferry miscellaneous expenses	....	Dec.	483
Car service	126,654	Dec.	3,845
Total	$2,512,216	Dec.	$129,946
Balance net earnings	$1,881,997	Inc.	$513,339

An increase of receipts is here shown of $383,393 39, or 9¼ per cent. The increase in passenger receipts was $160,389 29 or 17 per cent; and, in coal receipts, $216,558 90, or 12¼ per cent. There was a decrease in merchandise receipts of $7,728 10, or 1 per cent.

The expenses show a decrease of $126,946 73, or 5 per cent. There has been an increase in running expenses of $55,448 24; in repairs of buildings, machinery, &c., of $23,860 85; and, in general expenses, of $39,338 85. There has been a decrease in repairs of road of $48,378 28; in fuel consumed of $77,010 64; in car service of $3,845 57; in repairs of equipment of $121,316 55, and in ferry expenses of $43 63.

The gross receipts per mile run have been as follows: from passenger trains, $1 28 against $1 16 in 1869; from merchandise trains, $2 04 against $1 90; from coal trains, $2 36 against $2 27; The average receipts per mile run from all trains have been $1 87 against $1 81 the previous year.

The gross expenses per mile run have been $1 07 against $1 19 the previous year.

CONSTRUCTION.

But little new work has been done during the past year. The sums charged to construction accounts amount to $104,536 16. The requisite time of experiment having passed, the company have decided to begin at once relaying the main tracks with steel rails, with the intention of continuing the work till such rails have entirely taken the place of iron in all tracks exposed to heavy wear and traffic.

NEWARK AND NEW YORK RAILROAD.

The heavy cost of this branch, from near Jersey City to Broad street, in Newark, will make it a tax on the resources of the parent company for some time to come; but it is well built and cheaply run, and the business is constantly increasing, so that a steady improvemeet in results is to be expected.

BRANCH FROM CENTRAL TO NEWARK ROAD.

It has been decided to build, forthwith, a branch across the meadows east of Elizabeth, with a view of connecting the main line near Elizabethport with the Newark branch at the earliest practicable time this year. The line is a level tangent, the right of way and the work inexpensive, and the whole can be very speedily completed. When ready, it will give a perfect security to passengers and freighters against detentions, as in case of accident, all the trains can be sent across the meadows by a route but two miles longer than the direct route.

DELAWARE, LACKAWANNA AND WESTERN R. R. COMPANY.

Many inquiries have been made about the present position of matters between the Delaware, Lackawanna and Western Railroad Company and the Central. The contract between the companies is a perpetual one, and binds the bulk of their business of all kinds to this avenue. The lease of the Morris and Essex Railroad by the former has resulted in the diversion of most of the passenger and freight traffic of the Scranton road to that route. As yet the coal business is mainly carried over our road to the wharves at Elizabethport, owned by the Delaware, Lackawanna and Western. As this transfer is clearly in violation of the contract under which the broad gauge was laid on the Central road exclusively for this business, suit was commenced at the close of the year for damages up to that time, and a fresh suit will have to be brought each year, for ever increasing damages, unless an amicable adjustment is proposed and carried out.

CENTRAL NEW JERSEY LAND IMPROVEMENT CO.

The extensive and valuable lands along the line of the Central road and of the Newark branch, so far as the same were no longer necessary or desirable for the purposes of the railroad, have been transferred, from time to time, to the Central New Jersey Land Improvement Co., under a charter, secured some years ago, for the very purpose of receiving these lands when the time should come for parting with them. All the stock of the Land Company was held by or for this company; and, as it was no longer necessary or desirable to control it, the stock was allotted, at the close of the year, among the stockholders of the Central road, *pro rata*, with $30, or thirty per cent., credited on each share, as a representative of the profits of the year over eight per cent., and of the previous profits of which no division had been made. The remaining instalments, as called by the Land Company, will be paid over to the Railroad Company, in liquidation of the balance due by the former to the latter on the purchases, and the money will be applied to the purchase of equipment, &c., for which purpose large sums would otherwise have to be raised. The value of these lands is large and rapidly increasing, and will, it is believed, return a good profit to the stockholders.

The lands and water front of the American Dock and Improvement Company are not affected in any way by this transfer, nor does it affect lands used at present, or required prospectively for railroad purposes.

BONDS.

The remaining $900,000 of the first mortgage bonds became due on the first of August last, and $760,000 have been paid off. Of the $600,000 outstanding of the second mortgage, $346,000 have been anticipated; making a total of $1,106,000 bonds redeemed. Of the mortgage bonds of 1890, $937,000 have been issued at par and interest. The bonded debt therefore is now $3,231,000, or $169,000 less than at the beginning of the fiscal year.

LEHIGH AND SUSQUEHANNA RAILROAD.

Since the close of the year 1870, a most important negotiation has been commenced and perfected for the lease of the Lehigh and Susquehanna Railroad and branches. This road extends from the terminus of the Central at Phillipsburg, up the Lehigh Valley, and across the mountain range into the Wyoming Valley; the main road being 105 miles in length, while the branches, sidings and double track bring the length of track up to 252¼ miles. Attention is drawn to the fact that as the Lehigh Coal and Navigation Company receive as rent one-third of the gross receipts, this Company incur no liability except for business actually done. The risk of freshets also is taken by the lessors, and not by this Company. The entire equipment of the road, consisting of 72 engines, 15 passenger cars, 10 baggage cars, 554 freight cars, 10,442 coal cars and 263 other cars is also purchased at valuations amounting to $3,632,750. All this equipment is new or nearly so, uniform in style and make, and corresponds with the Central cars and engines, so that much expense in maintaining will be avoided. Payment for this equipment is made by the assumption of $2,310,000 of the Lehigh Six Per Cent. Loan, due in 1897, and of the outstanding balances of the two Lehigh Car Trusts; so that the purchase requires no immediate payment of heavy sums, but can be made to suit the convenience of the treasury.

New York and New Haven Railroad Company.—We extract from the report of the directors of this road, for the fiscal year ending March 31, 1871, the following interesting facts in relation to the business and condition of the company:

The income during the past year was as follows: From transportation of passengers, $1,750,641; freight, $438,346; mails and express matter, $107,623; other sources, $17,338—making a total af $2,313,949. During the same period the expenses for repairs of roads, buildings, bridges, engines, cars, fuel, light, haulage, salaries, &c., amounted to $1,250,608, leaving a balance for transportation earnings of $1,063,341, from which must be deducted $159,995 for taxes and $77,437 for interest, leaving a net income of $825,909. The resources for the past year have been as follows:

Cash on hand April, 1, 1871	$564,626
Materials on hand	211,607
Second instalment on new capital	750,000
Transportation earnings	1,063,341
Total resources	$2,589,574
The payments during the year have been:	
Dividends (two of 5 per cent each)	$675,000
Taxes	159,995
Interest	77,437
Additional real estate	10,952
Balance of cost of Coscob bridge	241
New bridges, new depots and lands	31,091
Decrease of accounts payable	257,921

Digitized by Google

Materials for coming season	217,549
Cash on hand and due from agents	1,159,405
Total	$2,589,574
The expenditures on account of new capital have been as follows:	
Additional real estate	$255,516
Steel rails	346,575
New land and shops at New Haven	386,399
Bridgeport bridge	46,499
Coscob bridge	76,279
New equipment	48,000
New depots and depot grounds at New Rochelle and Portchester and bridges	52,435
Total	$1,211,705

The net earnings of the road have been $62,609 more than they were the preceding year. Since the last annual report a contract has been entered into between this company and the Hartford and New Haven Railroad Company, by which all the property of both companies has become joint property, under the control and management of a board of ten mangers, selected equally from the the board of directors of each corporation. Under the above contract this company is entitled to receive annually fifty-seven one-hundredths of the net earnings of both roads, and the remaining forty-three one-hundredths will belong to the Hartford and New Haven Railroad Company. Each company's share of the net earnings will be paid over to their Treasurer, to be divided among their stockholders or otherwise disposed of, as may be determined by their board of directors. On the 1st of November last the board of directors, under and pursuant to a written request of the board of managers, and for their account, entered into a contract with the Shore Line Railway Company for a perpetual lease of their railroad, extending from New Haven to New London, at an annual rent of $100,000. The receipts from operating the Shore Line Road during the five months just elapsed were $129,321, while the expenses and rent during the same period amounted to $119,169. It is not deemed probable that the earnings of the Shore Line Road for the first two or three years of the lease will be sufficient to pay the annual rent, as considerable outlays must be made in rebuilding bridges and improving the roadway and equipment. The board of managers will cause this road to be gradually relaid with steel rails, and placed in all respects in a condition to compare favorably with the main lines, with the full expectation that the increased facilities and additional improvements will add materially to the business of the road. Hereafter the annual report to the stockholders of this company will be a report of the business of the entire line, subject to the control of the board of managers.

New Jersey Railroad Lease.—The N. Y. *Times* gives the following:

The lease of the United Railroads of New Jersey to the Pennsylvania Railroad Company, which has for months past been the subject uppermost in the minds of railroad men, capitalists and politicians of New Jersey, was submitted to the United Board of Directors at Trenton yesterday. The committee to whom the matter had been confided had a meeting on Saturday last in Philadelphia in conjunction with a similar committee from the Pennsylvania company, and after eleven hours debate, all the provisions of the lease were finally agreed upon. Their work was approved by the directors of the New Jersey companies yesterday —only a few verbal alterations being made—and the meeting adjourned to give the committee time to make the required alterations. The Directors will then have another meeting, after which the lease will be submitted directly to the stockholders.

Before the meeting adjourned yesterday an offer was received from another powerful company, which it is not necessary to name, submitting proposals equally favorable to those made by the Pennsylvania, and offering, in addition, a bonus of nearly $1,000,000. This offer will, of course, affect materially the negotiations now going on, but, although the security offered is a first-class description, the matter will now rest with the stockholders. If the lease to the Pennsylvania Company is rejected by them, the second offer may receive consideration. The amount of property to be transferred is of a value of $40,000,000, embracing railroad lines and canals that cover seventeen out of the twenty-one counties of the State.

TRENTON, N. J., May 10.—The stockholders of the Camden and Amboy Railroad and Delaware and Raritan Canal met to-day in annual session. The present directors in both companies were re-elected by very large majorities. The relative strength of parties in the joint board is seven against leasing and nine in favor.

Newark and New York.—The lease of the Newark and New York Railroad to the New Jersey Central Railroad was effected on Monday, the agreement being that the lessees pay seven per cent. per annum, semi-annually, on the entire cost of the road. The lease is to be perpetual. This is in effect a mere formality, forasmuch as the great bulk of the stock in the local road was controlled by stockholders in the Central.

— The representatives of the Morris Canal Company have signed the lease of the Lehigh Valley Railway Company, it having been previously signed by the representatives of the Railroad Company. Since the execution of the lease the stock of the Canal Company has risen in the market from 80 to 120.

— Earnings of the Central Pacific Railroad Company:

For the month of April, 1871	$756,250
For the month of April, 1870	633,758
Increase this year over 1870	$122,492
Earnings first four months, 1871	$2,392,685
Earnings first four months, 1870	1,929,370
Increase this year over 1870	$463,315

Chicago and Northwestern.—The following is the official comparative statement of business for ten months of the fiscal year from June 1, 1870, to March 31, 1871, of the Chicago and Northwestern Railway Company:

RECEIPTS.

	1869–70.	1870–71.
Gross earnings	$10,438,453 50	$9,811,171 62
Decrease in 1870-71	$317,281 82, equal to 5 92-100 per cent.	

TOTAL CURRENT CHARGES.

	1869-70.	1870-71.	Dec. '70-71.
Operating expenses	$6,581,999	$5,206,122	$1,375,876
Taxes	385,022	327,899	61,122
Interest on bonds and interest and exchange	960,087	916,171	43,925
Sinking funds	45,120	45,120	....
Dividends paid on Chic. & Mil. RR. stocks.	1,698	994	704
Rent on Iowa roads	876,297	791.033	85,264
Total	$8,850,225	$7,287,331	$1,562,894
Saving in the above items in 10 months, in 1870-71,	$1,562,894 56, equal to $17 65-100 per cent.

Materials for coming season	217,549
Cash on hand and due from agents	1,159,405
Total	$2,589,574
The expenditures on account of new capital have been as follows:	
Additional real estate	$253,516
Steel rails	346,575
New land and shops at New Haven	386,399
Bridgeport bridge	46,499
Coscob bridge	76,279
New equipment	48,000
New depots and depot grounds at New Rochelle and Portchester and bridges	52,435
Total	$1,211,705

The net earnings of the road have been $62,609 more than they were the preceding year. Since the last annual report a contract has been entered into between this company and the Hartford and New Haven Railroad Company, by which all the property of both companies has become joint property, under the control and management of a board of ten mangers, selected equally from the the board of directors of each corporation. Under the above contract this company is entitled to receive annually fifty-seven one-hundredths of the net earnings of both roads, and the remaining forty-three one-hundredths will belong to the Hartford and New Haven Railroad Company. Each company's share of the net earnings will be paid over to their Treasurer, to be divided among their stockholders or otherwise disposed of, as may be determined by their board of directors. On the 1st of November last the board of directors, under and pursuant to a written request of the board of managers, and for their account, entered into a contract with the Shore Line Railway Company for a perpetual lease of their railroad, extending from New Haven to New London, at an annual rent of $100,000. The receipts from operating the Shore Line Road during the five months just elapsed were $129,321, while the expenses and rent during the same period amounted to $119,169. It is not deemed probable that the earnings of the Shore Line Road for the first two or three years of the lease will be sufficient to pay the annual rent, as considerable outlays must be made in rebuilding bridges and improving the roadway and equipment. The board of managers will cause this road to be gradually relaid with steel rails, and placed in all respects in a condition to compare favorably with the main lines, with the full expectation that the increased facilities and additional improvements will add materially to the business of the road. Hereafter the annual report to the stockholders of this company will be a report of the business of the entire line, subject to the control of the board of managers.

New Jersey Railroad Lease.—The N. Y. *Times* gives the following:

The lease of the United Railroads of New Jersey to the Pennsylvania Railroad Company, which has for months past been the subject uppermost in the minds of railroad men, capitalists and politicians of New Jersey, was submitted to the United Board of Directors at Trenton yesterday. The committee to whom the matter had been confided had a meeting on Saturday last in Philadelphia in conjunction with a similar committee from the Pennsylvania company, and after eleven hours debate, all the provisions of the lease were finally agreed upon. Their work was approved by the directors of the New Jersey companies yesterday —only a few verbal alterations being made—and the meeting adjourned to give the committee time to make the required alterations. The Directors will then have another meeting, after which the lease will be submitted directly to the stockholders.

Before the meeting adjourned yesterday an offer was received from another powerful company, which it is not necessary to name, submitting proposals equally favorable to those made by the Pennsylvania, and offering, in addition, a bonus of nearly $1,000,000. This offer will, of course, affect materially the negotiations now going on, but, although the security offered is a first-class description, the matter will now rest with the stockholders. If the lease to the Pennsylvania Company is rejected by them, the second offer may receive consideration. The amount of property to be transferred is of a value of $40,000,000, embracing railroad lines and canals that cover seventeen out of the twenty-one counties of the State.

TRENTON, N. J., May 10.—The stockholders of the Camden and Amboy Railroad and Delaware and Raritan Canal met to-day in annual session. The present directors in both companies were re-elected by very large majorities. The relative strength of parties in the joint board is seven against leasing and nine in favor.

Newark and New York.—The lease of the Newark and New York Railroad to the New Jersey Central Railroad was effected on Monday, the agreement being that the lessees pay seven per cent. per annum, semi-annually, on the entire cost of the road. The lease is to be perpetual. This is in effect a mere formality, forasmuch as the great bulk of the stock in the local road was controlled by stockholders in the Central.

— The representatives of the Morris Canal Company have signed the lease of the Lehigh Valley Railway Company, it having been previously signed by the representatives of the Railroad Company. Since the execution of the lease the stock of the Canal Company has risen in the market from 80 to 120.

— Earnings of the Central Pacific Railroad Company:

For the month of April, 1871	$756,250
For the month of April, 1870	633,758
Increase this year over 1870	$122,492
Earnings first four months, 1871	$2,392,685
Earnings first four months, 1870	1,929,370
Increase this year over 1870	$463,315

Chicago and Northwestern.—The following is the official comparative statement of business for ten months of the fiscal year from June 1, 1870, to March 31, 1871, of the Chicago and Northwestern Railway Company:

RECEIPTS.

	1869-70.	1870-71.
Gross earnings	$10,438,453 50	$9,811,171 62
Decrease in 1870-71	$817,281 88, equal to 5 92-100 per cent.	

TOTAL CURRENT CHARGES.

	1869-70.	1870-71.	Dec. '70-71.
Operating expenses	$6,581,999	$5,206,122	$1,375,876
Taxes	385,022	327,899	61,122
Interest on bonds and interest and exchange	960,067	916,171	43,935
Sinking funds	45,120	45,120	....
Dividends paid on Chic. & Mil. RR. stocks	1,698	994	704
Rent on Iowa roads	876,297	791.033	85,264
Total	$8,850,225	$7,287,331	$1,562,894

Saving in the above items in 10 months, in 1870-71, $1,562,894 56, equal to $17 65-100 per cent.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, May 12, 1871.

There is more general inclination to enter upon mercantile transactions, and the business of the past week has been good, both for export and home use, and, as many of the leading staples of domestic produce are getting within a compass which permits them to be controlled, there is some revival of speculation, favored by an extremely easy money market.

Cotton has shown some speculative excitement since Wednesday, and Middling Uplands closed at 15¾c. Breadstuffs show some depression in Flour and Wheat, but are firmer for Corn and Oats. Groceries have been fairly active, but the advance in Sugar has not been maintained. Good Refining closes at 9¾c.

Kentucky Leaf Tobacco has been fairly active. The sales of the week foot up 900 hhds., of which 700 hhds. are for export. Prices are firm at 5½@5¾c for Lugs, and 6@10½c for low to fine leaf. A feature in the business of the week has been a demand for the better grades, to the comparative neglect of lugs and low leaf. Seed Leaf has been dull and inanimate, but prices have ruled steady. The sales of the week embrace 108 cases new crop Ohio and 100 cases 1869 crop Connecticut, on private terms; 85 cases new crop Pennsylvania fillers, 13½c; 150 cases 1869 crop Massachusetts, 30@37½c, and 150 cases 1869 crop Connecticut wrappers, 35@65c. Spanish Tobacco has met with a steady demand; 450 bales Havana sold at 85c@$1 10 per lb.

Provisions have been less active, and Hog products have declined. At the concession, however, the market showed much firmness to-day, with a tendency towards some reaction. There was a large jobbing business in Pork at $17@$17 25 for mess, $15@$15 50 for prime mess, and $14@$14 50 for prime. Lard is firm at 11⅛@11½c for prime Western steam. Bacon 9c for long clear, and 8½c for Cumberland. Hams, 11½@11½c for sweet pickled. Beef has ruled rather firmer. Butter has been drooping, but Cheese, though irregular, has done rather better.

Freights have advanced to 8d for Grain by steam to Liverpool with 8½d generally demanded at the close. Several Grain charters have been made, mostly at 6s 3d for British and French ports direct, and 6s 6d to Cork for orders. Charters have also been made for vessels to carry about 75,000 bbls Petroleum, mainly at four to five shillings for Ports in the North of Europe.

East India goods have been without especial feature, except the sale of 4 500 bags Calcutta Linseed to arrive at $2 30, gold, 60 days. Fruits are dull; layer Raisins sold at $2 55, and quarter boxes Sardines at 17½d; Fish have been moderately active and prices steady. Whiskey closes quiet at 91½c. Tallow firm but quiet at 9c. Shipping hay has declined to $1@1 05 per 100 lbs. Nothing new in oils, except a decline in Crude Whale to 56c for prime Northern.

Metals have been without new feature, and but moderately active. Spirits Turpentine has been variable, but closes very firm at 52@52½c with the stock in few hands. Rosin is firmly held but without business of importance, $240 bid for strained. Hops dull and unchanged.

Petroleum has been very active for Refined, the demand being mainly speculative and prices are decidedly higher, closing at 25c on the spot; Crude has been more active at an advance, closing at 14½@14½c in bulk. Wool has been more active, especially foreign; the small supply checks any large movement in domestic.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles from the port of New York since January 1, 1871, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show *total values*, including the value of all other articles besides those mentioned in the table.

COTTON.

FRIDAY, P. M., May 12, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening May 12. From the figures thus obtained it appears that the total receipts for the seven days have reached 46,849 bales against 51,432 bales last week, 56,685 bales the previous week, and 63,042 bales three weeks since, making the total receipts since the first of September, 1870, 3,669,659 bales against 2,674,933 bales for the same period of 1869–70, showing an increase since September 1 this year of 994,726 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	19,230	14,060	Florida bales.	65	155
Mobile	3,863	3,866	North Carolina	518	793
Charleston	3,50[illegible]	2,993	Virginia	2,937	2,504
Savannah	4,676	6,614			
Texas	6,266	4,061	Total receipts	46,849	38,286
Tennessee, &c	5,794	3,202	Decrease this year	8,563	....

The exports for the week ending this evening reach a total of 76,620 bales, of which 49,497 were to Great Britain, 9,872 to France and 17,251 to rest of the Continent, while the stocks as made up this evening, are now 380,346 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Week ending May 12.	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans	18,291	16,167	34,458	21,093	141,138	130,135
Mobile	8,843	1,200	10,043	7,513	25,204	43,005
Charleston	2,377	300	2,677	1,103	18,404	10,455
Savannah	3,911	7,070	10 981	3,601	32,416	44,884
Texas	3,327	1,319	4,666	5,879	63,184	31,920
New York	11,583	1,017	12,630	8,192	76,000	45,000
Other ports	1,165	....	1,165	859	24,000	17,000
Total	49,497	27,123	76,620	51,240	380,346	322,699
Total since Sept. 1	2,107,493	666,646	2,763,139	1,542,240	....	....

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 25,380 bales, while the stocks to-night are 57,947 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to May 5, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1. 1870.	1869.	EXPORTED SINCE SEPT. 1 TO— Great Britain	France	Other For'gn	Total.	Northern Ports.	Stock.

We have had a firm though rather quiet market the past week. During the early days of the week there was no change in prices and the sales were moderate, but later with the receipts at the South rapidly falling off, and the reports with regard to the new crop not construed favorably, while at the same time Liverpool showed new strength, prices here rallied, the grades below Low Middling advancing ⅝@¾c., and Low Middling and grades above ¼c. To-day this upward movement has been continued, Middling closing to-night at 15¾c. against 15¼c. last Friday, and Ordinary at 11⅝c. against 10¾c. a week ago. There appears to be an undercurrent of strength to the market, based on the idea that cotton compared with other commodities is now relatively cheap, and that, therefore, with consumption at its present high rate, the smallest disaster to our crop, would result in some recovery in prices. Hence, although the offerings continue fair, holders are by no means free sellers, and prices are easily turned upwards. For forward delivery there has been a good business doing at an advance corresponding to the advance for spot cotton. Low Middling closed to-night at 15½c. for May, 15½c. for June, 15½c. for July, 15½c. for August, and 15½c. for September. The total sales of this description for the week are 88,129 bales, including 1,479 free on board. For immediate delivery the total sales foot up this week 19,153 bales, including 10,243 for export, 6,037 for consumption, 1,418 for speculation, and 1,455 in transit. Of the above, 730 bales were to arrive. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	11⅛@....	11⅛@....	11⅛@....	12 @....
Good Ordinary	13⅛@....	13⅛@....	14 @....	14⅛@....

				2,700	14⅞		

The sales during the week of free on board have reached 1,479 bales. The particulars of these sales are as below:

200 free on board at Savannah p. t.
479 free on board at Baltimore p. t.
800 free on board at Charleston p. t.

The following exchanges have been made during the week:

1,000 May for 1,[illegible]00 June, even terms.
1-16c. paid to exchange 200 May for 200 June.
⅜c. paid to exchange 500 May for 500 July.
¼c. paid to exchange 500 December for 500 September.

WEATHER REPORTS BY TELEGRAPH.—The South has experienced another week of unpleasant weather. All our telegrams to-night, except the one from Galveston, speak of damage having been done through the excessive rains and cold. Our dispatch from Charleston states that the frost they have had will make replanting necessary in some districts. To precisely the same effect is our telegram from Augusta. From Macon our correspondent telegraphs that they have had three rainy days during the week; that it is raining so much the weeds are becoming troublesome. He also adds that it has been very cold. Yesterday they were compelled to have fires, but to-day it is warmer. Our telegrams from Columbus, Mobile, Selma and Montgomery also

Digitized by Google

give pretty much the same statement of the weather, and of the condition of the plant. At Memphis our correspondent states that the cold, wet weather is making the young plant die out. At Nashville it has rained two days and the balance has been cloudy. The thermometer during the week has averaged at Charleston 68, at Macon and Columbus 64, at Selma 66, at Montgomery 61, at Mobile 67, at Memphis 59, and at Galveston 73.

CONTINENTAL CONSUMPTION.—We published last week the circular of M. Ott-Trumpler, showing the continental consumption for the quarter ending October 1, 1870, and for the six months beginning October 1, 1870, and ending April 1, 1871. If we examine those figures a little more closely, we find they lead to very important results. For instance, they show the following facts:

	Bales.
Consumption (*total*) for the six months, from Oct. 1, '70, to April 1, '71	891,000
Consumption (*per week*) for the six months, from Oct. 1, '70, to Apr. 1, '71	34,269
Consumption (per week) for the quarter ending Oct. 1, 1870	21,692

Now, granting these statements are correct (and they undoubtedly are, so far as they go), the question naturally arises, What was the *actual* weekly consumption on the first of April? It will be remembered that these figures (34,269) are the weekly *average* for the six months. Further, it must be remembered that when that six months began, the weekly average, according to the above statement, was only 21,692 bales. Now the problem is, if we start October 1, 1870, with an *actual* consumption of 21,692 bales, what would the *actual* consumption be each week during the succeeding six months, to bring the *average* to 34,269 bales. As we make it out, the improvement has been regular since that time, and if so, the progression in consumption would have to be about as follows: For October, 24,000 bales; for November, 29,000 bales; for December, 33,000 bales; for January, 37,000 bales; for February, 40,000 bales; for March, 43,000 bales. In other words, the takings of the continental spinners on the first of April, 1871, would thus appear to be 43,000 bales per week. Ott-Tumpler states that on October 1 the stocks at the mills had been reduced to almost nothing, whereas now they have an average supply, but not more. Of course the extent to which they have increased their stock must be deducted from these totals to arrive at a correct conclusion as to consumption. Making then the largest possible allowance for stock larger than Ott-Tumpler admits (say 5,000 bales per week or 180,000 bales increase during the six months), and we would still have a present weekly continental consumption of 38,000 bales without including Russia and Spain. We do not claim for this result perfect accuracy, but it certainly approximates to the truth, and in that view indicates a remarkable fact, considering the disturbed state of the Continent during most of the period in question.

GUNNY BAGS, BAGGING, &C.—The market for cloth opened quiet, but later there was more demand, most parties being of the opinion that prices have touched bottom, and in anticipation of a large cotton crop have bought quite freely for future delivery. At the close there is decidedly more tone, and prices rule firm. The sales are 100 bales, to arrive, late shipments, at 12c. gold, in bond; 100 bales Borneo, in Boston, at 12c. gold, in bond; 100 bales on private terms; 500 rolls Domestic for present, and 4,500 do. for future delivery, reported at 19c. time. Bags have not shared the improvement in demand noticed in cloth, and no sales of straight lots are reported. We quote 15@15¼c. There have been some sales of inferior empty Linseed bags, but no prices are given. Hemp has met with only a moderate demand, but rules very steady in price. The sales are 2,000 bales, per "Bunker Hill," at 11c. gold, 60 days, and 1,500 bales in Boston on private terms. Jute is rather dull, but is steady in price at 5¾@6¼c. gold; 350 bales prime, sold to arrive, at 6¼c. gold. Jute Butts are in good demand from paper makers, as straw is so scarce that Butts have to be used in its stead. The sales are 350 bales on spot, at 4¼c. cash; 700 bales at 4¼c., 60 days, adding interest; 400 bales at 4¾c., 30 days, and 500 bales, to arrive, per "Simila," at 4c., all currency.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	Week ending May 12, 1871.			Week ending May 12, 1870.		
	Receipts.	Shipments	Stock.	Receipts.	Shipments.	Stock.
Augusta	1,260	2,393	16,297	913	3,033	14,508
Columbus	358	1,361	4,632	376	1,808	7,966
Macon	308	1,231	3,538	304	1,243	8,543
Montgomery	404	887	4,731	299	919	6,250
Selma	327	663	2,048	251	739	4,325
Memphis	3,861	6,671	16,190	4,839	4,474	16,472
Nashville*	1,395	2,543	2,350	1,308	2,248	5,275
	7,913	15,749	49,786	8,290	14,514	63,339

*A count of stock at Nashville this week shows 1,000 bales less than the running count called for.

These totals show that the interior stocks have decreased during the week 8,846 bales (being now 13,553 bales less than for the same period of last year), while the aggregate receipts are 377 bales less, and the shipments 1,235 bales more than for the corresponding period of 1870.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons:

	1871.	1870.
Stock in Liverpool.....bales.	966,000	527,000
Stock in London	92,350	37,378
Stock in Glasgow	700	300
Stock in Havre	30,900	85,000
Stock in Marseilles	15,600	12,550
Stock in Bremen	86,344	13,860
Stock rest of Continent	35,600	30,000
Afloat for Great Britain (American)	240,000	180,000
Afloat for France (American and Brazil)	27,000	71,210
Afloat for Bremen (American)	61,497	21,018
Total Indian Cotton afloat for Europe*	282,280	171,000
Stock in United States ports	380,646	322,399
Stock in inland towns	49,786	63,339
Total	2,317,808	1,535,054

*This item includes all India cotton afloat for Europe, and also all cotton afloat for Liverpool other than American.

These figures indicate an *increase* in the cotton in sight to-night of 682,749 bales compared with the same date of 1870.

The exports of cotton this week from New York show a decrease since last week, the total reaching 17,844 bales, against 13,297 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

EXPORTED TO	WEEK ENDING April 15.	April 22.	April 29.	May 6.	Total to date.	Same time prev. year.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 74,725 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in THE CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night:

	Total bales.
NEW YORK—To Liverpool, per steamers Nemesis, 1,760....Idaho, 3,616 ....Scotia, 1,193....England, 2,130....City of Dublin, 883 ...Malta, 719....City of Antwerp, 1,009....Manhattan, 1,158....Algeria, 856 ....per ship Scindia, 606	13,880
To Havre, per brig M. M. Francis, 1,125	1,125
To Rotterdam, per ship J. H. Stamler, 2,784	2,784
To Antwerp, per bark Gen. Birch, 55	55
NEW ORLEANS—To Liverpool, per ships Carpo, 2,875....Marion, 3,378 ....Importer, 3,986....Cordillera, 4,170....per bark Braggio, 295 and 30 sacks seed cotton (=10 bales)	14,714
To Queenstown, for orders, per bark Urkraine, 1,926	1,926
To Havre, per steamer Mercury, 3,066....per ship Memnon, 2,341	5,407
To Bremen, per ship Tamerlane, 2,648	2,648
To Hamburg, per ship Uncle Joe, 2,606	2,606

Digitized by Google

Included in the above totals are from New York 55 bales to Antwerp; from New Orleans, 500 bales to Barcelona; from Mobile, 350 bales to St. Petersburg; from Charleston, 746 bales to Barcelona; and from Baltimore, 50 bales to Amsterdam.

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 111 and 111⅜, and the close was 111⅜. Foreign Exchange market continues strong. The following were the last quotations: London bankers', long, 110⅜; short, 110⅞, and Commercial, 109⅞. Freights closed at ¼d. by steam and 7-32@ ¼d. by sail to Liverpool.

BY TELEGRAPH FROM LIVERPOOL.—

LIVERPOOL, May 12, 5 P. M.—The market opened quiet and closed with a hardening tendency, with sales of the day amounting to 12,000 bales, of which 3,000 bales were taken for export and speculation. The sales of the week have been 78,000 bales, of which 13,000 bales were taken for export and 10,000 bales on speculation. The stock in port is 966,000 bales, of which 592,000 bales are American. The stock of cotton at sea bound to this port is 429,000 bales, of which 240,000 bales are American.

	April 21.	April 28.	May 5.	May 12.
Total sales	47,000	81,000	82,000	78,000
Sales for export	7,000	15,000	17,000	13,000

" 1868-9	122,145	40,527	162,672
" 1867-8	130,311	36,949	176,260

BREADSTUFFS.

FRIDAY P. M., May 12, 1871.

The market for Breadstuffs the past week has shown very little variation in prices, closing feverish and unsettled. It is believed that supplies from the break in the Erie Canal may be expected about the 22nd inst.

The receipts of Flour have been more liberal, but the demand has been fairly active and general—in fact, sellers have at times been able to obtain some advance. The good trade brands have been especially wanted, and family flours have sold very well. The common shipping extras, however, close rather slow at $6 10 @6 15, delivered, with good to choice, $6 20@6 40. The export movement shows some falling off from last year, while the receipts are fully as large.

Wheat has been variable. The receipts by rail and canal have been larger than expected, but the foreign advices have been favorable to sellers, and with a good export demand, prices ruled buoyant until to-day, when, with dull accounts from Liverpool, increased offerings on sale, and an advance of half-penny asked for ocean freights—making 2½d. advance for the week—prices of new Spring fell off 2 cents—selling at $1 55 afloat, closing with not more than $1 54 freely bid, but choice Amber Winter brought $1 62, with good lines salable at $1 60. A feature this week has been the considerable quantities of old Winter Wheat offering. New Spring has sold to some extent for June at $1 50.

Corn has been fairly active and firm. The supply has been barely sufficient for the home trade, and shippers have not been able to do much. To-day, with limited supplies, and a competition between dealers and shippers, prices advanced 2c, Western mixed selling at 80@82c, and prime Yellow 82½c. The Eastward movement of Corn is much less liberal than was anticipated.

Rye and Barley quiet and unchanged. Canada Peas very dull but firmer.

Oats have been in light supply and dull until to-day, when several boat loads of good Western sold at 65½c, in store, and White Ohio brought 69@70c.

The following are the closing quotations:

Flour—		Wheat, Spring, bush	$1 40@ 1 56
Superfine	₱ bbl. $5 50@ 5 90	Red Winter	....@ ....
Extra State	6 10@ 6 35	Amber do	1 55@ 1 60
Extra Western, common	6 00@ 6 40	White	1 60@ 1 90
Extra and double extra Western & St. Louis	6 50@ 8 50	White California	1 70@ 1 90
Southern shipp'g extras	6 75@ 7 15	Corn, Western Mix'd	80@ 82
Southern, trade and family brands	7 50@ 9 25	Yellow, new	82@ 82½
Rye Flour, super & extra	5 00@ 6 10	White	80@ 85
Corn Meal, Western and Southern	3 70@ 4 30	Rye	1 05@ 1 20
		Oats	64½@ 70
		Barley	85@ 1 12
		Malt	90@ 1 15
		Peas, Canada	1 10@ 1 40

The movement in breadstuffs at this market has been as follows:

GROCERIES.

FRIDAY EVENING, May 12, 1871.

The various articles covered by this review have undergone slight fluctuations during the week, but nothing of magnitude, and we have few really new features to report. Sweets are in small stock, present and prospective, and though there has been a slight lull in the demand, importers probably feel more confidence on their stocks than is to be observed on any other article of groceries. Advices from the interior in regard to the amount of goods wanted are somewhat cloudy, though there is a feeling among sellers that as soon as the supply of breadstuffs now pushing for tide water shall have been realized upon, the funds thus obtained will be invested in foreign goods for return freights. One thing, however, is certain, buyers have thus shown a desire to keep all operations within the bounds of certain wants, and most strenuously resist all attempts to force values to an extreme range, any decided advance at once checking the demand, after current orders have been filled.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black....	7,479 pkgs.	Laguayra ..	846 bags.
Green.....	3,581 pkgs.	Other.....	1,934 bags.
Japan.....	3,385 pkgs.	Sugar, Cuba..	5,927 boxes.
Various.....	3,339 pkgs.	Cuba.....	7,031 hhds.
Coffee Rio....	10,638 bags.	Porto Rico	1,040 hhds.
Java.....	7,200 mats.	Other.....	968 hhds.
Maracaibo..	2,513 bags.		

Sugar, Brazil.	10,253 bags.
Manila, &c..	509 bags.
M'las'es, Cuba	1,581 hhds.
Port Rico.	224 hhds.
Demerara..	88 hhds.
Other.....	204 hhds.

*Hhds. include bbls. and tcs. reduced

Imports this week at this port have included 32,248 bags of Rio Coffee, 3,113 do. of Laguayra, and 3,420 do. of sundry kinds. The receipts of Sugar are 12,941 boxes, 9,368 hhds. and 3,973 bags. Of Molasses 1,968 hhds. have arrived. In Tea the imports are 371,585 lbs. of black, 772,279 lbs. of green, and 617,819 lbs. of Japan.

The stocks in New York at late, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at date.		Imports at leading ports since January 1.

TEA.

There has been less general activity in this market during the period under review, the pretty liberal purchases during the two or three preceding weeks having met the most urgent wants of jobbers. Still, on the whole, the movement has been fair and, all grades came under treaty, with prices ruling at least steady, while in some cases there was quite a decided firmness, choice Greens and Oolongs being considered the most desirable stock, and now and then a fine chop of Japans has done very well. The condition of affairs is probably not quite as satisfactory as importers and large holders would desire; but there does not appear to prevail the rather discouraging tone noticeable early in the spring, and the inclination to withdraw desirable samples is rather increasing. The line trade has moved along to about an average extent from day to day, though a somewhat larger attendance of buyers would have been acceptable to jobbers. Sales of 7,250 pkgs. Green, 4,000 pkgs. Oolongs, and 3,850 pkgs. Japan.

The imports this week include 371,585 lbs. of black per "Caernarvonshire," from Foo Chow; 772,279 lbs. of green, per "J. S. Stone," from Shanghae, and 617,819 lbs. of Japan per "Coulnakyle," from Yokahama.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871.....	10,519,360	12,028,119	4,393,581	26,941,060
1870.....	11,910,317	10,429,056	4,251,639	26,591,012

The indirect importations, including receipts by Pacific Mail steamers via Aspinwall, have been 9,971 pkgs. since January 1, against 30,986 last year. The receipts of Tea overland by railroad have this week amounted to 3,016 pkgs.

COFFEE.

The feeling in the general market, if anything, is just a trifle better than last week, but not by any means buoyant or particularly stimulating, and a great many of the trade still continue to express much dissatisfaction with the position. On two or three occasions there has been a little spurt of demand from consumers, either on direct purchases or mail orders, but the anticipation of an increased interior distribution arising therefrom have not been realized and the disappointment felt is very noticeable. In some cases values have been slightly modified again, but rates are now so low, and the margin for profit so greatly contracted that importers appear to have settled into a sort of positive determination to resist all further calls for liberal concessions, and hold their goods until buyers get ready to take them. On Brazils holders could still be found who were willing to shade somewhat on odd, undesirable lots, or even good grades, to prompt buyers, but in a general way nearly former quotations have ruled all the week, and the disposition has been to keep the market as free from pressure as possible. The position, in fact, seems to be simply this, that the absence of any certain demand takes away a large advantage from owners, and should they attempt to realize, even present low and unremunerative rates would have to be shaded somewhat, but with buyers appearing in any force, a reaction is almost certain, as the stocks are small, and few additions are due. At the outports there has continued a fair movement at about previous rates. West India grades, at some reduction in price, have sold with rather greater freedom, and as the increasing tendency of supplies was therefore checked, importers are more steady at the decline. Java is dull for want of stock, though jobbers have been distributing fair amounts at full prices, from the supply in second hands. Sales here of 7,117 bags Rio; 7,000 bags Maracaibo, 1,300 bags Laguayra, 300 bags Savanilla, 220 bags Costa Rica, and from second hands 3,000 mats Java. Sales at Baltimore of 8,621 bags Rio, at Philadelphia 4,900 do, at Mobile 3,819 do. and at New Orleans, 3,749 bags do. At Boston 520 mats Singapore.

Imports this week have included 32,248 bags of Rio Coffee by "Ethiopian," "Electra," "Benita," "Netherton," "Mory" and "Ptolemy;" 4,695 do. Santos by "Johannes Kier" and "Mary" and 3,426 do. of sundry kinds by the steamer "Henry Chauncey."

The stock of Rio May 11, and the imports since Jan. 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.
Stock.....	76,036	....	39,640	11,429	6,710	2,000	135,815
Same date 1870.....	56,607	....	12,884	2,000	3,000	....	51,491
Imports.....	260,258	14,805	210,121	110,502	88.079	5,500	689,265
" in 1870.....	214,283	....	173,066	70,827	17,302	3,045	478,543

Of other sorts the stock at New York, May 11, and the imports at the several ports since January 1, 1871, were as follows:

In bags	New York. stock.	New York. import.	Boston import.	Philadel. import.	Balt. import.	N. Orle's import.	Total imports at all the ports

* Includes mats, &c., reduced to bags.

SUGAR.

A further advance has been obtained on Raws since our last report, and a pretty good business transacted, but the market, though generally strong, has lacked the extreme buoyancy previously current. Importers and holders have, as a rule, continued to find the Cuban accounts encouraging, and none would probably have at any time been willing to part with any considerable quantity of goods; yet the anxiety to operate has been more decided in many cases on the part of sellers than of buyers. The speculative call died out after the first few purchases, and this left the outlet for goods dependent upon the wants of the Trade and Refiners. The former required about the average small parcels taken from day to day during the season so far, and the latter, with their production selling less freely, made a corresponding reduction in the amount of raw goods handled, and sales from first hands were a little slow in consequence. In the meantime there was a slight increase in the accumulation of supplies and offerings from wharf were made at figures showing that owners deemed present prices about as profitable as putting stocks in store, and would show some favors to buyers who would relieve them of consignments without further trouble. Taken altogether, the market may be called a little slack and uncertain, but with the position pretty well under control, a revival of the

Digitized by Google

demand would be sufficient basis for sellers to again secure all the advantage. Refiners were quick and excited for a day or two following our last, and prices further improved on all grades, though Powdered still appeared to do rather the best. The increased cost, however, checked the demand as soon as orders were filled, and the market became rather weak. It is evident that consumers of Sugars, as well as all other articles of groceries, are determined not to pay extravagant prices, and the Trade are commencing to understand this fact. The sales of Raw embrace 5,021 hhds. Cuba, 550 hhds. Porto Rico, 150 hhds. St. Croix, 100 hhds. Demerara, 675 hhds. Martinique, 5,357 boxes Havana, 900 bags West India, and 70 hhds. Melado.

Imports at New York, and stock in first hands, May 11, were as follows:

	Cuba, bxs.	Cuba, *hhds.	P. Rico, *hhds.	Other *hhds.	Brazil, bags.	Manila, &c, bags.	Melado hhds.

MOLASSES.

The general position of the market for foreign goods is unchanged, business footing up moderate, and prices ruling very firm; indeed, if there be any variations at all it is in slightly increased bids for first-class grades, and all aiming to the moderate supplies. Buyers are not over anxious in their movements, but still are unsatisfied with the amounts on hand, and would readily make room for a few more cargoes, especially of choice boiling or grocery qualities. The inferior sorts are still much neglected, but medium grades have been under negotiation, and with the entire accumulation, only moderate, the feeling is better throughout, and holders refrain from urging the market. Domestic is still in large general supply, and not meeting with much demand, but holders seem to feel pretty confident that good management will enable them to eventually work off all they have on hand, and full former rates are asked. Syrups selling well on grades ranging from 45c to 55c, but 40c and 60c stock both attract a fair amount of attention. Sugar House Molasses has been in good demand, and prices advanced most, sales now standing at 20c in hhds. and 24c in bbls. Sales during the week of 314 hhds. Cuba Muscovado, 980 hhds. Porto Rico, 530 hhds. St. Croix, about 125 hhds. English Island in small lots, and 775 bbls. New Orleans.

The receipts at New York, and stock in first hands, May 11, were as follows:

* Including tierces and barrels reduced to hhds.

SPICES.

There has been some negotiation on invoices in first hands, but nothing of any magnitude in the way of sales accomplished, and the market has not shown much activity in a wholesale way. There does not appear to be many if any, really new features, holders of the stocks insisting upon former figures in most cases, and neither offering with freedom or showing a desire to attract buyers, while jobbing dealers have enough goods on hand to meet their current wants, though assortments are not first-class. Cassia, and possibly Cloves, have shown occasional signs of slight weakness, but all other grades are stiff. The retail business has been fair, and values range about as last quoted, with a reasonably steady tone on most goods, though on odd lots buyers have now and then gained a slight advantage.

FRUITS, &c.

The market for all kinds of Foreign Dried fruits has continued quiet, and prices for many kinds have further declined. Layer Raisins have been particularly heavy, as many of the jobbers have been anxious to sell their stock; prices have fallen off 5@10c. per box since our last; the larger holders are, however, holding their stock with more confidence, and refuse to accept present rates. The stock of half and quarter boxes is, compared with whole boxes, larger than usual at this season of the year, and holders are particularly anxious to get rid of them, as later in the season the demand for them is very light. A full lot of quarters sold at 50c. per box. Currants have sold moderately, mostly for export, but at a slight concession. Prunes are rather quiet, and still favor the buyer. Sardines have moved to quite a large extent at prices lower than heretofore quoted, but the close is again firmer at last quotations. Nuts generally rule quiet, and a small decline may be noted in most kinds. Citron is scarce. Fire Crackers are selling fairly at full former prices.

Foreign Green continues in steady active demand, at full prices. Sales of Oranges from store at $4 75@5 25, and Lemons at $5@5 50. West India kinds are in good supply. Pineapples are arriving quite freely, and sell at easier prices. We note sales of Baracoa Bananas at $1 87½@2 per bunch. Jamaica do. $2 50@3 per bunch. Bahama Pineapples, $15. Havana do, $10@12 per hundred, and Baracoa Cocoanuts $35 per thousand. At the auction sale to-day Valencia Oranges sold at $6 50@7 37½ per case.

Domestic Dried are firmer and more active for Apples, and the feeling is decidedly more buoyant than last week. No large demand is, however, anticipated, and holders generally sell willingly at 5½@6c for prime State. Quarters unpeeled Peaches are steady, but still quiet. Prime pared Peaches are scarce, and our quotations for them are not more than nominal. Pitted Cherries are firm, Plums and Raspberries without particular change. Peanuts are again becoming more active, and buyers are meeting the views of holders. Pecans are slow.

Domestic Green are firm for Apples, and a fair demand for this season of the year prevails, all the stock is held by a few parties; they sell at $6@7 per bbl. Southern Strawberries sell at 25@35c per quart, Cherries at 12c per lb. Cranberries are dull and nominal.

ADVICES FROM PRODUCING MARKETS.

From the London *Produce Markets Review*, of April 22, the position of the staples of Tea and Sugar in the markets of Great Britain are given with interesting particulars. In Tea it was noted that this season there had been no regular fall in prices as formerly, the large invoices constantly arriving tending to keep the market even, at low but paying prices. The custom of holding Teas in stock for a "rise" had, until a year or two, been the practice of many importers, at some time holding certain grades for three or four years. The importations since January 1 were 60,000,000 lbs., nearly the whole of which had been placed upon the market, which had naturally led to a depression in the market, though the total amount afloat (including that from India) was estimated at 14,000,000. The tendency of prices generally was considered to be upward, in fact this tone was already felt in black leaf Congou.

The market for Sugar had suffered a marked change, with an entire absence of the speculative demand, and a quiet market for consumption. Prices for Raw as yet had not declined, but with the new crop coming in, which, if placed on the market, present views of holders could hardly be realized. It was said that the French people, in place of loaf sugar—which was in so small supply—have used quantities of the pure white raw beet crystals, "the latest fruit in the constant progress of sugar making."

Statement for the four principal markets of Great Britain since January 1 to April 15:

	1870.	1871.
Landings ..... tons.	126,5 9	121,247
Decrease this year, 5,302 tons.		
Consumption	110,412	158,619
Increase this year, 48,207 tons.		

Rio Coffee.—The market at Rio on the 5th of April was in a firm position, owing to the demands of the holders of Coffee for higher prices. For the preceding fortnight sales were some 40,000 bags, but at the close exchange had fallen off, and exporters bought more freely. Stock at date comprised 150,000 bags. Daily arrivals had averaged about 5,700 bags per day. The brokers have lowered their quotations, but these must be considered nominal.

Cuba Sugar.—CLAYED.—HAVANA, May 5.—The conclusion of grinding operations almost everywhere on the Island, with crops showing an average decrease of 20@25 per cent, combined with better cable quotations from the United States and London, has imparted a firmer tone to our Sugar market; and the suitable descriptions for those quarters and for the South of Europe (mostly for Spain) have been dealt in extensively; business, however, having again been curtailed by the want of more ample supplies of desirable lots and the resistance of many holders to meet the demand freely, even at the high figures which are being paid. The sales which have been reported during this week amount to about 25,000 boxes.

THE DRY GOODS TRADE.

FRIDAY, P. M., May 12, 1871

There has been a slight improvement in the jobbing trade during the past week, the demand for small assorted lots being active, in consequence of a more liberal retail distribution. The mild weather drew out a better attendance of buyers from the interior, representing the near-by as well as the Western trade, while the improved demand from consumers has also broken stocks to such an extent that orders are coming in for "sorting up" lots, and the aggregate sales effected have been somewhat in excess of those of two or three preceding weeks. It is said that the retail trade in many sections of the West and Southwest has been checked by the early opening of the spring, which has given farmers an opportunity to begin their farm work some two or three weeks sooner than usual. Being thus engaged, the purchases by those living at a distance from stores are likely to be delayed until their early spring work is over, and the trade during June will be, it is thought, unusually heavy.

No definite idea can be formed as to whether the opening of the fall trade will be early or late. The advance in prices on all classes of woolen fabrics would naturally have a tendency to check speculative purchases, and it is not improbable that sales of these goods will be made only to such buyers as require goods either for manufacturing clothing or to transport to distant and inaccessible markets. There is no apparent prospect of a rise on cottons, with the exception of prints, which are likely to be higher in consequence of the high cost of printing cloths. As this is entirely the result of speculation, it is doubtful that buyers will have sufficient confidence in the stability of prices on these goods, to purchase early or in very large amounts. The market is firm on other goods, and in some instances the scarcity of goods gives prices an upward tendency.

DOMESTIC COTTON GOODS.—The principal feature of the cotton goods trade during the week has been the decline of ¼c in standard brown sheetings. This decline does not appear to have resulted from any overstock in first hands nor from any excess of the production over the present or prospective wants of the trade, and indeed it would be difficult to give any reason for agents making a reduction unless they considered goods too high as compared with the present cost of the raw material. The lower and medium grades are in very short supply and are held at full prices with an advancing tendency on some brands. Bleached goods remain firm at previous quotations. There is a good demand reported for the better qualities of 4-4 goods, and the stock is rather small for this season of the year. Prints are selling well in all desirable patterns of light colorings, and we hear of no concessions being offered to close out accumulated stocks. The prices paid for cloths now and for some time past render a rise on all dark work probable. Colored cottons have sold fairly but are without notable feature.

DOMESTIC WOOLEN GOODS.—The market is well cleared out of light-weights, and the demand for this class of fabrics, both in cassimere and faced goods, is very small. There is a good inquiry for heavy-weights, but it is too early for liberal transactions in fancy cassimeres, the stock carried over from last year being very small, while new work has scarcely begun to come in as yet. In castors and coatings there is a fair trade doing, and some of the most favorably-known makes are largely sold to arrive. An advance of 5@12 per cent has been established on these goods, and should wool continue at its present high cost a still further rise is probable when the demand becomes more general. Fancies have also been advanced in many instances, but in the absence of a general trade quotations on these goods are merely nominal. Flannels are in good demand in the medium and low grades, and are selling at an advance on last season's prices of 5@15 per cent. There is not much inquiry for the better qualities, though a few sales of the best makes are reported. Shawls have been quiet for some days past in the absence of a good retail demand.

FOREIGN GOODS.—With the exception of a few thin fabrics and suitings adapted to the present wants of the interior and city retail trade, there is very little doing in imported dress goods, either with importers or jobbers. Dress silks are in more liberal demand, both fancy and colored silks selling freely at full prices. Foulards and other low cost goods are not so active at the moment, and are offered by jobbers in some instances at a slight concession. Ribbons continue in active demand in all desirable widths and shades, at full prices, while other styles are slow of sale at a decline. In other classes of goods the trade remains about as previously reported, with little activity in any line.

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of leading Jobbers:

BROWN SHEETINGS AND SHIRTINGS are moderately active, but are unchanged beyond a reduction of ¼c on standards, and are apparently firm. Amoskeag A 36 11½, do B 36 11, Atlantic A 36 12, do D 36 10½, do H, 36 11½ Appleton A 36 12½, Augusta 36 11, do 30 10, Bedford R 30 8 Boott C 34 9½, Commonwealth O 27 8, Grafton A 27 7½, Great Falls M 36 11 do S 33 9½, Indian Head 36 12, do O 10, Indian Orchard, A 40 12½, do C 36 10½, Laconia O 39, 12 do B 27 11, Lawrence A 36 11, Lyman C 36 10½, do E 36 11½, Medford 36 11, Nashua fine O 33 11½, do R 36 13, do E 40 14½ Newmarket A 36 10½, Pacific extra 36 11½, do L 36 11, Pepperell 7-4 22½, do 5-4 25, do 9-4 27½, do 10-4 32½, do 11-4, 37½, Pepperell E fine 39 12½, do R 36 11½ Pocasset F 30 8, Saranac fine O 33 11½, do R 36 13, Stark A 36 11½ Swift, River 36 8, Tiger 27 8.

BLEACHED SHEETINGS AND SHIRTINGS are in fair request for this season of the year, but are without important activity in any grade. We quote as follows: Amoskeag 46 16½, do 42 15, do A 36 14½, American A 36 —, Androscoggin L 36, 15½, Arkwright WT 36 13, Ballou & Son 36 12½, Bartletts 36 14½, do 33 13½, Bates XX 36 13, Blackstone AA 36 13½ Boott B 36 13½, do O 30 10, do R 26 8½, Clarks 36 17½, Dwight D 40 18, Ellerton 10-4 45, Fruit of the Loom 36 16, Globe 27 6½, Gold Medal 36 13, Great Falls Q 36 15 Hill's Semp. Idem 36 15, Hope 36 13, James 36 15, Lonsdale 36 15½, Masonville 36 16, Newmarket C 36 12½, New York Mills 36 21 Pepperell 6-4 22½, do 10-4 37½, Tuscarora XX 36 13, Utica 5-4 25 do 6-4 32½, do 9-4 47½, do 10-4 52½, Waltham X 33 11, do 42 15½, do 6-4 22½, do 8-4 27½, do 9-4 32½, do 10-4 37½, Wamsutta 36 20.

PRINTING CLOTHS are largely sold ahead at 7½@7½c. for 64x64's and 6¾@7c. for seconds.

PRINTS are stiff, with a good demand for light work and the stock well reduced. Prices are unchanged, as follows: American 10½, Albion solid 10½, Allens 10½, do pinks 11, purples 10½, Arnold 8½, Atlantic 5½, Dunnell's 11, Hamilton 11, London mourning 9½, Mallory pink 11½, do purples 10½, Manchester 10½, Merrimac D 11, do W pink and purple 12½ do W fancy 12, Oriental 10½, Pacific 11, Richmond's 10½, Simpson Mourning 10, Sprague's pink 11, do blue and White 10½, do shirtings 9½, Wamsutta 7½.

DEALERS IN SOUTHERN AND MISCELLANEOUS SECURITIES,

No. 9 NEW STREET.

Loans Negotiated.

Publication.

THE NEW YORK DAILY BULLETIN,

A First-Class Daily Commercial and Financial Journal.

The BULLETIN furnishes—

1st. The most complete FINANCIAL REPORT published in any daily paper, embracing:

The daily sales and quotations of every Security dealt in at the Stock Exchange and the Mining Board.

The quotations of Securities not on the Stock Exchange list, including Southern Stocks and Bonds.

A transcript of the official register of the Gold Room, showing every quotation from the formal opening to the formal closing of the Room—published in no other paper.

A summary of the daily transactions at the SUB-TREASURY, the GOLD EXCHANGE BANK, and the CLEARING-HOUSE.

A full table of quotations of STERLING and CONTINENTAL EXCHANGE.

THE CHANGES IN THE REDEEMING AGENTS OF THE NATIONAL BANKS, AND THE OFFICIAL PERIODICAL STATEMENTS OF THE NATIONAL BANKS IN EACH STATE, as furnished by the Comptroller of the Currency—published by no other daily paper.

2d. The most accurate and the ONLY DAILY report of the DRY GOODS MARKET, including a full PRICE CURRENT of staple and domestic fabrics, which is corrected daily.

3d. A carefully prepared report on the PRODUCE MARKETS, much fuller in its details than that of any other daily journal, embracing a full Price Current semi-weekly.

4th. A daily statement of the RECEIPTS OF PRODUCE, the IMPORTS FROM FOREIGN PORTS, and the MANIFESTS OF VESSELS CLEARED AT THE CUSTOM HOUSE.

5th. Its CITY COMMERCIAL and FINANCIAL NEWS is fuller than that of any other journal.

6th. In its EDITORIAL DEPARTMENT the BULLETIN gives a fuller discussion of current commercial and financial topics than any other journal in the United States; and in this especially its influence ranks second to that of no other paper in the country.

7th. Its PRICE IS ONLY ABOUT ONE-HALF that of other leading commercial papers, and yet its information is fuller and in all respects as valuable.

N. Y. DAILY BULLETIN ASSOCIATION,
79 & 81 William St., New York.

NEW YORK
State Railroad Bonds.

A First-Class Home Investment.

FIRST MORTGAGE GOLD BONDS
OF THE
Rondout & Oswego RR.

Principal and Interest Payable in Gold

SEVEN PER CENT SEMI-ANNUALLY.

This Road covers 100 miles of the most direct possible line between the Great Lakes and deep-water navigation on the Hudson River, the whole line of which will be completed and in operation on or before October 1, 1872, and give a new line of road to Lake Ontario and the West, 25 miles shorter than any line that can be found.

It passes through the Cement, Flag-Stone and Lumber regions of Ulster County, and the rich agricultural bottoms of Delaware and Green counties, all of which have not heretofore been reached by railroad facilities, and from which sections the formation of the country prevents the construction of a competing line.

The 36 miles of road operated for three months is already paying net earnings equivalent to 7 per cent gold on its cost of construction and equipments. The issue of Bonds is limite dto $20,000 per mile of COMPLETED ROAD, the coupons payable in gold in this city. Price of the Bonds, 90 in currency.

Full particulars of the above may be had of, and the Bonds for sale by,

THE TREASURY AND THE PLETHORA OF BANK NOTES.

It is reported that Mr. Boutwell is about to take measures for reducing the accumulation of bank notes at this centre of the National Banking system. One of the least satisfactory aspects of the financial situation is the extreme ease of our money market, and the consequent stimulus of speculative excitement from the accumulation of idle capital and of bank notes. For several years we have had, at this season, anxious discussions among our city bank officers as to the policy of relieving the money market of part of its burden by sending the notes of country banks to the proper redeeming agents. No practical plan has ever been put in operation, and in the absence of appropriate legislation, there is some doubt whether much can be done towards applying a complete remedy. So long as the country banks are not compelled to redeem their notes in New York, they would be able to remit notes here as fast as any Clearing House machinery can be made to send them home for redemption. Our city banks thus assume a heavy burden; and such of them as allow interest on deposits are compelled to pay a heavy tribute to the banks of the interior. The mischievous results which follow this needless swelling of bank deposits in New York could, however, be partly neutralized if Mr. Boutwell would give instructions at the Treasury that all bank notes which are received there shall be sorted out and sent to the redeeming agencies for payment. This would be a very effective means of checking the unhealthy plethora of the money market, and it might be continued so long as the undue accumulation of bank notes continues at this centre. Mr. Boutwell has full power to do this without any additional legislation, and there is an obvious propriety in the adoption of this policy, for by holding national bank notes the Treasury virtually lends money to the issuing banks without interest, and the notes being payable on demand, no bank can object to its notes being sorted and sent home in accordance with the law.

Another method for accomplishing the same object is the formation of an assorting machinery here in connection with the Clearing House. This plan has however been tried, and the banks found that without compulsory legislation it could not be made to work satisfactorily. Such legislation the country banks have contrived successfully to resist. If the Treasury will adopt the plan suggested above as a temporary palliation of the evil there is little doubt that the proper enactment can be passed through Congress at an early day. We are therefore gratified to learn that Mr. Boutwell has this method of redemption under consideration, and the promptitude with which he has taken action in regard to the double eagles shows that now as heretofore he is ready to apply a remedy whenever he is convinced that the needful power is in his hands. The subsiding of the excitement in the gold market as soon as it was announced that a supply of double-eagles was available at New Orleans, and that meanwhile the mint was engaged in coining large pieces only, adds another illustration to the long list of similar facts showing the vast power exercised over every department of financial affairs by the policy of the Treasury. The inference is irresistible that the Secretary of the Treasury will be regarded as responsible for the judicious use of those vast powers over the monetary machinery with which our defective, anomalous financial system invests him to a greater extent than is enjoyed by the financial minister of any other great commercial nation.

There is this further advantage in the plan here suggested for the relief of the plethora of bank notes. These notes will lie in the vaults of the banks to which they belong until the moment arrives when there is a legitimate demand for an increased volume of currency. When this need comes the notes will flow out of their hiding place, and entering into the general current of the circulation, they will be as salutary as they are now mischievous. We lay no stress on the fact that the Treasury will escape the making of forced loans to these banks to the extent of the notes held. However important, this is but a subordinate matter.

Digitized by Google

The chief danger to be met, the greatest mischief to be remedied, is in the money market, where the plethora of bank notes is producing its usual effects in stimulating speculation.

Although the present monetary aspect is tranquil and rates of interest rule low, the present crisis is by no means one in which we can safely neglect due precautions against possible trouble. Our foreign exchanges are not in a satisfactory state, and any trouble in the European money markets would be likely to affect us adversely. The vast amount of English capital lending here on call is not very likely to be suddenly drawn upon; but our merchants and foreign bankers are by no means reassured, nor is the general condition of financial confidence improved by the fact that the Bank of England has this week lost 3 millions of its gold reserves, while the existing pressure on the British money market is increased by the announcement of a Turkish loan for 30 million dollars, and also of a loan for Spain besides the French Indemnity loan and that of our own new Five per cents which have too many competitors to rise suddenly into very extraordinary favor in London.

RAILROAD CONSOLIDATION AND LEGISLATIVE RESTRICTIONS.

Wall street has been considerably agitated for some days past by the presence in this city of several railroad magnates, prominent among whom are Messrs. J. Edgar Thompson, J. N. McCullough, and Thomas A. Scott, of the Pennsylvania Central Railroad; with the Treasurer, Secretary, General Superintendent and several Directors of the Great Western Railroad of Canada. Rumor is busy as to the precise object of this gathering, and by many speculators the sudden recent advance in Erie shares is supposed to be in some degree due to the doings of these gentlemen, who are supposed to be in communication with Commodore Vanderbilt and with the Erie Board of Directors. Others have declared that these parties, instead of being agreed, are animated by hostility; and that their negotiations contemplate several alternatives, each of which is urged by the road whose interests would be most promoted. Probably the most absurd conjecture of all is that this secret conclave is constructing a great railroad monopoly which shall control the whole traffic to the Pacific slope, and intend with British capital to complete a new through line across this continent for that purpose. This scheme was announced on Thursday in a telegram purporting to have been sent from San Francisco; and some persons, more credulous than discerning, are urging that Congress should interfere by specific legislation to check the dangerous growing power of our capitalists and corporations. The despatch which has helped to provoke this outburst is as follows, and refers to an absurd project of building a rail road on a route long ago surveyed and rejected:

SAN FRANCISCO, May 16.—Papers have been drawn up here to-day securing the most extensive and powerful railroad combination ever attempted in the world. It includes the Pennsylvania Central and connections from the seaboard to the Union Pacific terminus at Ogden, Utah, and on this side the California Pacific (not the Central Pacific, but the Vallego opposition line), which will be extended north to Goose Lake, Oregon, and connecting with the Oregon Railroad to Portland, possibly also to Puget Sound; thence to Christmas Lakes; thence eastward along the south side of Snake River, in Southern Idaho, to a point in easy connection with the Union Pacific, eastward of Ogden.

This route will avoid the heavy grades across the Sierra Nevada, and complete a continuous line from the Atlantic to the Pacific. It will be constructed immediately, all the capital having been secured in Europe for the entire work. No subsidies will be asked.

We are assured that there is no truth whatever in this story, which is supposed to have been published for interested purposes. At the first cursory view most of its statements are not very credible. English capitalists just now are too busy with the preliminary arrangements for their own transcontinental system of Canadian railroads from Halifax to Puget Sound, and are too anxious to construct that new road to the Orient through British territory, to be willing to invest 100 millions of dollars in constructing a link in a new rival foreign line, which would scarcely be able to command a dollar of capital in this city. Moreover every one who has had much to do with the initiation of large engineering schemes well knows that the needful negotiations for 1,900 miles of railroad could not possibly be matured and the capital raised in secrecy. Still, when this scheme was announced on Thursday, it took every one by surprise, and in the best informed circles nobody seemed to have ever heard of it or to have much inclination to believe in its truth. But among the general public there has been, as we have said, a multitude of inquiries and discussions as to this new enterprise. In part this is due to the adroit mention of the Pennsylvania Central Railroad, whose credit it was perhaps designed to injure, and whose reputation for wealth and power, sagacity and success, resembles very closely that enjoyed some years ago under the great railroad engineer, Mr. Brunel, by the Great Western Company of England before its vast resources were squandered and its prosperity destroyed by a magnificent but too prodigal policy of extension. The railroad annals of England show that consolidation may be an evil, and that the union of different lines under one management, however beneficial within certain limits, becomes, when it is pushed too far or too much legislated about, equally mischievous to the public interest and to the stockholders of the roads themselves. Mr. Brunel's road and many others in England, formerly very profitable, were for a long term of subsequent years unable to pay dividends, and have often required the most skilful management to keep them out of hopeless bankruptcy. It is the more important to keep in mind these facts, for there is some foundation for the prevailing fear that the same rage for consolidating vast lines of railroad, which has nearly spent its force in England after causing severe losses to multitudes of investors, is now likely to gather strength and to extend among ourselves. But for this, such rumors about the Pennsylvania Railroad and Commodore Vanderbilt would not rise up day after day in Wall street. The vast power wielded by capital accumulated in few hands gives to the most difficult projects possibility, and of course the tendency to over-expanded consolidation among the railroads, even where it works at last the most cruel injuries to the stockholders, produces for a time magnificent profits. Moreover, such schemes seldom fail to terminate eventually in promoting the growth of national wealth and productive power. Even Mr. Brunel's Great Western road, which has erected, as it were, a great monument of warning to rich corporations how they risk bankruptcy by over-expansion, has exerted an amazing influence in enriching and developing certain districts of England which it traverses. No doubt the same advantages might have been won without inflicting loss and ruin and want upon widows and orphans and frugal mechanics whose invested money was wasted, sunk and thrown away. There is a method of railroad extension which, without these risks of individual suffering and loss to investors will promote production, stimulate national growth, and augment the public wealth.

Hereafter we may endeavor to point out in detail some of these fundamental conditions of railroad extension. For the present purpose, however, one or two general remarks must suffice. And in the first place we must expect a very rapid future enlargement of our network of railroads. We have now in the United States 55 thousand miles of road in operation, or twice as much as we had twelve years ago. At the present rate of growth it will not require a decade to in

Digitized by Google

crease our network to 100 thousand miles, and even then we shall be less thoroughly supplied with railroads than are France or Germany. And we shall have almost four times as many square miles of territory to each mile of road as England has now. In extending these roads amalgamation is inevitable between existing roads and new roads. Being necessary, such consolidation must be left free, and cannot without danger be interfered with by legislation as has been rashly advised in some quarters.

Secondly, every well-placed line, if economically administered and well-built, adds ten-fold its cost in a few years to the available capital of the nation. It does this by giving new values to the real-estate through which it passes, by creating new markets and extending the old markets, by densifying population and thus calling into existence manufacturing industry, by enlarging the area and swelling the volume of our internal and external commerce. In these and other methods railroad extension increases the wealth of the masses of our people, multiplies their means of earning livelihood, and by enriching all orders of the community, raises the standard of comfort among them all. By the same process the pressure of taxation is lessened, for as each man's ability to bear the burden grows, the population increases, and there are more individual citizens to contribute to the aggregate revenue of the government. On this principle it is that we have always advocated as a productive investment of national property, the liberal grants of public land, to such important pioneer railroads as the Illinois Central was 10 years ago in the Mississippi valley, and as more recently have been the Pacific roads in the region of the Seirras and the Rocky Mountains.

In short, the great principles regulating governmental interference forbid whatever hinders the healthy growth of railroads and justify such legislative acts only as foster such growth. The minor evils of consolidation and amalgamation can safely be left to work their own cure, and any legislative manipulations which may be contrived to check them, will probably like the meddlesome remedies of an unskilled physician aggravate rather than relieve the malady.

Private investments in costly works, which, like railroads, are absolutely needful to enable this country to pay its national debt and bear the burden of taxation, should not be cramped or fettered with a single impediment, restriction or disability that can be dispensed with. Our young system of railroads, like all rapidly developing organizations, must be free if it is to grow so swiftly and so harmoniously as to keep pace with the material exigencies of the national life.

RAILROAD EARNINGS FOR APRIL AND FROM JANUARY 1 TO MAY 1.

Nearly all of the roads included in the list below show an increase in their earnings for April, 1871, compared with the same month of 1870, and the decrease of $27,283 on the Ohio and Mississippi and $96,430 on the Union Pacific have no particular significance, as the former road has already earned $93,765 more, in the past four months of this year than in the same period of 1870, and the Union Pacific, while showing a decrease in gross traffic, is also making such an important saving in expenses as to make the net earnings larger than last year. The Central Pacific shows an increase of $122,492; Chicago and Alton $45,615; Illinois Central, 33,574; Milwaukee and St. Paul $40,751, and Toledo, Wabash and Western, the largest increase of any road—$125,511.

The month of April was rather favorable for the railroads than otherwise, and the weather generally such as to favor both the passenger and freight business, while the movement of some kinds of cereals on the Western roads was considerably larger than in the same month of 1870. In January the net increase on 14 roads was $410,836; in February the net decrease on 12 roads was $1,304; in March the net increase on 12 roads was $514,500; and in April the net increase on 12 roads is $509,194.

RAILROAD EARNINGS IN APRIL.

	1871.	1870.	Increase.	Decrease.
Central Pacific	$756,250	$633,758	$122,492	$.....
Chicago & Alton	396,654	348,039	45,615	.....
Cleveland, Col., Cin. & Indianapolis.	283,399	246,046	37,353	.....
Illinois Central	589,661	555,087	33,574	.....
Marietta & Cincinnati	118,173	106,246	11,927	.....
Michigan Central	470,708	412,930	57,778	.....
Milwaukee & St. Paul	483,884	443,133	40,751	.....
Ohio & Mississippi	243,650	270,933	.....	27,283
Pacific of Missouri	285,416	279,543	5,873	.....
St. Louis & Iron Mountain	129,590	101,265	28,325	.....
Toledo, Wabash & Western	444,210	318,699	125,511	.....
Union Pacific	584,540	680,970	.....	96,430
Total	$4,783,130	$4,396,649	$509,194	$123,713

The prospect of large earnings in the current month seems to be very good—the freight movements of the Interior will probably exceed those of May, 1870, and the passenger traffic should also be increased, particularly on those roads leading to the Pacific coast, as the disturbances in Europe will have an important influence in turning the tide of pleasure travel towards California during the rest of the season.

The statement of earnings for the past four months of the year is quite satisfactory. It seems evident that the tendency of railroad business is towards an increase, as shown by the returns given below; and the large earnings which have been made in several years since the war, are apparently not exceptional, but will be continued and increased with the growth of the country. The latest reported earnings of Rock Island and Chicago and Northwestern (these roads having an arrangement for sharing certain specified expenses and profits) have been as follows: The Northwestern Road reports for the ten months, ending March 31:

RECEIPTS.

	1869-70.	1870-71.
Gross earnings	$10,428,453	$9,811,171

Decrease in 1870-71.....$317,281 82, equal to 5 92-100 per cent.

TOTAL CURRENT CHARGES.

	1869-70.	1870-71.
Operating expenses, taxes, interest, &c	$8,850,225	$7,287,331

Saving in the above items in ten months, in 1870-71, $1,562,894, equal to $17 65-100 per cent.

Rock Island as follows:

	December.		January		February.	
	1870.	1869.	1871.	1870.	1871.	1870.
Gross earnings..	$393,468	$465,032	$387,173	$401,275	$361,871	$449,654

A similar conspicuous improvement in net profits (against a decrease in gross earnings) to that shown by the Chicago and Northwestern road, is seen on the Union Pacific, the latter reporting an increase of $358,166 in net earnings for three months from January 1, while the gross receipts were $214,511 less than last year.

EARNINGS FROM JANUARY 1 TO MAY 1.

	1871.	1870.	Increase.	Decrease.

Pennsylvania Railroad.—The company gives notice to shareholders that they have the privilege of subscribing for new stock at par, one share for every six as registered, April 30, 1871. Holders of less than six shares will be entitled to subscribe for a full share, and those holding more than a multiple of six shares will be entitled to an additional share. Subscription will be received and the first instalment of 50 per cent will be payable between the 22d of May and 22d of June, 1871. Second instalment of 50 per cent between the 22d November and the 22d December, 1871. If stockholders prefer, the whole can be paid at the time of subscription, but no subscription will be received after June 22. The semi annual dividend of the company will be paid on the 30th inst., and will probably be 5 per cent or $2 50 per share. Those who wish to offset dividend to the first instalment on subscription will do so at the rate of $15 to $25. That is, the company will pay $15 on six shares of stock, and the subscriber will pay the company $25 as 50 per cent on the first instalment of his share of new stock. The company, it will be seen, gets 40 per cent more in cash than it pays out, while the shareholder gets a share of stock for $50 that is now selling at $65, for every six shares that he owns.

RAILROADS OF PENNSYLVANIA.

The annual railroad report of the Auditor General of the State of Pennsylvania, J. F. Hartranft, Esq., has st beeⁿ published, and we present below an abstract of all the most important points of information in regard to each road. This State report is one of the most valuable issued, and gives much important information. As the custom of managing railroad corporations with entire secrecy, so far as their financial affairs are concerned, is unfortunately becoming more and more prevalent, the public is obliged to rely upon the returns, made once a year to the State authorities, for all the information that is to be obtained about many of these companies, and unless we have laws passed to compel public reports to be made more frequently, there is little prospect of any greater protection to stockholders than they now have. The report for the previous year was published in the CHRONICLE of May 14, 1870.

Name of Company.	Total am'nt now paid in of capital stock.	Total am'nt now of funded debt.	The am'nt now of floating debt.	Cost of road and equipment.	Length of main line of road laid.	Passenger receipts.	Freight receipts.	Total receipts from all sources.	Total* operating expenses.	Rate per cent per annum of dividend.

[From our own correspondent.]

LONDON, Saturday, May 6.

The proposal of the Government for raising the sum required to meet the increased expenditure of the country by resorting to direct taxation alone, that is to say, by the imposition of a six-penny income tax has led to two important debates in the House of Commons during the week. On Monday it was moved by Mr W. H. Smith, the conservative member for Westminister, that it be declared "inexpedient that the income tax should be increased to the extent contemplated in the financial proposals of Her Majesty's Government," but this proposal was negatived by a majority of 85. On Thursday, Mr. McCullagh Torrlus moved that the tax be five pence, instead of six pence in the pound, but after a long discussion, that proposal was also negatived, although the Government majority was reduced 46. The course the Government has pursued with regard to the Budget has been very severely criticized even by its own supporters, and some of the liberal members have refrained from voting on the question at all Had there been any strength in the opposition, and had Mr. Disraeli felt that his influence was sufficiently great to form a strong cabinet, the ministry must have given way; but as the belief is that the accession of the Tories to power would be short-lived and that an unnecessary disturbance would be the result, most of the liberal members, although disapproving of the Budget, have voted with the ministry, and saved its fall. Mr. Lowe, in introducing his budget, said that the Government were desirous of keeping the income tax as low as possible, as a high rate pressed so heavily on the lower middle class. Mr. Bernal Osborne characterized budget "No. 3" as a "budget of revenge." In spite, however, of the hardship to which clerks, &c., of £200 a year and under, will be subject, it must be admitted that the country is better able to pay a six-penny rate now than at any former period. The last six-penny rate was during the Abyssinian war, when the country was nothing like so prosperous, and when official liquidators were compelled to enforce calls upon unfortunate shareholders in defunct companies. Cotton was then much dearer than it is now, and great caution pervaded every department of business. The position of the country is now very different. The war has thrown a large amount of trade into our hands; cotton is abundant and cheap; the woolen trade is healthy; the iron districts are well employed; and bread is at a moderate price. The weather for the growing crops is excellent, and there seems every prospect for the country of a year of unexampled prosperity. Some persons say the prosperity is fictitious; but they are the opponents of free trade, and who continue to shut their eyes to realities. The late war is in itself a powerful argument in favor of free trade, for notwithstanding the magnitude of that terrible struggle, and our important commercial relations both with France and Germany, the loss to this country was comparatively trifling. So widespread is our commerce that any loss we sustain in any particular department, or with any particular country, is compensated in frequent instances, by an improvement elsewhere; and it is remarkable that although within a comparatively short distance of us a fearful war has been raging, and in which we had no right to interfere, our trade of last year was fully equal to any former year.

From the principal agricultural sections of the country the reports received during the week respecting the growing crops are favorable. Wheat is perhaps the least satisfactory, the severe frosts of the winter having caused the plant to decay in many places. At the same time, there is probably less land under wheat cultivation this season as there is evidently more attention being paid to grazing, owing to the very lucrative price now being obtained both for beef and mutton. The "fall" of lambs this year has been unusually heavy, and no doubt equal attention has been paid to the production of beef. Some time must elapse before this year's produce can be brought to maturity; but if the increased supply of stock is in the country, there will be certainly abundance of food for it, for there can be no question about the heavy yield of grass. In a short time our supply of turnip-fed cattle will be pretty well exhausted, and the season for grass-fed stock will be commenced. It may be safely said that our supply of meat during the summer months will compare very favorably with that received last year, which was remarkable for an unprecedented drought. And not only shall we have more meat, but dairy produce will be more abundant, of better quality and cheaper.

The wheat trade during the week has been firm, and although very little change has taken place, prices have shown a hardening tendency.

Annexed is a statement showing the imports and exports of cotton into and from the United Kingdom, from September 1 to May 4, compared with the corresponding period in 1869–70.

	1870–1.		1869–70.	
	Imports.	Exports.	Imports.	Exports.
American.....bales	1,781,672	260,402	988,5[illegible]3	72,301
Brazilian	311,699	34,810	311,449	42,614
East Indian	762,989	380,057	925,760	375,007
Egyptian	201,278	8,118	144,390	3,416
Miscellaneous	179,533	6,357	83,094	10,010
Total	3,240,171	689,744	2,453,056	503,378

There is an entire absence of a demand for gold for export, and the accumulation in the market continues on a rapid scale. The supply held by the Bank of England is now £23,498,220, being £3,500,000 more than at this date last year. So long as such a lamentable state of affairs exists at Paris, money is likely to accumulate here; but it is expected that with the return of order in Paris, large supplies of bullion will be sent away from this market. Good government, however, should be added, for until that is established, even Frenchmen will be unwilling to risk their capital in France. Several Frenchmen have started in business out of France, and among them, I am informed, M. Schneider, late President of the Corps Legislatif and proprietor of the Creuzot Iron Works. The commercial demand for money is good, but the supply being so very large, choice bills are taken at 2½c per cent. New loans continue to be talked about, and it is expected that one for Spain will be launched in a few days. A small loan for £600,000 for Costa Rica will, it is said, be brought out next week. The following are the quotations for money:

Mexican Dollars, per cz last price.	4	10¾	@	4	11¾

There has been an increase of firmness in the Consol market, and British railway shares have further improved in value. With the exception of the lines over which the Continental traffic is carried, the traffic receipts are very favorable. For last week, on 13,908 miles, they were as much as £870,763, against £822,712 last year on 13,654 miles, showing an increase of 254 miles and of £48,051. As the lines traversing the manufacturing districts show very substantial increases, good evidence of the activity of our trade is afforded. Foreign government securities, excepting United States, Brazilian, Russian and Italian, have been dull. Atlantic and Great Western Reorganization Stock has been as high as 15¼ premium, and the certificates of debenture are at 45 to 46. Erie railway shares are much better, on the announcement from New York that the demurrer put in by the directors to the Committee's Bill of Complaint had been overruled, and that the directors were ordered to file their answer in thirty days. The following were the highest and lowest prices of consols and the principal American securities on each day of the week:

	Monday.	Tuesday.	Wed'ay.	Thu'ay	Friday.	Sat'day.
Consols	Holiday	93¼-93¾	93¼-93¾	93¾-93¾	93¾-93¾	93¾-93¾
U. S. 5-20's, 1883		90¾-90¾	90¾-90¾	90¾-90¾	90¾-90¾	90¾-90¾

Illinois shares ($100)		110¾-111¼	110¾-...	110¾ 111¼	110-111	110¾-110

The Frankfort advices state that the stock and share markets continue strong, in the face of a flood of new issues, especially of a variety of American Mortgage and City Bonds. The large amount of interest due on United States government securities is now partially placed in these more speculative channels, the price of United States bonds being too high to induce re-investment. There has also been a demand for six per cent Georgia bonds at 72¼ to 73. Still the market is limited for those descriptions, and American firms, it is stated, "will find themselves in error if they calculate on a large sale for new creations merely because small amounts of old ones have found buyers." There were some subscriptions for Omaha Bridge bonds, "but the advertisement came too late to be operative." California Oregon bonds, guaranteed by the Central Pacific, will be introduced at an early day by a leading firm, and others are to follow. Money continued very abundant.

English Market Reports—Per Cable.

The daily closing quotations in the markets of London and Liverpool for the past week have been reported by submarine telegraph, as shown in the following summary:

London Money and Stock Market.—There has been some little fluctuation in the prices for American securities, with rather a drooping market. Prices have rallied slightly to-day, but close about ¼c. lower that one week ago.

	Sat.	Mon.	Tues.	Wed.	Thur.	Fri.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show a decrease in both dry goods and general merchandise. The total imports amount to $6,561,621 this week, against $7,846,227 last week, and $10,382,026 the previous week. The exports are $4,306,496 this week, against $3,846,933 last week, and $3,910,936 the previous week. The exports of cotton the past week were 13,095 bales, against 17,844 bales last week. The following are the imports at New York for week ending (for dry goods) May 12, and for the week ending (for general merchandise) May 13.

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
Dry goods	$1,332,005	$1,402,998	$1,581,174	$1,795,842
General merchandise	4,441,246	4,185,326	3,670,952	4,765,779
Total for the week	$5,773,251	$5,588,324	$5,252,126	$6,561,621
Previously reported	85,680,403	116,170,375	107,864,780	137,074,773
Since Jan. 1	$91,453,654	$121,758,699	$113,116,906	$143,636,394

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports, for the week ending May 16:

EXPORTS FROM NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
For the week	$4,035,781	$3,871,338	$3,667,044	$4,306,496
Previously reported	65,112,464	60,193,256	61,183,081	86,085,777
Since Jan. 1	$69,148,245	$64,064,594	$64,850,125	$90,392,273

Digitized by Google

The following will show the exports of specie from the port of New York for the week ending May 13, 1871:

Camden & Atlantic Railroad.—The receipts from operations of this road for the year ending Dec. 31, 1870, were:

From passengers.....	$222,069 04
From freight.....	92,094 33
From express.....	15,750 90
From United States mail.....	3,000 00
From miscellaneous.....	1,529 96
Total.....	$334,444 23
Working expenses.....	175,078 21
Balance.....	$159,366 02

In the report of the superintendent the receipts are stated at $334,444 23 for the year 1870, against $321,438 44 in the year 1869—an increase of $13,005 79, and the total expenses in 1870 at $175,215 23, against $231,276 04 in 1869—a decrease of $46,060 81. The percentage of receipts expended in operating in 1870 was 51.14, against 61 in 1869, a decrease of 9.86. The President in his report says:—The earnings and expenses of operating the road, excluding renewals, from the year 1865 to 1870, inclusive, together with the percentage of receipts thus expended, are given in the following table:—

	Earnings.	Expenses.	Profit.	Per cts
1865.....	$266,848 33	$178,350 01	$88,498 31	66·83
1866.....	288,649 95	149,394 54	139,255 51	51·75
1867.....	306,972 03	149,926 73	157,045 30	48·84
1868.....	325,040 84	174,945 74	150,095 10	53·82
1869.....	320,677 65	174,620 02	146,057 63	54·45
1870.....	333,514 87	167,083 29	166,431 57	50·09

The Company have 8 engines, 19 first class and 15 second class passenger, 4 baggage, 2 mail and 89 freight cars. Miles run by engines with passenger trains, 120,760; freight, 32,509; gravel, wood, construction and switching, 10,367—163,636, against 160,166 in 1869, an increase of 3,470.

—Attention is invited to the advertisement of Messrs. Edward Haight & Co., who have just brought out the loan of the Rondout and Oswego Railroad Company, the same being first mortgage seven per cent gold bonds, the issue of which is limited to $20,000 per mile of completed road. The bonds are offered at 90. The road passes through a rich section of the State heretofore deprived of railroad facilities, and is an important internal improvement. When completed the line will be the shortest connecting the great lakes with deep water navigation on the Hudson. The section of the road finished is in profitable operation. Fuller particulars can be obtained of Messrs. Haight & Co.

BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

FISK & HATCH,

BANKERS AND DEALERS IN GOVERNMENT SECURITIES,
No. 5 NASSAU STREET, NEW YORK, May 15, 1871.

THE SIX PER CENT GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD CO. are secured upon a property which, when the extension to the Ohio River, now in process of rapid construction, is completed and fully equipped, will represent a cost of nearly $30,000,000, and an actual value in Roads, Franchises, rights of way, &c., of not less than $50,000,000. The total amount of the loan is $15,000,000, of which one-half has already been sold.

The CENTRAL PACIFIC BONDS negotiated by us, amounting to $25,885,000, have a ready market everywhere, being favorably known and actively dealt in at all the principal Stock Exchanges of this country and Europe, and are readily salable at all times at quoted market price, which is now above par.

The Bonds of the CHESAPEAKE AND OHIO RAILROAD CO. we believe to be of equal value and security, and must in time take a like rank in market value and salable character.

Holders of Five-Twenty Bonds, desiring to fund them otherwise than in the new Five Per Cent Government Loan, may do so with entire safety, at a profit of about 20 per cent, and without reduction of interest, by an exchange for the Bonds of the CHESAPEAKE AND OHIO RAILROAD CO.

Price of the bonds, until further notice, 91, and accrued interest from May 1.

We also buy and sell Government Securities, and the Bonds of the Central Pacific Railroad Co., and as agents of the U. S. Government, will attend to the funding of Five-Twenties into the new United States Bonds.

FISK & HATCH.

BANKING HOUSE OF HENRY CLEWS & CO., 32 WALL ST., N. Y.

Our business is the same as an incorporated bank.

Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed on all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make telegraphic transfers of money to any desired point, and transact every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upward on.

The Imperial Bank, and Messrs. Clews, Habicht & Co., London.

The Provincial Bank of Ireland, The National Bank of Scotland, and all their branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Government and other investment securities; also Gold and Exchange.

Advances made on approved collaterals and against Merchandise consigned to our care.

We make collections of Notes, Drafts, Coupons and Dividends with promptness on all points, and are fully prepared to offer banking facilities upon either currency or gold basis.

GERMAN BANK OF LONDON (Limited).

DIRECTORS.

George Albrecht, Bremen.

GREAT NATIONAL LOAN.

☞ NEW FIVE PER CENT. BONDS OF THE UNITED STATES.

The Treasury Department is now able to promise that the registered Certifi cates of Stock, and a good part of the Coupon Bonds of the New Loan of the United States bearing Five per Cent. interest, payable quarterly in gold, will be ready for delivery early in the present month. The subscriptions to the loan now amount to $62,000,000, and it is expected that the subscriptions and sales will progress more rapidly when the certificates and bonds are ready for market abroad as well as at home. The whole sum of Five per Cents offered to the public generally, and to the holders of United States 5-20 Bonds, without qualification, is $200,000,000. When this amount, to which preference is thus given, is taken up, the remainder of the Five per Cents, $300,000,000, embraced in the new loan of July 14, 1870, for refunding the public debt, will be offered in connection with $300,000,000 Four and one-half per Cents, and any part of $700,000,000 of Four per Cents, the one running fifteen years and the other thirty years.

The following is a copy of the New Five per Cent. Bond, under and pursuant to the New Loan Act of Congress:

FORM OF FIVE PER CENT. BOND.

INTEREST | FUNDED LOAN OF 1881. | FIVE PER CENT.

UNITED STATES OF AMERICA

ARE INDEBTED TO THE BEARER IN THE SUM OF ..... DOLLARS.

THIS BOND is issued in accordance with the provisions of an Act of Congress entitled "An Act to authorize the refunding of the National Debt," approved July 14, 1870, amended by an Act approved January 20, 1871, and is redeemable at the pleasure of the United States after the first day of May, A. D. 1881, in coin of the standard value of the United States on said July 14, 1870, with interest in such coin from the day of the date hereof, at the rate of FIVE PER CENTUM per annum, payable quarterly, on the first day of February, May, August and November in each year. The principal and interest are exempt from the payment of all Taxes or Duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority.

WASHINGTON, ..., 18....

Entered ..... Recorded .....

..... Register of the Treasury.

Registered bonds will be issued of the denominations of $50, $100, $500, $1,000, $5,000 and $10,000, and coupon bonds of each denomination except the last two. The interest will be payable in the United States at the office of the Treasurer, any Assistant Treasurer, or designated depository of the Government, quarterly, on the first days of February, May, August and November in each year.

The interest on the registered stock of this loan, it is determined by the Treasury Department, will be paid as conveniently to the holder as on the Coupon Stock, and personal attendance, or attendance by proxy at the Treasury, to draw and receipt for the interest will be dispensed with *whenever the check of the United States Treasurer, mailed punctually to the address and order of each holder on or before every quarter-day, is preferred to such attendance.* This check, payable in gold coin at the Treasury in New York (or such other office as the Stock is registered at), will be negotiable or collectable on the indorsement of the owner or owners of the Stock. In pursuance of this arrangement, the subscribers to, or purchasers of the Stock in its registered form (which is a complete protection against theft or other losses incident to Coupon Bonds payable to bearer) are advised to give their Post-office address in full, and to notify of any change in the address between quarter days.

The whole proceeds of the new loan will be applied to the payment or redemption and cancellation of the 5-20 years six per cent. bonds, and in addition to these proceeds the 5-20s are now being reduced by purchase at the rate of $10,000,000 per month.

The entire effect, therefore, of the new loan, in connection with the existing Sinking Fund process of the Treasury, is to reduce both principal and interest of the Public Debt of the United States. *The loan creates no additional supply of Government stocks,* while the application of the surplus revenues derived in gold from Customs is constantly lessening, as it has been doing for two years past, the Funded Stocks bearing six per cent. gold interest.

The 1st of May schedule of the Public Debt, which has just been published by the Secretary of the Treasury, shows a reduction in these stocks since the April schedule of $12,215,700 and a further lessening of the yearly interest charge thereon of $732,942. This leaves the total yearly interest charge in gold $111,982,034. In the same month the Treasury paid and canceled $2,470,000 of the Three per Cent. Currency debt, reducing the whole of this debt bearing interest to $51,023,000, and the yearly interest charge thereon to $1,537,470.

The proposed further reduction of the annual interest charge upon the Public Debt by refunding is as follows:

By exchange of $500,000,000 United States six per cents for new five per cents of 1861	$5,000,000
By exchange of $300,000,000 United States six per cents for four and a half per cents of 1886	4,500,000
By exchange of $700,000,000 United States six per cents for four per cents of 1901	14,000,000
Total saving per annum by refunding	$23,500,000

The large and rapid accumulation in the last few years of private capital now retired from active business, and of the cash Savings and Life Insurance premiums deposited with or intrusted to the provident institutions of the country all seeking the most undoubted security, pledged to be kept free of all taxes, under national or local authority, and content, provided this object be assured, with moderate rates of interest—will no doubt ultimately absorb so much of these New Stocks as may not be taken in voluntary conversion of United States 5-20s, or marketed abroad.

The Official Schedule of the Treasury affords the following classification of Funded Stocks (in Gold) of the United States as outstanding on the 1st of May:

FUNDED STOCKS (IN GOLD) OF THE UNITED STATES.

Date.	Coupon.	Registered.	Total.
5-20s, 1862	$383,401,050	$107,564,600	$490,965,650
5-20s, 1864	45,700,000	56,781,600	102,481,600
5-20s, 1865	125,818,550	54,605,800	179,919,350

* Exclusive of accrued interest.

C. C. NORVELL,

In charge of advertising United States loans.

TREASURY OFFICE, NEW YORK, May 2, 1871.

The Bankers' Gazette.

DIVIDENDS.

The following Dividends have been declared during the past week:

COMPANY.	PER CENT.	WHEN P'ABLE.	BOOKS CLOSED.
Miscellaneous.			
American Merchants' Union Express Co...	3	July 1.	June 10 to July 3.

FRIDAY EVENING, May 19, 1871.

The Money Market.—With the continued accumulation of deposits in our city banks, money has been still easier than heretofore quoted, and loans of large amounts to the leading dealers in Government securities have frequently been made at 2 per cent, while 3 and 4 per cent have been the fair quotable rates of the week for loans on miscellaneous collaterals. National bank notes continue to be at a discount of ¼@½ per cent, where the holders wish to obtain greenbacks for them, but deposits having largely increased in the banks there is less pressure to obtain legal tenders, and large amounts of national currency are left untouched in the bank vaults. From the extraordinary ease in money on call, and the general expectation that the market will continue easy for some time to come time loans have naturally been made at lower rates, and 4 per cent per annum on thirty days, or six per cent on six months contracts, have been the ordinary terms, with approved collateral security. No change has been announced in regard to the operations of the Treasury in purchasing bonds or selling gold or negotiating the new United States bonds, and with Mr. Boutwell's policy unchanged there is a general expectation that money will be easy for some months ahead.

The last city bank statement showed a large increase in deposits and legal tenders, but comparatively unimportant changes in the other items, the details being as follows: Loans, decrease, $81,487; specie, increase, $389,229; circulation, decrease, $72,826; deposits, increase, $4,374,478; legal tenders, increase, $2,153,082. The result was to leave the banks $1,466,898 stronger in their excess over legal reserve, the whole excess being $14,629,442.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	May 13, 1871.	May 14, 1870.	May 15, 1869.
Loans and discounts	$269,281,291	$278,400,000	$269,500,000
Specie	16,196,523	32,400,000	15,400,000
Circulation	31,321,479	33,300,000	33,900,000
Net deposits	231,956,015	222,400,000	199,400,000
Legal Tenders	64,272,293	57,900,000	53,600,000

The demand for Commercial Paper has been further stimulated by the low rates of money on call, and we quote 5@6 per cent for the best class of endorsed notes at 60 days, while other grades are also quoted at easier rates than heretofore.

Quotations are as follows:

		per cent.
Commercial, first class endorsed	60 days.	5 @ 6
" " "	4 months.	5½@ 6½
" " "	6 months.	6 @ 7
" " single names	60 days.	6 @ 8
" " "	4 to 6 months.	6 @ 9
Bankers', first class foreign	60 days.	5 @ 6
" domestic	3 to 4 months.	5½@ 6½

United States Bonds.—Government bonds have been more active and higher, chiefly on account of the rise in gold and extreme firmness of foreign exchange. The foreign bankers have been among the principal purchasers, and have taken bonds for shipment in preference to buying bills or shipping specie under the existing difficulty of obtaining suitable coin. Under

Digitized by Google

these influences Five-Twenties of 1862 have sold up to 111¾ against 111, the closing price in our last report; Five-Twenties of 1867 to 114 against 113½, and Ten-Forties to 110 against 109¾. The Treasury purchased $2,000,000 on Wednesday, between 111.23 and 111.49; the total offerings were $4,877,000, a smaller amount than at any previous purchase for several weeks past. Subscriptions to the 5 per cent loan now reach about $65,000,000, and some of the new bonds (coupon $1,000s) have come forward from Washington and been delivered to the subscribers to the loan, in proportion to the respective amounts taken by each of them. The bond is handsomely engraved, and occupies about one-half the page of royal quarto bank-note paper on which it is printed, and the 40 coupons (quarterly for 10 years) the other half. Both bear the vignette of Gen. William Henry Harrison. In regard to any further or different arrangements for the negotiations of the bonds, there has been as yet no announcement, and it has probably been anticipated that the readiness of the bonds for delivery would have the effect of largely increasing subscriptions.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, May 13.	Monday, May 15.	Tuesday, May 16.	Wednesd'y May 17.	Thursday, May 18.	Friday, May 19.

* This is the price bid and asked, no *sale* was made at the Board.

State and Railroad Bonds.—Southern State bonds have been active, and, as a general rule, higher. There is evidently more confidence felt in Southern State bonds as a class, on account of the several influences affecting the securities of the different States, which we have heretofore noticed, the chief of these influences being the more conservative spirit generally felt throughout the South, and the opposition to any further increase of their present indebtedness. Tennessees and New North Carolinas have advanced materially; the latter bonds, after deducting the overdue interest, are obtained at a very low price, and some of the issues are considered to be of unquestionable legality, and recognised as such in the State. In regard to funding the Virginia debt a circular has been issued from the Socond Auditor's office at Richmond, stating substantially that:

1. Persons wishing to fund their stock and interest will apply in person here, or place their stock, with instructions and proper orders as to the kind of stock they elect to take, etc., in the hands of some one outside of this office.
2. Except where stock is to be funded in the same name, and for the same kind of stock, a power of attorney will be required.
3. Where interest only on all registered stock s ands to the credit of a party, 1st July, 1871, the order of the owner will be sufficient, specifying in whose name it shall be funded.
4. The "new certificates" of January 1, 1866, and January 1, 1867, issued for arrears of interest to those periods, will be funded, with all the interest thereon to 1st July, 1871.
5. The funding will commence on the 5th of July next.

Railroad bonds have been in good demand at firm prices. Central Pacifics close at 101¼@102, and Union Pacific First Mortgage Bonds 93½ to 93¾, Land Grants 86⅞ to 87½, and Incomes 88¾ to 89½.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

* This is the price bid and asked, no *sale* was made at the Board.

Railroad and Miscellaneous Stocks.—The stock market has been quite irregular, with considerable speculative activity at times, and prices at the close generally higher than last week. During the first few days the market was comparatively dull, and in consequence of the small business prices seemed to lack strength, except in Union Pacific and Erie, which advanced; but subsequently there was a stronger tone with more business, and on many of the prominent stocks higher prices were made yesterday and to-day than have been reached before this month. New York Central has sold up to 100¾, do. certificates to 95¼, Reading to 115½, Lake Shore to 113¼, Erie to 34¾, Reading to 115½, Union Pacific to 37¼, Rock Island to 115½, and N. J. Central to 114¾. On Erie, Reading, Lake Shore, Union Pacific, and N. J. Central, these are the highest prices of the year. The speculation in Erie, which has been the leading feature of the market, has been accounted for by various reports that the road is to pass into the hands of a new party, Mr. Vanderbilt being most generally named, but the movement is more commonly believed to be the result of efforts made by the Erie parties themselves. The $3,000,000 new stock certificates have been cancelled, and official notice to that effect given to the Stock Exchange. There have been no further developments as regards Pittsburg, which has fluctuated between 125 and 128¼, closing at 127¼. The report being current that a 50 per cent stock dividend will be made next week.

The following substitute for article 21 of the Stock Exchange Constitution was adopted on the 12th instant:

The rates of commission, where no agreement has been made to the contrary, shall be as follows: One-quarter of one per cent on the par value of stocks, bonds, and other securities, when the transaction is made for a regular investor; one-eighth of one per cent on the par value of all securities bought or sold, when the transaction is a speculative one.

SEC. A. The lowest commission on all purchases or sales of stocks, bonds or other securities, made for persons not members of the Exchange, shall be one-sixteenth of one per cent on the par value of all securities bought or sold.

SEC. B. The lowest commission on all purchases or sales of stocks, bonds or other securities, made for members of the Exchange, shall be at the rate of $2 per 100 shares of the par value of $100; and $10,000 par value of bonds shall be equal to 100 shares of full stock.

Any member violating sections A or B of this article, directly or indirectly, shall, upon conviction, cease to be a member of the New York Stock Exchange.

To-day the market has been feverish and excited, with material fluctuations in prices; Erie fell off to 29½@29⅝, and the market closed barely steady at near the lowest figures of the day.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

* This is the price bid and asked, no *sale* was made at the Board.

The Gold Market.—Gold has been active and advancing, and closed at 113 against 111¾ last week. The principal cause of the higher premium has been the large export demand arising from the high rates of exchange, which are kept up by the scarcity of double-eagles for shipment. The difference between small coin and double-eagles continues to be about ¼ per cent, and unless the latter shall be obtained from the Sub Treasury there seems to be little prospect that the supply from hoards and other sources will be sufficient to meet the export demand. The customs requirements and "short" interest in the gold market are also sources of strength to the premium. Customs receipts for the week have been $2,849,000. On gold loans rates for borrowing have ranged from "flat" to 3 per cent, and for carrying "flat" to 2¼ per cent. To-day the rates for carrying were 1 and 2 per cent, and for borrowing 1 and 2 per cent to "flat." At the Government sale of $2,000,000 on Thursday, the total bids amounted to $5,910,000, and the awards were between 111.90 and 112.01. The export of specie last week was about $3,000,000, and the shipments for the week ending to-morrow will probably be near the same figures.

The following table will show the course of the gold premium each day of the week past:

	Quotations. Open-ing.	Low-est.	High-est.	Clos-ing.	Total Clearings.	Balances. Gold.	Balances. Currency.
Saturday, May 13....	111¾	111¾	111¾	111¾	$37,738,000	$1,738,096	$2,827,286

Foreign Exchange.—Foreign exchange has been extremely firm at 110¾@110½ for 60 days sterling, and 110½@111 for short sight. Rates are still supported by the scarcity of double eagles for shipment, which have been worth about ¼@5-16 premium, the supply being rather more liberal to-day, and the lower rate accepted.

Notwithstanding the high quotations the demand for exchange has been rather better, as some parties lately holding off for lower prices of gold and sterling have become discouraged, and pur chased at current rates.

There have been increased shipments of government bonds by the foreign banking houses, but not to such an extent as to balance the trade movement, and exchange will probably continue firm for some time to come. To-day there was a perceptibly easier feeling, and while asking rates were unchanged, transactions were frequently done at a concession. Cotton exports from all ports have been 77,384 bales against 45,787 bales in the same week last year.

Quotations are as follows:

	60 Days.	3 Days.

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES.

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3. The Table of Railroad, Canal and Other Stocks, on another page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column *x=extra; s=stock or scrip.*

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q.—J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name

Delaware and Hudson Canal Company, Rensselaer and Saratoga Railroad, and Albany and Susquehanna Railroad.—At the annual meeting of the stockholders of this Company, held May 9, 1871, the following gentlemen were elected managers for the ensuing year: Charles N. Talbot, Edward J. Woolsey, George Talbot Olyphant, Abiel A. Low, Robert Lenox Kennedy, James M. Halsted, Le Grand B. Cannon, James R. Taylor, Thomas Dickson, John Jacob Astor, Thomas Cornell, William J. Hoppin, Isaac N. Seymour. Thomas Dickson, Esq., was re-elected President for the ensuing year.

The New York *Times* says: The Delaware and Hudson Canal Company, on the 18th inst., concluded a perpetual lease of the Rensselaer and Saratoga Railroad from Albany and Troy to Lake Champlain and Rutland, Vt., including the old Schenectady and Saratoga branch from Schenectady to Ballston. The whole mileage of road, without sidings and turnouts, is 181 miles, and the conditions of the lease are seven per cent on the capital of $6,000,000 the first year and eight per cent thereafter, and the interest charges on the debt of $308,816 per annum. The arrangement affords the Delaware and Hudson a complete or continuous connection by rail from their mines via the Albany and Susquehanna Road, already under lease, to Lake Champlain and the North.

In regard to the Albany and Susquehanna Railroad, formerly leased to the Delaware and Hudson Canal Company, it will be remembered that a very fierce contest for the control of the railroad company was inaugurated some eighteen months ago between Mr. Fisk and Mr. Ramsey; that each party claimed to have elected their Board of Directors, and that various suits were thereupon commenced. The main suit was tried in the Special Term, and judgment given against the Fisk party. An appeal was taken, and the General Term have given a decision affirming the judgment, and directing that further prosecution of all suits be discontinued, the Ramsey directors to have immediate possession, and costs to be paid by the Fisk party.

Erie Railway Stock.—The *Times* of to-day has the following: The Erie movement ran up to 34¼ per cent, and new theories of the source of the rise multiply as the price goes up, and the apparent "mystery" contributes in no inconsiderable measure to the anxiety of the speculators to take "a turn" in this new wheel of fortune. The Pennsylvania Central people and the Michigan Central are credited to-day, in common with the Vanderbilt roads, with making court to a great property which it is supposed Gould and Fisk will soon voluntarily abandon for a consideration, or be ousted by decree of the Federal Court when the main issue of the Heath and Raphael suit becomes before Judge Blatchford. It was authoritatively announced at the Stock Exchange this forenoon that the 30,000 new shares, notified 30 days ago for registration at the Farmers' Loan on the 19th would not be issued. The present registration of $75,000,000 is now overdrawn by 30,000 shares, so that the Heath and Raphael, or Coleman Receiver stock, 60,000 shares, cannot all be registered unless a corresponding amount of other stock is withdrawn by purchase, which will probably be done.

The Hudson River and Harlem Connection.—The new cross-cut line, connecting the Hudson River Railroad at Spuyten Duyvil with the Harlem Railroad at Mott Haven, is nearly completed. The building of this road has been attended with comparatively little difficulty, with the exception of a heavy cut through the Hill near the Mott Haven terminus. The cutting is through hard gneiss and blue rock, 40 feet deep by 20 wide. The road will be ready in June, when all the Hudson River passenger trains will run over it.

Taxes on Dividends, &c., in 1870.—The Attorney-General (whose opinion was asked by the Secretary of the Treasury) pronounces that the statute of 1870 does not remit, as the Commissioner of Internal Revenue assumed that it did, taxes on dividends and interest falling due in the last five months of 1870, commencing August 1st.

***United* Companies of New Jersey.**—The following dispatch from Philadelphia, May 18, gives the latest information in regard to the probable leasing of these Companies to the Pennsylvania Railroad. It is stated that the question to be submitted to-morrow at a meeting in Trenton, will be not whether the lease will be submitted to a vote of the stockholders, for that seems to be conceded; but whether it shall be submitted with or without a recommendation from the united boards that it be accepted. Either way it is expected that the lease will be at the earliest practicable moment submitted to vote of the stockholders; two-thirds of the entire capital stock of the company in its favor being required to make the lease effective.

The Reading Railroad, which made an offer on the day of the annual meeting of the joint companies to lease the Delaware and Raritan canal and a conditional offer to take the united works, having made an arrangement with the President of the Pennsylvania Railroad Company for the use of the canal should the lease be perfected, withdraws its offer and is no longer a competitor for either of the united works. This fact will be made known officially at a meeting of the directors to-morrow, and thence be promulgated to the stockholders and the public.

The lines of the Companies, owned or leased, traverse 17 of the 21 counties of New Jersey.

THE CAPITAL IS:

Stock	$18,990,677
Funded debt of the several Companies	12,420,050
Funded debt of the United Companies	3,843,893
Total	$35,945,620

This capital is represented in property as follows:

Cost of Camden and Amboy road, including branches, steamboats, other equipments, real estate, &c.	$12,527,160 41
Cost of Delaware and Raritan Canal and appurtenances	4,735,353 53
Cost of New Jersey Railroad, equipments, property, &c.	8,955,993 76
Real estate and capital payments of the United Companies	642,112 36
INVESTMENTS IN AND ADVANCES TO AUXILIARY WORKS.	
Stocks	$4,555,905 00
Bonds and mortgages	356,750 00
Advances	2,064,728 58
Sent to England for extinguishment of English debt	70,708 17
Sinking fund for extinguishment of sterling loan	57,752 04
Unappropriated materials on hand	447,880 30
Cash in hand of Treasurers	831,285 26
Total	$35,245,629 41

It will be seen that the Companies hold $8,500,000 of stocks, bonds, cash, &c., beyond the cost of their railways and canal. The traffic of the Companies last year was:

RECEIPTS.			
Passengers	$2,805,558 37	Del. & Raritan Canal tolls	$588,352 86
Freights	2,656,121 18	Steam towing	334,642 20
Mails	37,502 15	Rents and auxiliaries	467,921 30
Miscellaneous	70,173 73		
Total			$7,260,940 78

EXPENSES.			
Operating roads	$3,947,011 87	Operating steam towing	$238,824 83
Operating canal	304,349 50		
Total			$4,549,185 60
Net receipts			$2,711,055 18
Interest			836,874 92
Transit duty and taxes			387,803 50
Premium and discount			70,441 97
Sinking fund N. J. R. R. and Trans. Co			20,000 00
General expenses			171,367 91
Total			$1,486,488 30
Profit and loss carried to surplus earnings			1,224,566 88

Lake Shore and Michigan Southern Railroad.—The *Chicago Railway Review* has the following from the annual report of the above company: "The organization of the company is a consolidation of several, forming a continuous line of railway from Buffalo to Chicago, 540 miles in length. The company owns and controls branches as follows: Elyria to Sandusky, 35 miles; Oak Harbor to Millbury, 15; Toledo to Elkhart, Ind., 133; Adrian to Jackson, Mich., 46; and Adrian to Monroe, Mich., 34 miles. The following roads are under separate organizations, but their capital stock is owned wholly by this company: Detroit, Monroe and Toledo, 65 miles, and the Kalamazoo and White Pigeon, 37 miles. The Jamestown and Franklin Road, 51 miles, is operated by the company under a lease. It is contemplated at an early day to construct this line from Jamestown to Ashtabula. The Kalamazoo, Allegan and Grand Rapids Road, 58 miles, is also operated under a lease, making in all 1,014 miles owned and leased by the company. The company has 34 miles of double track, mainly between Erie and Cleveland, and 233 miles of side track. During the past year 25 new engines and 601 cars have been added to the equipment of the road, at a cost of $654,309 45. The present equipment consists of 299 engines, 274 passenger and 6,077 freight cars. The authorized capital stock is $50,000,000, of which sum $35,000,000 has been issued to the stockholders of the various company's entering into the consolidation, leaving $15,000,000 which can be issued only by authority of a previous vote of the stockholders. The bonded debt of the company amounts to $22,283,000, the annual charge for interest on which is $1,561,810, the rate being 7 per cent on all except $200,000, which is 8 per cent. Of this debt 19 classes of bonds are secured by mortgages on distinct portions of the road. The earnings for 1870 were:

From freight	$8,658,661 81
From passengers	4,153,512 11
From all other sources	645,366 94
Total	$13,157,540 86
Operating expenses, including taxes—68 1-5 per cent	8,368,821 08
Net earnings	5,088,719 78
Interest on bonded debt and guaranteed stock, leases, etc	1,777,202 42
Dividends—two of 4 per cent each	2,752,360 00
Total	$4,529,562 42
Surplus for the year	559,157 36

The earnings of the road for the first four months of the year in 1871 show an increase of $393,000 over the corresponding period of last year.

Digitized by Google

Annual Report of Georgia Railroad.—The receipts for road earnings have increased over the previous year the sum of $148,069 02; and the net profits—after deducting all payments on account of road, ordinary and extraordinary—have increased $39,268 68. The gross earnings of the road have been:

From passenger receipts	$395,158 65	
From freight receipts	1,082,119 71	
From mail receipts	22,825 21—	$1,500,098 57

The operating expenses for the same time have been:

For conducting transportation	$228,905 41	
For motive power	273,704 77	
For maintenance of way	276,009 14	
For maintenance of cars	53,939 95—	$832,559 27
Earnings over and above ordinary expenses		$667,539 30

Out of which have been paid:

For new depots	$12,023 16	
For new locomotive engines	48,857 67	
For new cars	105,232 70	
For old locomotive engines rebuilt	28,567 42	
For new tools and stationary engines	4,695 35	
For Government tax on gross receipts	4,727 79	
For new culverts	1,335 92—	$205,440 01
Net income		$462,099 29
Balance to reserved fund		$127,064 72

The gross earnings of the road have been very satisfactory, but it will be seen that the expenditure has been very heavy. It will be noticed that the earnings of the banking department have been small, and somewhat less than the receipts for the previous year. This resulted from the fact that our cash capital, previously small, was mostly absorbed in some *extra* outlays and investments, by which interest and discount account were of course reduced. As an auxiliary to our other business, the means of advancing to merchants and business men are very desirable, and, as one means of supplying this want, the Board proposed an increase of capital to an extent not exceeding $5,000,000, and obtained permission of the Legislature for that purpose. Subscriptions were obtained to the amount of $44,800, and the subscription suspended until the sense of the stockholders could be had on this mode of increasing the resources of the company. The sense of the Convention is respectfully asked on this subject. The very heavy outlays necessary for improvement of property and to secure our Southwestern connections, as explained in our last annual report, added to the inducements to increase cash resources in some form. This could only be done by increased subscriptions to capital, by an increase of bonded debt, or by sale of securities. These resources have all been partially resorted to, and by reference to the state of the company now exhibited and compared with that of last year you will find

Capital stock increased	$44,800
Bond account increased	65,500
Stocks and bonds of other companies reduced	13,000
Total	$123,300

Cincinnati, Hamilton & Dayton Railroad.—The stockholders of the C., H. & D. R.R. met in annual session on the 9th inst. Daniel McLaren, the president of the company, submitted his annual report, from which we abstract the following interesting items:

Gross earnings of the company	$1,270,621 98
Transportation expenses	627,295 93
Leaving for interest on bonds, taxes and dividends	$643,326 05

The operating expenses have been 49 36-100 per cent of the gross earnings.

Earnings per mile	$21,177 03
Number of passengers carried	753,787
Tons of freight moved in narrow gauge cars	486,030

The net earning have been 12 68-100 per cent, out of which two cash dividends have been paid to the stockholders, of 4 per cent each, free from Government tax.—*Railroad Record.*

The Chesapeake and Ohio Railroad.—Messrs. Fisk & Hatch, financial agents of this Company, have recently, by direction of the Company, advanced the price of its first mortgage bonds, which they are negotiating from 90 to 91, in consequence of the improved investment demand; they give the following account of the progress in the extension and improvement of the road:

Since the first mortgage six per cent loan of the Company for $15,000,000, now in process of negotiation, for the purpose of extending the road to the Ohio River, as a great East and West Trunk line, was first placed upon the market, over $7,000,000 have been sold. The proceeds from the sales of the bonds have kept the Company amply supplied with means for vigorously pushing forward the work on the extension of the road between the White Sulphur Springs (the present Western terminus, to which the road is completed and in operation, 227 miles from Richmond), and the final western terminus on the Ohio River, and have been economically and judiciously applied to that purpose. The rapidity with which the bonds are now being taken, in exchange for five-twenties and for new investments, insures the early sale of the remaining balance of the loan, which will yield an amount sufficient for the completion of the work. For various reasons it was deemed important by the directors that the western end of the road, from the Ohio River to the vicinity of the Falls of the Kanawha, a distance of about 90 miles, should be completed at the earliest day possible, and consequently a large proportion of the labor and resources at their command have been directed, during the past year, to that end. Between 5,000 and 6,000 men have been constantly employed upon the work, which has rapidly progressed toward completion, and it is expected that this division of the road will be put in operation during the coming summer. In the meantime the work on the intermediate section, between the Falls of the Kanawha and White Sulphur Springs, is all under contract and being carried forward, so as to be ready as soon as the tunnel at the Big Bend of the Greenbriar can be opened. This tunnel is being rapidly excavated, and the entire extension will be completed and the road put in operation as a continuous through line from the tide waters of the Chesapeake Bay to the Ohio River, and prepared to receive the extensive through business which awaits it, within a little more than a year from this date. During the past year the completed portion of the road now in operation from Richmond to the White Sulphur Springs, 227 miles, has been thoroughly improved. About 18 miles of the iron has been replaced with new rails of the best quality, and important additions to the equipment have been made in new locomotives, cars, &c. The earnings of this portion, as a local road, without through connections, have been very satisfactory, reaching nearly $800,000 for the past year. The certainty of the early completion of the road to the Ohio River has also stimulated a great activity in preparations for the development of the mineral and agricultural resources along its line.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, May 19, 1871.

The past week has been one of considerable speculative and and export activity in the leading articles of domestic produce, a large, heavy business having been done in Cotton, Breadstuffs, Provisions and Tobacco, with a feverish, unsettled tone prevailing, and prices, except for Tobacco, subject to frequent fluctuations. In foreign merchandise trade has been dull, thus reversing the condition of affairs a short time since.

Cotton, after several fluctuations, closes quiet at 15c for low middling uplands on the spot, and 15¼@15¾c for the next three months. Breadstuffs show an advance to $6 30@$6 60 for shipping extra Flour. Wheat closed at $1 55@$1 57 for new spring. Corn has declined to 75@76c for Western mixed. Groceries close firmer.

Provisions have been drooping, with a marked decline in Pork and Lard. Mess Pork was pressed for sale, and declined yesterday to $16, at which there were to day more buyers than sellers, with prime mess quoted at $15, and prime at $14. Lard fell off to 10¾c for prime Western steam, with good city made selling at 9½c, but at the close the former was firm at 11c, with sales at that price for June and 11¼c for July delivery. Bacon and Cut Meats have been nominal, but close with more inquiry. Heavy dressed Hogs have declined to 6c per lb., the lowest figure in many years. Beef has remained quiet. Butter has declined 3@5c, prime State and Orange County selling at 28@30c. Cheese seems to have fairly opened for the new season at 13½@14c for prime factory. Freights have been active in the shipment of Grain, but otherwise quiet. To Liverpool, by steam, 9d was paid yesterday and to-day, but the close was dull; Cotton has been taken at ¼d; Cheese, 40s; Bacon, 30s. To London, by sail, Wheat 8¾d, and Flour 2s 6d. A few charters have been made at 6s 9d@7s to Cork for orders and for direct ports on the Continent. Petroleum charters have been less active.

Tobacco has been more active. The Regie buyers have been in the market for Kentucky Leaf, and about 1,600 hhds. have been taken, mostly Spain and Italy. Prices have ruled very strong at 5¼@6c for Lugs, and 6¼@9@11c for Leaf, but very little over 9c, and the sales mostly at 6c and 8c for good lugs and medium leaf. A French contract is announced to be awarded on the 31st inst. for 9,000 hhds. Kentucky and 2,500 hhds. Virginia. Prices at the Western markets have advanced ½@¾c the past week. In Seed Leaf there has been more business, but it has imparted little tone or strength to the market. The sales have been 1,100 cases new State by a receiver to a dealer, on private terms; 90 ditto, on private terms; 300 ditto, part at 21c, 50 cases new crop Connecticut and Massachusetts, on private terms, and 50 cases Pennsylvania fillers at 14c. Spanish Tobacco active; sales 500 bales Havana at 85c@$1 07½. Manufactured Tobacco selling fairly at steady prices.

East India goods have been more active, Calcutta Linseed being taken freely at $2 35, gold, 60 days, to arrive, and several thousand bales of Manila Hemp have been sold on the spot at 11c, gold.

Metals have been generally dull at previous prices; Russia sheet, however, has sold more freely, but at decline, though the close is firm; about 3,000 packs have been sold at 10¾@11¼c., gold Hops remain dull and nominal for State, &c., but some California have arrived and sold at 15@20c. Wool very firm and quiet for want of stock.

Rosin has been fairly active and has advanced, closing at $2 55 for strained. Spirits Turpentine has declined, but closes very firm with only about one hundred barrels in yard, and the business entirely in small lots from store at 58@60c. Petroleum early in the week declined, but later on a better speculative demand prices advanced, closing at 24¾c. for refined on the spot, and 14½c. for crude in bulk. Tallow has been active at ⅛c. advance, closing at 9@9⅛c.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles from the port of New York since January 1, 1871, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show *total values*, including the value of all other articles besides those mentioned in the table.

COTTON.

FRIDAY, P. M., May 19, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening May 19. From the figures thus obtained it appears that the total receipts for the seven days have reached 45,067 bales against 46,849 bales last week, 51,432 bales the previous week, and 56,685 bales three weeks since, making the total receipts since the first of September, 1870, 3,715,454 bales against 2,719,023 bales for the same period of 1869-70, showing an increase since September 1 this year of 996,431 bales. The details of the receipts for this week (as per elegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	16,538	18,331	Florida bales.	51	154
Mobile	4,782	8,523	North Carolina	589	583
Charleston	3,542	2,734	Virginia	2,518	2,061
Savannah	4,721	7,592			
Texas	6,107	5,991	Total receipts	45,067	44,055
Tennessee, &c	2,218	3,682	Increase this year	1,012	....

The exports for the week ending this evening reach a total of 77,384 bales, of which 37,728 were to Great Britain, 20,806 to France, and 18,850 to rest of the Continent, while the stocks as made up this evening, are now 335,792 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Week ending May 19.	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans	17,071	30,004	47,075	22,384	109,394	125,005
Mobile	5,225		5,225		22,985	44,230
Charleston	2,838	4,513	7,196	3,051	13,012	9,402
Savannah	2,722	2,822	5 594	5,623	29,286	45,450
Texas	996	1,438	2,434	6,209	67,915	28,462
New York	8,818	579	9,198	7,974	73,290	48,000
Other ports	668	....	668	518	20,000	18,000
Total	37,728	20,856	77,884	45,757	335,792	317,549
Total since Sept. 1	2,148,296	992,574	2,940,870	1,884,963	....	....

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 31,597 bales, while the stocks to-night are 18,243 bales more than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to May 12, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1. 1870.	1869.	EXPORTED SINCE SEPT. 1 TO— Great Britain	France	Other For'gn	Total.	Northern Ports.	Stock.

The market the past week has fluctuated considerably. On Saturday last there was an improvement of ¼c. chiefly under the influence of the upward turn at Liverpool. This advance was continued on Monday, Middling Uplands at the close being quoted at 16½ here, and at 7½d at Liverpool. Tuesday, although Liverpool was quoted at 7½@⅝, prices here gave way ¼c, and the next day there was a further decline of ¼c, Middling Uplands closing that day at 15¾c. Thursday, there was no change, but to-day the quotation returned to 15⅞, with moderate demand, closing steady. The offerings during the week have been sufficient to meet the demand, though there has been no pressure to sell. For future delivery the movement in prices has in the main corresponded with the fluctuations in spot cotton. Low Middling closed to-night at 15½c. for May, 15 5-16 for June, 15¾c. for July, 15¾c. for August, and 15¾c. for September. The total sales of this description for the week are 84,600 bales, including 1,000 free on board. For immediate delivery the total sales foot up this week 19,645 bales, including 8,280 for export, 6,090 for consumption, 1,865 for speculation, and 4,020 in transit. Of the above, 41 bales were to arrive. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	11⅛@....	11⅛@....	12 @....	12⅛@....

The sales during the week of free on board have reached 1,000 bales. The particulars of these sales are as below:

300 free on board at Charleston p. t.
700 free on board at Galveston p. t.

The following exchanges have been made during the week:

¼c. paid to exchange 200 May for 200 June.
¼c. paid to exchange 100 May for 100 September.
1,400 May for 1,400 July, even terms.

WEATHER REPORTS BY TELEGRAPH.—The weather of the part week has been a great improvement upon previous weeks. Ous telegrams received to-night show that it has been warm and dry throughout almost the entire cotton belt. We notice one rainy day early in the week, reported at Columbus and Mobile, but with those exceptions nothing unfavorable in the weather is stated. Replanting, where it had become necessary, has therefore proceeded satisfactorily, and crop accounts are improving. A few weeks of such weather would do much towards repairing the damage done by the cold and rain of the past month, affording, as it does, an opportunity to clear out the grass and giving the plant a healthy start. From nearly every section it is reported that the weeds and grass had become very troublesome. The thermometer at Charleston, Columbus and Mobile has averaged 73, at Montgomery 78, at Selma 80, at Macon 77, and at Memphis and Galveston 72.

CROP MAIL REPORTS.—Last week we sent out a large number

Digitized by Google

of letters to each one of the Southern States inquiring with regard to the extent of land put down to cotton and corn this year compared with last year, and the present condition of the crop. We have received very many replies, but not enough as yet to come to a definite conclusion for all the States. From Georgia and Alabama, however, our answers are more numerous, and enable us to reach what we believe to be reliable figures with regard to that section.

Georgia.—Cotton planting has *decreased* this year from 10 to 15 per cent, and corn planting has *increased* to just about the same extent. The present condition of cotton is very unfavorable; this is the unanimous opinion. One correspondent at Columbus says the "continued excessive rains and cold frosty nights have created a necessity for replanting many cotton fields, and some of them will have to be replanted the third time. On high dry uplands, where a partial stand was obtained, the plant looks sickly and stunted; on bottom lands we hear of no good stands as yet." Another correspondent at Macon writes that "the cotton on the gray lands has been considerably damaged by the late cold and rainy weather, while on the red lands it has fared somewhat better, but is overrun with grass." These extracts contain (as to the condition of the crop) the substance of all the letters we have received from the State. Another important point upon which all agree is that *not exceeding twenty-five per cent* of the fertilizers purchased last year have been purchased this year.

Alabama.—The estimates received as to the decreased cotton planting are wider for Alabama than for Georgia, some of them reaching as high as twenty-five per cent decrease. The best opinion, we think, would put it at about an average of 15 per cent. Corn planting has increased about 20 per cent. The present condition of the plant is very similar to its condition in Georgia. A correspondent at Montgomery, who has kept a rain guage for several years, gives the following statement of the rain fall this year and last year:

	1870.	1871.		1870.	1871.
January fall of rain....	5·55	6·15	April fall of rain.....	3·62	12·40
February fall of rain..	5·45	8·57	May to the 15th...	0·30	5·85
March fall of rain.....	4·60	11·00			
Total.....				19·52	43·97

We have here an increase this year of 24.45 inches since the first of January. If to these figures we add a temperature some of the time below freezing, we shall reach a correct conclusion as to the present condition of the crop throughout the State. As to fertilizers used, there is the same decrease noticed for Georgia.

We shall next week hope to receive our advices from all the other states, and shall in the end be able to make up a table of general results.

It is hardly necessary to warn our readers against drawing the conclusion from the above that there is to be a very small cotton crop this year. A few weeks of clear, warm, dry weather would make a very material, and we might almost say an absolute change. All that can be said is that the planting has decreased about 15 per cent in these States; that the fertilizers used do not exceed a quarter of the amount sold last year, and the present condition of the plant is bad.

Surplus for Export.—In view of the unfavorable reports with regard to the growing crop which have up to this week been received, it becomes of special interest to know what is the balance of last year's growth we still have for export. We gave some figures on this point several weeks since, but a fuller statement will show the following result:

Estimated crop, as per Chronicle of April 29		4,185,000
Stock on hand Sept. 1, 1870		59,747
Total supply		4,244,747
Consumed by spinners, North, estimated for year	806,000	
Consumed by spinners South, " "	95,000	
Exported to May 13, 1871	2,763,286	
Foreign engagements May 13	275,000	3,939,236
Total surplus for export and stocks at end of year.....bales		305,511

We see here that there remains for export and stocks at the end of the year only 305,511, in case the crop reaches 4,185,000 bales. The consumption of Northern spinners we have estimated at the same figure as last year. Should they see any reason for stocking up towards the close of the season, there would be just so much less left for export. These figures would not appear to afford much encouragement to those who are operating for a decline.

Gunny Bags, Bagging &c.—The market for cloth has again become very quiet, and prices, though as before quoted, are entirely nominal. Bags show no improvement in either price or demand. No sales of lots are reported. Hemp has been more active for Manila, and prices are in seller's favor. Sales are 500 bales on spot at 10¼c, 2,500 bales at 11c. and 500 bales inferior ex "Glenlyon" at 10¼c, all gold. In other kinds we note no business. Jute is dull at 5½@6½c gold, as to quality. Jute Butts are in fair demand and the close is firmer—held at 4½c. The sales are 1,050 bales on the spot at 4½@4⅝c currency, the sales early in the week were at 30 days, but to-day were cash.

Movements of Cotton at the Interior Ports.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	Week ending May 19, 1871.			Week ending May 19, 1870.		
	Receipts.	Shipments	Stock.	Receipts.	Shipments.	Stock.
Augusta.....	845	1,673	13,880	941	2,017	13,432
Columbus.....	179	1,214	3,597	373	1,367	7,031
Macon.....	250	813	3,020	639	1,057	8,055
Montgomery....	434	656	4,500	393	763	5,885
Selma.....	213	450	1,811	341	566	4,100
Memphis.....	3,282	8,941	10,531	3,840	4,526	15,888
Nashville.....	965	1,752	1,563	1,798	1,656	4,935
	6,168	15,499	38,911	8,325	11,952	59,326

These totals show that the interior stocks have decreased during the week 10,875 bales (being now 20,415 bales less than for the same period of last year), while the aggregate receipts are 2,157 bales less, and the shipments 3,547 bales more than for the corresponding period of 1870.

Visible Supply of Cotton.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons:

	1871.	1870.
Stock in Liverpool.....bales.	937,000	590,000
Stock in London.....	91,545	32,988
Stock in Glasgow.....	700	300
Stock in Havre.....	29,920	86,520
Stock in Marseilles.....	15,600	12,550
Stock in Bremen.....	51,822	19,103
Stock rest of Continent.....	35,000	30,000
Afloat for Great Britain (American).....	260,000	122,000
Afloat for France (American and Brazil)...	42,500	69,090
Afloat for Bremen (American).....	41,972	23,467
Total Indian Cotton afloat for Europe*....	315,338	197,000
Stock in United States ports.....	335,792	317,549
Stock in inland towns.....	38,911	59,326
Total.....	2,190,100	1,559,888

* This item includes all India cotton afloat for Europe, and also all cotton afloat for Liverpool other than American.

These figures indicate an *increase* in the cotton in sight to-night of 636,212 bales compared with the same date of 1870.

The exports of cotton this week from New York show an increase since last week, the total reaching 13,095 bales, against 17,844 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

Shipping News.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 73,051 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in The Chronicle last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night:

	Total bales.
New York—To Liverpool, per steamers City of Washington, 608.... Colorado, 1,396....Java, 951....Holland, 2,497....France, 2,038.... City of Brooklyn, 745....Abyssinia, 964....per ships Prince Patrick, 1,035....Glenesk, 1,711	11,925

Total	40,273	4,297	4,658	22	9,495	205	165	4,315	73,051

Included in the above totals are from New York 96 bales to Continent via Glasgow, and 12 bales to Hamburg; from New Orleans, 3 bales to Cette, 1,559 bales to Amsterdam, 1,527 bales to Antwerp, 749 bales to Cronstadt, 2,354 bales to Barcelona, and 271 bales to Vera Cruz; from Mobile, 1,200 bales to Amsterdam; from Charleston, 300 bales to Barcelona; from Savannah, 924 bales to Antwerp; from Texas, 729 bales to Amsterdam; from Boston 2 bales to other British Provinces.

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 111⅛ and 112¼, and the close was 112. Foreign Exchange market remains firm. The following were the last quotations: London bankers', long, 110⅛@110¼; short, 110⅛@111, and Commercial, 110¼@110½. Freights closed at ¼d. by steam and 9-32@11-32d. by sail to Liverpool.

BY TELEGRAPH FROM LIVERPOOL.—

LIVERPOOL, May 19, 5 P. M.—The market opened quiet and steady and closed a shade easier, with sales of the day footing up 12,000 bales, of which 8,000 bales were taken for export and speculation. The sales of the week have been 106,000 bales, of which 19,000 bales were taken for export and 22,000 bales on speculation. The stock in port is 937,000 bales, of which 562,000 bales are American. The stock of cotton at sea bound to this port is 454,000 bales, of which 260,000 bales are American.

	April 28.	May 5.	May 12.	May 19.
Total sales	81,000	82,000	78,000	106,000
Sales for export	15,000	17,000	13,000	19,000
Sales on speculation	8,000	11,000	10,000	22,000

Of the present stock of cotton in Liverpool 61 per cent is American against 62 per cent last year. Of Indian cotton the proportion is 13 per cent, against 18.50 per cent.

LONDON, May 6.—The demand has been irregular, but at the close the market is somewhat firmer. The following are the particulars of import, deliveries and stocks:

	1869. bales.	1870. bales.	1871. bales.
Imports, January 1 to May 4	99.164	46,687	93,896
Deliveries	170,072	135,948	70,174
Stocks, May 4	74,321	32,983	91,545

BREADSTUFFS.

FRIDAY P. M., May 19, 1871.

The market has shown a slight upward tendency in Flour and Wheat, but in the coarser stuffs prices have been irregular, the whole closing unsettled.

Flour has come forward freely by rail, and there is an unusually large quantity on the canal, destined for tide-water, but prices have been ruling for some time below the relative value of wheat, and this induced some speculation, which, together with an improved demand for Great Britain and the British Provinces, caused an advance in the low grades of State and Western brands. In the course of Tuesday, Wednesday and Thursday the sales of common shipping extras alone reached about 30,000 bbls., commencing at $6@6 20, and closing at $6 30@6 50, with better grades at $6 60@ $6 65. Some of the medium grades experienced a partial advance. Superfine flours have been in brisk request, and family flours have done better; so that the whole range of quotations advanced. Southern flours have remained quiet. Rye flour dull. Corn Meal, at some decline, has sold freely, including 1,500 bbls. Southern and Brandywine at $4 10@$4 20. To-day the demand was less active, but prices ruled very firm.

Wheat has arrived but moderately by rail or by canal, while the impatience or necessity of shippers has induced them to buy more freely, paying daily a slight advance; No. 2 Spring selling from $1 54 on Tuesday up to $1 58 at the opening to-day, on the spot, and $1 52½@1 54 for June arrivals. Holders have been favored by an advance abroad and a higher gold premium, which have been offset by an advance to 9d. for freight to Liverpool by steam. At the close of to-day's market the tone was less buoyant, under a partial decline abroad, and increased receipts at Chicago and Wilwaukee, and leading shippers bid only $1 56 for No. 2 Spring, and three boat loads sold, for early arrival, at $1 55.

Corn has been dull, and in the past few days prices have declined 4c., closing at 75@76c. for Mixed, and 76@77c. for Yellow Western, at which there is some revival of export demand. Rye has remained without essential change. Barley quiet, the stock being exhausted. Barley Malt closes firmer. Oats met with a speculative demand—prime Western sold at 66½@67 in store, with choice White Ohio 72c delivered, but the close was very dull. Canada Peas scarce, and quoted $1 15 in bulk in bond.

The following are the closing quotations:

Flour—		Wheat, Spring, bush	$1 35@ 1 57
Superfine	$ bbl. $5 75@ 6 15	Red Winter	....@ ....
Extra State	6 40@ 6 60	Amber do	1 58@ 1 65
Extra Western, common	6 30@ 6 65	White	1 65@ 1 90
Extra and double extra Western & St. Louis	6 75@ 9 00	White California	1 70@ 1 80
Southern shipp'g extras	7 00@ 7 35	Corn, Western Mix'd	75@ 76
Southern, trade and family brands	7 75@ 9 25	Yellow, new	76@ 77
Rye Flour, super & extra	5 00@ 6 10	White	76@ 80
Corn Meal, Western and Southern	3 40@ 4 20	Rye	1 05@ 1 20
		Oats	66@ 72
		Barley	....@ ....
		Malt	1 00@ 1 20
		Peas, Canada	1 12@ 1 40

The movement in breadstuffs at this market has been as follows

GROCERIES.

FRIDAY EVENING, May 19, 1871.

The market continues in about the same general condition noted for a week or two past, with values scarcely changed and the supplies as a rule fair. Coffee is in a very sluggish state, and probably the most unsatisfactory to owners on the list, and the movement in sweets has fallen off somewhat, owing mainly however to the filling of pressing orders, as holders are firm and refuse to name concessions on their goods. Interior buyers commence to drop in here and there, but they appear to be merely looking around as yet, and afford no indications of their projected movements. Mail orders are fair in the aggregate, but in most cases the call is for small invoices to carry buyers along for a week or two, until they are prepared to attend personally.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black	7,994 pkgs.	Laguayra	532 bags.	Sugar, Brazil	.... bags.
Green	11,150 pkgs.	Other	1,880 bags.	Manila, &c.	.... bags.
Japan	3,912 pkgs.	Sugar, Cuba	12,297 boxes.	M'las'es, Cuba	4,840 hhds.
Various	3,340 pkgs.	Cuba	7,898 hhds.	Porto Rico	2,120 hhds.
Coffee Rio	6,214 bags.	Porto Rico	491 hhds.	Demerara	.... hhds.
Java	2,250 mats.	Other	1,615 hhds.	Other	239 hhds.
Maracaibo	2,145 bags.			*Hhds. include bbls. and tcs. reduced	

Imports this week at this port have included 10,554 bags of Rio Coffee, 4,183 do. of Singapore, 1,469 do. of St. Domingo, and 1,530 do. of sundry kinds. The receipts of Sugar are 12,753 boxes, 16,845 hhds., and 38,710 bags. Of Molasses 7,782 hhds. have arrived. In Tea the imports are 1,308,818 pounds of Japan and 503,579 pounds of Black.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at date.		Imports at leading ports since January 1.

Molasses.....hhds	6,106	19,448	143,754	172,813

TEA.

About the only change in the market is the development of an increased and comparatively general demand for the long neglected Japans, with quite a liberal business consummated. Blacks have been a little slow, but Greens fairly active, and on all grades full former rates were as a rule obtained without difficulty. Taken altogether the market seems to be in a rather more healthy condition than at the date of our last, and importers speak somewhat hopefully of a continuation of the inquiry on a steady level for several weeks. Jobbers have distributed fair amounts, but mainly in small lots, as consumers and small dealers find it difficult to depart from the old cautious manner of operating merely to the extent of positive wants. Sales of 6,500 Greens; 1,000 Oolongs; 1,800 Souchongs, and 9,500 Japans, besides about 12,000 pkgs, to arrive, the particulars of which are not generally made public, but supposed to be about one-third Oolong and the balance Japans.

The imports this week include 355,972 pounds of Japan Tea, per "Belted Will," from Yokohama; 330,027 lbs of do, per "G T Ray," from the same port, and 503,579 lbs of Black, per "Glanmorganshire," from Foo Chow.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871	10,519,360	12,025,119	5,372,872	27,914,851
1870	11,810 317	10,429,056	4,672,339	26,911,712

The indirect importations, including receipts by Pacific Mail steamers via Aspinwall, have been 10,327 pkgs. since January 1, against 31,496 last year. The receipts of Tea overland by railroad have this week amounted to 639 pkgs.

COFFEE.

We do not discover that this market has undergone any very decided variation on the general position since our last report, except that the slight hopes of an improvement in business previously entertained have not been realized, and the whole tone is flat and dispiriting. It is not only importers and jobbers at this point who complain of the dullness, but the same condition of affairs appears to prevail throughout the country, and there is a growing impression that either the accumulations in the interior were greatly underestimated, or a system of caution and economy has greatly reduced the consumption. Goods certainly appear to be offered cheap enough, and some of them at a great loss, but not an invoice has been taken for weeks, except a positive outlet had already been secured in the way of smaller parcels. The arrivals of Brazils have not been heavy, but in the absence of a counteracting demand the stock in first hands has increased, and the assortment is also better. Holders offer their samples at former rates, and are not indisposed to allow slight favors to buyers who will operate with freedom, but there is a refusal to grant any further decided concessions, as recent telegrams from Rio Janeiro still indicate light shipments and a range of cost leaving a considerable margin of loss on cargoes laid down here at the prices now to be obtained. At the outports the movement has not been very heavy, but there is still quite a number of little invoices selling to interior buyers in direct competition with New York. Java shows no new features, prices remaining about as before, and a fair amount of stock going to consumers from second hands. West India descriptions are dull, the recent purchases having about met the urgent wants of the trade, and though values are nominally unchanged, there is a tame feeling and many importers are anxious to realize on their pretty large stocks. Sales here of 3,570 bags Rio and 900 bags Santos, 2,000 bags Ceylon, 1,800 bags Costa Rica, 750 bags Maracaibo, 500 bags St. Domingo, and 1,050 bags St. Domingo were shipped from first hands to Europe. Sales at Baltimore of 5,490 bags Rio, and at New Orleans of 2,125 bags do.

Imports this week have included 8,140 bags Rio Coffee, by "Rew" and "E Shun;" 695 do Savanilla, by "Branch" and "Elizabeth;" 4,183 do Singapore by "Sallie Brown;" 1,469 do St Domingo, by "Ben Bolt" and "H H Thompson," and 905 do sundry kinds by the "Ocean Queen."

The stock of Rio May 18, and the imports since Jan. 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.

SUGAR.

The check to the buoyancy on Raws noted last week has finally developed into rather a tame feeling, and at almost any time since our latest preceding report a concession would have been necessary in order to sell with any ease or freedom. The falling off in the demand for their production reduced the wants of refiners in some cases to almost nothing, as they found supplies from old purchases still on hand, nothwithstanding the attempts made to keep operations strictly within the margin of actual necessity, and neither the trade or speculators coming to the relief, business assumed small proportions, with the usual slack tone always noticeable on such occasions, but more especially after values have been previously on the advance. We do not discover, however, that importers have lost any confidence, or for that matter buyers, as purchases have been made for next month's delivery on a basis fully equal to ruling values at present. The crop is undoubtedly short, the wants of consumers in all probability likely to reach nearly an average, and though the arrivals just now are rather larger and the stock increasing, there is thought to be no danger of an over-stock unless, indeed, values should be run up high enough to attract supplies from unusual sources. The offerings during the week were at no time large, and embraced few samples of goods in store, sellers preferring to negotiate on landing parcels. Refined goods have moved with much less freedom than last week, and with the production overrunning the outlet, values decreased, with quite a competition at times shown by the various companies to get rid of their surplus. All grades are now available, and selections comparatively easy, though at the close the feeling is again quite firm. The sales of Raw embrace 3,281 hhds. Cuba, 1,292 hhds. Porto Rico, 250 hhds. Demerara, 200 hhds. St. Croix, 50 hhds. English Island, &c., 22 hhds. New Orleans, 60 bbls. and 270 ceroons St. Domingo, and 6,408 boxes Havana.

Imports at New York, and stock in first hands, May 18, were as follows:

MOLASSES.

There has been some increase of the arrivals of foreign but largely on direct consignment to consumers, or of an undesirable quality, and the market obtains no relief. Grocers and refiners are very well represented, and really seem not only willing but anxious to operate with a fair amount of freedom, could they find the necessary assortment from which to make their selections, but importers have nothing of consequence now to offer, and expect few lots to arrive, which keeps business within a narrow channel. On desirable goods the feeling is, of course, very firm, and most of the trade have recently advanced quotations, even on medium stock, as this begins to attract attention in the absence of anything better. Domestic has met with a few spasmodic calls, principally on the fine and fancy qualities, and these commanded full rates, but the supply is so unusually large that holders are unable to gain a decided advantage. Syrups have sold with less general freedom, though commanding previous rates, but Sugar House Molasses finds an outlet about as fast as produced, and is very firm at 20c. in hhds., and 24c. in bbls. Sales of 618 hhds. Cuba Muscovado; 550 hhds. Cuba Clayed; 555 hhds. Porto Rico; 225 hhds Barbadoes; and 550 bbls. New Orleans.

The receipts at New York, and stock in first hands, May 18, were as follows:

*Including tierces and barrels reduced to hhds.

SPICES.

The market for wholesale parcels remains comparatively dull, and dealers do not appear to anticipate any immediate improvement in business, as the trade are fairly stocked and require few invoices, though in reality the general paucity of the supply in first hands is the main cause of the slow movement. Additional arrivals have recently taken place, but they were pretty much all previously sold, and made no actual increase of stock. Values continue to hold their own on all qualities, and in some cases are a trifle buoyant. Among the jobbers the reports do not indicate anything very large in the way of sales, but there is a fair retail distribution and full figures can be realized.

FRUITS, &c.

The Foreign dried market continues to be a quiet one. Prices are comparatively lower than for many years, yet the trade have no confidence, and buy only such lots as they need for daily demands, and many of the jobbers who carry a little more than needed for present wants are underselling importers. Early in the week there was apparently more firmness in layer Raisins, but later again the market shows signs of weakness, and only jobbing lots can be sold at $3 50; a lot of 1,000 boxes could probably be bought at $3 45 if the offer was made. Currants are in light demand at about former prices, at which only small lots are changing hands. Prunes are dull and favor the buyer. Sardines have not been affected by the large sales of last week; they meet with only a fair demand at our quotations. Nuts are selling slowly; a good many have arrived in a poor and damaged condition, and find a sale only in the auction rooms, at from 5@6c. per lb. for walnut. Firecrackers are in steady though only moderate demand at our last prices. African Peanuts, on account of the scarcity and high prices of domestic, sell well.

Foreign Green are firmer for Oranges, and a good demand prevails. The offerings at auction have hardly kept up with the demand from jobbers. Lemons are in only fair demand, but prime November Cut are firm in price. At the auction sale to-day Palermo Oranges sold at $4 45@4 75 per box, and do. Lemons at $3 50@4 40. The supply of West India kinds is full. Pineapples come in freely, and sell at $12@14 per hundred. Baracoa Bananas are of better quality, and sell well at $1 75@2 25 from vessels. Baracoa Cocoanuts sell slowly at $35 per thousand, and Carthagena are dull at $55 per thousand.

Domestic dried apples have been firmer, owing to the purchasing last week to fill the California order, but at the close the market is very quiet, with many sellers and few buyers. Blackberries are now all out of second hands; the last lot of account brought 13½c.; since, they have sold at 14c. Peaches of all kinds are scarce, but in no demand; prices are nominal. Pitted cherries are firmer and in fair demand. Plums are dull. Raspberries are steady, but not active. Peanuts are again becoming more active, the stock in the hands of jobbers is becoming very low, and there is more inquiry from holders; the stock is said to be only one half of what it was last year.

Domestic green apples are firmer and in demand. The stock in icehouses is reduced to about 5,000 barrels, and sales are at $7 50 for Russetts. Cranberries are dull and without a price. Strawberries are in better supply from Maryland, and sell at 30@50c. per quart for best.

ADVICES FROM PRODUCING MARKETS.

Tea.—Messrs. Aug. Heard & Co.'s usual telegram, dated China, April 12, is without any fact regarding tea, as the season at all the ports has closed, and no further quotations or statistics may be looked for until the new season opens.

THE DRY GOODS TRADE.

FRIDAY, P. M., May 19, 1871

The market has settled down into the dull state peculiar to this season of the year, and transactions in any department are unimportant. But few buyers have visited the market in person since our last report, and the bulk of the sales are on mail orders. These are coming in in fair numbers, and call for moderate amounts of goods, though the trade is not so heavy as was generally look for. The demand from city buyers is fair, the continued warm weather having stimulated a good demand from consumers, and necessitated a more or less general replenishment of stocks. Southern houses have also been buying rather more freely for a few days past, in consequence of an improved retail demand there, but no important inquiry is reported from any section, and the sales remain of small assorted lots. The range of prices has been without notable change, and continues fairly firm on all lines.

Advices from salesmen in the west and southwest, are to the effect that the prospects are considered favorable for a good retail distribution through June, with a pretty thorough clearing out of stocks. This will leave merchants in a good condition for the Fall trade, and there are indications already that the season will be an active one. Collections are coming in freely as the rule, with only a few individual exceptions. Few suspensions have been reported thus far, the only important one being that of a shawl-importing and jobbing house, with liabilities amounting to about $66,000. A settlement was effected with the creditors at 50c on the dollar.

DOMESTIC COTTON GOODS.—The market remains about as last reported on all cotton fabrics. Brown cottons in the lower grades are very firm, and in some instances tend toward higher prices, although as yet few changes have been made. There is a short supply of nearly all makes in these as well as the finer counts, but in the latter there appears to be less steadiness, and, as noted last week, standards are off ¼c. Bleached goods are firm and unchanged. There is not much inquiry for any grade, and the sales effected are chiefly of small lots to fill depleted stocks and supply current wants. Colored cottons are in relatively fair request, and sell in small lots, but the aggregate movements are unimportant. Prints sell fairly in all desirable patterns of light colorings, though the demand is less spirited than at the time of our last review. Prices continue firmly sustained, and are likely to be higher during the fall season, as manufacturers claim that they cannot make dark work except at a loss, unless an advance is obtained corresponding with the rise in cloths.

DOMESTIC WOOLEN GOODS.—There has been a fair demand for heavy weight goods since our last report, without any large transactions either in cassimeres or faced goods. The advancing prices in the raw material as well as the fact that stocks are very light, gives much firmness to the market, and goods are held at full prices, while in many instances an advance is asked. Holders do not press sales, and buyers are obliged to pay full prices. For this reason there seems to be less inclination than usual to make purchases in excess of actual requirements, and there are few buyers outside of the clothing trade. New goods in the lower grades are coming in freely, while few samples of fine goods are received, as yet, and no business is doing excepting in the medium and low cost fabrics. Flannels in gray mixtures of the lower qualities find ready sale at an advance on last season's prices Fine goods of all classes are also higher, but are not especially active. A few sales of blankets to early buyers are reported by agents, but as yet no important transactions have been made.

FOREIGN GOODS.—The leading features of the foregn goods trade remain unchanged since our last report. There has been a moderate sorting up trade in progress, and fair transactions are reported in thick dress fabrics and other goods especially suited to the late trade. Japanese silks and robes meet ready sale at unchanged prices, and continue firm, in consequence of the light stocks. The demand for silks is mainly for the medium-priced fancy stripes and checks, and for colored goods in the most popular shades. Foulards are not meeting very ready sale, and are offered at easy prices. Blacks meet a steady sale, but not in large lots, prices, however, are stiff and unchanged. Linens are quiet throughout, with a good degree of steadiness in values, in consequence of the favorable advices from the foreign markets. Woolens are fairly active in winter weights, and the agents for the principal makes are taking large orders for goods to import.

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of leading Jobbers:

BROWN SHEETINGS AND SHIRTINGS of the best makes are still sold close to the production, and excepting in the finer grades there is a good degree of stiffness in prices. Amoskeag A 36 11¼, do B 36 11, Atlantic A 36 12, do D 36 10½, do H, 36 11¼ Appleton A 36 12½, Augusta 36 11, do 30 10, Bedford R 30 8 Boott O 34 9½, Commonwealth O 27 8, Grafton A 27 7½, Great Falls M 36 11 do S 33 9½, Indian Head 36 12, do 30 10, Indian Orchard, A 40 12½, do C 36 10½, Laconia O 39, 12 do B 27 11, Lawrence A 36 11, Lyman C 36 10½, do E 36 11½, Medford 36 11, Nashua fine O 33 11½, do R 36 13, do E 40 14½ Newmarket A 36 10½, Pacific extra 36 11½, do L 36 11, Pepperell 7-4 22½, do 8-4 25, do 9-4 27½, do 10-4 32½, do 11-4, 37½, Pepperell E fine 39 12½, do R 36 11½, Pocasset F 30 8, Saranac fine O 33 11½, do R 36 13, Stark A 36 11½, Swift, River 36 8, Tiger 27 8.

BLEACHED SHEETINGS AND SHIRTINGS sell fairly at firm prices and are unchanged in every particular. Financial.

SEVEN-THIRTY GOLD LOAN
OF THE
NORTHERN PACIFIC RR.

RAPID PROGRESS OF THE WORK.

The building of the Northern Pacific Railroad, (begun July last), is being pushed forward with great energy from both extremities of the line. Several thousand men are employed in Minnesota and on the Pacific Coast. The grade is nearly completed **266** miles westward from Lake Superior; trains are running over **130** miles of finished road, and track-laying is rapidly progressing toward the eastern border of Dakota. Including its purchase of the St. Paul & Pacific Road, the Northern Pacific Company now has **413** miles of completed road, and by September next this will be increased to at least **560**.

A GOOD INVESTMENT.—Jay Cooke & Co. are now selling, and unhesitatingly recommend, as a Profitable and perfectly Safe investment, the First Mortgage Land Grant Gold Bonds of the Northern Pacific Railroad Company. They have **30** years to run, bear Seven and Three-Tenths per cent gold interest (more than **8** per cent currency) and are secured by first and only mortgage on the ENTIRE ROAD AND ITS EQUIPMENTS, and also, as fast as the Road is completed, on

23,000 ACRES OF LAND to every mile of track, or **500** Acres for each $1,000 Bond. They are exempt from U. S. Tax; Principal and Interest are payable in Gold; Denominations: Coupons, $100 to $1,000; Registered, $100 to $10,000.

LANDS FOR BONDS. Northern Pacific 7-30's are at all times receivable at TEN PER CENT ABOVE PAR, in exchange for the Company's Lands, at their lowest cash price. This renders them practically INTEREST-BEARING LAND WARRANTS.

SINKING FUND. The proceeds of all sales of Lands are required to be devoted to the re-purchase and cancellation of the First Mortgage Bonds of the Company. The Land Grant of the Road exceeds Fifty Million Acres. This immense Sinking Fund will undoubtedly cancel the principal of the Company's bonded debt before it falls due. With their ample security and high rate of interest, there is no investment, accessible to the people, which is more PROFITABLE OR SAFE.

EXCHANGING U. S. FIVE-TWENTIES. The success of the New Government 5 per cent Loan will compel the early surrender of United States 6 per cents. Many holders of Five-Twenties are now exchanging them for Northern Pacific Seven-Thirties, thus realizing a handsome profit, and greatly increasing their yearly income.

OTHER SECURITIES. — All marketable Stocks and Bonds will be received at their highest current price in exchange for Northern Pacific Seven Thirties. EXPRESS CHARGES on Money or Bonds received, and on Seven-Thirties sent in return, will be paid by the Financial Agents. Full information, maps, pamphlets, etc., can be obtained on application at any agency, or from the undersigned.

NEW YORK

State Railroad Bonds.

A First-Class Home Investment.

FIRST MORTGAGE GOLD BONDS
OF THE

Rondout & Oswego RR.

Principal and Interest Payable in Gold

SEVEN PER CENT SEMI-ANNUALLY.

This Road covers 100 miles of the most direct possible line between the Great Lakes and deep-water navigation on the Hudson River, the whole line of which will be completed and in operation on or before October 1, 1872, and give a new line of road to Lake Ontario and the West, 25 miles shorter than any line that can be found.

It passes through the Cement, Flag-Stone and Lumber regions of Ulster County, and the rich agricultural bottoms of Delaware and Green counties, all of which have not heretofore been reached by railroad facilities, and from which sections the formation of the country prevents the construction of a competing line.

The 86 miles of road operated for three months is already paying net earnings equivalent to 7 per cent gold on its cost of construction and equipments. The issue of Bonds is limited to $20,000 per mile of COMPLETED ROAD, the coupons payable in gold in this city. Price of the Bonds, 90 in currency.

Full particulars of the above may be had of, and the Bonds for sale by,

EDWARD HAIGHT & CO.,
9 Wall Street,
FINANCIAL AGENTS OF THE R. & O. COMPANY.

MR. BOUTWELL'S PERPLEXITY.

The ratification of the new treaty which is now on its way to England has given an impetus to the new loan. The announcement is made that Mr. Boutwell is somewhat perplexed by a conditional proposal from a prominent banking house, on the part of a number of banks and private firms in this country and in Europe, to take the whole of the 135 millions of these new Five Per Cents, so as to complete the first 200 millions now offering. The precise nature of the terms has not transpired, but they are said to include the condition that the amount is to be placed at once in approved banks to the credit of the government, but is not to be immediately drawn for by Mr. Boutwell, but is to lie without interest till the 1st September. It is generally believed that the offer will not be accepted in its present form. Among the reasons urged upon his attention in favor of the scheme are the following:

First, the money market is now so easy that call loans are 3 to 4 per cent, and it is difficult for lenders to employ their balances; so that large amounts have lately been offering at 1@2 per cent. This plethora in the money market cannot be reasonably expected to last very long. It may be succeeded by great activity next fall. Consequently no time is to be lost. And if the new loan is to be absorbed at all this year, the present time offers advantages which may not soon recur for the rapid placing of the bonds.

Secondly, the slow progress of the Treasury subscriptions shows the necessity of setting in motion a new machinery for negotiation. The whole amount taken up to the present time does not exceed 65 millions, and notwithstanding the dullness of speculative business, and the abundance of idle money accumulating here, as well as in the chief loan markets abroad, there seems to be small probability that, without some special effort, a very considerable proportion of the remaining 135 millions can be disposed of for a long time to come.

Thirdly, there are a multitude of other new securities pressing on the market, such as railroad bonds and municipal securities, of which a large aggregate is being absorbed here and in Europe, so that the capital which is willing to invest itself in such securities as the new Fives is powerfully attracted in other directions, and cannot be fixed in the new Government Fives so long as there remains any supposed uncertainty as to the final success of the new loan. When once the impression gets abroad that there is a positive certainty that the Fives are the last that will be offered at this price, the theory is that private investors and public institutions, savings banks, national banks and trust companies will hasten to secure their share of these bonds, especially if 50 millions of registered Five-Twenties of 1862 shall at once be announced for withdrawal and redemption at par in gold under the five years' option, which has now expired for three years.

These reasons, with others, are urged on Mr. Boutwell, who is known to be extremely anxious that the new bonds should sell more rapidly than heretofore. It is doubtful, however, whether he would be justified in conceding the 90 days' credit which is demanded without interest. When the bonds leave the Treasury, the cash must by law be deposited there, and cash which cannot be checked for till the beginning of September cannot, with any propriety, be said to be in the Treasury at all. There is, moreover, this additional difficulty, that the locking up in the Treasury of this vast sum of currency, might produce a spasm in the money market at the critical moment when the fall demand begins for currency to go West to move the crops. Other objections are raised to the paying out of 50 millions of the gold reserve of the Government, to redeem the outstanding old Five-Twenties before a single dollar of the purchase money for the new Fives becomes available to the Treasury under the proposed contract. It is also asked what adequate security ought to be given to the Government for the faithful performance of so large an engagement and to prevent failure should the expected public demand not arise in time

Digitized by Google

to take the bonds off the hands of the contractors before the pay day comes round.

In view of these facts it is argued that Mr. Boutwell will decline the offer and will prefer to adhere to his old methods of disposing of the loan. He is said to be of opinion that the hesitancy and slow progress of the loan hitherto has arisen from other causes more than from those above referred to. Prominent among them is the uncertainty as to the new treaty, which is now on the point of removal. With the assurance of peace between us and England, the removal of the unsettled state of public feeling, and the re-establishment of financial confidence between the two countries, under a treaty so judicious, moderate and comprehensive as that which which will soon be ratified at the Court of St. James, there will be such an impulse given to the demand for our securities that England alone will take a large part of the residue which is left of our new Fives. Such is Mr. Boutwell's reported opinion. We may be well assured that if in England a free market should develop itself for these new Fives, the small aggregate of 100 or 150 millions will be absorbed in a very short time, should the ease of the London money market continue.

Nor is the prospect impared so much as was expected by the coming French loans. The first 100 millions of dollars are to paid toward the end of June, or 30 days after the pacification of Paris. This sum is said to have been offered by German and other Continental bankers, as has also the next 200 millions which will be due at the close of December. The next payments will, not, perhaps, be quite so easily arranged; but that of May 1st, 1872 is but 100 millions of dollars, and the remaining payments of 600 millions will not be completed till March 1st, 1874. Hence it is possible that during this year a small part of this Indemnity loan will find its way into the English money market, our new Fives will therefore have a better chance of pushing their way into public favor. In confirmation of this view it has been pointed out that the Fives of the Canadian government, which certainly are not worth more than the Fives of the United States, are now selling in London at more than par in gold.

FINANCIAL PANICS AND THE INVESTMENTS OF INSURANCE COMPANIES.

A prudent captain, in repairing his ship, does not wait for the storm; but anticipates it, and does his overhauling in fair weather. In managing its somewhat overburdened financial barque, this country will do well to adopt a like precaution. Fine weather, with a propitious sky, when the sun shines and no danger threatens, is the time for anticipating evil and guarding against the future tempest. It is on this principle that the Insurance Companies are attracting so much attention just now in the financial circles. Our panic of 1857 might have been prevented if the Ohio Life and Trust Company had not failed at a critical moment; and the terrors of Black Friday were precipitated on the London money market because Overend, Gurney & Co. were so expanded and gorged with liabilities as to be unable to resist the "bear" combination which for months had employed all their talent and money and genius to depreciate and render unsaleable the securities in which this and other banking firms had invested to their ruin.

In both these cases the monetary panic spread far and wide, and by the well known laws of such convulsions multitudes of small institutions were crushed under the toppling ruins of those more lofty; but it is very likely that neither disaster would have begun or spread as it did if reasonable care and proper safeguards had been applied to strengthen beforehand the weak parts of the financial system. From the recent failure of certain Insurance Companies a [illegible] spring up to examine the whole fabric of [illegible] organism; and this week a meeting for some such purposes has been assembled by the National Insurance Convention. The proceedings of this body have been very imperfectly reported by the press; but from the practical character and large experience of the delegates much is expected; and there is no doubt that the official record, when published, will be a valuable repertory of facts, figures and suggestions for reform. Among the suggestions already announced, the most important, in a practical point of view, were offered by Mr. F. S. Winston, President of the Mutual Life Insurance Company of this city. On behalf of the Life Insurance Companies of this State, and after consultation with their officers, he advocated several changes in the legislation of the various States. Of these, the most important were as follows:

1. Uniformity in the forms of annual reports and other requirements made by the different State Departments of Insurance.
2. The adoption of the same basis, principles and system in the valuation of policies and computation of reserves by the different State Departments where such valuations and computations are to be made.
3. The acceptance by each State Department of the valuations made by any other State Department, (in which the companies were incorperated), when properly performed on sound and recognized principles and an uniform basis.
4. The lists of policies and securities in detail required in the annual statements to be made to one State Department only, and the certificate of the total amount of such policies and amount and value of such assets from said departments where made to be deemed sufficient in all other State Departments.
5. The deposit of securities by the companies to be made in the State only in which the company was incorporated, if there required, and the certificate of such deposit from the Insurance Department of the State where made, to be accepted by all other State Departments.
6. The appointment of one agent or attorney only in each State to be required by it to accept legal service in behalf of a company, thereby avoiding great possible dangers.
7. Taxation, if not practicable to have it entirely removed from life insurance, to be made uniform and reasonable in the different States, and not complicated and oppressive, as at present in many portions of the country.

Regarding the Fire Insurance Companies similar reforms were urged by Mr. George T. Hope of the Continental Fire Insurance Company. The great object at which all these suggestions profess to aim is of course to augment the public safety. This paramount object the proposed changes are for the most part adapted to promote. Especially is this true of the arrangements to concentrate the assets of the companies, to prevent their dispersion among the different States, and to keep them under immediate control, or at least within easy reach in case of panic. It is not easy to multiply beyond need the bulwarks which protect the insured constituency of such corporations. When a Life Insurance Company fails, the injury is fatal to multitudes of widows and orphans, who lose the living laid by for them through many years of frugal thrift and self sacrifice. So with a Fire Insurance Company, when a merchant's property is destroyed, he is ruined and reduced to poverty if he do not get his insurance money. In an individual point of view the damage from such failures cuts deeper and inflicts injuries more fatal, because it is concentrated in a narrower area than that arising from the failure of a bank, by which a multitude of persons lose something, but few lose every penny they own. In a more general view to the financial system of the country, however, and as parts of the complex organism by which the business of the country is carried on, both the banks and the insurance companies are like, or at least they fulfil analogous functions. The first duty of both is to the public. And a heavy failure at a monetary crisis in the ranks of the insurance companies is as likely to spread alarm and panic through the financial circles as a failure of a bank.

It was one of the Napoleonic war maxims to choose the weak spot in the enemy's line, and on this point to concen-

Digitized by Google

trate in an overwhelming, crushing, piercing column his whole force. This Napoleonic policy is that adopted by a financial panic. With unerring precision it selects the weakest part of the financial lines, and invariably breaks out there. If it be among the insurance companies, or the banks, or the trust companies, or the savings institutions that this weak spot exists, there the panic may start; and, like a great conflagration, when once started, it defies all human sagacity to foresee whither or how far it will spread its consuming, devouring rage. The present is a very favorable time, as we have said, for such investigations as are periodically needful into the position of our financial institutions. A fault discovered now can be remedied, though at another time, when the money market is less auspicious and the state of public confidence more disturbed, such a fault might be fatal.

We lay the more stress on these facts because, so far, the the Convention has paid too little attention to them. After freely conceding all that these gentlemen claim as to their right to have their corporations relieved of antiquated burdens and oppressive restrictions which prevent expansion, contract business, and give undue advantage to the companies of certain States over rival organizations elsewhere, still we must maintain that superior questions have paramount claims; that subordinate matters, however important, must hold but the second place; and that the first duty of insurance companies is to the public.

Hence it is that our Insurance reformers will do well to scrutinize very closely the character of the assets and liabilities of their respective companies, and the availability of the securities in which their investments are made. A bank having more debts outstanding due on demand cannot afford to hold so large a proportion of mortgages or other long securities as can safely be chosen by an insurance company, because these securities are not so easily or so swiftly convertible at a crisis into ready cash. Hence the bank is debarred from many lucrative investments in which the insurance company may indulge more freely, so as to gain larger profits. Life insurance companies are, moreover, less liable to irregular and unforseen demands than fire insurance companies. Still it is worthy of note that last year, although the amounts insured with the New York fire companies reached 4,800 millions, the amounts paid were less than 24 millions, or ½ per cent of the whole. Making all needful concessions, however, there is some doubt whether our banks, savings institutions and insurance companies are not tempted by the necessity of earning profits and are not venturing to lock up in securities not readily convertible, a larger part of their means than would be approved by a sound policy or a due regard to their safety in time of peril and panic.

SOME FEATURES OF OUR EXPORTS.

The statistics of the exports from the United States for the year 1870, which we published some weeks since, present features of interest, compared with the same figures for 1869, illustrating the relative prosperity of the different sections of the country. And first, it will be noticed that both the great staples of the West—Breadstuffs and Provisions—show a falling off in the values exported, the total deficiency amounting to nearly 13 million dollars. The short corn and hog crops of 1869 readily account for part of this, but the falling off in the value of wheat and flour will cause some surprise, in view of the large demand which was occasioned by the war in Europe. But it must be remembered that the premium on gold was higher in 1869 than in 1870, and the valuations of exports are given in currency. Then, again, fully one-half of the exports of Flour and Wheat in 1870 were made at very low prices, while those of 1869 were at comparatively high prices until near its close. The exports in each year aggregated (reducing Flour to Wheat) something over 50 million bushels, more than double the quantities exported in the previous two years, and unequalled, we believe, in the history of our Breadstuffs trade. That our export of Provisions show no greater falling off in quantity and value is due mainly to the European war; for with the subsidence of that demand, the trade is left in a very precarious situation. The recent decline in prices of "hog products" has been very severe.

The exports of Southern products show an increased value of 30 millions in Cotton and a decrease of 9½ millions in Tobacco and Naval Stores, leaving a balance of 20½ millions in favor of that section. That a gain of 800,000 bales, or fifty per cent, in the quantity of Cotton exported, only gives an increase of 30 million dollars, or eighteen per cent in the total value is, of course, to be attributed to the great decline which took place in 1870—the price of Middling Uplands averaging only 20·84c. in 1870 against 29·62c. in 1869.

There is a handsome increase in the exports of Petroleum—though greater in quantity than in value; and in some of the minor staples the exhibit is a favorable one; but it will be seen to have been generally the case that an increase in quantity was attended with a decrease in value. This forcibly illustrates the shrinkage in prices which was going on throughout 1870, except in articles of food. The most notable improvement, because entirely abnormal, was in the export of munitions of war, which amounted to about thirteen millions in 1870 against about four millions in 1869—an excess of nine millions—while the shipments of iron and its manufactures increased nearly three millions, or more than doubled. A recapitulation of the differences in the foreign movement of the productions of the various sections of our country for the years 1870 and 1869 will show the following result:

Increased exports of products of the Southern States	$20,500,000
Increased exports of products of the Eastern and Middle States	7,200,000
Total increase	$27,700,000
Diminished exports of products of the Western States	12,700,000
Balance showing aggregate increase	$15,000,000

Besides feeding our own large cities, which are now exceeded in population by but few in the world, we have sent abroad, in the two years under review, 7 million barrels of flour and meal, 68 million bushels of wheat, 323 million pounds of animal food; supplemented with 400 million pounds of tobacco; and we have contributed to foreign manufactures, 1,800 million pounds, or about four million bales of cotton; not forgetting 243 million gallons of petroleum, furnishing Europe with an illuminating fluid of unequaled excellence and cheapness. How insignificant are mines of gold and precious stones, compared with such treasures as these!

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS

The following are the changes in the Redeeming Agents of National Banks since the 18th of May, 1871. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency.

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
Maryland—Baltimore	The Central Nat'l Bank	The National Park Bank of New York, approved.
Kentucky—Harrodsburg	The First National Bank	The National Park Bank of New York, approved.
Wisconsin—Kenosha	The First National Bank	The Second National Bank of Chicago, approved in place of the First National Bank of Chicago.
Iowa—Indianola	The First National Bank	The Third National Bank of Chicago, approved.
New York—Onconta	The First National Bank	The National Park Bank of New York, approved.

New National Banks.

The following national banks have been organized since the 18th of May 1871:

Official No.

1,821—The People's National Bank of Winchester, Ill. Authorized capital, $75,000; paid in capital, $50,000. Thomas C. Keener, President; John Moses, Cashier. Authorized to commence business May 19, 1871.

Digitized by Google

1,632—The Gainesville National Bank, Alabama. Authorized capital, $100,00 paid in capital, $54,250. Jonathan Bliss, President; C. D. Woodruff, Cashier. Authorized to commence business May 20, 1871.

1,633—The First National Bank of South Haven, Michigan. Authorized capital, $50,000; paid in capital, $35,000. Silas R. Boardman, President; Charles J. Monroe, Cashier. Authorized to commence business May 22, 1871.

1,634—The Farmers' National Bank of Salem, Virginia. Authorized capital, $50,000; paid in capital, $32,500. John J. Moorman, President; Green B. Board, Cashier. Authorized to commence business May 23, 1871.

[From our own correspondent.]

LONDON, Saturday, May 13.

One of the more prominent features of the week has been the large influx of gold into the country, the bulk of which has been received from the United States. The supplies sent into the Bank have been unusually large, and at the present time there are no indications of a reviving export demand. The only quantity purchased for export of late has been a sum of £432,000, which was bought by Messrs. Murietta & Co., and sent to Buenos Ayres on account of the Argentine loan. By telegraph we learn of large supplies coming forward; £434,000, for instance, is due from Australia about the 22d inst. This consists of Australian gold. There are also the large supplies which continue to be forwarded from the United States. The insurrection in Paris still checks all demand for export, and although there is some prospect that the reign of the Commune is drawing to a close, men hesitate to give an opinion as to what is to come next. Many arguments have arisen, and it may even be asserted that, taking into consideration the collapsed state of France after the surrender of the Emperor, the troubles in Paris may prove a boon to France. The fact must not be lost sight of that the French army was captive in Germany, and grave were the doubts expressed as to what would be done with it when it returned home. The National Guard of Paris, in its conceit at having kept the Germans at bay for five months, has treated with contempt the trained soldier, and has endeavored to impress upon the world the idea that theirs has been the most glorious achievement of the war. The credit of the resistance of Paris is due, however, more to those who had the sagacity to secure so large an amount of provisions, whereby close upon two millions of people were fed for five months. The fighting was comparatively little, and that was chiefly done by the troops of the line. The rising, revolution, or rebellion, under whichever name people like to call it, has had one important effect, viz.: that of bringing the captive army together, and of making it devoted to one chief. Under McMahon the army has regained confidence, and as it is one of the misfortunes of France that her people are so erratic as to need an army to keep them in order, the concentration and devotion of the army may be looked upon as guarantees that order will be maintained with a firm hand. Order once restored, and with little prospect of its being seriously disturbed, France will then be able to look seriously at her position. That position cannot but be grave, but the nation, like the individual, must face the difficulty, and must speedily set to work to restore its fortunes. With the restoration of order, the position of our money and bullion markets will be speedily changed, for if order, in its fullest sense, is established, the English capitalist will be only too willing to help, as the help given will be attended with considerable gain.

During the present week the demand for money has been exceedingly quiet. There has been some inquiry in connection with the settlement in the Stock Exchange, and the demand for commercial paper has been fair. But the supplies of idle capital are so large that, although the demand is considerable, it is still possible to discount freely the best three months' paper at 2½ per cent. And there will probably be no improvement until a change for the better has taken place in the state of affairs in Paris. The following are the quotations for money, compared with those of last year:

	1870. Per cent.	1871. Per cent.		1870. Per cent.	1871. Per cent.
Bank minimum	3 @...	2½@ ..	4 months' ba'k bills	3¼@3½	2½@2¾

Mexican Dollars per oz.	4	10¾ @	4	11¾

In the Stock Exchange a considerable amount of business has been in progress, and nearly all classes of securities have improved in value. In British railway shares, owing to the continuance of very favorable traffic returns, there has been a further important rise. During the week ending May 7 the traffic receipts of railways in the United Kingdom amounted on 13,908 miles to £874,596, against £820,169 last year, on 13,665 miles, showing an increase of 243 miles, and of £54,427. The receipts for the goods traffic on the principal lines amounted to £432,052, against £396,455, showing an increase of £35,597. The debenture stocks of British railways have improved on the second reading of a bill which, if finally passed, will enable trustees to invest their funds in those securities. In the foreign market there has been an improved tone, and Spanish and Italian descriptions have risen in price. United States Government securities are firm in value, and have not materially altered during the week. Atlantic and Great Western securities remain firm, and the reorganization stock has been as high as 15½ premium. Erie railway shares are at about 21, but Illinois Central are weaker. The following were the highest and lowest prices of consols and the principal American securities on each day of the week:

	Monday.	Tuesday.	Wed'ay.	Thu'ay	Friday.	Sat'day.

The tone of business remains good, and in nearly all cases prices are firm. The following relates to the trade of Manchester:

This market has been unusually flat throughout the week. Producers still keep well under contract, but the actual business done since last Friday has been about the smallest which has been transacted since the commencement of the present year. This flatness is mainly attributable to the cessation in the demand for the India and China markets. Within the last fortnight the Eastern demand has very materially fallen off, and, as is usually the case under similar circumstances, buyers for the continent of Europe and other quarters have nearly withdrawn from the market, and have abstained from making offers except at reduced prices, which producers are not yet prepared to accept. The position of both spinners and manufacturers has become worse within the last fortnight. Some weeks since the demand for both yarn and cloth continued animated and good, while the cotton market kept declining, and producers had everything in their favor. Within the last two or three weeks the price of cotton has maintained itself better than either cloth or yarn, and producers are, relatively speaking, worse off than they were previously. The large contracts which both spinners and manufacturers undertook in the first quarter of the year have been of immense service to them, and even at the present time they are still moderately well under order and under no pressure to sell; but at the price of cotton to-day they can no longer make sales of either yarn or cloth at the advantageous and profitable prices. The imports of cotton this week have been comparatively small, amounting only to 48,000 bales. The sales are put down as 78,000 bales, of which the trade have taken 55,000 bales; but the actual sales have not been so large, and a considerable proportion of the amount mentioned above consists of cotton already sold and forwarded to the consumer from the ship's side. The comparative scarcity of the better qualities of American cotton still imparts exceptional strength to the yarn and cloth produced from these descriptions, but the stock of East Indian and common American sorts is ample, and coarse yarns spun from them are weak, and freely offered at lower prices than would have been accepted a week since.

Annexed is a statement showing the imports and exports of cotton into and from the United Kingdom, from September 1 to May 11, compared with the corresponding period in 1869–70.

	1870–1. Imports.	1870–1. Exports.	1869–70. Imports.	1869–70. Exports.
American...bales	1,817,190	271,502	1,013,107	76,812
Brazilian	317,780	35,849	328,626	43,229
East Indian	776,105	391,095	931,387	389,931
Egyptian	201,278	8,865	149,575	3,416
Miscellaneous	181,009	6,911	84,216	10,170
Total	3,293,362	714,923	2,511,441	514,568

With regard to the wool trade, Mr. Helmuth Schwartze reports that the demand remains brisk, and current prices are fully maintained. A solitary exception to this rule exists in the case of lambs' wool, which is perceptibly cheaper than at the beginning of the series. But even here there is no abatement in the inquiry, and the decline appears rather as a reaction from the former excessive rates—the more natural, as the supply of lambs is always plentiful at this season. For superior combing wools, both from Port Phillip and Sydney, there are rather less competitors in the market than a fortnight ago, but the prices show very little change, and remain, on the whole, satisfactory to growers. Medium to good Australian fleece, and all scoured descriptions, are quite as high as at any period during this series, and the same may be said of Capes, the demand for which continues unabated. Whether the exceptional inquiry for army clothing will long outlast the war, and continue after the extraordinary activity that has prevailed in this branch of industry for the last six months, is perhaps doubtful; but at present there are no signs of any falling off in this direction, and the position of Cape and all similar wools may accordingly be expected to remain firm for some time to come. From all sides the reports on the condition of the woolen industry are very satisfactory; the manufacturers are fully employed, and loth to extend their engagements at the prices existing for goods at present; the stocks are moderate, and everything points to a brisk business in the immediate future.

The weather is cold and cheerless, with easterly winds, which are not favorable to the progress of vegetation. The vegetable world has been pretty well at a standstill during the week, but there are no complaints, and there is an abundance of grass in the pastures. The wheat trade has been quiet but firm during the week. In prices no material change has taken place.

The following statement shows the imports and exports of bread and feeding stuffs into and from the United Kingdom, during last week and since the commencement of the season, compared with the corresponding periods in 1869–70:

FOR THE WEEK ENDING MAY 6.

	1870'71. Imports.	1870'71. Exports.	1869'70. Imports.	1869'70. Exports.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show an increase in both dry goods and general merchandise. The total imports amount to $7,460,904 this week, against $6,561,621 last week, and $10,382,026 the previous week. The exports are $3,473,666 this week, against $4,306,496 last week, and $3,846,933 the previous week. The exports of cotton the past week were 9,068 bales, against 13,095 bales last week. The following are the imports at New York for week ending (for dry goods) May 19, and for the week ending (for general merchandise) May 20.

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

Lake Shore and Michigan Southern Railroad.—The annual report of the Lake Shore and Michigan Southern Railroad Company, for the year ending December 31, 1870, is published in the *N. Y. Daily Bulletin*; a brief extract from the report was given in the CHRONICLE of May 20th, but the following additional details are of much interest:

The bonded debt of the Company (including the debt of the Detroit, Monroe and Toledo Railroad Company, and the Kalamazoo and White Pigeon Railroad Company, the stock of both of which roads is owned by this Company) amounts to $22,283,000. The annual charge for interest on this debt, and the $466,000, bonds of the late Cleveland and Toledo Railroad Company, in the hands of the Sinking Fund Commissioners, is $1,594,430. The rate of interest is seven per cent on all except $200,000, which is eight per cent.

The company, on July 1st, 1870, executed a consolidated mortgage, with a provision for a sinking fund, to secure the payment of bonds registered and coupon, to the amount of $25,000,000, bearing interest at the rate of seven per cent per annum.

Of the bonds secured by this mortgage a sufficient amount has been set apart to secure the payment of the bonded debt at maturity and the proceeds of the residue will be appropriated to double tracking the main line and procuring additional eqipment.

There has been built at Elkhart, Indiana (the intersection of the Main and Air Lines), a machine shop, with other improvements, at a cost of $141,831 26.

New depots and other structures, where none had previously existed, have been erected upon the road at a cost of $139,567 57.

Additional second track and side tracks, thirty-four miles in extent, have been constructed at a cost of $314,406. There has been expended in bridge masonry and permanent embankment, the sum of $391,089 93. There has been expended in permanent work upon the Kalamazoo Division, the sum of $73,300. A further sum of $39,449 65 has been expended in miscellaneous construction. There has been advanced, for the purpose of the construction of the extension of the Jamestown and Franklin Railroad, from Franklin to Oil City and beyond, during the past year, the sum of $421,262 26. The completion of this extension has contributed to a large increase of the traffic of this company.

There has been placed in the track, during the past year, 18,661 tons of new and re-rolled rails, including 3,054 tons of steel rails. The cost of these rails, with the exception of the iron used in the construction of new side tracks, has been charged to operating expenses. The business of the last year has demonstrated the necessity of additional double track, and it has been determined to construct, during the present year, one hundred and fourteen miles between the cities of Buffalo and Toledo, that being the part of the road where additional facilities are more immediately and imperatively required. This includes the re-building of that portion of the Northern Division of the late Cleveland and Toledo Railroad, extending from Sandusky, Ohio, to Oak Harbor, about twenty-six miles.

The earnings of the road for the first four months of the year 1871, show an increase of $393,000 over the corresponding period of 1870, affording reasonable expectation that the year will be one of great and unusual prosperity.

Grand total	$63,287,279

Chesapeake and Ohio Railroad.—This road is progressing rapidly towards completion. The road is already running to the White Sulphur Springs, and the earnings thus far are over $800,000, which exceeds the estimate made when the road was first commenced. East and west from Coalsmouth over 100 miles are graded waiting for the iron, of which 10,000 tons are landing at Coalsmouth. At the western terminus the connections are so numerous that the company has determined to place 3,000 tons of steel rails as the best and most economical to support the great wear and tear. Next year the connecting roads now building from all the leading western and south-western cities will be completed about the same time as the Chesapeake and Ohio, so that the road will start with a full press of traffic from the west and southwest. The Chesapeake and Ohio Railroad, via Washington to St. Louis, when completed, will be fifty-one miles shorter than over the Erie Railway, and 110 miles less than by the New York Central via Chicago, and will furnish another trunk line from New York city to the west and southwest.

Selma and Meridian.—This railroad, eighty-one miles long, part of a direct line between Vicksburg and Savannah, was sold at Selma, Ala., on the 18th ult., under chancery decrees, and was bought in by the bondholders at the minimum price of $1,000,000.

Minnesota Debt.—On May 2nd, the people of the State of Minnesota, voted in special election, in favor of not acknowledging the indebtedness on the Bonds, issued by the State and known as Minnesota State Railroad Bonds. Of the status of this indebtedness, we have in previous issues furnished full particulars.

U. S. Financial Agents in London.—Messrs. Jay Cooke, McCulloch & Co. have been appointed agents of the United States in London for making the navy disbursements abroad. Messrs. Baring Bros. & Co. have heretofore been the agents, and the disbursements since the war have amounted to four or five million dollars annually.

— The *Anglo-American Times* recently gave some interesting remarks of Mr. Geo. McHenry, of Pennsylvania, upon the new United States loan, concluding with this interesting table:

AMERICAN INDEBTEDNESS TO EUROPE.

	1861.	1871.
Federal securities	$30,000,000	$1,000,000,000
State securities	70,000,000	100,000,000
Municipal securities	20,000,000	8,000,000
Railway bonds	10,000,000	150,000,000
Railway shares	50,000,000	110,000,000
Canal bonds and shares	200,000	5,000,000
Mining securities	300,000	27,000,000
Miscellaneous debt	15,000,000	100,000,000
Total	$200,000,000	$1,500,000,000

AMERICAN WEALTH.

	1861.	1871.
Population	33,000,000	40,000,000
Property	$13,000,000,000	$21,500,000,000

Deducting the debts due to foreigners at the respective periods, the accumulated wealth of the United States in 1861 was $400 per head; in 1871, $500 per head in gold.

—Attention is directed to the card of the Texas Banking and Insurance Company at Galveston, Texas. This company has a cash capital of $238,000, and includes in its list of directors a number of the most prominent business men of Galveston. Special attention is given to collections in all parts of the State of Texas which are made without any other charge than the ordinary rates of exchange. J. M. Brandon, Esq., is President; J. C. Wallis, Esq., Vice-President, and the Messrs. Lauve Cashier and Secretary.

—The National Bank of Texas, at Galveston, makes collections on all accessible points. M. Kopperl, Esq., is the President; J. J. Hendley, Vice-President, and Chas. F. Noyes, Assistant Cashier.

—On another page will be found the advertisement of the Weston Fuel-Saving and Gas and Smoke Consuming Boiler. The great improvement introduced by this boiler is in the economy of fuel, as the gas and smoke heretofore lost are now consumed, with the result of saving from 33 to 40 per cent in the quantity of fuel ordinarily used by other boilers. Among other testimonials of the great value of this boiler is one from Mr. D. B. Grant, President of the "Grant Locomotive Works," at Paterson, N. J., who commends it very highly, particularly for the use of soft coal.

—Messrs. Davis & Freret in New Orleans are among the leading real estate brokers and general land agents of the South, they give attention to business in the States of Louisiana, Texas, Mississippi, Alabama, &c., in buying, selling and leasing of plantations and other real estate, paying of taxes, collecting rents, etc.

BANKING AND FINANCIAL.

BANKING HOUSE OF HENRY CLEWS & CO., 32 WALL ST., N. Y.

Our business is the same as an incorporated bank.

Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed on all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make tele graphic transfers of money to any desired point, and transac every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upward on.

The Imperial Bank, and Messrs. Clews, Habicht & Co., London.

The Provincial Bank of Ireland, The National Bank of Scotland, and all their branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Government and other investment securi ties; also Gold and Exchange.

Advances made on approved collaterals and against Merchan dise consigned to our care.

We make collections of Notes, Drafts, Coupons and Dividends with promptness on all points, and are fully prepared to offer banking facilities upon either currency or gold basis.

BANKERS AND DEALERS IN GOVERNMENT SECURITIES.

No. 5 NASSAU STREET, NEW YORK, May 20, 1871.

THE CHESAPEAKE AND OHIO RAILROAD COMPANY are extending their line of road to the head of reliable navigation on the Ohio River, where it will meet and connect with lines now building or projected, to the principal railroad centers and river cities of the Western States. 237 miles are in operation, and the iron for 100 miles additional has, when completed, a large business now being laid. The road will beside an immense mineral traffic to the East and West through business,

THE SIX PER CENT. GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD Co. are amply secured, and very desirable for safe and profitable investment.

$25,000,000 CENTRAL PACIFIC BONDS negotiated by us, amounting to $15,000,000, have a ready market everywhere, being favorably known and actively dealt in at all the principal Stock Exchanges of this country and Europe, and are readily salable at all times at quoted market price, which is now above par.

The Bonds of the CHESAPEAKE AND OHIO RAILROAD Co. we believe to be of equal value and security, and must in time take a like rank in market value and salable character.

Holders of Five-Twenty Bonds, desiring to fund them otherwise than in the new Five Per Cent Government Loan, may do so with entire safety, at a profit of about 20 per cent, and without reduction of interest, by an exchange for the Bonds of the CHESAPEAKE AND OHIO RAILROAD Co.

Price of the bonds, until further notice, 91, and accrued interest from May 1.

We also buy and sell Government Securities, and the Bonds of the Central Pacific Railroad Co., and as agents of the U. S. Government, will attend to the funding of Five-Twenties into the new United States Bonds.

Bankers—The London Joint Stock Bank, London.

The Capital of the German Bank of London Limited is £2,000,000, divided into 200,000 Shares of £10 each: of which 60,000 Shares, representing a capital of £600,000, have been issued, subscribed for, and allotted, and are intended to be fully paid up within six months.

The bank is established in London and has no branches on the Continent or abroad. It is now prepared to open business, to negotiate approved securities, and generally to attend to transactions appertaining to Foreign banking business.

Bartholomew House, Bartholomew lane, London, E. C., April, 1871.

THE NEW ORLEANS, MOBILE AND TEXAS RAILROAD COMPANY

Are building a trunk line, connecting New Orleans with Mobile on the east, and giving the only railroad connection between the former city and the great and most productive State of Texas on the west, the total distance from Mobile to Houston being 475 miles.

The company is composed of strong Northern capitalists, who have already expended nearly TEN MILLION DOLLARS of their own funds in the construction of the line. They have built about 225 miles from Mobile westward, and secured by purchase of securities and made provision for the thorough repair and equipment of the 108 miles constituting the Texas division; leaving but 140 miles to be built to complete the entire road.

It is believed that no other railroad corporation in the country has ever made so large an expenditure from its own means before offering any of its securities to the public.

The Company now offer for sale the 8 per cent mortgage bonds upon the Louisiana division of 226 2-3 miles from New Orleans to the Sabine River. This will probably be the most valuable portion of the whole line, as it will be the only rail communication by which the enormous productions of Texas can reach the Southern metropolis.

So important is this road considered to Louisiana, that the State has made very liberal grants in aid of the enterprise, by direct donations, by endorsement of its bonds, and by subscriptions to the stock of the Company, amounting in all to over eight million dollars.

The bonds now offered are of two classes: First mortgage bonds, to the amount of $12,500 per mile, and second mortgage bonds, to an equal amount, both principal and interest guaranteed by the State of Louisiana. The price of the two classes is the same, and subscribers can take their choice.

The Bonds are only in the denomination of $1,000, or £200 each, interest payable January and July, at the rate of eight per cent currency in New York, or seven per cent gold in London, at the option of the holder, at the time each coupon is due. Bonds can be registered if desired.

No better security has been offered to investors. The line is a good and important one, and the stockholders have proved their determination and ability to carry the work to an early and successful completion, by the very large amount they have themselves put into it.

The Bonds are largely profitable, as well as entirely safe. One thousand dollars invested in these eight per ceet bonds will give the purchaser *more than seventy-seven per cent* greater annual interest than the same amount invested in the new Government Five Per Cents, into which the Government Sixes are being funded by the Secretary of the Treasury.

At the same price, an eight per cent currency long bond is far cheaper than a 7 per cent gold one. Calculating a return to specie payments in three years, and taking the time that the bonds of the New Orleans, Mobile and Texas Railroad have to run—45 years—we find that by compounding the interest of each, every six months, at 7 per cent, an 8 per cent currency bond at 90 will give a return of $2,614 18 more than a 7 per cent gold bond, at the same price, or nearly three times the amount of the original investment.

While the purchaser of the 8 per cent bonds of this Company can realize this special profit, he also holds the option of taking advantage of any temporary advance in gold, as he has choice, at every separate coupon day, of gold interest at 7 per cent, or currency interest at 8 per cent.

The bonds are dated May 1, 1871. The first coupon will, therefore, be a fractional one, running from May 1 to July 1. The price is 90, and accrued interest at 8 per cent currency from May 1 to date of remittance. Bonds will be sent free of cost and Government, and all other marketable securities will be taken in exchange at their best market rates, without charge for selling.

Information concerning the company and the Road, and pamphlets containing map and full details of the enterprise, can be obtained of the undersigned or any of the Company's advertised agents.

FRIDAY EVENING, May 26, 1871.

The Money Market.—There has been no abatement in the excessive accumulation of loanable funds, and while 2@3 per cent on governments, and 3@4 per cent on miscellaneous collaterals are the quoted rates for call loans, it has often been impossible for banks and other lenders to place their balances at all. In consequence of this very large supply of money there has been less complaint heard in regard to the national bank currency, as the proportion of legal tenders on hand is generally sufficient for business purposes. The present ease in the market is apparently influenced by the almost universal opinion that the same condition of affairs will continue for some time to come, as well as by the immediate causes producing it. There is certainly no prospect at the moment of any change in the condition of monetary affairs, though it is barely possible that the reported negotiations in regard to the new United States bonds may result in placing the Secretary of the Treasury in a position where he will be less positively committed to keeping an easy market. On time engagements rates have been from 4 per cent on thirty days to 6 per cent on six months, with approved collaterals. The last city bank statement, May 20, showed the following changes: Loans, increase, $205,240; specie, decrease, $983,710; circulation, decrease, $116,513: deposits, increase, $1,637,998; legal tenders, increase, $2,269,029. The result of this statement was to show the banks $954,048 stronger in their excess over legal reserve, the whole excess being $15,584,390.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	May 20, 1871.	May 21, 1870.	May 22, 1869.
Loans and discounts	$289,436,531	$280,300,000	$270,300,000
Specie	15,262,813	34,100,000	15,400,000
Circulation	31,204,966	33,000,000	33,900,000
Net deposits	238,594,016	226,500,000	199,400,000
Legal Tenders	66,321,822	59,000,000	57,200,000

Commercial Paper has been in good demand, and first-class names have been negotiated at 5@5½ per cent, while some very choice names have sold at 4½ for sixty days; on six month's paper rates are 5½@6½ per cent.

Quotations are as follows:

		per cent.
Commercial, first class endorsed	60 days.	4½@ 5

United States Bonds.—Government securities have been decidedly dull at steady prices, the fluctuations of the week hardly exceeding ⅛@¼ per cent on any of the issues. There has been less demand from foreign bankers for shipment, and the current investment inquiry from home purchasers has constituted the chief business of the week.

At the Treasury purchase of $2,000,000 on Wednesday the total offerings amounted to $5,216,800, and the awards were between 111.10 and 111.25, gold, at the same time being 111.38@111.50.

The most important event of the week in regard to the new loan has been the reported proposition of a prominent banking firm to Secretary Boutwell that their own house, in connection with other some other dealers in Government bonds, should take the whole balance of the $200,000,000 5 per cents now offered, being about $135,000,000. Upon inquiry we are unable to learn that anything more definite has been done in the matter than making a request of Mr. Boutwell to state whether such a proposition, if made upon certain specified terms, would be accepted by him. No reply has as yet been made by the Secretary of the Treasury, but it seems to be generally thought that a proposition upon the terms named could not be accepted, and it is considered doubtful whether a combination of private bankers can make any similar proposal which will not demand more of Mr. Boutwell than the existing laws or his own ideas of business policy will permit him to grant.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, May 20.	Monday, May 22.	Tuesday, May 23.	Wednesd'y May 24.	Thursday, May 25.	Friday, May 26.

* This is the price bid and asked, no *sale* was made at the Board.

State and Railroad Bonds.—Southern State bonds have been active in Tennessees, Virginias, South Carolinas new, and North Carolinas, with considerable inquiry also for old Louisianas, and to some extent for all the Southern State securities. Tennessee bonds have advanced about 2 per cent., and there is evidently much confidence felt in the financial affairs of the State, caused in part by the prospect that a further large amount of bonds will be taken up by the solvent railroads.

The decision of the Court in Louisiana regarding the State debt is understood to permit the issue of such bonds to railroads, &c., as were authorized by law previous to the passage of the Constitutional amendment limiting the whole debt to $25,000,000; this will increase the contingent liabilities of the State about $7,000,000.

Railroad bonds have generally been more active, stimulated by the great ease in money and the growing confidence in this class of securities. The Pacifics, as usual, have been most largely dealt in; Central Pacifics advanced to 103⅛@103½ on the foreign demand, and Union Pacifics, after showing some weakness on the Incomes and Land Grants, which sold on Wednesday down to 81½@82 for the former, and 84½@85 for the latter, on speculative rumors, close to-day as follows; Firsts, 92½ to 92½; Land Grants, 85¾ to 86; Incomes, 85¾ to 86.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

Railroad and Miscellaneous Stocks.—Transactions in the Stock market have not been on a very large scale, and no general movement in prices has taken place, either in the direction of another upward turn, or towards a reaction from the late advance. Money continues to be so extremely easy as to offer every inducement to speculation, and the prevailing opinion of the street still favors the side of higher prices, whenever any material change takes place. In several specialties there have been considerable fluctuations—Rock Island has advanced to 119½, against 115½ last week; Reading sold to-day at 117½, at least 2 per cent higher than last week, and seems therefore to be favorably affected by the very important action of the company in their recent purchase of an extensive property in coal lands, &c., and issuing for that purpose a new mortgage of $25,000,000, a part of which is to be reserved for retiring their present indebtedness of about $6,000,000 and the balance applied to the purposes above named. Lake Shore closes at 114 against 113 last week, and the rumor of a stock dividend, which has so long been afloat concerning this road, now takes the shape of a report that $15,000,000 additional capital will be issued for double tracking the road between Buffalo and Chicago, and that stockholders will have the privilege of taking the new stock for 40 ar 50 per cent in cash. An active movement is noticed in coal stocks with an advance of more or less importance in the whole list; the scheme for consolidating the American, Maryland and Consolidation coal companies is again talked of. Erie closes at 29⅝@29½, there having been no further developments in regard to the stock, or the real cause of the recent advance. The New Jersey Central road was reported at one time as about to be leased to a Pennsylvania Company, but the report was promptly contradicted by the President. Dividends upon the Northwest stocks, common and preferred, are expected to be declared on the 31st instant.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

The Gold Market.—Gold has been dull and ranged all the week between 111⅛ and 112, closing up quiet at 111½ and 111¾. The immediate cause of the slight decline from the advance of last week was the easier rates of foreign exchange, and the consequent shipment of a smaller amount of specie than had been anticipated. The export last week was $2,417,998, and has been thus far this week $1,087,000, which, with the shipments of to-morrow, will probably make the total export of this week about $2,000 000.

The rates for carrying and borrowing gold do not indicate a very heavy "short" interest in the market, although it is possible that the easy rates for money and the absence of speculative movement for a rise render it difficult to ascertain the exact extent of this interest.

A considerable amount of railroad and other bonds have recently been negotiated abroad, and the demand for these securities is evidently on the increase, so that the movement may in time have a material effect in settling our trade balance, and checking the exports of specie.

At the government sale of $2,000,000 on Thursday, bids amounted to $6,618,500. Customs receipts of the week have been $2,800,000. In the loan market rates have ranged from "flat" to 1 per cent for borrowing, and 1 to 3 per cent for carrying, the rates to-day being 1, 2 and 1½ to "flat" for carrying.

The following table will show the course of the gold premium each day of the week past:

	Quotations. Opening.	Lowest.	Highest.	Closing.	Total Clearings.	Balances. Gold.	Balances. Currency.

Foreign Exchange.—The weakness in Exchange noticed in our last report developed immediately afterward into a decline of ½ in prime bankers' sterling, followed on Tuesday by a further decline of ½, prime bills being then quoted at 110½@110¾. This decline was caused by the supply of exchange thrown on the market through a prominent banking house, drawing 30 and 60 days sterling bills against the new loan of the Reading Railroad. This loan is for $25,000,000, though it is reported that only $2,500,000, or £500,000, will be negotiated abroad this Spring; the 60 day bills were drawn at 110. To-day the market was firmer, and prime bills advanced ½ for both 60 days and short sight; a prominent drawer, however, was selling the latter at a concession from highest rates. The advance was understood to be based on the announcement that there were no more bills against the Reading loan for sale, at present. Double Eagles continue to be at ⅛@3 16th premium. Exports of cotton from all United States ports have been 56,540 bales for the week, against 38,421 bales in the same week of 1870.

Quotations are as follows:

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES.

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3. The Table of Railroad, Canal and Other Stocks, on another page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column x=*extra*; s=*stock or scrip*.

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q.—J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name.

Philadelphia and Reading Railroad—New Loan.—The Philadelphia *Ledger* has an article in regard to the above from which we condense the following:

"It has been known that for some months past a number of gentlemen connected with the Reading Railroad Company have been buying large bodies of valuable coal lands in the Schuylkill and Mahanoy coal regions, and it has been generally supposed that these purchases were made in the interest of the Railroad Company. During the present session of the Legislature an act of incorporation was obtained, and under it these lands will hereafter be held. They embrace in the aggregate about 50,000 acres of the most valuable and productive coal land in the State of Pennsylvania, including nearly all the large bodies formerly held by individuals and coal companies in the first and second coal fields. The stock of this new coal company will be held by the Philadelphia and Reading Railroad Company, ample authority for this purpose having been conferred by the act of incorporation above referred to. The money required for this new enterprise will be raised by a loan made by the Reading Railroad Company. All of the branch lines of railroads which were owned entirely by the Company have been lately merged into and consolidated with the Philadelphia and Reading Railroad Company. And a new consolidated mortgage upon all of the property and franchises of the latter company will be issued to secure bonds to the amount of $25,000,000. These bonds will all have forty years to run and will be 7 per cent. currency, both coupon and registered; 6 per cent. gold, both coupon and registered, all in sums of $1,000 each; and 6 per cent. sterling in sums of £200 each; all the issues being free from taxes. Out of this issue of bonds $6,000,000 will be set apart to retire all the present mortgage loans of the Company, amounting to $5,807,000, so that the new loan will practically be a first mortgage loan upon all the property of the Company. The following statement of the assets of the Company has been prepared to show the amount of property upon which the new loan is secured:

Railroads, including main line, Lebanon Valley, Northern Liberties and Penn Township Branch, Lebanon and Pine Grove Branch, Pine Grove and Lebanon Railroad, Lorberry Railroad, Union Railroad, Good Spring Railroad, and Mahanoy and Shamokin Railroad, with their laterals and sidings, aggregating 648¼ miles of single-track road	$31,864,000
Depots, embracing all depots, terminal and wharf structures, office buildings, &c	3,898,661
Real estate, embracing properties held in fee simple, and not included in the items of railroads or depots	8,217,665
Locomotive engines and cars	10,083,990
Stocks and bonds held by the Company	4.325,358
Steam collieries	588,486
Coal barges	580,152
Debts due the Company, cash and uncollected bills	4 092,038
Materials on hand	1,200,529
Total	$64,800,873

The leased lines of railroad and canal held by the Reading Railroad Company are also embraced in the mortgage, though not included in the values in the above statement. The Fidelity Insurance, Trust and Safe Deposit Company of Philadelphia will be the trustee, and the mo tgage provides for a cumulative sinking fund of 1 per cent. per annum upon the outstanding bonds, beginning with the year 1873. Out of the new loan, after setting apart the $6,000,000 to retire the present mortgage indebtedness of the Company, $19,000,000 will be left for the purchase and development of coal lands, and the acquisition of other new property necessary for the increased traffic of the Company. All of the property thus acquired will be added as a security to the new loan, so that the entire amount of $25,000,000, when issued, will be secured by property worth over $80,000,000 exclusive of the value of the numerous leased lines of railway and canal now held by the Company."

The Pennsylvania Railroad Company and its Leased Roads.—The reorganization of the roads west of Pittsburg, leased by the Pennsylvania Company, does not seem to be correctly understood. The following statement is by an officer of the new organization: The number of miles of road in the West exceeds two thousand. The Pennsylvania Railroad Company proposes to delegate to a separate corporation the immediate supervision and management of its properties west of Pittsburg. The legal title of this new corporation is "The Pennsylvania Company." It is chartered by the State of Pennsylvania. Its capital stock consists of—preferred stock, $8,000,000; common stock, $4,000,000; total, $12,000,000. The $8,000,000 of preferred stock is held, and is to be held permanently, by the Pennsylvania Railroad Company. This amount of new capital stock, in consideration of which the above railroad interest of the Pennsylvania Railroad Company were transferred on March 1, to the Pennsylvania Company, covers fully all the expenditures of the parent company in this connection. The $4,000,000 of common stock is also held by the Pennsylvania Railroad Company, who may sell it at par whenever, from time to time, such use of it as may be found expedient. All the profits of the operation of the new organization during 1871, after meeting the obligations of the lines leased, are to be used by the Pennsylvania Company in perfecting and equipping the roads transferred to it. After 1871, it is claimed, the preference shares of this company will yield at least six per cent on their par value. These works, as a whole, now yield net revenues more than sufficient to meet all the obligations assumed for the Pennsylvania Railroad Company in taking possession while the operations of the sinking fund of the Pittsburg, Fort Wayne and Chicago Railroad Company, the terms of which have been faithfully complied with, and the semi-annual amount to be charged to the running expenses, will pay off the whole of its mortgage debt of $13,563,000 before the bonds are due. The management of this Pennsylvania Company has been placed by the company in the hands of seven directors, as has already been announced.—*Exchange.*

Houston & Texas Central Railway Company.—The Chief Engineer reports as follows, May 1: Gentlemen—I herewith submit a general report of operations on your road, in the different departments which have been under my control during the past year.

At the date of your last annual meeting you had in operation 155 miles of road, running to Calvert on the main line and to Brenham on the western branch.

Since that time the road has been opened for passenger and freight business to Groesbeck, 40 miles north from Calvert, on the main line; and to Ledbetter, 25 miles west from Brenham, on the western branch, making a total of 220 miles now in operation, with 10 miles of track laid beyond Ledbetter to Giddings, (and which will be ready to open for business about the 8th inst,) making at the present date a total of 230 miles of track.

The new portion of the road is well built, in good order, and in general compares favorably with any of the best roads where no ballast is used.

The earnings of the road were much reduced during September, October and the early part of November from the effects of the quarantine regulations incidental to alarm of yellow fever, and later by the non-arrival of rolling stock, which was expected early enough to meet the requirements of the business season. Incessant rains also, in December and January, damaged the road to some extent, and, of course, interfered proportionally with the business. The expenditures for repairs, therefore, bear more than a usual proportion to the earnings.

ROLLING STOCK.

The engines, passenger and freight cars owned by the company are as follows, viz:

Engines in running order	26	Baggage cars building	4
Engines in shop for repairs	4	Box cars	273
Passenger cars in good order	20	Platform cars	245
Passenger cars needing repairs	3	Stock cars	15
Passenger cars building	2	Boarding cars (old, worn out and unfit for regular service)	8
Baggage cars in good order	5		

CONSTRUCTION.

Since August last, when I took charge of engineering operations on your road, the line has been located from Ledbetter to Austin, and preliminary lines run from Richland creek to Red River, with a location secured twenty miles north of Corsicana.

By these surveys the distance from Houston to Red River, two miles above Preston where the line reaches it, is 354 miles, from Hempstead to Austin 118 miles, and the total length of your entire line when completed will be 472 miles.

The line to Austin is somewhat longer, but much cheaper and more easily built upon than that originally run up the Colorado bottom, which the present line avoids altogether, except near Austin, where it is not subject to overflow.

The grades on the present line are located everywhere above the highest known floods.

Arrangements have been made which are believed to be fully adequate to secure, if desired, the completion of the road to Austin by the first of October next.

About the first of June the grading will be completed from Groesbeck to Richland creek, a distance of 30 miles. Preparations have been also made to go on immediately with the grading as far as Corsicana, 10 miles north from Richland creek and 210 miles from Houston.

Boston, Hartford & Erie.—At a full meeting of the Berdell bondholders, at Boston, last week, the question was upon the raising of $200,000 to be paid to the receivers and trustees, so that the latter could foreclose the mortgage and enable the bondholders to get possession of the road, in accordance with the recent decree of the courts. An assessment of 2 per cent on the par value of the bonds was finally agreed upon, the bondholders paying this assessment being declared specially entitled to the benefit of the suit for foreclosure. The road, during the last ten months, has paid expenses and $90,000 more, not including office expenses. Edward L. Pierce was added to the committee of bondholders, the other members being George M. Barnard, William T. Hart, S. Adams and T. R. Lathrop.

Union Pacific Railroad Company.—

	April, 1871.	April, 1870.
Earnings	$604,347 58	$680,978 26
Expenses	268,401 94	474,355 61
Net earnings	$335,845 64	$206,617 65
	Jan. 1. to April 30, 1871.	Jan. 1 to April 30, 1870.
Earnings	$1,957,644 23	$2,148,879 99
Expenses	1,062,414 69	1,841,045 27
Net earnings	$895,229 54	$407,834 72

The net earnings in 1871 show an increase over 1870:

For April	$129,227 99
Three months previous	358,166 83
And for four months	$487,394 82

COMPARATIVE STATEMENT SINCE OPENING, 10TH MAY, 1869.

	First fiscal year, May 10, 1869—April 30, 1870.	Calendar year, 1870.	Second fiscal year to May 1, 1870—April 30, 1871.
Earnings	$8,364,592 50	$7,6-5,277 11	$7,333,961 35
Expenses	5,797,098 56	4,677,414 84	3,898,704 26
Net earnings	$2,567,493 94	$2,947,862 27	$3,435,257 09
Percentage on expenses	69 30	61 34	53 16

The St. Joseph Bridge.—The $500,000 subscription of St. Joseph to this bridge was conditional on a previous expenditure of $100,000 by the bridge company. The company being u able to obtain such an amount in private subscriptions to its shares, now asks that the terms be altered so that fifty per cent of the city subscription be paid at once. As an inducement, it is declared the bridge will not cost more than $800,000, and that the city will control the property absolutely.

The New-Orleans, Mobile and Texas Railroad Company.—The four south-western States of Alabama, Mississippi, Louisiana and Texas constitute a vast district, which is enormously productive, with resources for cotton, sugar, molasses, rice, wheat, corn and cattle-raising almost unlimited; and having within their bounds the great commercial cities of the Gulf. As railroads have made the Western States populous and prosperous, so railroads connecting the great agricultural regions of the south-west, with their natural markets and shipping ports, are to be the main agency inincreasing the wealth of the South, and, in turn, the roads will find large profit in the traffic which will follow their opening.

The New Orleans, Mobile and Texas Railroad Company is composed of capitalists, who saw the promising field for the employ- of capital, and who have already expended many millions of dollars in the work, and have built, equipped and opened to profitable business 140 miles of the road connecting Mobile and New Orleans (the only railway line between those two important commercial cities), and are now vigorously pushing the work west of the Mississippi River. The road is to run from New Orleans to the Sabine River (226 miles), and thence to Houston, Texas (108 miles), making the total distance from Mobile to Houston, 475 miles.

Among the leading stockholders in the Company are Hon. E. D. Morgan of New York, Hon. Oakes Ames, of Massachusetts (who are the trustees under the mortgage); Hon. John A. Griswold, of Troy, N. Y.; Messrs. Morton, Bliss & Co.; J. and W. Seligman & Co.; L. Von Hoffman & Co.; James H. Banker, and Harrison Durkee, bankers, of New York, and othess, whose names are well known in business circles. Having disbursed very largely of their own means, as above noted, without asking help from the public, the company now offer for sale their First Mortgage Bonds, limited by law to $12,500 per mile, and Second Mortgage Bonds, to an equal amount, principal and interest guaranteed by the State of Louisiana. They have forty-five years to run, and pay interest at the rate of seven per cent. gold or eight per cent. currency, at the option of the holder, at the time when each coupon is due.

Mr. W. B Shattuck, who was formerly engaged in the negotiation of the Government loans, and who followed up his eminent success in the national securities by rapidly negotiating the Union Pacific First Mortgage Bonds, and, more lately, the Bonds of the Central Railroad of Iowa, of which he was Treasurer, has been appointed Financial Agent of this company, and sets forth some of the strong points of the enterprise in another column.

Nashville & Decatur—An exchange makes the following statement of the terms of the lease of the Nashville & Decatur Railroad to the Louisville & Nashville Railroad Company, lately agreed upon by a joint committee from the directories of the two roads: The Louisville & Nashville Company assume the floating and bonded indebtedness of the Nashville & Decatur Company, not to exceed $2,450,000. The lease to extend for thirty years, to go into effect on the 1st of July, 1872, or sooner if agreed upon by the parties. Concurrent with or dependent upon the ratification of this lease is a contract by which the Louisville & Nashville Company binds itself to furnish the contractors for building the North & South road the money to complete that road. This money the North & South Company was obligated to furnish these contractors, but owing to the war in Europe that Company has been unable to comply with its contract with its contractors, and that work has been for some time suspended. Under the new contract the North & South road is to be completed by the 1st of May, 1872. To return to the lease of the Nashville & Decatur road: From and after two years from the date of the completion of the North & South road, the Louisville & Nashville road is to pay, semi-annually, an annual dividend of six per cent on the stock of the Nashville & Decatur Company. Should the profits from the North & South road during the first two years that it is run fail to pay the interest on the bonded debt of that Company, then the Louisville & Nashville Company may appropriate so much of the six per cent annual dividends that would be due on the stock of the Nashville & Decatur Company for the first two years of the lease, as will be sufficient to pay one-half of the deficit of the North & South road in meeting its interest. For the payment of the indebtedness of the Nashville & Decatur Company the Louisville & Nashville Company is to receive stock in the Nashville & Decatur Company. At the expiration of the lease the road and equipments are to be returned to the stockholders. If there be any deficiency it is to be paid by the Louisville & Nashville Company. If there be any excess in valuation when returned, the Nashville and Decatur Company to pay for it. No permanent improvements to be made without the consent of the directory of the Nashville and Decatur Company. The organization of this company to be continued during the lease. The road and equipments to be received and returned at gold valuation. The Nashville and Decatur Company to have the right of adjusting all suits and disputed claims against it. Strictly guarded stipulations are made prohibiting any discrimination for or against any point on the road, especially Nashville, in the tariff or movement of freights."

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, May 26, 1871.

In the leading staples of domestic produce — Cotton, Breadstuffs and Provisions—much speculative activity has prevailed during the past week, in fact, they seem to have attracted to them many of the operators on the Stock Exchange, and the combinations to influence the prices of them have wide ramifications. The legitimate demand is good for all of them. Most foreign merchandise has, however, been rather quiet, and in Coffee and Sugar prices are easier.

Tobacco has been active, and very firm for Kentucky Leaf, the demand being mainly for account of foreign governments, the sales having amounted to about 1,500 hhds. Local manufactures and dealers have done very little. All the offerings—which have been comparatively small—have been quickly taken up, but it is expected that the receipts during June will be greatly increased. Prices remain very firm. Lugs, 5½@6c; Leaf, 6½@11c. Seed Leaf Tobacco has been without important feature, though the trade has been very good for home use. Many parties in the trade express a want of confidence in present prices. The sales have been 460 cases new crop Connecticut and Massachusetts, second and fillers, and 170 cases new crop New York, both on private terms; 1,000 cases new crop Ohio, 20@25c, and 200 cases 1869 crop, Connecticut and Massachusetts Wrappers, 35@45c. Spanish Tobacco in good demand, with sales of 750 bales Havana at 85@102½c, currency, duty paid. Manufactured Tobacco is quiet.

Provisions have been active and variable in the leading staples, closing generally with a steady tone at some decline. Pork was active for speculation early in the week; Mess advanced to $16 50 for May and June and $16 75 for July, but there has been a sharp reaction, with sales to-day at $15 50@$15 62½ for June and $15 75 for July, with Prime Mess jobbing at $14@$14 25. Lard sold to the extent of several thousand tierces on Wednesday evening and Thursday at 10⅞@11c. for prime Steam on the spot, 11c. for June, and 11¼c. for July, closing dull, with a partial concession of ⅛c. from these prices. Bacon has sold fairly for export at 8½c. for Short Rib and 9c. for long and short clear. Beef has gone forward to London. Butter has declined, good to prime Western and State selling as low as 20@25c., but closes with some reaction on the effect of drought upon pasturage. Cheese has sold for export at 13¾@14c. for prime factories.

Proleum advanced about 1c. yesterday, but closes dull today at 25c. for refined, and 15c. for crude, in bulk.

Rosin has been firm most of the week, but closes unsettled; strained about $2 60. Spirits Turpentine has varied considerable, but closes firm at 52½@53c.

Metals are still without important feature. Oils have been more active at old prices. Tallow has been firmer and active at 9@9⅛c.

Wool has been in less demand, but prices remain firm, with light stocks. Hops have been firmer on advices that the vine in some parts of England has been injured by vermin; prices are unchanged as yet.

East India Goods have been less active, and general trade on minor articles dull.

Freights have been rather quiet. Room available for Grain to Great Britain was pretty well taken up previously, and shippers have been securing Grain to fill them. Their embarrassments in this work, caused by damage to the Grain arriving by canal, has checked business at the close; shipments to Liverpool by sail to-day 7½d in bulk and 9d by steam.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles from the port of New York since January 1, 1871, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show *total values*, including the value of all other articles besides those mentioned in the table.

ARTICLES.	Great Britain.	France.	Holland & Belg.	Germany.	Other N. Europe.	Spain.	Other S. Europe.	China & Japan.	Australia.	Br. N. A. Colonies.	Cuba.	Hayti.	Other W. Indies.	Mexico.	British Guiana.	Brazil.	Other S. American.	All oth. Ports.	Total this week.	Total since January 1, 1871.	Same time 1870.

COTTON.

FRIDAY, P. M., May 26, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening May 26. From the figures thus obtained it appears that the total receipts for the seven days have reached 40,178 bales against 45,067 bales last week, 46,849 bales the previous week, and 51,482 bales three weeks since, making the total receipts since the first of September, 1870, 3,756,898 bales against 2,750,047 bales for the same period of 1869–70, showing an increase since September 1 this year of 1,006,851 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	17,100	10,465	Florida bales.	125	178
Mobile	2,691	2,168	North Carolina	819	703
Charleston	2,200	2,605	Virginia	3,316	1,789
Savannah	3,970	5,086			
Texas	5,083	2,117	Total receipts	40,178	30,737
Tennessee, &c	4,844	5,676	Increase this year	9,441	....

The exports for the week ending this evening reach a total of 56,540 bales, of which 31,931 were to Great Britain, 10,445 to France, and 14,164 to rest of the Continent, while the stocks as made up this evening, are now 300,843 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night.

Week ending May 26.	Exported to—		Total this week.	Same w'k 1870.	Stock.	
	G. Brit	Contin't			1871.	1870.
New Orleans	17,171	17 135	34,306	17,067	92,190	116,277

Total	31,931	24,809	56,540	38,421	300,843	302,013
Total since Sept. 1	2,180,165	712,819	2,892,984	1,928,481	....	....

* Of the exports from Galveston to the Continent this week 1,311 bales were to France.

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 18,119 bales, while the stocks to-night are 1,170 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to May 19, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1.		EXPORTED SINCE SEPT. 1 TO—				Northern Ports.	Stock.

We have had an advancing buoyant market the past week This upward movement has been due in part to the improvement at Liverpool, in part also to the efforts of the shorts to cover their outstanding contracts due this month, but has found its chief support in the growing belief that cotton is cheap, that it has touched bottom, and that the little remnant of the crop can be easily held, and in case of a recurrence of bad weather at the South can be put upon the market at higher prices. On Saturday last there was little doing, but an advance of ¼c. was established. Monday the transactions were still light, and prices remained unchanged. Tuesday was quiet, but there was a further advance of ¼c. The next day, Wednesday, was active, and prices improved ¼c. Thursday the close was ⅛c. higher, Midling Uplands reaching 17c. But to-day there has been a slight reaction, prices being off ¼c, the receipts proving larger than anticipated. The same influences which have operated on spot cotton have also effected contracts for future delivery, and prices have advanced, though not in all cases correspondingly. Low Middling closed to-night at 15⅞c. for May, 15⅞ for June, 16 3-16c. for July, 16 5-16c. for August, and 16¼c. for September. The total sales of this description for the week are 65,950 bales, including 300 free on board. For immediate delivery the total sales foot up this week 28,511 bales, including 6,596 for export, 11,670 for consumption, 3,162 for speculation, and 7,083 in transit. Of the above 561 bales were to arrive. The following are the closing quotations

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	12⅛@....	12⅛@....	13 @....	13½@....
Good Ordinary	14⅛@....	15 @....	15½@....	15½@....

The sales during the week of free on board have reached 800 bales. The particulars of these sales are as below:

300 May for 300 June, even terms.

The following exchanges have been made during the week:

¼c. paid to exchange 300 June for 300 July.
¾c. paid to exchange 100 August for 100 June.

WEATHER REPORTS BY TELEGRAPH.—Our telegrams to-night, although very much more favorable than for many previous weeks, are not entirely so. There have been two days on which it rained (Monday and Tuesday) at Mobile, Selma, Columbus and Macon, but the storm does not appear to have extended to Montgomery and Augusta, and our correspondent at Selma states that it was light. Crop accounts are therefore more favorable in all that section, and also in the other States on the Atlantic coast. At Memphis, however, although it has rained but one day, our correspondents do not speak favorably; but at Nashville they have had two weeks now of fine weather. The Memphis district, embracing West Tennessee, North Mississippi and Eastern Arkansas,

Digitized by Google

has suffered very severely during the late weeks of rain, and is peculiarly in need of fine weather to save a large portion of the crop. Galveston reports favorable weather, with the crop progressing satisfactorily. The thermometer has averaged at Charleston, 75; Montgomery, 72; Macon, 79; Columbus, 77; Mobile, 78; Selma, 80; Galveston, 75; and Memphis, 75.

CROP MAIL REPORTS.—We have during the past week received letters from almost every section of the South, excepting Texas, giving very full particulars of the area planted in cotton this year and the condition of the crop about May 15. Some of our correspondents in whom we have great confidence, and who have had particular advantages for informing themselves with regard to their entire State, have given an opinion covering the whole State; but we have also received letters from each district, with an estimate of the area under cotton in such district, enabling us to test the more general opinions and leading us to rely with great confidence upon the conclusions we have reached. We have space to give only the following results.

North Carolina.—The falling off in cotton planting in this State reaches about 12 per cent. Weather has been very unfavorable—cold and wet, so that replanting has become necessary in many instances, while in others the grass is extremely troublesome.

South Carolina.—The decrease in cotton cultivation is more decided in South Carolina, due in a great measure to the necessities of the planters, resulting from the large use of fertilizers last year, the small price obtained for cotton, and the bad laws and heavy taxation which that people are struggling under. The area in cotton has decreased 20 per cent, and corn has increased to about the same extent. In this State the weather has also been very bad. A correspondent at Charleston, writing under date of May 22, to illustrate the coolness of the nights, says (speaking of a district within 10 miles of that city), "that there has hardly been a night when fires have not been found comfortable, and in no case has thick covering for beds been discarded." It is not to be wondered at therefore, that the plant is reported as looking sickly, and only from three to six inches in hight, and very generally full of weeds and grsss.

Georgia and Alabama.—In addition to the letters reported by us last week from Georgia and Alabama, we have within the past few days received communications from numerous other correspondents, but all to about the same effect. As to the area in cultivation in these two States we see no reason to change our figures, except to put the average at say 13 per cent decrease for Georgia, leaving it at about 15 per cent for Alabama. For all the States above mentioned, some falling off in crop should also be allowed on account of the small amout of fertilizers used. This remark applies with special force to Georgia. With regard to the condition of the plant we can add nothing to the facts we gave last week.

Mississippi.—Our advices from this State are from all portions of it, and the result shows a falling off in planting of an average of about 12 per cent. The weather in most sections has been extremely unfavorable, and the planters feel much discouraged, having no money, high taxes, and both the crop of cotton and corn very backward.

Tennessee.—In Tennessee the average decrease planting is less; in the 18 western counties, say 5 per cent, and in the middle of the State 10 per cent, or about an average of 7 per cent decrease. The cold, wet Spring, however, has been particularly severe in the western counties. At first the tender plant had a hard struggle to get up; subsequently much of it sickened and died, and the balance looks very unpromising. Replanting has in many cases been resorted to. This has been mostly done in bottom lands with the hoe, carefuily preserving every plant that is living, as a living early plant in the rich bottoms every four feet gives a better promise of a good yield than plants one or two feet apart planted late.

Arkansas.—The average decreased planting in Arkansas is about 8 per cent, and the weather has been and the crop is about as reported for Tennessee.

Louisiana.—The falling off in cultivation in Louisiana is about 9 per cent. Early in the season the weather was not so unfavorable as in most other portions of the South. But for the ten days previous to May 17 the weather was very cold and wet. The late favorable change has most likely come in time to prevent very serious damage, unless there is a recurrence of rain.

From the foregoing facts we obtain the following results:

States.	—Decr'd acreage.— Per ct.	Acres.	States.	—Decr'd acreage.— Per ct.	Acres.
North Carolina....	12	54,000	Tennessee.....	7	37,000
South Carolina....	20	120,000	Arkansas.....	8	56,000
Georgia.....	13	170,000	Louisiana.....	9	83,000
Alabama.....	15	210,000			
Mississippi.....	12	197,000	Total dec. acres.. ..		932,000

The second column in the above statement of decreased acreage is based on the total estimate of acreage given out by the Government last year, and shows that the falling off reaches nearly one million acres.

GUNNY BAGS, BAGGING, &C.—There has been no demand whatever for either Bags or Cloth this week, and consequently no correct quotation can be given; lots can be bought at 18c. for Calcutta and 19c. for Domestic Cloth, and 14½c. for Bags; an order below these prices would undoubtedly be filled. Manila Hemp is very dull, and we have no sales to report; quoted at 11½c., gold. Jute is dull and nominally 5½@6½c., as to quality. Jute Butts have met with a very limited sale. We note 600 bales at 4½c., cash, currency, and 4¾c., currency, 60 days.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	—Week ending May 26, 1871.— Receipts.	Shipments	Stock.	—Week ending May 26, 1870.— Receipts.	Shipments.	Stock.
Augusta.....	511	8,070	6,823	644	1,321	12,755
Columbus.....	162	713	3,044	231	810	6,452
Macon.....	83	306	2,796	247	1,022	7,280
Montgomery....	313	1,139	3,674	218	658	5,445
Selma.....	215	531	1,495	256	1,056	3,300
Memphis.....	2,435	4,640	8,324	3,004	4,217	14,678
Nashville.....	1,097	1,480	1,280	1,479	873	5,542
	4,815	16,829	26,886	6,079	9,957	55,452

The above totals show that the interior stocks have decreased during the week 12,025 bales, and are to-night 28,566 bales *less* than at the same period last year. It will also be noticed in a previous table that the stocks at the outports are now *less* than a year ago.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons:

	1871.	1870.
Stock in Liverpool.....bales.	913,000	600,000
Stock in London.....	90,049	28,592
Stock in Glasgow.....	600	350
Stock in Havre.....	32,800	94,270
Stock in Marseilles.....	15,600	11,900
Stock in Bremen.....	56,153	19,049
Stock rest of Continent.....	30,000	40,000
Afloat for Great Britain (American).....	250,000	120,000
Afloat for France (American and Brazil)...	41,250	71,443
Afloat for Bremen (American).....	37,749	22,068
Total Indian Cotton afloat for Europe*....	364,099	223,011
Stock in United States ports.....	300,843	302,018
Stock in inland towns.....	26,886	55,452
Total	2,159,029	1,594,148

* This item includes all India cotton afloat for Europe, and also all cotton afloat for Liverpool other than American.

These figures indicate an *increase* in the cotton in sight to-night of 554,881 bales compared with the same date of 1870.

Below we give our usual table of exports from New York for the week:

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 79,493 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in THE CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night:

	Total bales.

Total....	37,008	1,728	1,200	61	20,105	5,033	3,353	3,349	79,498

Included in the above totals are from New Orleans 1,477 bales to Ghent, 3,445 bales to Genoa, and 461 bales to Barcelona; from Charleston 1,102 bales to Barcelona; from Savannah 1,170 bales to Barcelona; and from Boston 1 bale to British Provinces.

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 111⅜ and 112, and the close was 111⅜. Foreign Exchange market is strong. The following were the last quotations: London bankers', long, 110½@110⅝; short, 110⅝@110¾, and Commercial, 110@110¼. Freights closed at ¼d. by steam and 3-16@¼d. by sail to Liverpool.

BY TELEGRAPH FROM LIVERPOOL.—
LIVERPOOL, May 26, 5 P. M.—The market opened steady and closed quiet, with sales of the day amounting to 12,000 bales, including 8,000 bales for export and speculation. The sales of the week have been 99,000 bales, of which 20,000 bales were taken for export and 17,000 bales on speculation. The stock in port is 913,000 bales, of which 560,000 bales are American. The stock of cotton at sea bound to this port is 480,000 bales, of which 250,000 bales are American.

BREADSTUFFS

FRIDAY P. M., May 26, 1871.

We have had very unsettled markets for flour and grain during the past week, with a partial decline in prices.

Flour has arrived but moderately, and holders have not been compelled to concede anything to keep their hands clear, except in the common extras and other low grades made from Spring wheat; in these the speculative and export demand noted last week has been materially curtailed, and prices are lower and drooping. But in the medium and better grades, made from Winter wheat, Amber as well as White, there is a scarcity, with a demand from the home trade showing no abatement, as well as some business for the West Indies and South America, and prices have been well maintained; indeed, for fresh made city mills, and some other favorite brands, a little more money has been paid. To-day, the market was a little weak; a good line of extra State sold at $6 35.

Wheat has arrived freely, and a decline of five pence per cental is reported from Liverpool, while ocean freights have remained firm. But a considerable portion of the receipts were sold previous to arrival, and did not come upon the market. Parties who had freight room engaged were compelled to purchase wheat to fill it, and this has served to prevent any decline to correspond with that in Liverpool. Amber Winter Wheats have been in some demand from the Continent and for milling, and have brought extreme prices, while there was more doing in White Wheats. At to-day's market prices opened 1 cent lower, but owing to the fact that much of the corn arriving is in an unfit condition for shipment, the purchases of corn yesterday to fill freight engagements had to be thrown up, and the space filled with wheat; this created an abnormal demand for wheat, and notwithstanding a great decline in Liverpool, No. 2 Spring sold freely at $1 48@1 49, with choice at $1 50.

Corn has come forward freely, but owing to the long detention at the break in the canal, much of it is heated or otherwise out of condition. In consequence of this a much wider range of prices has been established. The export demand has been active, but, as stated above, a large proportion of the purchases yesterday were rejected, and to day prime dry samples of Western mixed brought 73@75, while the poorest qualities sold at 66@68, being available to home buyers, or requiring to go to store to be dried or cooled. Yellow sold at 76@78c for Western and Southern and White, 76c for Western.

Rye has sold in a small way at full prices. The season for Barley is over. Canada Peas are nearly nominal at $1 15@1 16 in bond. Oats have been in light supply, but with a very limited demand prices have been weak and unsettled, the market closing lower, with sales at 67@68c for prime cargoes afloat.

The following are the closing quotations:

Flour—		Wheat, Spring, bush	$1 40@ 1 50
Superfine	$ bbl. $5 60@ 6 00	Red Winter	@ ....
Extra State	6 25@ 6 45	Amber do	1 62@ 1 66

GROCERIES.

FRIDAY EVENING, May 26, 1871.

The market has been variable during the week, but without wide fluctuations on values, and there is no positive gain for either the buyer or the seller, though on a close distinction the first named class of operators may have slightly the most advantage on the position for the time being. The demand was spasmodic and hardly up to expectations, while supplies have proved sufficient in all cases for the outlet, with parcels in second hands here and there offered for re-sale in view of the increased values reached since original purchases were made. Interior buyers still fail to show any great amount of anxiety, though the supply of goods from the interior is now reaching the seaboard freely and means of transportation are improving in quantity and shading somewhat in cost. Importers, as a rule, appear fairly confident of the future and offer supplies sparingly.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black	5,512 pkgs.	Laguayra	279 bags.	Sugar, Brazil	bags.
Green	7,720 pkgs.	Other	467 bags.	Manila, &c.	13,021 bags.
Japan	2,862 pkgs.	Sugar, Cuba	3,647 boxes.	M'las'es, Cuba	1,333 hhds.
Various	1,207 pkgs.	Cuba	4,011 hhds.	Porto Rico	419 hhds.
Coffee, Rio	8,337 bags.	Porto Rico	2,332 hhds.	Demerara	hhds.
Java	3,021 mats.	Other	302 hhds.	Other	234 hhds.
Maracaibo	4,018 bags.			*Hhds. include bbls. and tcs. reduced	

Imports this week at this port have included 10,799 bags of Rio, 3,120 do. of Santos, 15,540 do. of Java, 4,297 do. of Laguayra, and 915 do. of sundry kinds. The receipts of Sugar are 7,489 boxes, 11,251 hhds., and 33,021 bags. Of Molasses 1,589 hhds. have arrived. In Tea the imports are 2,313,355 pounds of Black, 1,304,897 do. of Green, and 568,870 do. of Japan.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at date.		Imports at leading ports since January 1.	
	1871.	1870.	1871.	1870
Tea, lbs.	....	....	29,359,330	29,712,550

Molasses, hhds.	8,866	20,668	154,965	181,292

TEA.

The demand has been fair, but not unusually active, with the market showing about the same general features noted for a week or two past. All kinds were inquired after to some extent, and desirable grades commanded full figures, with prices ruling firm up to the close. Throughout, however, holders have appeared quite well disposed to meet the call, and the assortment available was such as to render selections comparatively easy. The general stock continues full—is slightly increased, if anything—recent arrivals more than balancing the sales. The transactions during the week embrace 4,780 pkgs. Green, 14,500 Oolong, 5,200 Souchong, and 3,950 Japans.

The imports this week include 940,900 pounds of Black Tea, per "E. Nicholson," from Foo Chow; 651 680 pounds of Green, per "John Nicholson," from Shanghae; 19,755 pounds of Black and 653,217 do Green, per "Stanfield," from Shanghae; 518,870 do Japan, per "Royal Minstrel," from Yokahoma; and 849,121 do Black, per "Sea Serpent," from Hong Kong.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871	11,961,339	12,028,119	5,696,899	29,359,330
1870	11,292,406	11,416,766	6,003,378	29,712,550

The indirect importations, including receipts by Pacific Mail steamers via Aspinwall, have been 10,598 pkgs. since January 1, against 31,496 last year. The receipts of Tea overland by railroad have this week amounted to 80 pkgs.

COFFEE.

There has been a somewhat larger amount of goods changing hands since our last report, but little or no reduction of stock, and though at one time the general market seemed to develop a steadier tone, sellers have gained no positive advantage, and at the present writing the feeling is again rather slack, and holders, to some extent, discouraged in their hopes of a reaction. Buyers evidently are still determined not to venture out of their depth, and withdraw upon the first indication of a possible turn in their favor. Brazils during the early portion of the week were in very good demand from the trade, and, as compared with nearly a month past, there was enough stock changing hands within a day or two to give the market an appearance of activity. The call, however, showed caution, and on subsequent advices by telegram via Europe, from Rio Janeiro, reporting a more liberal movement on United States account, there was a withdrawal of bids, and business became slack. The sales above referred to while in progress had the effect to give the position a somewhat steadier tone, but holders were in reality meeting the outlet on comparatively easy terms, and, since the reports from the point of production came to hand, have shown even more anxiety to realize, though at the same time taking care to prevent any undue pressure. The regular steamer arrived during the week with some 6,800 bags. At the outports the movement has continued moderate, with no important change to advise on value. Our stock of East India is still entirely in second hands, from whence a fair amount is distributed to consumers, and a cargo of some 4,200 mats Singapore was sold by one dealer to another. West India coffee is in very good stock, the general demand quite moderate, and, though quoted as nominally unchanged, prices want strength, and occasionally concessions are hinted at by holders, who appear rather anxious to sell. The transactions include 8,595 bags Rio, a resale of 4,200 mats Singapore, 350 bags Savanilla, 450 bags Laguayra, 2,700 bags Maracaibo, and 80 bags Java. At Baltimore 20,982 bags Rio. At the close the stock of Java in first hands has been increased by the arrival here of 15,000 mats, per Agincourt, and 1,600 at Boston, by Louise.

Imports this week have included 10,799 bags Rio, per "Marie" and "North America;" 3,120 do Santos, per "Priscilla;" 15,540 do Java, per "Agincourt," and 925 do sundry kinds.

The stock of Rio May 25, and the imports since Jan. 1, 1871, are as follows

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.
Stock	68,453	....	49,322	9,756	10,437	3,100	141,068

SUGAR.

Raw Sugars have not shown much general life, and prices have been rather tame during the week. There were a few throbs of activity, but the movements indicated that buyers did not intend to operate freely, and aside from the natural temporary steadiness, the effect upon the position was unimportant. The trade continues to be very moderate operators, and refiners, though buying fairly to meet a corresponding call for their production, are somewhat indifferent beyond the wants of a few days ahead. The accumulation in store

Digitized by Google

is still withheld, but from landing parcels the offerings have been fully equal to if not in excess of the outlet, and in some cases sellers resorted to a trifling amount of pressure in order to realize quickly. There were at times rumors of a large fleet of sugar-laden vessels close at hand, and this had something of a depressing influence, but the stocks increased to only a limited extent, and the aggregate is far from large for the season. Among importers we find just about as much confidence expressed as weeks ago, in view of the continued high cost of Sugars at the points of production, and the entire absence of margin for profit or even expenses on many lots now laid down here, and the current tame feeling is looked upon as merely the natural result of the lull in trade, from which a revival is hoped for at an early day. Refined Sugars have at no time during the week been really active, but still the demand was fair, and with the production now so managed as to about counteract the outlet, a firm, uniform tone was preserved on values. Powdered has at times been scarce, and sold ¼@¼c. above regular quotations for Hards. The general market closes with a tame feeling current. Sales of Raw embrace 3,969 hhds. Cuba, part before arrival; 1,436 hhds. Porto Rico, 375 hhds. Demerara, 72 hhds. New Orleans, 450 hhds. various grades, 3,987 boxes Havana, and 742 hhds. Melado.

Imports at New York, and stock in first hands, May 25, were as follows:

	Cuba, bxs.	Cuba, hhds.	P. Rico, hhds.	Other hhds.	Brazil bags.	Manila, &c. bags.	Melado hhds.

MOLASSES.

The market for foreign goods is without decided variation, but if there be any change at all it is rather against the selling interest. The arrivals continue small certainly, and there is still some demand for first-class goods from both refiners and the trade, but the general consumption has become somewhat diminished, and the recent advance induces a much more cautious spirit, and is also likely to draw out better assortments either from the points of production or from stocks intended for other cities along the coast. The medium and common sorts which had commenced to strengthen somewhat in sympathy are thrown back into the old flat condition, and values are little better than nominal. Domestic Molasses is still something of an enigma to the trade, in view of the extensive stock and the slow demand, but for the present there is no inclination to force a position certainly weak, and the general range of prices remains about the same as last week. Syrups of all kinds have been dull, and there is a pretty good stock available. Sugar House Molasses also has sold with less freedom and the feeling somewhat weak, closing at 30c. in hhds. and 34c. in bbls. at extremes. Sales of 375 hhds. Cuba Muscovado, 776 hhds. Porto Rico, 100 hhds. English Island, etc., and 450 bbls New Orleans.

The receipts at New York, and stock in first hands, May 25, were as follows:

*Including tierces and barrels reduced to hhds.

SPICES.

The predictions of dealers on a small run of trade have been realized, the movement in a wholesale way up to the present writing proving extremely light, and though the available stocks are far from extensive there is enough for the current outlet. Cassia indeed is plenty, and a little tame in price. Pepper could be obtained to a fair extent, and it is mainly on Nutmegs and choice lots of Cloves that holders have the position under positive control. The jobbers report a very fair movement from store and full prices in all cases, though no advance to quote.

FRUITS, &c.

The market continues in that quiet state noted for some time past. Jobbers report a very light trade, and will buy only such lots as they need to keep up assortments. Many of them who still have a little more stock than they need immediately are anxious to sell, and this accounts for the fact that small lots of Raisins can be bought lower than full lots, importers showing more confidence in the future. Layer Raisins are jobbing at $2 40 per box, and it is reported that a discount even from this price has been made, but for full lots a buyer would have to pay $2 45. The stock is full, but held by strong parties, who claim that the goods could not be replaced at present figures. Currants sell slowly, mostly in small lots, at former prices. A large lot could probably be shaded. Prunes have favored the buyer, especially Turkish, and a moderate trade has been done in them. Sardines meet with only the usual jobbing sales, at about former prices, though small lots can be had at this price. Dates have sold to some extent, but at no improvement in prices. Nuts have met with a fair demand, and rule firm in price.

Foreign Green are in good demand, and Oranges are very firm in price. Lemons are more plenty, but the best are firm in price. We quote Messina and Mountain Oranges $5 50@6, Sicily $4@5. Lemons are quoted at $4@5 for fair to good, and $6 for choice. West India have sold largely at $8@12 per hundred for Bahama Pineapples, $1 50@2 50 for Baracoa Bananas, $1 50@2 25 for Jamaica do., 35c. per thousand for Jamaica Cocoanuts, $32@35 for Baracoa do., and $30 @35 for Carthagena do.

Domestic dried fruit are generally dull. There is no stock of any kind except apples, and on these buyers and sellers are apart in their views, holders offering no inducements to tempt buyers to buy to carry over, hoping there will spring up a demand from some source to help them get rid of their stock without a loss. Dealers buy only on orders or to keep a small stock on hand

Blackberries and cherries are firm. Raspberries are quiet. Peaches nominal. Peanuts are more active, and as the stock is small, holders generally obtain higher prices. Sales at $3 25 for best Wilmington now held at $3 50 by the largest parties.

Domestic green apples are in small stock and demand, at firm prices; sales at $7 50@8 50 per bbl. Strawberries are firm at the close, with a good sale. Southern berries are not coming forward freely, and Delaware and Jersey have not fairly begun. We have had some very fine early from New Jersey, which have brought 35@40c. per quart. Ordinary sell at 20@30c.

ADVICES FROM PRODUCING MARKETS.

Tea.—Market reports from all the China ports give little of interest as regards Teas at Shanghae. On April 11th the total contracts for the previous month had been only 4,000 half-chests, and the stock now on hand was expected to be carried over until the new season. At Foochow, Amoy and Yokohama the season is closed, no transactions worthy of notice having taken place. In regard to the new crop there seems to be no reliable information as yet.

Rio Coffee.—Messrs. Wright & Co.'s telegram, dated Rio de Janeiro, May 6, 1871, says:

Sales of Coffee for United States since 22d ult.....	74,000 bags.
Shipments " " " "	61,000 "
Loading " "	33,000 "
Stock " " at date.....	112,000 "

Exchange, 25½d.

From Messrs. Boje & Co.'s report of the 24th of April we note an active demand for Coffee for the fortnight, previous sales for that period amounting to 90,000 bags at relatively higher prices. The last advices from Europe reported a dull market, but holders of Coffee were firm, and the markets closed strong. Total sales for month for United States, 66,600 bags; stock at date, about 105,000 bags; daily arrivals here averaged about 5,000 bags per diem.

Vessels in port for United States since March 24.....	bags. 84,677
Vessels cleared and ready for sea.....	6,812

THE DRY GOODS TRADE.

FRIDAY, P. M., May 26, 1871

Trade has remained quiet throughout the current week, with very small transactions either in first hands or with jobbers. The only sales have been to city buyers or on orders from dealers in the interior, and are light in the aggregate. The retail trade has not been very active as yet, in conseqence of the continued cool weather, and the demand for goods to replenish broken assortments is unusually small for this season of the year. It is thought, however, that there will be a good trade during June, but commission houses are expecting much benefit from it, as jobbers generally hold ample stocks for all of their probable wants. The market rules firm with few quotable changes in any department. The trade generally appear to be in an easy financial condition and dry goods paper finds ready sale in the discount market. The amount offering is not unusually large for this time of the year. There has been one failure during the week—that of Wm Hoffman & Co., skirt manufacturers, with liabilities amounting to about $100,000. The assets are not stated, but are reported small. This failure is not attributable to any unsoundness in the trade at large, and it is thought even with the large amount of paper maturing about the 1st of June there will be comparatively few suspensions.

DOMESTIC COTTON GOODS.—There is more firmness in the market for all cotton fabrics since the recent advance and firmer tone in the market for the raw material, and a speculative feeling has developed itself especially in brown goods. The lower grades of these have been very firm for some time past, and an advance has been expected in some of the leading makes, which will probably be hastened by the firm feeling. Standards are also more buoyant and will probably advance before the fall trade fairly opens. The demand for bleached goods remains unimportant, and the market is wholly unchanged. Prices continue firm, but we see no disposition on the part of holders to advance prices at present. Printing Cloths are weaker, with prices a shade lower. Contracts for future delivery are not placed so freely as they were a few weeks since, and there is a prospect of goods settling down to their proper level. Prints are still in fair request at steady prices, though concessions might possibly be offered by agents to effect large sales. Colored cottons are unchanged and remain fairly firm.

DOMESTIC WOOLEN GOODS.—The market for woolen fabrics continues quiet, with rather less inquiry for goods than is usual at this season of the year. Holders are firm and are offering few inducements to purchasers in the way of discounts from quoted prices. There is consequently less speculative demand from the jobbing trade, and few sales are effected except to clothiers. Hosiery for winter wear is opening at a trifle under last year's quotations, but agents contemplate an early advance, and several prominent makes are to be marked up on the 1st proximo. The demand is light as yet, and sales are unimportant. Flannels have been quiet during the week, with no changes to report.

FOREIGN GOODS.—The only trade doing at present is with jobbers who are effecting moderate sales of thin goods for the summer trade to retailers here and in the interior. There is a fair inquiry for jaconets and grenadines, as well as Japanese goods, and the latter are held at stiff prices. Suitings are also in moderate demand, the principal call being for linens, grass cloths and chambrays. Ribbons and millinery goods are quiet, at unchanged and generally firm quotations. Woolens are not very active, though importers are taking a fair number of orders for goods to arrive, and the tone of the market is rather improved in consequence of the advance in domestic goods.

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of leading Jobbers:

BROWN SHEETINGS AND SHIRTINGS are firmer in all grades, with a tendency toward higher prices upon the opening of trade. Quotations are unchanged, as follows: Amoskeag A 36 11¼, do B 36 11, Atlantic A 36 12, do D 36 10½, do H, 36 11½ Appleton A 36 12, Augusta 36 11, do 30 9½, Bedford R 30 8 Boott O 34 9½, Commonwealth O 27 8, Grafton A 27 7½, Great Falls M 36 11 do S 33 9½, Indian Head 36 12, do 30 10, Indian Orchard, A 40 12½, do O 36 10½, Laconia O 39, 12½ do B 27 11, Lawrence A 36 10, Lyman O 36 10½, do E 36 11½, Medford 36 11½, Nashua fine O 33 11½, do R 36 13, do E 40 14½ Newmarket A 36 10, Pacific extra 36 11½, do L 36 11, Pepperell 7-4 22½, do 8-4 25, do 9-4 27½, do 10-4 32½, do 11-4, 37, Pepperell E fine 39 12½, do R 36 11½, Pocasset F 30 8½, Saranac fine O 33 11½, do R 36 13, Stark A 36 11½, Swift, River 36 8, Tiger 27 8.

Publication.

THE NEW YORK DAILY BULLETIN,

A First-Class Daily Commercial and Financial Journal.

The BULLETIN furnishes—

1st. The most complete FINANCIAL REPORT published in any daily paper, embracing:

The daily sales and quotations of every Security dealt in at the Stock Exchange and the Mining Board.

The quotations of Securities not on the Stock Exchange list, including Southern Stocks and Bonds.

A transcript of the official register of the Gold Room, showing every quotation from the formal opening to the formal closing of the Room—published in no other paper.

A summary of the daily transactions at the SUB-TREASURY, the GOLD EXCHANGE BANK, and the CLEARING-HOUSE.

A full table of quotations of STERLING and CONTINENTAL EXCHANGE.

THE CHANGES IN THE REDEEMING AGENTS OF THE NATIONAL BANKS, AND THE OFFICIAL PERIODICAL STATEMENTS OF THE NATIONAL BANKS IN EACH STATE, as furnished by the Comptroller of the Currency—published by no other daily paper.

2d. The most accurate and the ONLY DAILY report of the DRY GOODS MARKET, including a full PRICE CURRENT of staple and domestic fabrics, which is corrected daily.

3d. A carefully prepared report on the PRODUCE MARKETS, much fuller in its details than that of any other daily journal, embracing a full Price Current semi-weekly.

4th. A daily statement of the RECEIPTS OF PRODUCE, the IMPORTS FROM FOREIGN PORTS, and the MANIFESTS OF VESSELS CLEARED AT THE CUSTOM HOUSE.

5th. Its CITY COMMERCIAL and FINANCIAL NEWS is fuller than that of any other journal.

6th. In its EDITORIAL DEPARTMENT the BULLETIN gives a fuller discussion of current commercial and financial topics than any other journal in the United States; and in this especially its influence ranks second to that of no other paper in the country.

7th. Its PRICE IS ONLY ABOUT ONE-HALF that of other leading commercial papers, and yet its information is fuller and in all respects as valuable.

UNION NATIONAL BANK OF New Orleans.

This Bank, organized under the general law of Congress, with its capital of

$600,000

intact, is now fully prepared for Business.

As the first of the Old Institutions of the State to improve the opportunity of furnishing our population with the facilities of a local circulation on which the interest accrues to our people, we respectfully solicit a portion of your Business.

Board of Directors:

M. M. SIMPSON, (of Salomon & Simpson,) | F. VAN BENTHUYSEN,
JOHN PHELPS, | WALTER PUGH,
E. F. LA VILLEBEUVRE, | VICTOR MEYER,
H. W. FARLEY, | B. M. POND,
LEON GODCHAUX, | W. HARTWELL,
CARL KOHN, President, | R. J. VENABLES,
THEO. HELLMAN, Vice Pres't, (of Seligman Heilman & Co.)
JAMES CHALARON, Cashier.

G. TOWNSEND. P. O. FAZENDE. W. R. LYMAN.

Townsend, Lyman & Co.

BANKERS & BROKERS,
NEW ORLEANS.

☞ Particular attention given to business of Correspondents. Collections remitted for at current rate of Exchange.

New York Correspondents: Trevor & Colgate, Morton, Bliss & Co.

STATE NATIONAL BANK

OF NEW ORLEANS,
Formerly LOUISIANA STATE BANK, Incorporated
1818.
Capital..$500,000 | Limit,..$1,000,000

Prompt attention given to Collections upon all points in the Southern States. Collections free of charge other than actual cost upon distant places.

Remittances promptly made at current rates of exchange on the day of maturity.

Exchange purchased and sold upon all points.

SAMUEL H. KENNEDY, Pres't
E. KIGNEY, Vice-Pres't.
CHAS. L. C. DUPUY Cashier.

N. O. National Bank

OF
NEW ORLEANS, LOUISIANA.

ALEX. WHELESS, President,
JAS. N. BEADLES, Vice-President.
RICHARD JONES, Cashier.

Particular attention given to Collections, both in the City and all points in connection with it. Prompt returns made at best rate of Exchange, and no charge made, excepting that actually paid upon any distant point. Correspondence solicited.

NEW YORK CORRESPONDENT:
NINTH NATIONAL BANK.

Bankers and Brokers.

PORT HURON & LAKE MICHIGAN

SEVEN PER CENT GOLD BONDS,

Having the Endorsement of two Railways,

GREAT WESTERN OF CANADA,

DETROIT & MILWAUKEE, Michigan

A Limited number of the bonds of this road have been placed in our hands FOR SALE at NINETY AND ACCRUED INTEREST. To those desiring a safe paying investment we have no hesitation in offering them as equal to anything in the market. For particulars, maps, pamphlets &c., send to, or call upon

DRAKE BROTHERS,
BANKERS, 16 Broad St.

NEW YORK

State Railroad Bonds.

A First-Class Home Investment.

FIRST MORTGAGE GOLD BONDS
OF THE

Rondout & Oswego RR.

Principal and Interest Payable in Gold

SEVEN PER CENT SEMI-ANNUALLY.

This Road covers 100 miles of the most direct possible line between the Great Lakes and deep-water navigation on the Hudson River, the whole line of which will be completed and in operation on or before October 1, 1872, and give a new line of road to Lake Ontario and the West, 25 miles shorter than any line that can be found.

It passes through the Cement, Flag-Stone and Lumber regions of Ulster County, and the rich agricultural bottoms of Delaware and Green counties, all of which have not heretofore been reached by railroad facilities, and from which sections the formation of the country prevents the construction of a competing line.

The 36 miles of road operated for three months is already paying net earnings equivalent to 7 per cent gold on its cost of construction and equipments. The issue of Bonds is limite dto $20,000 per mile of COMPLETED ROAD, the coupons payable in gold in this city. Price of the Bonds, 90 in currency.

Full particulars of the above may be had of, and the Bonds for sale by,

EDWARD HAIGHT & CO.,
9 Wall Street,
FINANCIAL AGENTS OF THE R. & O. COMPANY.

DESIRABLE

HOME SECURITIES.

OFFICE OF

MEAD & CLARK,

BANKERS, 141 BROADWAY,

The attention of Capitalists and Investors generally is invited to the

FIRST MORTGAGE

7 Per Cent Gold Bonds

OF THE

Walkill Valley Railway Company, which we offer for sale at 90 and accrued interest, in currency. The Railway is situated on the west side of the Hudson River, and is now running for 20 miles to New Paltz, and is under contract to be in working order to Kingston next fall. The bonds are a first-class investment, and we invite the closest investigation of them. The principal and interest are

PAYABLE IN GOLD.

The coupons are paid semi-annually in this city, on the first days of April and October, free of government tax; and the issue of bonds is limited to $20,000 per mile of completed road. Any information concerning them will be given at our office.

COUNTRY BANK DEPOSITS AND THE PLETHORA OF THE LOAN MARKET.

The money market is now in such an unhealthy plethoric condition that the most incredible rumors find ready currency, and during the last week several stories have been in circulation with a view to produce some temporary disturbance. One of these affirms that Mr. Boutwell will shortly call in 500 millions of the Five-Twenties on which the five years' option has expired, and will pay them off in gold. This rumor was doubtless founded on the proposal which was announced last week, to take on certain conditions the remainder of the new five per cent loan. But this proposal, as we intimated, was quite inadmissible; and as it has since been declined, Mr. Boutwell has not the means at his disposal for any sudden liquidation of 500 millions of bonds, or any considerable part thereof. Nor indeed is there the slightest probability that if he had the means he would do any act so likely to produce confusion in the financial circles, or so certain to injure the objects he uniformly keeps in view. In the interests of the Treasury, no less than in those of the people, Mr. Boutwell will doubtless allow himself to do nothing to derange the monetary machinery of the country or to impair public confidence.

Another rumor is that a considerable demand is springing up for money from various causes and especially in connection with the wool crop; and that in this way the balances of the Western banks will be more fully employed and the deposits of the New York banks will be drawn down. On many accounts it were desirable that some healthy movement of this sort could be started; for the banks of this city hold some 50 millions of deposits from the interior which ought not to be here. These deposits have been attracted into their coffers by the mischievous practice of paying interest. The interior banks being unable otherwise to earn 4 per cent. on their idle funds are glad to send them here at that rate; and at this centre these funds accumulate as a dangerous provocative of speculation until some legitimate demand from outside calls them away and causes their absorption into more wholesome channels of activity. This unhealthy accumulation of idle balances in our banks is one of the weakest and most threatening elements in the financial situation. It is pregnant with danger and calls loudly for reform. It is true the remedy is not easy to apply. Two methods of cure have, however, been proposed. One is for the banks which pay interest on deposits to refuse to do so during the dull seasons, and especially from May to August. The difficulty here, however, would be that our banks would not hold together. There would be a fear lest some of them in the hot competition for business would make a bid for the accounts of the Western banks and make some private offers to pay interest with a view to this object. And even if the banks could be relied on to avoid this dishonorable course, the private bankers would probably interpose and do the same thing. In either case the evil would not be cured or even temporarily alleviated. Another remedy is the redemption of interior bank notes. It has been proposed that our city banks should establish a redemption bureau in connection with the Clearing House, and should sort out and present for redemption all country bank notes as they come here. This plan has been partially submitted to the test of experiment; but for reasons not unlike those we have mentioned above it had to be given up. A third plan that we recently discussed is said to be under consideration at Washington. It was first proposed, we believe, in our columns, four or five years ago, and has been recommended by the Comptroller of the Currency in one or two of his reports. It proposes to reduce the plethora of artificial bank deposits from the interior in our city banks by sorting out all the bank notes received at the Treasury, and having them forwarded from the Treasury to the various redeeming agencies for payment. There is no doubt that the Secretary possesses ample powers for the purpose under existing laws. For by holding bank notes the Treasury really lends money to

Digitized by Google

the issuing banks without interest. Moreover, the banks could not reasonably object to this plan, for their privilege to issue currency is enjoyed on the condition that they shall redeem the currency on demand; and they have no right to claim that the Treasury shall carry those notes during the dull season, when there is no legitimate use for them in the overflowing current of the circulation. The proper course is for these superfluous notes to lie where they belong, in the vaults of the issuing banks, which are bound to keep them until the season returns when there is a legitimate want for an increased volume of the currency. When that time comes these notes will easily and naturally pour themselves into the current of the circulation with great advantage both to the issuing banks, to the public, and to the general interests of business. If Mr. Boutwell will carry out his reported intention in this respect, he will do more for the sustaining of the monetary machinery of the country than by almost any other single act of his administration.

When this reform is tried, Congress will be able to act with more intelligence in prescribing by law some more effective method of bank note redemption than is provided at present by the national currency law. And in any case the money market will in all probability remain tranquil for some time to come. The Treasury has poured out all its reserves which can be spared. Neither the South, the West, nor the East needs money at this season. There is thus a surplus supply and a defective demand. Hence it is almost impossible for our banks to use their balances, except at very low rates. The vast amount of government bonds which used in this market to be carried for speculators are gone. The Treasury has bought up these speculative bonds, or they have been sent abroad. Few bonds are consequently here, except in the hands of investors. Hence the money market can scarcely fail to continue easy till August, when some activity may be expected from the demand from the interior, which is expected this year a little earlier than usual, to begin to disturb the deposits in our city banks.

THE GOLD SALES AND THE GOVERNMENT CREDIT.

The Treasury sales of gold will amount to seven millions this month and the purchases of bonds to four millions. Hence the decrease of the debt from March, 1869, to the close of the fiscal year will be 230 millions of dollars; and from July, 1865, when the debt reached its maximum, the liquidation will reach the aggregate of 457 millions. With these facts before us we can look with some complacency on the announcement for which too many apologies have been made, that the decrease of the debt last month was no more than $4,439,358. The people are quite willing to see a cessation of the policy of rapid liquidation of the public debt. There is a widespread conviction that we have been attempting too much, that the debt must be allowed to rest for a while and that the taxes must be reduced to the lowest possible aggregate compatible with sufficiency of revenue for economical efficient government. Perhaps there is danger lest, under the domination of this new policy, we should run into the opposite extreme. Still at bottom there is no doubt that the people are right. No nation in the world, at the close of a destructive war, has ever given such an exhibition of financial strength. There is an increasing body of our best citizens who think that it had been better if a part of this 457 millions had been left to fructify in the pockets of the people instead of being used to pay off bonds which are not due, and which the bondholders did not wish to have paid before maturity. At any rate, as our people are now investing their money so rapidly in manufactories, in railroads and other works of productive value, which will increase by ten fold their cost the wealth of the country, and as there has been for two or three years so continuous a depression of business from our bad fiscal and financial system, the pressure of taxation must, as far as possible, be relieved and the policy of buying bonds, and of hoarding money in the Treasury must, to some extent, cease. Of course, if there be any surplus revenue from taxation, there must be some disposition of the aggregate. And under the existing laws Mr. Boutwell has little choice of expedients left him.

We have often had occasion to demonstrate the fallacy of some of the current theories of national credit, and the danger of adopting them as guides of our financial policy. Among these theories one of the most mischievous is that which assumes that "saving" is the chief means by which a nation grows in wealth, and that to accumulate money in the Treasury is the way for a country to raise its credit. This antiquated fallacy is the more dangerous because there is a sense in which it is partly true. That a nation like an individual may accumulate the means and instruments of wealth, and so grow in opulence, is undoubted. What is not true is that this method of simple hoarding is the only or the best method. How has this country expanded and grown, and astonished the nations of Europe by its rapid development in wealth? Is it by accumulating and hoarding and locking up its gold in the National Treasury and elsewhere? Or is it by a process incompatible with such an imprisonment of the national resources in unproductive idleness? Such are the questions which are often asked in connection with the policy of hoarding gold and prepaying the bonds, and they are revived with every month's exhibit of the Treasury balance as published by Mr. Boutwell in his statement of the public debt. The cash balance locked up in the Treasury, as will be seen by the official figures on another page, amounted on the 1st of June to $98,605,963. Of this sum nearly 9 millions are currency, and about 90 millions are gold. The argument is that so large an aggregate of dead unproductive money is needless, and some of Mr. Boutwell's critics would have half of it dispersed immediately, while others would pay out all except a very small working balance. If the reserves in the Treasury were really idle and unproductive, it certainly would be needless; and the demand for its dispersion would command more of the public favor than has ever heretofore been conceded.

With these principles in view relative to the management of the National finances we are just as much opposed to the needless accumulation of money in the Treasury, as are those gentlemen who find fault with the hoarding policy. What they have to do, however, is to prove, instead of assuming without proof, that this money is useless; that it is idle; that it has not indispensable functions to perform; and that its removal would not cause danger and mischief. Let us look at the facts. The currency balance, as we said, is 9 millions. Is this too much for a reserve when currency payments to the amount of 7 to 10 millions are frequently outstanding, and liable to be demanded at any moment? If our Treasury, like that of England, had a great bank ready to make advances on incoming revenue from taxation, the currency balance might be dispensed with; but we have no such resource. By the dissolution of the old United States Bank, the Treasury was designed to be made independent of the banking system, and so, with little modification, it has since remained. No loans or temporary advances or banking facilities are available to our Treasury as they are to the British Exchequer in time of need. Hence a large balance is required at all times to remain in Mr. Boutwell's hands. And it is incumbent on those who say that 9 millions of currency is too much to show that a less sum would answer the purpose.

Digitized by Google

This they try to do by pointing to the gold balance, which is about 90 millions. But of this sum, 17 millions belong to depositors who hold gold notes payable on demand. The entire balance of gold therefore belonging to the Government is 73 millions. This is all Mr. Boutwell has with which to pay his interest when it falls due. But more than half of this sum has accrued at this moment. The whole amount of interest due 1st June is $38,672,431. Hence the surplus coin in the Treasury is less than 35 millions. This sum is about one-fourth of the annual interest on the National debt, and to protect the Government credit some such reserve is indispensable to prevent danger from any commercial convulsion and from the consequent falling off of the customs duties on which we wholly depend for funds to pay the coin interest on the public obligations.

We must remember, moreover, that the coin in the Treasury has one other important function to perform, which is too much lost sight of. It is the only reserve any where held for the greenback circulation, the amount of which is 356 millions. This aggregate of greenbacks represents a forced loan without interest from the people to the Treasury. It is therefore the duty of the Treasury to hold such an amount of coin reserve as may be needful to sustain the credit of the greenbacks. And in proportion as we approach specie payments will the necessity increase for the coin reserve to assume larger and larger dimensions. On the whole, then, we must conclude that Mr. Boutwell cannot be justly charged with locking up too much gold in the Treasury, and that in selling 7 millions this month, according to his announcement, he is selling as much as in the present exigencies of the Treasury he can spare. Probably, indeed, he would not have been willing to dispose of so much, but for the export demand which for a brief interval springs up and deranges the gold market at this period of the year.

THE NEW BIRTH OF FRANCE.

The news brought to us from France for several weeks past has been an accumulation of horrors. Nothing in modern history has approached in mournful interest the scene presented by Paris on Sunday last, when the fierce turbulence of the mob which has kept that great capital so long in disorder exhausted itself in vain resistance to the national power, and died out in fire and blood. Hardly any one ventures to speak hopefully of a people among whom such events can occur; and the wild frenzy of the commune and the ferocity of the government in suppressing it are alike pointed out as proofs that the French character, that of the nation as a whole, is destitute of the elements which make order and progress possible; that, in short, this great part of Christendom must be left out of all our calculations and our hopes for the future of civilization.

But we have not so learned history or human nature; to say nothing here of Providence, or of a high purpose guiding the destinies of mankind. The philosophy of the New Testament is not yet abandoned by all thoughtful men; it is that, indeed, in which we all profess to read the events of other ages; and why should it be deemed rash to apply it to the events of to-day? That philosophy is of hope, not of despair, and while it fully recognises the contradictions of life, and the long and fierce struggles through which all principles must pass to triumph, it keeps steadily in view an end to which these point forward; in the darkest hour of night it does not doubt of the coming day. If the very Prince of Peace came "to bring not peace but a sword," if the first effect of that sublime revelation of human brotherhood, in which all after ages were to build their harmony and progress, was but to spread dissension, war and ruin through the world, then it is quite conceivable that other wars and other ruins may prepare the way for other triumphs of peace and truth. Surely of all men Americans should be the last to strike from the roll of nations any great people, because of the mistakes or the disasters of a single year. If France has been covetous of glory and of a neighbor's territory, is it for those who conquered Mexico within twenty-five years to reproach her? If she is rent by factions who forget their own laws and meet in civil war, is that an irredeemable disgrace in the eyes of a nation not yet done with weeping over the unnumbered dead of its own fraternal strife?

Whatever the rest of the world may think and say, it becomes Americans, the old allies of France, to seek for all that is good and promising in her situation, and to extend to her our sympathy in misfortune, and the encouragement of our strongest hopes for her recovery. Nor are there wanting grounds for these hopes; which it is especially desirable to hold in view in these days of depression and despondency. For a century past France has been suffering under the pressure of two prodigious evils, on the one hand, the predominance of the military spirit and order, and, on the other, the revolutionary passions of the demagogues and their dupes. Every government which has assumed the guardianship of society has found itself in Paris face to face with a fierce and desperate mob, conscious of its own strength, and bent on supremacy. To keep down this mob it has been necessary to keep in hand an enormous army, and the nation at large has acquiesced in this policy and fostered it, thus cultivating its own military ambition, and burdening all its industries. The pressure of a centralized government has only intensified the energy of the protest against it; and thus both the military spirit on the one side and the mob spirit on the other have grown to the terrible proportions in which they have manifested themselves for the last year. A year ago the curses of France were a vas army, hungering for employment, and regarded as dangerous to all its neighbors, and a vast mob, actuated by one consuming passion of contempt and hatred for its rulers and for society at large.

That army dragged France into war, as is now known, against the wish of the Emperor, who dared not resist it, especially when the ambition of the whole nation, fostered so long by its existence, joined with it in demanding victory. It was crushed, and the mob, which it had controlled, rose irresistibly. All order, all government, all social organization was at an end. The demagogues who misguided the throng undertook to carry on the war in the nation's name, but met with an irresolute and untrusting support, and soon failed. Against their will, but wisely, and with the approval of the world, the people of France came together in an assembly of their representatives, and made a calamitous, but not dishonorable peace, on the best terms they could obtain; and then the same blind, rash, unreasoning mob, under the same reckless leaders, armed against the nation, proclaimed themselves the apostles of destruction and of denial, and, gathering to their standard the unprincipled adventurers of all Europe, began a desperate war upon mankind. They wildly declared what seemed to them principles, Atheism, Communism, the negation of all beliefs and the abolition of all institutions that are dear to the world; but they in reality represented nothing but discontent, unrest, the love of disorder, cherished until they had become master passions. The whole nation gathered its force against them, crushed them, exterminated them as if they had been wild beasts and not men; and the Paris mob, which has been for three generations the terror of France and of Europe, exists no more.

Is there not something hopeful and encouraging in this very fact, that the two great evils which all men recognized

Digitized by Google

only a year ago as the burdens and the dangers of France have now passed away? The army is crushed, and that in a way which cannot fail to teach the nation that her true glory must be sought elsewhere than in conquest. The mob is destroyed, and the pretext on which the structure of the military governments of the past was justified is destroyed with it. Is it not to be reasonably hoped that the worst features of society in France will now disappear? That the people, in establishing a new government, will require it to seek its strength in something else than in arms; and that Paris herself, freed from the brood of demagogues who have so long kept her in disorder, will acquiesce in the supremacy of law and in the will of the nation? It is idle to speak of the French as a people that "learn nothing;" a falser paradox was never uttered. They are the nimblest of mind, the quickest of apprehension, among the nations of Europe; and have always been surprising the world by learning only too speedily the lessons they had set themselves. And they have had an experience during the last year such as has not in many years come to any other people, and such as might teach the dullest and slowest wits all they need to learn to become even now the most orderly and progressive nation of Europe.

It is still too soon to say how much they have actually learned or how well. But there are not wanting indications that France is now more ready to unite in the establishment of a permanent government, and to support it with something like popular unanimity, than for many years before. The National Assembly is cordially acknowledged as supreme throughout the land. The Executive has shown itself halting, timid and perhaps cruel; and it is certainly unacceptable to a majority of the nation, but while it is upheld by the Assembly, it is respected and obeyed even in Lyons and Toulouse. The army, as reconstructed, is powerful enough to hold in awe all disaffected or rebellious elements; but it is the instrument of the nation and is feared only by its enemies. There is active discussion everywhere of the claims of candidates for the highest place in the government, be it presidency or throne; but not a breath of apprehension is heard anywhere of the seizure of supreme power by violence. Usurpation is impossible; and all parties are agreed that the coming head of the nation must hold power by the nation's will. In other words, it has become certain that France hereafter has but one ruler; and that whether, among the numerous aspirants to high office, she shall choose to take as her first citizen an emperor, a king or an elected governor, the supreme ruler of the land shall still be the one who now sits upon the throne, and speaks with her authority and in her name, alike to victorious Germany and to subdued Paris—the Public Opinion of France.

If this anticipation be fulfilled, we can see no reason for despondency as to the future of the reconstituted nation. France is even now by far the richest country on the European continent. The exhaustless resources her people still display under the wasting desolation of these wars have been the wonder of all observers. The sources of her wealth, in her vineyards and factories, in the industry, taste and genius of her people, in her supremacy in all the arts of grace and ornament, and in her trade, have been but for a short time interrupted; and their peculiar character is such that they must grow in favor and in importance as other nations increase in wealth, luxury and refinement. The best economists assure us that, with peace, order and an economical government, even the great debt incurred by the war and the greater one occasioned by the treaty of peace, will lay upon the people no intolerable burden at first, and will be easier to bear with each succeeding year. As for the other elements of French national greatness the world is familiar with them; the literature, the eloquence, the science, the rich culture, of which Paris has been for ages the centre, have never flourished more gloriously than of late; and the intellect of which these things were the expression still remains. Who will believe that it has been blunted, obscured, made coarse, and so suffered an essential change under the stirring events of the last few months? Who can doubt that, as soon as order is restored, and the regular course of life and of work begins again, all these will take their old place in the van of civilization, and the world will be as glad as it was a year ago, to accept from France its choicest products alike of handiwork and of thought?

As for the precise course which politics may take in France, we have no predictions to offer and scarcely a wish to express. The important step is taken, when the question of the future form of government becomes a question of politics, that is, a struggle of opinions and principles on the ground of reason, and ceases to be a question of war, a struggle of personal ambitions on the ground of force. Having reason to trust that this step is actually made already, the particular result of the present canvass becomes of secondary importance. It is like the change which took place in the United States, when we ceased to fight for the existence of the nation, and began to dispute and vote as to who should administer its government. The latest reports which reach us seem to show that a majority of the National Assembly have come to the conclusion to establish a constitutional monarchy, in which the representatives of the people shall make all laws, and a king shall be their agent to enforce them. It is even said that they have determined to restore the Comte de Chambord, the "legitimate" heir of the old Bourbon kings, under a constitution as popular as that of 1830; and that the Orleans branch of the family, the descendants of Louis Philippe, acquiesce in this resolve; so that Henri V. will be the first sovereign under the new regime, and since he is childless, the young Comte de Paris will be the heir presumptive to the throne. This is not the plan which the American people would have judged the most desirable: it is not that from which we should hope for the best and most permanent government. But if it is the will of France, as peaceably expressed through the National Assembly, every right-minded man will wish it complete success.

REVIEW OF THE MONTH.

The large accumulation of loanable funds at this centre and the consequent ease in money, were the most important influences bearing upon our financial markets in the month of May. Money has frequently been loaned in large blocks to leading dealers in government securities, at two per cent, and lenders have in many cases been obliged to leave their balances unused for lack of ability to place them on any reasonable terms. The principal reasons for this plethora of money seem to be the ordinary flow of currency from the interior at this period of the year; a rather conservative course pursued in commercial business, with less than the usual amount of speculation; and still more than all other causes, the policy of the government in keeping an easy money market during the negotiation of their new five per cent bonds.

Government securities were comparatively dull during the month at steady prices. No important disturbing influences and little fluctuation in prices occurred. There was at one time a better demand from foreign bankers, for shipment, arising from the high rates of exchange, but this was not continued to any great amount, and business, taken altogether, was of moderate volume. A proposition on the part of some of the most prominent bankers of New York to take, on certain terms, the whole balance of $135,000,000 of the new five per cent government loan now offering, has been rejected by the Secretary of the Treasury. The proposal was rather a remarkable one in its nature, and it is hardly to be anticipated that a combination of our shrewd business men

Digitized by Google

would enter into any such engagement except upon terms which the Government could not grant.

Stocks were generally dull during May, compared with the great buoyancy and speculative excitement of the previous month. No positive weakness was developed in the market, but there was a decided lull in business and a hesitation in the upward movement of prices. Several of the leading speculative stocks, however were materially advanced during the month, among which the most conspicuous were Rock Island, Reading, Erie, and Lake Shore. The extraordinary ease in money and the confidence fel in the continuance of the same condition of monetary affairs for some time to come has offered every inducement for speculation, and the more general feeling in the market has been on the side of higher prices.

The following table will show the opening, highest, lowest and closing prices of railway and miscellaneous stocks during the months of April and May, 1871:

Gold was more active and advanced, having sold up to 112¼ on the 19th, the highest point reached since January 1. The, chief supporting influence of the market was the export demand which continued to be large under the high rates of foreign exchange. Fluctuations in the premium are now small compared with the wide range to which we have been accustomed in former years, and the fact that a rise of only 1 to 3 per cent is produced by influences which would formerly have caused a variation of 10 per cent, shows the much firmer basis to which the market has settled, and probably encourages, with some parties, the idea that a further permanent decline of several per cent may be possible, and thus induces a continuous short interest in the market of greater or less importance.

Foreign Exchange has been exceedingly firm, as will be seen by the prices below. The large balances to be settled at this period of the year give rise to a heavy demand for bills, and as the export of United States bonds has been smaller this year than previously, and our imports of merchandize much larger, the rates of exchange have ruled high. Recent reports from London and Frankfort give accounts of the introduction of a number of American railroad and other loans in those markets, and these negotiations, together with the demand for our old railroad bonds, may, in time, have some effect in reducing the rates of exchange.

[From our own correspondent.]

LONDON, Saturday, May 20.

The belief that the news of the Paris Commune having collapsed may be received at any moment has engendered a feeling of caution during the last two days, inasmuch as there is a pretty general expectation that the effect of the restoration of order in Paris will be to increase materially the export demand for gold in this market. What will be the actual course of our money market as soon as Versailles has achieved her final victory over Paris is the subject of many a discussion. That the rate of interest will rise soon after Paris is recaptured is scarcely to be doubted, but, at the same time very much depends upon the state of politics and the character of the Government, and the upward movement may be delayed for some weeks, perhaps months, if the Thiers regime should fail to command the confidence of the people. Looking at the past, one cannot but arrive at the conclusion that the existing Government is not the Government for France, and as an efficient army, led by Imperial generals, will soon be in Paris, it is by no means improbable that should Thiers and his ministry fail to please the army and the people, there may be an outcry for the restoration of the Empire. So long as there are these doubts about the future, the monetary outlook must be equally uncertain. Had the French, after the signature of the preliminaries of peace set to work to raise the money necessary to free the soil of the victor, the money market would unquestionably have been seriously disturbed, for in this country there was certainly every inclination to subscribe largely to a new French loan, whatever might have been its magnitude. The saving to the French nation would have been something great. The money would have been raised on comparatively easy terms, and with it, France would have rid her soil of the army which still holds a considerable portion of it as security for payment of the indemnity, and which is at present being supported by the nation at an enormous expense. A French loan will at present, however, be subscribed to with some reluctance; the terms will be less easy; and probably before the Government can approach our market with any certainty of success, money will have to be subscribed largely at home in order to give confidence here. The prospect is, therefore, that the effect of French requirements will be to gradually harden the rates of interest, and not to produce a sudden disturbance as might have been the case had Paris not taken up arms against the newly-

Digitized by Google

established Government. The doubts and uncertainties, however, of the future are inducing many speculators in securities to diminish the extent of their engagements, and hence many classes of securities have given way in price owing to numerous realizations.

The position of the Bank of England is remarkably strong. The amount of notes in the hands of the public is now £24,300,000, against which the Bank holds coin and bullion to the extent of £23,000,000. With the exception of £300,000 the Bank could, if necessary, redeem at once its note circulation, without resorting to the sale of those securities against which the Bank act allows the issue of notes. Such a position it has not attained for many years, and, consequently, any fears of a serious disturbance in the money market, after the restoration of order and good government in France may be dismissed. During the week the demand for money has been moderate, but in the open market the best short-dated bills, owing to the large supply of capital seeking employment, are taken at 2⅛@2⅜ per cent. The supply of commercial paper afloat is considerable. The following are the quotations for money, compared with those of last year:

	1870. Per cent.	1871. Per cent.		1870. Per cent.	1871. Per cent.
Bank minimum	3	2½	4 months' ba'k bills	3⅛@3¼	2⅝@2¾
Open-market rates:			6 months' ba'k bills	3⅛@3½	2¾@2⅞
30 and 60 days' bills	3	2¼	4 and 6 trade bills	3⅝@4	3 @3½
3 months bills	3 @3¼	2¼			

The rates of interest allowed by the joint stock banks and discount houses for deposits are as under:

	1870.	1871.
Joint stock banks	2	1½
Discount houses at call	2	1½
Discount houses with 7 days' notice	2½	1½
Discount houses with 14 days' notice	2½	1½

Annexed is a statement showing the present position of the Bank of England, the Bank rate of discount, the price of Consols, the average quotation for English wheat, the price of Middling Upland Cotton, and of No. 40 Mule Yarn, fair, second quality compared with the four previous years:

	1867. £	1868. £	1869. £	1870. £	1871. £
Circulation, including bank post bills	23,201,021	24,404,375	23,794,353	23,634,331	24,353,779
Public deposits	8,584,894	6,341,006	4,933,228	9,182,350	5 225,513

Bank rate	3 p. c.	2 p. c.	4½ p. c.	3 p. c.	2½ p. c.
Consols	93¼	94¼	93	94½	93¼
Price of wheat	64s. 11d.	74s. 3d.	44s. 6d.	44s. 5d	58s. 7d.
Mid. Upland cotton	11d.	10¾d.	11⅝d.	11 15-16d.	7 ¾d.
No 40 mule yarn	1s. 5d.	1s. 8¾d.	1s. 2½d.	1s. 3¾d.	1s. ¾d.

There has been no material alteration in the rates of foreign exchange. The demand, has, however, somewhat abated. There is no inquiry for gold for export, but Mexican dollars, of the old issue, continue to be purchased for shipment to China. The market for bar silver is quiet. The following prices of bullion are from Messrs. Pixley & Co.'s circular:

GOLD

	s.	d.	s.	d.
Bar Gold ....per oz. standard.	77	8¾	@77	9
do fine.... do	—	—	@—	—

Turin	5	6	5	6
Brussels	2½	4	2½	3¾
Madrid	5	5	5	5
Hamburg	—	—	2¼	2¼
St. Petersburg	6	8	4½	7

The stock exchange markets have been rather dull, speculators having diminished their engagements, owing to the probability of an early restoration of Paris to France. British railway shares, however, continue very firm. The traffic receipts continue very satisfactory, the total for last week having been £871,869, against £816,522 last year, showing an increase of £55,347. The receipts for goods' traffic on the fourteen principal lines show an increase of £36,412, the totals being £436,263 this year, against £399,851 last year. In the Consol market there has been no especial movement. Foreign stocks have been dull, but in the value of American Government descriptions there is no especial change. Erie Railway shares, owing to the rise at New York, have been as high as 27, but they have since receded from that point. Atlantic and Great Western Railway securities are firm. The following figures show the highest and lowest prices of consols and the principal American securities on each day of the week:

	Monday.	Tuesday.	Wed'sday.	Thu'sday	Friday.	Sat'day.
Consols	93¼-93⅜	93¼-93⅜	93¼-93⅜	93¼-93⅜	93¼-93⅜	93¼-93⅜

Messrs. Stern Brothers have issued the prospectus of a new loan for Spain for £6,000,000, of which £2,622,781 is offered for subscription in this country. The bonds bear interest at 6 per cent. per annum, the price of issue is 80. The loan will be redeemed at par within 17 years. The loan has been fully subscribed, and the scrip is at about 1 premium.

Advices from Frankfort state that the German stock markets maintain their firmness, and although, owing to the high prices to which shares have advanced, speculation is now restricted, new issues are daily introduced and readily subscribed. Among these have been two million dollars New York Midland, and one million Grand Rapids and Indiana bonds. Omaha Bridge bonds have reached 90, and few now remain in first hands. A subscription for two million dollars New Orleans-Mobile bonds has been fixed for an early day. It is stated that a new effort will be made to introduce North Pacific bonds. Georgia Six per Cents are in request; Louisiana Levee bonds are at 77½. For Spanish there is a good demand at rising prices, which are generally in advance of the London market.

It is stated that there will be a fresh issue of £400,000 of Atlantic and Great Western Reorganization stock, and that it will be made next week at the price of 80 *pro rata* to the existing holders. The object is to provide for every claim that can possibly be made on the part of any outstanding interests in the undertaking, so that on its passing to the new management it may be entirely free from all dissentient influences.

Messrs. E. F. Satterthwaite & Co., announce that they are instructed to offer for public subscription £235,000 first mortgage bonds of the Midland Railway Company of Canada, repayable in thirty years, bearing interest at six per cent. per annum, redeemable at par by a sinking fund of two per cent. per annum, and annual drawings commencing in 1873. The bonds form part of a total issue of £335,000, and are a first charge upon the undertaking. The line is ninety miles in length. In 1870 the nett revenue of the company was £25,714. Taking into account the sinking fund, the bonds will yield £7 1s. 2d. per cent. per annum by way of interest.

The weather has been milder during the last two days, and much more favorable to the country. The trade for breadstuffs has been quieter, and prices are rather drooping.

The following statement shows the imports and exports of bread and feeding stuffs into and from the United Kingdom, during last week and since the commencement of the season, compared with the corresponding periods in 1869–70:

FOR THE WEEK ENDING MAY 13.

	1870'71. Imports.	1870'71. Exports.	1869'70. Imports.	1869'70. Exports.
Wheat....cwt.	488,112	17,890	785,956	13,041
Barley	203,479	3,252	220,166	500
Oats	249,656	28,253	332,753	430
Peas	47,976	2,424	74,350	47
Beans	27,798	....	30,587	....
Indian corn	125,803	1,425	171,538	....
Flour	99,548	7,050	122,988	80

SINCE THE COMMENCEMENT OF THE SEASON (AUG. 28).

Wheat....cwt.	22,868,392	2,676,780	29,470,404	246,302
Barley	5,770,450	103,466	5,961,477	19,007
Oats	5,593,333	1,302,635	7,104,878	84,384
Peas	593,575	49,596	990,963	11,176
Beans	1,393,079	16,742	1,330,073	2,043
Indian corn	10,244,699	58,695	13,417,432	14,044
Flour	3,281,822	1,316,485	4,590,663	16,913

For the corresponding periods in 1868–'69 the figures were as under:

	Imports. For the week.	Imports. Since Sept. 1.	Exports. For the week.	Exports. Since Sept. 1.
Wheat....cwt.	347,006	20,079,073	1,469	151,137
Barley	116,103	8,051,957	2,111	99,789

Peas	3,007	877,353	76	23,099
Beans	14,739	2,002,979	9	4,453
Indian Corn	244,505	9,756,174	.. .	895
Flour	51,747	2,861,273	....	23,742

The state of trade shows very little alteration. The following relates to the Manchester market:

For shipping yarns the market has been quiet; but little business has been transacted, and to effect sales a slight concession has to be made. Spinners are very firm, being still well under contract. The home-trade yarn market is quiet in tone, and only a small business has been effected in yarns of this class. Prices are quoted the same as on Tuesday, but, in some cases, a shade less would have to be taken to make sales. The cloth market is little changed

Digitized by Google

since Tuesday, and the demand is still languid, and at lower rates. Shirtings are especially depressed, and producers of the lower makes, whose contracts are now falling out, would have to accept lower prices for future orders. To-day the market is flat, and the rumors of unfavorable telegraphic advices having been received have produced a depressing effect. Quotations are nominally unchanged, and, in fact, the firm position of yarns renders any reduction difficult.

English Market Reports—Per Cable.

The daily closing quotations in the markets of London and Liverpool for the past week have been reported by submarine telegraph, as shown in the following summary:

London Money and Stock Market.—The market closes quiet, with all American securities steady, Five-Twenties commanding a slight advance over the prices of a week ago.

	Sat.	Mon.	Tues.	Wed.	Thur.	Fri.
Consols for money	93⅛	Holiday.	93⅝	93⅛	92x	x91¾

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show an increase in both dry goods and general merchandise. The total imports amount to $8,174,154 this week, against $7,460,904 last week, and $6,561,621 the previous week. The exports are $4,162,140 this week, against $3,473,666 last week, and $4,306,496 the previous week. The exports of cotton the past week were 11,718 bales, against 9,068 bales last week. The following are the imports at New York for week ending (for dry goods) May 26, and for the week ending (for general merchandise) May 27.

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
Dry goods	$1,185,208	$1,280,286	$1,114,793	$2,121,610
General merchandise	5,635,567	4,842,749	2,501,710	6,052,544
Total for the week	$6,820,770	$6,072,985	$3,616,503	$8,174,154
Previously reported	94,923,025	125,833,780	119,763,079	151,097,298
Since Jan. 1	$101,743,795	$134,905,774	$123,379,582	$159,271,452

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports, for the week ending May 30:

EXPORTS FROM NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
For the week	$2,692,834	$3,676,457	$3,468,804	$4,162,140
Previously reported	72,805,766	67,917,740	68,460,545	93,866,939
Since Jan. 1	$75,498,590	$71,594,177	$71,944,349	$98,029,079

The following will show the exports of specie from the port of New York for the week ending May 27, 1871:

May 23—St. Nevada, Liverp'l			Southampton—
Foreign silver	$62,000		American gold	150,000
" 23—St. Germania, Hamburg—			Gold bars	60,117

—Among the cards of Southern Bankers in our advertising columns will be found that of Mr. A. C. Kaufman, Banker, in Charleston, S. C. Mr. Kaufman should, by this time, be pretty well known to our readers, but we take pleasure in again calling their attention to his business, in which investment orders, and collections are made specialties.

BANKING AND FINANCIAL.

THE NEW ORLEANS, MOBILE AND TEXAS RAILROAD COMPANY

Are building a trunk line, connecting New Orleans with Mobile on the east, and giving the only railroad connection between the former city and the great and most productive State of Texas on the west, the total distance from Mobile to Houston being 475 miles.

The company is composed of strong Northern capitalists, who have already expended nearly TEN MILLION DOLLARS of their own funds in the construction of the line. They have built about 225 miles from Mobile westward, and secured by purchase of securities and made provision for the thorough repair and equipment of the 108 miles constituting the Texas division; leaving but 140 miles to be built to complete the entire road.

It is believed that no other railroad corporation in the country has ever made so large an expenditure from its own means before offering any of its securities to the public.

The Company now offer for sale the 8 per cent mortgage bonds upon the Louisiana division of 226 2-3 miles from New Orleans to the Sabine River. This will probably be the most valuable portion of the whole line, as it will be the only rail communication by which the enormous productions of Texas can reach the Southern metropolis.

So important is this road considered to Louisiana, that the State has made very liberal grants in aid of the enterprise, by direct donations, by endorsement of its bonds, and by subscriptions to the stock of the Company, amounting in all to over eight million dollars.

The bonds now offered are of two classes: First mortgage bonds, to the amount of $12,500 per mile, and second mortgage bonds, to an equal amount, both principal and interest guaranteed by the State of Louisiana. The price of the two classes is the same, and subscribers can take their choice.

The Bonds are only in the denomination of $1,000, or £200 each, interest payable January and July, at the rate of eight per cent currency in New York, or seven per cent gold in London, at the option of the holder, at the time each coupon is due. Bonds can be registered if desired.

No better security has been offered to investors. The line is a good and important one, and the stockholders have proved their determination and ability to carry the work to an early and successful completion, by the very large amount they have themselves put into it.

The Bonds are largely profitable, as well as entirely safe. One thousand dollars invested in these eight per ceet bonds will give the purchaser *more than seventy-seven per cent* greater annual interest than the same amount invested in the new Government Five Per Cents, into which the Government Sixes are being funded by the Secretary of the Treasury.

At the same price, an eight per cent currency long bond is far cheaper than a 7 per cent gold one. Calculating a return to specie payments in three years, and taking the time that the bonds of the New Orleans, Mobile and Texas Railroad have to run—45 years—we find that by compounding the interest of each, every six months, at 7 per cent, an 8 per cent currency bond at 90 will give a return of $2,614 18 more than a 7 per cent gold bond, at the same price, or nearly three times the amount of the orginal investment.

While the purchaser of the 8 per cent bonds of this Company

Digitized by Google

can realize this special profit, he also holds the option of taking advantage of any temporary advance in gold, as he has choice, at every separate coupon day, of gold interest at 7 per cent, or currency interest at 8 per cent.

The bonds are dated May 1, 1871. The first coupon will, therefore, be a fractional one, running from May 1 to July 1. The price is 90, and accrued interest at 8 per cent currency from May 1 to date of remittance. Bonds will be sent free of cost and Government, and all other marketable securities will be taken in exchange at their best market rates, without charge for selling.

Information concerning the company and the Road, and pamphlets containing map and full details of the enterprise, can be obtained of the undersigned or any of the Company's advertised agents.

W. B. SHATTUCK, Banker,
and Financial Agent N. O., M. & T. R. R. Co.,
No. 23 Nassau Street, New York.

BANKING HOUSE OF HENRY CLEWS & Co., 32 WALL ST., N. Y.

Our business is the same as an incorporated bank.

Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed on all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make tele graphic transfers of money to any desired point, and transac every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upward on.

The Imperial Bank, and Messrs. Clews, Habicht & Co., London.

The Provincial Bank of Ireland, The National Bank of Scotland, and all their branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Government and other investment securi ties; also Gold and Exchange.

Advances made on approved collaterals and against Merchan dise consigned to our care.

We make collections of Notes, Drafts, Coupons and Dividends with promptness on all points, and are fully prepared to offer banking facilities upon either currency or gold basis.

HARVEY FISK. A. S. HATCH.

FISK & HATCH,

BANKERS AND DEALERS IN GOVERNMENT SECURITIES,
No. 5 NASSAU STREET, NEW YORK, May 29, 1871.

THE CHESAPEAKE AND OHIO RAILROAD COMPANY are extending their line of road to the head of reliable navigation on the Ohio River, where it will meet and connect with lines now building or projected, to the principal railroad centers and river cities of the Western States. 227 miles are in operation, and the iron for 100 miles additional is now being laid. The road will have, when completed, a large East and West through business, beside an immense mineral and general local traffic.

THE SIX PER CENT GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD CO. are amply secured, and very desirable for safe and profitable investment.

The CENTRAL PACIFIC BONDS negotiated by us, amounting to $25,885.000, have a ready market everywhere, being favorably known and actively dealt in at all the principal Stock Exchanges of this country and Europe, and are readily salable at all times at quoted market price, which is now above par.

The Bonds of the CHESAPEAKE AND OHIO RAILROAD CO. we believe to be of equal value and security, and must in time take a like rank in market value and salable character.

Holders of Five-Twenty Bonds, desiring to fund them otherwise than in the new Five Per Cent Government Loan, may do so with entire safety, at a profit of about 20 per cent, and without reduction of interest, by an exchange for the Bonds of the CHESAPEAKE AND OHIO RAILROAD CO.

Price of the bonds, until further notice, 92, and accrued interest from May 1.

We also buy and sell Government Securities, and the Bonds of the Central Pacific Railroad Co., and as agents of the U. S. Government, will attend to the funding of Five-Twenties into the new United States Bonds.

FISK & HATCH.

GERMAN BANK OF LONDON (Limited).

DIRECTORS.

George Albrecht, Bremen.

do do preferred	5	June 30	June 14 to July 1.

FRIDAY EVENING, June 2, 1871.

The Money Market.—There has been little change in the condition of monetary affairs, and rates for call loans remain at 3@4 per cent, with exceptional loans to the large government houses as low as 2 per cent. Some of the banks refuse to lend below 4, preferring to lock up their balances rather than lend them at any lower interest. The excessive supply of loanable funds at this centre has probably now reached its maximum, and there are some indications that a slight hardening tendency in rates may soon be expected; there will soon be a demand from Ohio and other Western States for money to move the wool crop, and the government programme for the month calls for the purchase of only $4,000,000 bonds against the sale of $7,000,000 gold, thus taking $3,000,000 currency off the market. Any change towards better rates will be hailed with satisfaction by the banks and other money lenders, and a healthy 5@6 per cent market would be more favorable to legitimate business than the present unusual plethora. The city bank statement of Saturday, May 27. showed the following changes compared with the previous week: Loans, increase, $2,005,107; specie, increase, $117,801; circulation, decrease, $137,722; deposits, increase, $4,896,744; legal tenders, increase, $1,709,096. The result was to leave the banks $646,641 stronger in their excess over legal reserve, the whole excess being $16,220,031.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	May 27, 1871.	May 28, 1870.	May 29, 1869.
Loans and discounts	$291,441,633	$279,500,000	$274,900,000
Specie	15,980,114	32,700,000	17,900,000
Circulation	31,071,244	33,200,000	33,900,000
Net deposits	238,490,760	228,000,000	203,000,000
Legal Tenders	68,230,418	61,600,000	57,900,000

Commercial Paper continues in good demand at 5@5½ per cent for first-class names on 60 days to 4 months time, while some very choice grades have been negotiated at 4½ per cent.

Quotations are as follows:

		per cent.
Commercial, first class endorsed	60 days.	4½@ 5
" " "	4 months.	5 @ 6
" " "	6 months.	5½@ 6½
" " single names	60 days.	6 @ 7
" " "	4 to 6 months.	6 @ 9
Bankers, first class foreign	60 days.	4½@ 5
" domestic	3 to 4 months.	5 @ 6

United States Bonds.—Government securities have been strong on a moderate business, Five-Twenties of 1867 closing at 114¼, against 113⅞ last week; Ten-Forties at 110, against 109⅞; and Currency Sixes at 115½, the same as last week. The principal causes of the firmness seem to be found in the upward tendency of gold, and the purchases of corporations and other investors who are desirous of placing their funds during the present period of easy money, in such securities as will pay a fair interest and find

Digitized by Google

easy sale at any moment. The Government purchases during June will be only $4,000,000, against $10,000,000 in May, but the announcement of this schedule on Monday had little effect upon prices, which have since been firmer, as above stated. On Wednesday the last purchase for May was made, amounting to $2,000,000, between 111.50 and 111.10, the total offerings being $4,053,300.

The proposition made to Mr. Boutwell by a prominent banking house of this city in regard to taking $135,000,000 of the new Five Per Cent Loan has been declined by the Secretary, as it was generally expected that it would be, upon the terms requested of him. In the meantime there has been little progress made in selling the bonds, and the further plans of Mr. Boutwell in regard to their negotiation, if he entertains any, are yet unknown to the public.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

Railroad and Miscellaneous Stocks.—The stock market has been unsettled in tone, with irregular prices. No general movement has taken place in either direction, and several of the speculative favorites show an advance, while others have declined. Rock Island closes at 123¼ against 119¼ last week, the advance being based upon reports that the company has a large surplus on hand, and also that the Pennsylvania Central is endeavoring to obtain control of the road in order to get a continuous line to the West. Reading has been strong, selling above 119, but declining again to-day to 117; the recent purchases of coal lands are regarded in Philadelphia as decidedly favorable for the company's interests. Lake Shore, after some fluctuations, was again strong to-day, closing at 114¼@114¾, though there has been no information given in regard to any scrip dividend or increase of stock. Dividends of 5 per cent have been declared on the Northwest stocks, both common and preferred, payable on the 30th inst. No effect was produced on prices, as the dividends had been confidently expected. The decline in several leading stocks has been quite as marked as the advance in some of those named above. Pacific Mail closes at 44¼ against 46¾ last week, the price falling off on the publication of the company's annual statement, although the statement is generally considered favorable. Cleveland & Pittsburg closes at 120¼ against 122½ last week; Ohio and Mississippi at 47⅛ against 50⅛, the parties manipulating this stock having disagreed among themselves; Western Union Telegraph at 57⅞ against 59⅛, and Hannibal and St. Joseph common at 89 against 98 last week and 104½ two weeks ago. The Commissioner of Internal Revenue at Washington has decided that the tax of $1,151,000 upon New York Central scrip dividend of 1868 must be paid; the stock, however, has not been much affected by this decision. The remarkable ease in the money market continues to be as great as at any previous time, and invites speculation from outside parties, but the past few weeks, of dullness and the reaction in prices of some leading stocks, have shaken confidence and materially increased the "bear" interest.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

State and Railroad Bonds.—Southern State bonds have been comparatively dull. Tennessees have shown some reaction from previous prices, and close about 1¼ per cent lower than last week, the decline being apparently the result of speculative sales, and not from any change in the financial affairs of the State or any less confidence in the ultimate value of the bonds. South Carolinas have not varied materially, and it is hoped that the State will be able to arrange its financial matters satisfactorily after a short time, though it is thought that the late convention erred in not providing definitely for the floating debt and maturing bonds of the State. Virginias have been dull and receded a fraction in price; a number of prominent bankers in this city have addressed letters to the State Auditor at Richmond requesting that the funding operations in July be transacted in New York, and it is to be hoped that the request will be acceded to if the law will permit, as it would greatly facilitate operations so far as the convenience of holders is concerned.

Railroad bonds continue to be in good demand, and both the old bonds and new loan offerings have been in request. Chesapeake and Ohio Loan advanced to 92. The Pacific railroad bonds close as follows: Central Pacifics, 102⅝@103; Union Pacific first mortgage bonds, 92⅝@92⅞; Land Grants, 83¼@83½; Incomes, 84¼@84½.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

The Gold Market.—Gold has been strong during the past two days, closing this evening at 112⅜, the highest point of the year. The cause of this advance seems to be mainly speculative, and it is reported that a clique has been formed to advance the premium still further. The Treasury sales for the month will be $7,000,000 against the purchase of only $4,000,000 bonds, and unless there is good reason to suppose that Mr. Boutwell will not again interfere with the course of gold, by selling extra amounts, it would appear that any combination to force up the premium must be attended with considerable risk of failure. The export so far this week has been about $600,000, so that the total, unless shipments of to-morrow are very large, will not greatly exceed $1,000,000. On Thursday the Treasury sold $2,000,000, the whole amount of bids being $6,116,000. Rates for carrying have ranged from "flat" to 3 per cent, and for borrowing from "flat" to 1-64th per day; to-day the rates paid for carrying were 1, 2 and 1½ per cent, and for borrowing flat to 1 per cent.

The following table will show the course of the gold premium each day of the week past:

	Quotations. Opening.	Lowest.	Highest.	Closing.	Total Clearings.	Balances. Gold.	Balances. Currency.
Saturday, May 27	111⅝	111¼	111⅝	111⅝	$20,047,000	$1,284,106	$1,435,820
Monday, " 29	111⅝	111¼	111⅝	111⅝	18,915,000	1,552,315	1,748,120

Patriot doubloons	15 50	@ 15 70	Spanish dollars	2@3 p.c. premium.	
American silver (new)	97¼	@ 98	South American dollars	par.	

Foreign Exchange.—The market has been dull, and business apparently checked by the upward tendency of gold, and a slight holding off of buyers in the hopes of obtaining lower rates. The negotiation of the Reading loan, and the reports from abroad of the placing in London and Frankfort of several American railroad loans, have taken the edge off the market for the time being, and encouraged the idea that rates may again decline. There seems to be little prospect, however, that the loans already negotiated will have any permanent effect upon our rates of exchange, and unless much larger amounts are placed hereafter, little concession in rates can be expected on that ground. Double eagles continue at a premium of about 3-16 to ¼ per cent, though the shipment of specie for the week will probably aggregate less than in any of the last three weeks. Cotton exports from the United States amount to 47,892 bales, against 36,160 bales in the same week of 1870.

Quotations are as follows:

	60 Days.	3 Days.

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES.

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3. The Table of Railroad, Canal and Other Stocks, on another page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column x=*extra*; s=*stock or scrip*.

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q.—J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name

NEW YORK CENTRAL RAILROAD—TAXATION OF THE EIGHTY PER CENT CERTIFICATES.—WASHINGTON, May 29.—The following decision is announced this afternoon by the Commissioner of Internal Revenue:

TREASURY DEPARTMENT.
INTERNAL REVENUE DEPARTMENT.
WASHINGTON, May 29, 1871.

John M. Bailey, Esq., Collector of Internal Revenue, Fourteenth District, New York.

SIR,—The following decision is announced as to the validity of an Internal Revenue tax assessed against the New York Central Railroad Company, on certain amounts of money represented by certain interest certificates issued by said Company. The facts are as follows:

On the 19th day of December, 1868, the New York Central Railroad Company, by its duly authorized Board of Directors, adopted the following resolution:

Whereas, This Company has hitherto expended of its earnings, for the purpose of constructing and equipping its road, and in the purchase of real estate and other properties, with a view to the increase of its traffic, moneys equal in amount to eighty per cent of the capital stock of the Company, and

Whereas, the several stockholders of the company are entitled to evidence of such expenditure and to reimbursement of the same at some convenient future period. Now, therefore

Resolved, That a certificate, signed by the President and Treasurer of this Company, be issued to the stockholders severally, declaring that such stockholder is entitled to eighty per cent of the amount of the capital stock held by him, payable rateably with the other certificates issued under this resolution, at the option of the company, out of its future earnings, with dividends thereon, at the same rates and times as dividends shall be paid on the shares of the capital stock of the Company, and that such certificates may be, at the option of the Company, convertible into stock of the Company whenever the company shall be authorized to increase its capital stock to an amount sufficient for such conversion.

Resolved, That such certificates be delivered to the stockholders of the Company, at the Union Trust Company, in the City of New York, on presentation of their certificates of stock, and that the receipts, provided for in these resolutions, shall be indorsed on the stock certificates.

Under the authority conferred by these resolutions certificates were issued.

In May, 1869, the Legislature of the State of New York legalized the issuing of the certificates and authorized their conversion into stock of the company, but no such conversion has ever been made. The capital stock of the Company at the time these resolutions were adopted, was $28,795,000, and for eighty per cent of the same, being $23,036,000, interest certificates, in the form above described, were issued. On the 3d of March, 1870, the Assessors of the Fourteenth Internal Revenue District of the State of New York, made an assessment against this railroad company, founded on the interest certificates. This was an assessment of five per centum on $23,036,000—making a tax of $1,151,800. He added as penalty for failing to make return under section 122, $1,000. The entire assessment was, therefore, $1,152,800. It is the validity of this assessment that is now under consideration. Did the law authorize it? There was an error in assessing the penalty of $1,000. That was not an assessable penalty, but one that can be recovered by some appropriate suit or proceedings. The question is as to the tax $1,151,800, was it in accordance with the law? The authority for this tax is found in section 122 of the act of June 30, 1864, as amended July 13.

In examining this assessment to see if it is in accordance with this law, it is pertinent to inquire upon what basis these interest certificates were issued, and whether that basis was subject or not to the tax of five per centum under the requirements of section 122 above quoted. To answer this inquiry we find that the Board of Directors of the New York Central Railroad Company, on the 19th day of December, 1868, stated in the resolution above quoted, in clear and precise terms, what these interest certificates represented.

These interest certificates, therefore, represent moneys—earnings of the New York Central Railroad, which had been received from time to time, and had been expended by the Company, but no acknowledgment of such earnings had ever been declared until this resolution of the Board of Directors, of the 19th of December, 1868, which was adopted. It appears, also, that eighty per cent of the capital stock of this Company, amounting to $23,036,000—moneys which were the earnings of the road, had been expended. There is no doubt that amount of money had been in the hands of the Company, and if still in its possession, should be liable to the tax under Section 122, above quoted. Further, the tax should have been upon those earnings from time to time as they accrued, They have, however, been expended, and they are now represented by these interest certificates.

Do the facts of the expenditure of this amount of $23,036,000, and the issue of these interest certificates to represent it, relieve the New York Central Railroad Company from the obligation to pay the tax on this amount which is claimed under Section 122.

These moneys having once been in the possession of the Company as earnings, created an obligation to pay the tax on them, which, under the requirements of the second clause of that section, required a satisfactory account to be rendered to the Assessor or Assistant Assessor before that obligation could be canceled. No such account was ever rendered, and it is therefore declared that the obligation of the New York Central Railroad Company to pay the tax on the original earnings of $23,036,000, and now represented by these interest certificates, is not impaired by their issue, but is of full force at the present time. You will accordingly notify the President of the New York Central Railroad Company of this decision, and will at once proceed to collect the tax of $1,151,800, which was properly assessed. Very respectfully,

A. PLEASANTON, Commissioner.

Grand Trunk Railway of Canada.—Report of the directors for the half year ending Dec. 31, 1870:

The gross receipts upon the whole undertaking, including the Buffalo and Champlain lines, have been		£793,740
Deduct ordinary working expenses (being at the rate of 67.12 per cent against 61.25 of the corresponding half of last year)	£532,762	
The renewals, &c., of the permanent way and works in the half year debited to revenue	136,101	
		668,863
Leaving an available balance earned in the half year of		£124,877
Deduct loss on American currency		8,284
Balance		£116,593

To this sum of £116,593 has to be added the balance carried from the net revenue account of last half year of £8,639, making a total balance of £125,232. From this, however, has to be deducted the amount of postal and military revenue due for the half year to the postal bondholders of £16,931, leaving the balance of £108,251 applicable for the following payments, viz:

Interest, &c., paid on lands		£1,602
On mortgage to Bank of Upper Canada		4,423
On loans, bankers' balances, promissory notes, European exc'ge, &c.		563
On British American Land Company's debentures		616
On Montreal Seminary debentures		616
On Island Pond debentures		2,700
Half-yearly instalment on Portland sinking fund		1,271
		£11,794
Atlantic and St. Lawrence lease (in full)	£38,399	
Detroit lease (in full)	11,250	
Montreal and Champlain	7,573	
Buffalo and Lake Huron	35,000	
		£72,222
First equipment bond interest		15,000
Second equipment bond interest		8,115
Balance carried forward		1,118
		£108,250

Comparing this half year with the corresponding period of 1869, the gross receipts show an increase of only £2,546, although there were carried 34,912 more passengers and 79,492 more tons of freight. It was almost entirely in consequence of the lowness of rates that, while the passenger traffic increased in numbers five per cent and the freight traffic in quantity thirteen per cent, the increase in the money received during the half year was only one-third per cent.

These have been very small aids to very heavy expenditures, but unless it be deemed expedient to increase cash capital for banking purposes, the existing resources with the accruing profits, it is hoped, will serve all the necessarry wants of the company.

Lehigh Coal and Navigation Company.—The report for the year 1870 is as follows:

The profits of the year from all sources were:

Net profits on railroads, including car service		$819,815 88
Net profits on Lehigh Canal		177,687 92
Net profits on coal—		
Summit mines	$26,402 49	
Newport mines	15,454 20	
		41,856 69
Net profits on real estate sold		82,206 37
Net profits from rents		57,004 39
Miscellaneous receipts		21,538 96
		$1,200,060 21
Less general expenses	$122,245 18	
Taxes chargeable to railroad	24,333 24	
Taxes chargeable to Lehigh canal	6,369 39	
Taxes chargeable to Delaware Div. Canal	8,633 66	
Taxes chargeable to coal	49,778 38	
Taxes on interest and capital stock	101,564 37	
Taxes on landed property and improvements	8,471 98	
Balance of interest account for 1870	1,054,341 52	
Lose on Delaware Division Canal	127,090 61	
		1,497,751 73
Deficit		$297,691 52

Digitized by Google

The past year has been one of the most unsatisfactory in the experience of the company since the disasters of 1862. Our profits are dependent almost entirely on the general condition of the coal trade, which, during the last year, was unremunerative to nearly every company and operator engaged in it. With low rates on the railroad, frequent breaks in the canals during the spring, and a six months' suspension at our mines, we find full reason for the small amount of our net receipts.

The amount of coal transported by the railroad shows an increase of 585,264 tons over the previous year, or, after deducting deliveries to the canal and to points and railroads above Mauch Chunk, the increase was 186,791 tons. While the gross receipts derived from all of the traffic of the roads were larger by 9·17 per cent than in 1869, the expenses were increased 13¼ per cent, and the net earnings, after deducting taxes and half of the general expenses, were $734,359 85, or 33 8·10 per cent of the gross receipts, against $812,802 94, or 39½ per cent in 1869, which difference is accounted for by the charge on coal being 1 65-100c, per ton per mile in 1870, against 2c. in 1869, while the number of trains was considerably increased.

SUPPLEMENTARY REPORT.

The most important event that has transpired in the affairs of the company since the opening of the present year, is the lease of our railroads to the Central Railroad Company of New Jersey, which was confirmed at a meeting of the stockholders held March 28. The sale to the Central Company of materials, machinery and securities, including a million of bonds of our new general mortgage, will give us $1,500,000, and this amount with our net receipts during the first four months after resumption of work at the mines, will reduce our floating debt to less than one million of dollars.

This sum we expect to provide for hereafter by the sale of bonds, Under the authority of the act of the Legislature, accepted at the recent meeting of stockholders, we propose to execute a new general mortgage for $15,000,000

And to reserve for the payment of, at or before maturity, the 1864 mortgage, due 1884 ..... $6,635,000

The railroad mortgage, 1867 mortgage due 1897 2,000,000

And the gold 1867 mortgage, due 1897 (the payment of the remainder of the five millions having been assumed by the Central RR. Co. of New Jersey) 2,690,000--10,325,000

$4,675,000

Of which we shall sell to the Central Railroad Co. of New Jersey 1,000,000

Leaving $3,675,000

After providing for the extinguishment of the floating debt, by a sale of a part of these bonds, there remains ample provision for our further wants.

The remaining obligations of the company are:—Convertible loan, 1867, due 1877, $1,496,879 18; do. 1869, due 1894, gold interest $1,970,000. (After deducting the bonds held in the sinking fund.)

Of the last-named issue the company controls a considerable part, and it is proposed to cancel $970,000, leaving outstanding $1,000,000, which will be retired rapidly by the sinking fund, and some portion may, perhaps, be converted into stock within a few years. The convertible loan due in 1877 can be provided for out of the proceeds of the general mortgage bonds, if not converted into stock.

It is proposed to issue no more than five millions of the bonds at the present time, and those to be in $1,000 registered certificates, 7 per cent interest in currency, principal redeemable in forty years.

The remaining ten millions will only be issued as old bonds are retired, and will be in all respects similar to the first issue, unless at the time of issue it shall be for the interest of the company that the period of maturity be extended and the rate of interest diminished.

[The terms of the lease were published in the CHRONICLE, April 15.]

Memphis & Little Rock Railroad.—

SUPT'S OFFICE, M. & L. R. RR.,
Memphis, Tenn., Feb. 15, 1871.

R. C. Brinkley, Esq., President:

Sir: I have the honor to submit the following report of the operations of the road in this department, for the year 1870.

The receipts from both divisions of your road have been as follows:

From passengers	$100,733 19
From freight	61,179 09
From other sources	7,913 47
Total cash receipts	$169,825 75
For mail service credited on purchase of property from the United States	10,651 76
Total	$180,477 51

The expenditures have been:

Conducting transportation	$55,768 19	
Motive power	52,130 10	
Maintenance of way	81,731 18	
Maintenance of cars	14,578 08	
		204,207 55
Excess of expenses over receipts		$23,730 04

By an examination of the table hereto attached you will find that the losses occurred in the first five months of the year, and while the road was only partially operated. The receipts for the months of January, February, March, April and May, on the Eastern Division, only amounted to $9,537 58; expenditures for same time, $39,224 35. Expenditures over receipts, $29,686 77. Of this amount there was an expenditure of over $20,000 for maintenance of way alone.

LAND DEPARTMENT.

This department has also been under my management. During the last year an increased demand has taken place for lands, and more lands have been sold during the past year than during all the preceding years since the war, and at better prices.

The sales of lands have amounted to 4,506.46 acres, at an average per acre of $4 52; making total sales for the year, $19,299 80; town lots sold at Brinkley, $5,665 00; total lands and lots sold, $24,964 80. Fully one-half has been received in cash and the remainder on one and two years time, with eight per cent interest.

Oregon & California.—This road extends from the city of Portland, Oregon, to the California State line, following for about 150 miles the Willamette River. The Willamette Valley is from twenty to sixty miles wide, very fertile and well settled. The road is finished to the city of Albany, eighty miles, with twenty miles more graded and bridged ready for the iron. The capital of the State—Salem—fifty miles from Portland, is located on this line.

MONTHLY EARNINGS OF PRINCIPAL RAILROADS.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, June 2, 1871.

Trade during the past week has not been very satisfactory. The volume of legitimate transactions has been below the average for the season, whether for export or home use, and were it not for some speculation in leading staples of domestic products there would be really very little to report.

The following is a statement of the stocks of leading articles of merchandise at dates given.

	1870.	1871.	
	June 1.	June 1.	May 1.
Beef.....tcs. and bbls.	18,140	24,048	27,359
Pork.....bbls.	30,906	118,883	124,826
Tobacco, foreign.....bales.	19,141	19,205	20,196
Tobacco, domestic.....hhds.	17,800	16,478	17,370
Coffee, Rio.....bags.	43,189	84,637	45,036
Coffee, other.....bags.	23 500	47,628	50,607
Coffee, Java.....mats.	35,923	10,380	....
Sugar.....hhds.	87,212	70,550	43,362
Sugar.....boxes.	99,632	72,837	50,775
Sugar.....bags, etc.	339.000	279,315	168,559
Melado.....hhds.	1,322	6,836	5,056
Molasses.....hhds.	17,387	4,874	6,843
Molasses.....bbls.	....	4,000	7,600
Hides.....No.	124,300	181,000	172,850
Cotton.....bales.	48,000	57,480	87,000
Rosin.....bbls.	26,400	31,000	34,710
Spirits Turpentine.....bbls.	1,800	673	955
Tar.....bbls.	29,200	9,300	11,025
Rice, E. I.....bags.	1,280	6,800	8,100
Rice, Carolina.....casks.	1,257	300	540
Gunny Cloth.....bales.	7,150	19,000	17,050
Gunny Bags.....bales.	5,650	15,000	14,275
Linseed.....bags.	98,000	58,000	66,700
Saltpetre.....bags.	10,200	17,939	17,700
Jute and Jute Butts.....bales.	19,700	22,428	15,500
Manila Hemp.....bales.	22,800	33,048	38,331

Provisions have pretty uniformly declined the past week. Although in the aggregate of all kinds of Pork there was a falling off in the stock of six thousand barrels, yet indications of an excessive supply broke prices down and there were sales to-day at $15 25 on the spot and $15 12½, seller July; while prime Mess sold at $14@14 50, part for export. Prime steam Lard has declined and closes unsettled, 10¼@10½c.; Short Rib Bacon has sold at 8c., and dry salted Shoulders as low as 6c. per lb. We notice some movement in Texas Mess Beef for export, and a favorite brand of Western Prime Mess sold at $23 75 per tierce. Butter has been slow at 20@25c. for prime Western and State, and prime factory Cheese has declined to 12½@13c. These prices of Provisions are, all through, the lowest, we believe, that we have quoted in nine years. Tallow has been active and closes at 9⅛@9¼c.

Freights have been only moderately active and with increased room seeking employment, rates have slightly declined. The latest engagements are mostly grain; to Liverpool, 7¼@7½d. by sail and 8½d. by steam; to London, by sail, 8d.; to Glasgow, by steam, 9d. Vessels loading for Havre have obtained Tallow at ⅜c., and whale oil 3¼c, and to Antwerp, tobacco at 27s. 6d., and Lard 30s.; also, several ships with Deals from St. Johns to Liverpool, 70s.

Tobacco has shown less activity, but prices have ruled firm. In Kentucky Leaf, buyers, especially for export, have been disposed to hold off. Stocks are small, receipts moderate for the season, and assortments not good, while an advance has been stimulated at the West by more pretty full prices paid at New Orleans, which port seems disposed to claim its former importance in the Tobacco market. The sales for the week with us have been about 800 hhds., of which 300 hhds. were to home dealers and manufacturers, prices ranging from 5½c. to 6½c. for lugs, and 6½@10½c. for Leaf. Seed Leaf shows a pretty fair movement, but the market is without strength or general activity. We hear, however, of considerable transactions in interior markets. The sales here have been: 100 cases Ohio, 100 cases Pennsylvan'a, and 450 cases Connecticut and Massachusetts fillers, seconds and wrappers, all new crop, and all on private terms, also, 500 cases old Connecticut, on private terms. Spanish Tobacco has been in more export demand, but otherwise quiet; sales embrace 490 bales, in bond, on private terms, and 300 bales, in lots, for consumption, at 87½@102½c. currency, duty paid.

Whisky has been in small supply, but dull and declining.

Petroleum has shown more firmness during the week, but closes dull and unsettled, with 25⅝c. bid for cargoes of refined for immediate delivery; Crude also dull at 15c. in bulk. Naval stores have generally shown a large amount of trade and a firmer tone, except for Spirits Turpentine, which has declined under liberal receipts, and closes at 48½c. Rosin closes at $2 60, and Wilmington Tar $3. The latter has sold to the extent of 3,000 bbls. for export. Hops have been in better demand for export, and prices have improved somewhat, closing at 2@5c, for old, and 7@14c. for new.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles from the port of New York since January 1, 1871, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show *total values*, including the value of all other articles besides those mentioned in the table.

EXPORTS SINCE JANUARY 1 TO

COTTON

FRIDAY, P. M., June 2, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening June 2. From the figures thus obtained it appears that the total receipts for the seven days have reached 36,402 bales against 40,178 bales last week, 45,067 bales the previous week, and 46,849 bales three weeks since, making the total receipts since the first of September, 1870, 3,792,269 bales against 2,772,432 bales for the same period of 1869–70, showing an increase since September 1 this year of 1,019,837 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	13,756	9,284	Florida bales.	16	54
Mobile	2,585	2,311	North Carolina	399	247
Charleston	2,239	1,598	Virginia	5,365	1,281
Savannah	2,551	2,646			
Texas	5,401	1,016	Total receipts	36,402	22,441
Tennessee, &c	8,948	4,009	Increase this year	13,961	....

The exports for the week ending this evening reach a total of 47,892 bales, of which 34,605 were to Great Britain, 7,789 to France, and 5,498 to rest of the Continent, while the stocks as made up this evening, are now 267,139 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Week ending June 2.	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans	3,628	8 893	12,521	16,988	98.978	107,897
Mobile	....	965	965	2,414	30,533	34.129
Charleston	5,497	270	5,767	....	7,963	9,892
Savannah	6,028	1,250	7 278	9,548	19,446	31,745
Texas	13,895	1,633	15,458	....	88,314	28,017
New York	5,494	276	5,770	6,815	67,000	61,000
Other ports	133	....	133	895	17,000	14,000
Total	34,605	13,287	47,892	36,160	267,139	276,080
Total since Sept. 1	2,214,913	799,363	2,944,177	1,959,598	....	....

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 1,555 bales, while the stocks to-night are 8,941 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to May 26, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1. 1870.	1869.	EXPORTED SINCE SEPT. 1 TO— Great Britain	France	Other For'gn	Total.	North-ern Ports.	Stock.

The boyancy noticed in the market last week has continued this week, and prices have rapidly advanced. There has not been a very active demand, but the supply here is small, and the balance in the country left of the crop after deducting the engagements is very limited, so that holders remain firm, advancing their asking rates almost daily. For export there has been but little inquiry, our quotations during the most of the week having been about 1c. above the parity of Liverpool. Spinners also have held off supplying their more pressing wants. But, notwithstanding this limited inquiry prices have advanced as stated above, and to-night Middling Uplands closed at 17¼c., against 16¼c. a week ago, and 15¼c. the previous Friday, being an advance of 1c. since last Friday, and of 2c. during the last two weeks. For future delivery the quotations have shown more fluctuations, but at the close the improvement in prices is very nearly the same as for spot cotton. Low Middling closed to-night at 16¼c. for June, 17¼c. for July, 17 9-16c. for August, and 16¾c. for September. The total sales of this description for the week are 88,900 bales, including —— free on board. For immediate delivery the total sales foot up this week 18,107 bales, including 2,213 for export, 7,218 for consumption, 2,902 for speculation, and 5,774 in transit. Of the above 112 bales were to arrive. The following are the closing quotations

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	13½@....	13⅝@....	14 @....	14½@....
Good Ordinary	15¾@....	16 @....	16¼@....	16¼@....

WEATHER REPORTS BY TELEGRAPH.—Our telegrams to night do not give a favorable account of the weather during the week. Throughout the greater portion of the Gulf and Atlantic States it has rained from two to four days, more severely, however, in some districts than in others. Our correspondents at Selma state that they have had three rainy days and the rest of the week cloudy; that thirty miles west of that point there have been local rains which are reported as very damaging in their results. At Montgomery the storm was less severe as there were but two days

Digitized by Google

rain, with the balance of the week pleasant; but at Mobile it has rained four days, and crop accounts are less favorable, much damage being feared. At Columbus, Augusta and Macon it has also rained from three to four days, the despatch at the latter point stating that the storm was still in progress and at Charleston they have had two days rain. On the other hand it has been warm and dry but cloudy all the week at Memphis while at Nashville it has rained two days. The Thermometer has averaged at Charleston, 78; Montgomery, 82; Columbus, 77; Macon, 79; Mobile, 77; Selma, 82; Memphis, 79.

MAIL CROP REPORTS.—We have attempted, during the previous two weeks, to give the most accurate information we could procure with regard to the area planted in cotton, and the present condition of the growing plant. Our object has been, as the year progresses, to estimate, on the best obtainable data, the effect of each change in the season. Two or three points in the problem may now be considered fixed.

First—We think all will admit that on the same extent of land planted, and the same amount of fertilizers used as a year ago, no more cotton can ever be raised any season than was raised last season—that is to say the weather and surroundings last year were simply perfect for cotton culture. It follows, therefore, that any decrease in acreage planted, or in fertilizers used, or any unfavorable condition in the weather this year, must be counted to the disadvantage of the present growing crop.

Second—That there has been at least 10 per cent less land put down to cotton this year, is, we belive certain. 1. This is the unanimous opinion of the leading Southern men, nearly every one giving a figure in his own section, which would bring the average above 10 per cent. 2. This is further proved by the universal admission that considerable more cotton and oats have been planted, while no one claims that in the aggregate (except in very limited districts) more land is being cultivated (taking grain and cotton together) than was cultivated last season.

Third—We think the great falling off in the use of fertilizers (nearly 75 per cent) in South Carolina, Georgia, portions of Alabama, &c., will, of necessity show itself in decreased production. Is it too much to allow a loss of 2 per cent on the aggregate crop from this cause? Then, again, the late stormy weather (though its ill results are largely exaggerated, if we have continued favorable weather in the future) has made replanting necessary to a considerable extent; has led to the abandonment of many fields, and a destruction of half the plants in others; while the whole crop is from the same cause backward. A very small estimate of the irreparable damage thus done would probably be 3 per cent of last years' growth.

Fourth—If what we have said above be correct, it follows that up to the present time we must estimate a loss to the growing crop of 15 per cent; or, if we call the present crop about 4,200,000 bales, it would show a loss of 630,000 bales thus far; this we cannot but believe is a very moderate figure, and will generally be received as an under estimate rather than an over estimate.

Fifth—There is one very favorable circumstance with regard to the present growing crop, and that is, its cost to the planter will be less than any previous crop since the war. 1. Very much less has been spent in preparing the ground and getting in the seed. 2. In a large majority of cases more favorable contracts have been made with the freedmen. 3. The increased planting of corn and oats will make the purchases for plantation use smaller, while the very large decline in the prices of bacon, &c., will enable them to support the freedmen at a figue much below that of last year.

GUNNY BAGS, BAGGING, &C.—The market for India Cloth is still very dull and quoted at 18c. a trifle lower, but even this price is nominal, and a lot might be bought for less. There is more confidence shown, however, as Domestic has met with an increased demand of late and sales chiefly for forward delivery not before reported, have been made of some 10,000 rolls here and in Boston at 19@20c closing steady at the highest price. Bags are dull and quoted nominally 14@14½c for 44s. Hemp has been very quiet; there have been some arrivals but they had mostly been sold before arrival. Stocks are moderate and prices remain firm at 10½@11c., gold. Jute has ruled dull and former quotations are still the only ones current, 5½@6½c. gold, as to quality. Jute Butts are less active, but close at 4@4½c. with sales in Boston of 500 bales at 4c. currency, 30 days, and in this market 450 bales at 4@4½c. currency. The following statistics are from Messrs. J. C. Rogers & Co.'s monthly circular.

	Stock June 1, 1871.			On the way from Calcutta		
	bls cloth.	bls bags.	bls butts.	bls cloth.	bls bags.	bls butts.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	Week ending June 2, 1871.			Week ending June 2, 1870.		
	Receipts.	Shipments	Stock.	Receipts.	Shipments.	Stock.
Augusta	608	1,565	5,866	337	1,372	11,820
Columbus	266	813	2,597	346	673	6,125
Macon	235	511	2,520	241	413	7,106
Montgomery	224	468	4,209	238	620	5,063
Selma	237	415	1,317	199	274	3,225
Memphis*	2,189	4,217	7,795	2,107	4,545	12,240
Nashville	1,304	1,649	885	510	1,233	4,819
	5,063	9,638	24,689	3,978	9,030	50,400

* A count of stock at Memphis to-day made the stock 7,795 bales, which was 1,500 bales more than the running count.

The above totals show that the interior stocks have decreased during the week 3,197 bales, and are to-night 25,711 bales *less* than at the same period last year.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons:

	1871.	1870.
Stock in Liverpool.....bales.	967,000	609,000
Stock in London	85,871	30,487
Stock in Glasgow	600	300
Stock in Havre	25,150	137,900
Stock in Marseilles	15,600	10,700
Stock in Bremen	63,736	18,406
Stock rest of Continent	30,000	50,000
Afloat for Great Britain (American)	188,000	136,000
Afloat for France (American and Brazil)	45,500	34,000
Afloat for Bremen (American)	34,187	22,068
Total Indian Cotton afloat for Europe*	365,693	249,559
Stock in United States ports	267,139	276,080
Stock in inland towns	24,689	50,400
Total	2,113,165	1,624,900

* This item includes all India cotton afloat for Europe, and also all cotton afloat for Liverpool other than American.

These figures indicate an *increase* in the cotton in sight to-night of 488,265 bales compared with the same date of 1870.

The exports of cotton this week from New York show an increase since last week, the total reaching 11,718 bales, against 9,068 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 57,505 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in THE CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night:

	Total bales.
NEW YORK—To Liverpool, per steamers Erin, 1,363 ...Cuba, 560.... Nevada, 2,414; Ptolemy, 948; City of Brussels, 190; Denmark, 2,045 per ship Glenlyon, 3,955	11,405
To Havre, per bark M. E. Corning, 204	204
To Bremen, per steamer New York, 109	109
NEW ORLEANS—To Liverpool, per ships Rochester, 2,395 ...Chas. Davenport, 3,337....Samuel Watts, 4,915....Maud, 3,449....per bark Ruby, 63 sacks seed cotton (31 bales)	14,047
To Cork, per ship Sawely Chindow, 3,124	3,124
To Havre, per ships Charlotte W. White, 4,106....Castine, 3,189.... per bark Cherokee, 1,785	9,080

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 111¼ and 112⅜, and the close was 112¼. Foreign Exchange market is dull and steady. The following were the last quotations: London bankers', long, 110⅛@110⅜; short, 110⅜@110½, and Commercial, 110@110⅛. Freights closed at ¼d. by steam and 3-16d. by sail to Liverpool.

BY TELEGRAPH FROM LIVERPOOL.—

LIVERPOOL, June 2, 5 P. M.—The market opened firm and closed active, with sales of the day footing up 20,000 bales, including 5,500 bales for export and speculation. The sales of the week have been 82,000 bales, of which 19,000 bales were taken for export and 17,000 bales on speculation. The stock in port is 967,000 bales, of which 611,000 bales are American. The stock of cotton at sea bound to this port is 432,000 bales, of which 188,000 bales are American.

	May 12.	May 19.	May 26.	June 2.

Of the present stock of cotton in Liverpool nearly 60 per cent is American against nearly 66 per cent last year. Of Indian cotton the proportion is 13 per cent, against 13.50 per cent.

LONDON, May 20.—A good business has been transacted in cotton during the week, but the trade is rather quieter at the close. Annexed are the particulars of imports, deliveries and stocks:

	1869. bales.	1870. bales.	1871. bales.
Imports, January 1 to May 18	113,328	53,956	96,586
Deliveries	181,574	145,715	78,360
Stocks, May 18	76,983	30,487	85,871

ALEXANDRIA, May 5.—The trade is quiet, but good and fine qualities of cotton are firm in price. Fair is quoted at 7⅞d to 7¾d; good fair, 8⅛d to 8¼d; fully good fair, 8⅜d to 8⅝d per lb. The shipments since November 1 have been as follows:

	Great Britain. bales.	Continent. bales.	Total. bales.
From Nov. 1, 1870, to May 4, 1871	159,863	49,283	209,146
Same period 1869-70	131,406	38,481	169,887
" 1868-9	127,169	41,834	169,003
" 1867-8	150,423	39,214	189,637

BREADSTUFFS.

FRIDAY P. M., June 2, 1871.

The markets the past week have been unsettled for flour and grain, but except a decline in oats, prices show very little change from last Friday.

Flour continues to arrive in quantities barely equal to the wants of the market, and although the shipping movement is considerably curtailed, prices have ruled comparatively steady, very low grades and flours from old wheat showing, however, some depression. The better grades have uniformly brought full prices, and we note more business in Southern shipping extras, which are pressed for sale at $6 85@$7 for South America. To-day prime shipping extra State from new wheat is in demand at $6 35@$6 40, but the general tone of the market is quiet, though firm.

Wheat has weakened a little under free receipts and dull accounts from abroad. Holders, however, have been very firm, and the offerings are not large. Much of the wheat arriving sold previously, and goes forward to Liverpool. But the freight engagements have been more than half for corn, and do not promise the continuance of the export movement in wheat which has latterly been going on. Amber Winter wheat has declined 2@3c. under a more liberal supply, and subsidence of demand from the Continent. New white wheat has arrived from Georgia, and is ten days earlier than usual. To-day the market was somewhat unsettled by a recovery in Liverpool of the decline reported yesterday, in the face of receipts of 70,000 quarters for three days; sellers offered their samples more freely, and English shippers took 90,000 bushels at $1 41 for No. 3 Spring, $1 47@$1 48 for No. 2 do. and $1 49 for No. 1 do.

Corn has varied but little. The receipts from the canal have been in much better condition than last week, and have been taken freely for export, mainly at 69@70c. for that suitable to go forward by steam, and 72@72½c. for that which will stand the voyage by sail, with some choice car-lots at 73@74c., and unsound and inferior boat-loads, 66@69c., closing steady in our range; yellow corn has been scarce and firm.

There has been a great pressure to close out the stock of oats, preparatory to the receipts of supplies by canal, and prices have declined 2@3c. The concession, however, has led to more activity, and caused a partial revival of speculative feeling, upon which the market closed firm at 63@64c. for good Western boat-loads.

For other grains the market has been dull and prices are nominal.

The following are the closing quotations:

Flour—		Wheat, Spring, new, bush	$1 41@ 1 49
Superfine	$ bbl. $5 60@ 6 00	Red Winter	....@ ....
Extra State	6 25@ 6 45	Amber do	1 62@ 1 66

GROCERIES.

FRIDAY EVENING, June 2, 1871.

Few if any really new points are presented in our review for the present week. As a whole the movement of goods has been only fair, and values remain generally within a close margin of previous quotations. Coffee remains in the same flat condition so long noticeable, and on Molasses, just at the moment there appears quite as much desire to sell as to buy, but Teas gain tone, and Sugars, though temporarily subject to slight depressing influences, are held with much confidence in the future. The interor demand for all kinds has, thus far, rather fallen below expectations, but consumers take off fair amounts of goods in small lots, and if buying slowly and cautiously, they are buying safely, not only for themselves, but for our merchants here.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black	6,635 pkgs.	Laguayra	1,180 bags.	Sugar, Brazil	.... bags.
Green	7,711 pkgs.	Other	1,815 bags.	Manila, &c.	12,066 bags.
Japan	4,139 pkgs.	Sugar, Cuba	6,005 boxes.	M'tias'es, Cuba	3,357 hhds.
Various	2,956 pkgs.	Cuba	4,775 hhds.	Port. Rico	942 hhds.
Coffee Rio	8,804 bags.	Porto Rico	784 hhds.	Demerara	223 hhds.
Java	2,431 mats.	Other	2,597 hhds.	Other	1,261 hhds.
Maracaibo	1,814 bags.			*Hhds. include bbls. and tcs. reduced	

Imports this week at this port have included 18,723 bags of Rio, 4,957 do. of Maracaibo, 50 do. St. Domingo, and 3,999 do. of sundry kinds. The receipts of Sugar are 7,312 boxes, 17,149 hhds., and 75,695 bags. Of Molasses 6,853 hhds. have arrived. In Tea the imports are 288,145 pounds of Black.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at date.		Imports at leading ports since January 1.	
	1871.	1870.	1871.	1870

Molasses.....hhds.	6,780	16,740	167,579	186,536

TEA.

The market has shown a fairly active movement throughout the greater portion of the period under review and a generally healthier tone, with importers and the trade as a rule talking in a very encouraging manner and looking for steady business for several weeks. Buyers move carefully and calculate pretty closely to probable wants, but there is thought to be little stock in the hands of jobbers, either local or interior, and even the current consumption from week to week is likely to require a fair supply, the distribution of the first of the year having by this time become pretty well used up. Prices are well sustained, with a steady tone on Blacks and much firmness on fine Greens and high grade Japans. The line trade has been very good at steady rates. The sales of invoices include 10,200 Greens, 2,900 Oolongs, 7,500 Japans.

The imports this week include 288,145 pounds of Black Tea per "Randers" from Hong Kong.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871	13,121,360	13,335,011	6,215,769	32,373,145
1870	12,296 139	12,455,032	6,244,418	30,995,589

The indirect importations, including receipts by Pacific Mail steamers via Aspinwall, have been 10,681 pkgs. since January 1, against 31,496 last year.

COFFEE.

The general market has continued in an extremely dull condition throughout the best portion of the week ending to-day, and though values have not been subject to any violen changes, the tone was weak on all grades, and buyers, had they felt inclined to operate, could have gained many advantages. Jobbers, however, do not find the distribution amounting to enough to warrant purchases beyond such wants as they can calculate upon within a week or two, and the invoices are made up with caution. On Brazils there is a most decided loss to importers on sales at ruling figures, and pressure to realize is in consequence refrained from whenever possible, but still there are a great many holders who would willingly part with a portion of their stock, and are ready to accept any full bid, owing in a measure to the constantly accumulating expenses. The assortment contains very ordinary grades, but from medium up the selection is easy, and it is on some of the finest lots that the greatest weakness is shown. Business at the outports continues to interfere to some extent with the New York market, but of late has not been very heavy. There is a small supply of Java available, of good quality generally, but buyers have negotiated in rather an indifferent manner. West India grades are plenty, with the supply increasing and prices weak on all qualities, though the easy terms offered have attracted some attention from the city jobbing dealers, and a few negotiations are in progress. Sales of 2,364 bags Rio, 500 bags Maracaibo, 250 bags Laguayra, 150 bags Laguayra, 75 bags Curacoa, 5,160 mats Java (before arrival, and shipped from first hands to Europe), 650 bags St. Domingo. At Baltimore, 7,102 bags Rio.

The imports this week have included 15,604 bags of Rio by the "Glynn," "Alice Taintor," and "Der Fruhling"; 4,597 do. Maracaibo by the "Grace Kelly" and "Dutch Princess"; 50 do. St. Domingo by the "Porte au Platte," and 3,999 do. sundry kinds.

The stock of Rio June 1, and the imports since Jan. 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.
Stock	84,637	....	36,078	8,869	9 500	4,500	143,579
Same date 1870	42,316	....	22,203	2,000	5,000	....	69,519
Imports	300,394	14,805	242,821	115,002	42,079	11,000	726,041
" in 1870	265,433	....	191,668	81,502	20,802	3,045	562,555

Of other sorts the stock at New York, June 1, and the imports at the several ports since January 1, 1871, were as follows:

In bags	New York stock.	New York import.	Boston import.	Philadel. import.	Balt. import.	N. Orle's import.	Total imports at all the ports
Java and Singapore	47	*46,897	*45,803	*1,962	....	....

* Includes mats, &c., reduced to bags.

SUGAR.

The market for Raws has been subject to some irregularity, and in most cases where actual changes in price took place there was a fractional gain for the buying interest. This was due in a measure to the rather slow and cautious demand from refiners, but mainly to the appearance of the expected

Digitized by Google

fleet of sugar cargoes and an accumulation of stock in first hands, from which there were some fair offerings, and sellers with goods on pier making slight concessions in order to hurry business. Stocks in store, however, were not allowed to be disturbed, and only on the common sorts of refining qualities did the shrinkage in values amount to anything, while holders generally remained strong in their views of the future, and predict a goodly advance before the next crop. The production has ceased in Cuba, and from all accounts thus far received it would seem that the amount obtained will be at least one-quarter less than last year, while there is thought to be a good prospect for an early increase in the European call, and a probable cleaning out of all the sugar available by the time the first of the next grinding is ready for market. Quite a number of orders from the Trade have been filled, but refiners were the principal buyers, and with other grades have taken a considerable amount of Melado. Refined have sold fast enough to keep the market pretty well cleared of stock, but the only way to attract buyers was to offer easy terms, and prices gradually fell off on all kinds. The recent distribution has fairly supplied the interior, though the stock among the small dealers is far from large. Sales of 5,867 hhds. Cuba, 750 hhds. Porto Rico, 225 hhds. St. Croix, 780 hhds. Martinique, 610 hhds. Demerara, 580 boxes Havana, and 1,720 hhds. Melado.

Imports at New York, and stock in first hands, June 1, were as follows:

MOLASSES.

The weakness on foreign styles noted in our last has rather increased during the period covered by the present review, and though the modification in values is small, buyers offered many little advantages not to be obtained during the middle of last month. There have been fair arrivals only, and the stock cannot be called large, but what there is here, both in first and second hands, is offered with considerable freedom, and this in the absence of any regular outlet, naturally produces weakness. Grocers, to be sure, are always willing to take a little very choice stock, and refiners can generally be found for a cargo or two of first-class boiling molasses, but purchases are, as a rule, now made with great caution, and there is an evident desire to carry just as small supply as circumstances will admit of. Domestic molasses has met with some demand, and former prices were obtained, with holders talking hopefully as to the future, but the stock is large, and the impression made by current sales not very perceptible. Syrups are in fair supply and dull. Sugar house molasses neglected, and with the supply on hand increasing, prices declined to 19c. in hhds., and 23c. in bbls. Sales of 650 hhds. Cuba Muscovado, 360 hhds. St. Croix, 565 hhds. English Island, 200 hhds. Porto Rico, and 380 bbls. New Orleans. There have been imported by refiners 4,600 hhds.

The receipts at New York, and stock in first hands, June 1, were as follows:

*Including tierces and barrels reduced to hhds.

SPICES.

The general market has been quite slow and on the whole the tone hardly so encouraging as last week. Jobbers have sold a fair number of small lots, but not to amount to anything in the aggregate and the supply in store holds out very well. To the accumulation in importers' hands, some additions have been made and there is a larger number of invoices on sale, without much of response from buyers. In nearly all cases former rates are asked but there is not quite so tenacious a holding out for extreme figures, and on some goods, Cassia in particular—slightly reduced bids would in all probability be accepted.

FRUITS, &c.

There has been no improvement in the demand for Foreign Dried, trade being confined mostly to small lots to fill country orders. Prices are not quotably lower, but holders show considerable anxiety to sell, while buyers are very indifferent. Jobbers complain of dullness, and say there has been no spring trade this year compared with former seasons, and many of them carry considerable stock, which they are selling below the cost of importing, preferring to make a small loss now to holding and have them spoil on their hands. Layer Raisins are very dull, but sell at former prices, in a jobbing way only, but large lots are not to be had below $2 40. Turkish Prunes favor the buyer; the warm weather is unfavorable to holders. Currants are dull and bids are solicited. Sardines meet with a light demand, small fish are firm but large, say four in a quarter box are lower, being considered by some parties unmerchantable. Nuts have met with a better sale, but at lower prices. Firecrackers are firm and in fair demand.

Foreign Green box fruit is firm with small offerings at auction. West India kinds are in full supply and pretty low prices rule. Sales of Pineapples at $8@$12 per hundred. Bananas in full supply selling at $1 25@$3 per bunch; Bahama Limes, $18 per bbl. Baracoa Cocoanuts, $32@$35 per thousand. Lemons are quoted at $3@$5 per box for fresh and November cut; Messina Oranges, $6 per box and Sorrento, $4@$5 per box. At auction to-day, Messina Oranges sold at $2 35@4 75 per box; do. Lemons, $4 15@4 60 per box; Palermo Oranges, $3@$5 45 per box and do. Lemons, $3 30@3 85 per box.

Domestic Dried Fruits are dull, and all kinds are heavy, except Pitted Cherries and Peanuts. Apples sell only in small lots except when offered low enough to induce buying to carry over. We note sales of sliced State at 6@8c. per lb., and Southern do. at 4½@5c. Pitted Cherries are in fair demand, and have sold as high as 20c. Peaches, both pared and unpared, are dull and only nominal.

Domestic Green are firm for Apples; the stock is small and held by one party; sales at $8 per bbl. Strawberries are selling at 15@18c. per quart for ordinary, and 20@25c. for best.

ADVICES FROM PRODUCING MARKETS.

From the London *Produce Market Review* of May 20 we quote in regard to Sugar: "There has been a large inquiry for all the better kinds of refining sugar during the week, and prices in some cases closed 6d. dearer than last Friday. Manila and Jaggery are in good demand, and very full rates are paid for them. The deficiency in stock is, however, further reduced, and last week the total stock was only 15,600 tons short of that of last year, while a month ago the deficiency was 24,700 tons; so that in the last four weeks the landings have exceeded the consumption by 9,000 tons. This change of course alters to some extent the statistical position of the London Raw market, but the general situation of sugar is undoubtedly stronger than it was a month or so ago, owing to the large consumption in Europe and America and the smaller general stock. The course of prices depends on the yield of the West Indian crops, of which there are the usual alarmist rumors; and if the gloomy expectations of the merchants should be realized higher prices may have to be paid before the new beet crop is ready. It is this, however, which ultimately governs prices, and purchases can now be made for Autumn and Winter delivery at 2@3s. under present rates."

There is also an article taken from the *Times* in regard to "spurious Teas" lately sold at public auction. We extract:

"Yesterday Dr. Lethebey, the Medical Officer of Health for the city, brought before the notice of the Commissioners of Sewers the fact that a large quantity of spurious tea had been sold by public auction at the Commercial Sale Rooms in Mincing lane in the course of last month, and produced various samples which had been obtained by one of the sanitary inspectors. He stated that they consisted of tea dust and siftings and of damaged leaves in a putrid condition, and were, in fact, precisely of the same description as the samples which were the subject of legal proceedings in March, 1870. The so-called 'Moning Congou' was composed of broken down and rotten tea leaves which had already been used for beverage, and the 'Orange Pekoe siftings' were made up of similar leaves, together with a large quantity of those of other plants. In the scented tea dust there was a great proportion of earthy matter and iron filings. The tea was sold to the extent of 600 half chests, and the price realized was from 1¼d. to 1¾d. per pound. He recommended that the matter should be referred to the Sanitary Committee, with a view to legal proceedings being instituted, and he added that a quantity of similar stuff was now on its way from Shanghai."

New Orleans Sugar and Molasses.—From the New Orleans *Price Current* of May 27 we take the following report on Sugar and Molasses:

SUGAR.—The stock is light, the demand is good, and prices are very firm. Sales are being made on the landing as received, and in the sheds at 9¾c. for Common, 10¼@10¾c. for Fair, 10¾@11c. for Fully Fair, 11¼@11½c. for Prime, 10@10½c. for Seconds, 12¼@12½c. for Yellow Clarified, and 13@13¾c. for White. Yesterday 200 boxes No. 13 Cuba Sugar sold at 10c. per pound.

MOLASSES.—The supplies are light and are sold readily as received at 30@53c. for Centrifugal, as in quality; 35@40c. for Fermenting; 35@53c. for Plantation Reboiled, as in quality, and 50@55c. for Cistern Bottom. City Refinery Reboiled is quoted at 30@60c.; Golden Syrup at 90@$1 per gallon.

THE DRY GOODS TRADE.

FRIDAY, P. M., June 2, 1871

The jobbing trade has remained quiet throughout the week, with only a moderate demand from distributors in the interior for goods to replenish assortments. The demand has been chiefly from Western dealers a few of whom are in the city, but the retail trade has not been sufficiently heavy in any section to necessitate a general replenishment of retailers' stocks. The package trade has improved materially, especially in cotton goods, for which a speculative demand has sprung up. The advance in the raw material, as well as the scarcity of many fabrics, has stiffened the market throughout and a more or less general advance is looked for before the opening of the fall trade if the market for the raw material does not experience a decline. In consequence of this, dealers who are in a condition to lay in stocks for their fall trade are purchasing freely from first hands, although the latter are not pressing sales.

The trade for the first five months of the year is said to have been very satisfactory by all classes of dealers. The season was short, the trade beginning late and dropping off early. While it lasted, however, the demand was very active and a very large amount of goods adapted to the season both of foreign and domestic manufacture, were placed. The trade appears to be in an easy financial condition at present, and we hear few complaints from any section of a scarcity of money.

DOMESTIC COTTON GOODS.—Brown and bleached cottons have been in improved demand in full packages in consequence of the firm and advancing tone of the market which has developed a speculative inquiry from heavy dealers here and in the interior. There has been an advance in the prices of some of the lower grades of both brown and bleached goods and a more general advance is looked for on these as well as on the better grades. Colored cottons are in limited demand although no heavy sales are effected, the movement being chiefly of goods for immediate use. There is some demand for full packages for the fall trade, but the sales are not heavy as yet. Canton flannels are selling freely from first hands, one commission house having placed upwards of one thousand cases of a prominent brand. Rolled Jaconets remain scarce and are selling at an advance on last week's quotations. Prints are in moderate demand in good styles of light and medium colorings and the distribution continues fairly active for this season of the year. Prices are without quotable change and appear to be well maintained.

DOMESTIC WOOLEN GOODS.—The high cost of the raw material keeps the market for all classes of Woolens very firm, and prices tend upward on many lines, although the current trade is small. Few buyers are taking goods as freely as they usually do at this season of the year, for future sales, the high prices leaving too little margin for speculative purchases. Fine fancy Cassimeres are not coming in in any assortments as yet, the offerings being chiefly of the lower grades, to which the demand is also confined. Cloths are quiet, with no material change. Carpets are quiet, but have advanced 5@10c. per yard, on the strength of the rise in wool and yarns, and a further advance is looked for.

FOREIGN GOODS.—There are no important changes to note in connection with any brach of the foreign goods trade. The demand for thin dress fabrics continues fairly active, with suitings selling especially well, although the demand for these has fallen off somewhat since our last review. Ribbons and Millinery Silks are in moderate request, but are selling low, excepting in the most desirable shades and widths. Linens are bringing a little better prices in the auction houses, through which most of the sales are made, at the moment. These goods have advanced abroad, but are not quotably higher here.

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of leading Jobbers:

BROWN SHEETINGS AND SHIRTINGS are meeting moderate sale for the current and future trade at full prices with a tendency toward an advance. Amoskeag A 36 11¼ do B 36 11, Atlantic A 36 12, do D 36 10½, do H, 36 11½ Appleton A 36 12, Augusta 36 11, do 30 9½, Bedford R 30 8½ Boott O 34 9½, Commonwealth O 27 6½, Grafton A 27 7½, Great Falls M 36 10½@11 do S 33 9½, Indian Head 36 12, do 30 10, Indian Orchard, A 40 12½, do C 36 10½, Laconia O 39, 12½ do B 27 11, Lawrence A 36 10, Lyman C 36 10½, do E 36 11½, Medford 36 11½, Nashua fine O 33 11½, do R 36 13, do E 40 14½ Newmarket A 36 10, Pacific extra 36 11½, do L 36 11, Pepperell 7-4 22½, do 5-4 25, do 9-4 27½, do 10-4 32½, do 11-4, 37, Pepperell E fine 39 12½, do R 36 11½, Pocasset F 30 8½, Saranac fine O 33 11½, do R 36 13, Stark A 36 11½ Swift, River 36 8, Tiger 27 8.

BLEACHED SHEETINGS AND SHIRTINGS have advanced on some of the low counts and are firm throughout. Amoskeag 46 16½, do 42 15, do A 36 14½, Androscoggin L 36, 15½, Arkwright WT 36 18½ Ballou & Son 36 12½, Bartletts 36 14½, do 33 13½, Bates XX 36 17½, Blackstone AA 36 13½ Boott B 36 13½, do O 30 10, do R 26 9, Clarks 36 17½, Dwight D 40 18, Ellerton 10-4 35, Fruit of the Loom 36 16, Globe 27 6½, Gold Medal 36 12½, Great Falls Q 36 15 Hill's Semp. Idem 36 15, Hope 36 13, James 36 15, Lonsdale 36 15½, Masonville 36 16, Newmarket O 36 12, New York Mills 36 21 Pepperell 6-4 22½, do 10-4 37½, Tuscarora XX 36 18, Utica 5-4 25 do 6-4 32½, do 9-4 47½, do 10-4 52½, Waltham X 33 11, do 42 15½, do 6-4 22½, do 8-4 27½, do 9-4 32½, do 10-4 37½, Wamsutta 36 20.

PRINTING CLOTHS are steadier, but are not quotably higher, full standard being quoted at 6¾@7c. The sales are light.

PRINTS are in limited demand at unchanged prices, but concessions could probably be obtained by purchasers of large amounts. American 10½ Albion solid 10½, Allens 10½, do pinks 11 do purples 10½, Arnolds 8½, Atlantic 5½, Dunnell's 11, Hamilton 11, London mourning 9½, Mallory pink 11½, do purples 10½, Manchester 10½, Merrimac D dk. 11, do W pinks and purple 12½ do W fancy 12, Oriental 10½, Pacific 11, Richmond's 10½, Simpson Mourning 10, Sprague's pink 11, do blue and White 10½, do shirtings 9½, Wamsutta 7½.

SEVEN-THIRTY GOLD LOAN
OF THE

NORTHERN PACIFIC RR.

RAPID PROGRESS OF THE WORK.

The building of the Northern Pacific Railroad, (begun July last), is being pushed forward with great energy from both extremities of the line. Several thousand men are employed in Minnesota and on the Pacific Coast. The grade is nearly completed **266** miles westward from Lake Superior; trains are running over **130** miles of finished road, and track-laying is rapidly progressing toward the eastern border of Dakota. Including its purchase of the St. Paul & Pacific Road, the Northern Pacific Company now has **413** miles of completed road, and by September next this will be increased to at least **560**.

A GOOD INVESTMENT.—Jay Cooke & Co. are now selling, and unhesitatingly recommend, as a Profitable and perfectly Safe investment, the First Mortgage Land Grant Gold Bonds of the Northern Pacific Railroad Company. They have **30** years to run, bear Seven and Three-Tenths per cent gold interest (more than **8** per cent currency)and are secured by first and only mortgage on the ENTIRE ROAD AND ITS EQUIPMENTS, and also, as fast as the Road is completed, on

23,000 ACRES OF LAND to every mile of track, or **500** Acres for each $1,000 Bond. They are exempt from U. S. Tax; Principal and Interest are payable in Gold; Denominations: Coupons, $100 to $1,000; Registered, $100 to $10,000.

LANDS FOR BONDS. Northern Pacific 7-30's are at all times receivable at TEN PER CENT ABOVE PAR, in exchange for the Company's Lands, at their lowest cash price. This renders them practically INTEREST-BEARING LAND WARRANTS.

SINKING FUND. The proceeds of all sales of Lands are required to be devoted to the re-purchase and cancellation of the First Mortgage Bonds of the Company. The Land Grant of the Road exceeds Fifty Million Acres. This immense Sinking Fund will undoubtedly cancel the principal of the Company's bonded debt before it falls due. With their ample security and high rate of interest, there is no investment, accessible to the people, which is more PROFITABLE OR SAFE.

EXCHANGING U. S. FIVE-TWENTIES. The success of the New Government 5 per cent Loan will compel the early surrender of United States 6 per cents. Many holders of Five-Twenties are now exchanging them for Northern Pacific Seven-Thirties, thus realizing a handsome profit, and greatly increasing their yearly income.

OTHER SECURITIES. — All marketable Stocks and Bonds will be received at their highest current price in exchange for Northern Pacific Seven Thirties. EXPRESS CHARGES on Money or Bonds received, and on Seven-Thirties sent in return, will be paid by the Financial Agents. Full information, maps, pamphlets, etc., can be obtained on application at any agency, or from the undersigned.

THE Commercial AND Financial Chronicle

HUNT'S MERCHANTS' MAGAZINE,

A Weekly Newspaper,

REPRESENTING THE INDUSTRIAL AND COMMERCIAL INTERESTS OF THE UNITED STATES.

VOL. 12. NEW YORK, JUNE 10, 1871. NO. 311.

Advertisements.

Advertisements will be inserted at the following prices per line for each insertion:

If ordered less than 4 times			20 cents per line.
"	4 times or more		16 "
"	9	"	14 "
"	13	"	12 "
	26	"	10 "
	52	"	8 "

If the advertisement occupies one column or upwards, a discount of 15 per cent on these rates will be allowed.

Space is measured in agate type, 14 lines to the inch.

Advertisements will have a favorable place when first put in, but no promise of continuous insertion in the best place can be given, as all advertisers must have equal opportunities.

GREAT NATIONAL LOAN.

$133,000,000 NEW FIVE PER CENTS.

PRINCIPAL AND INTEREST PAYABLE IN COIN.

INTEREST QUARTERLY, FEBRUARY, MAY, AUGUST AND NOVEMBER.

BONDS FREE OF ALL TAXES, LOCAL OR NATIONAL.

The Treasury Department having already received subscriptions to the amount of $67,000,000 to the first two hundred millions of the New Loans authorized by the Act of Congress of July 14, 1870, for refunding the Public Debt, bearing five per cent per annum interest, now offers to popular subscription the remaining $133,000,000 of this particular Loan, and is prepared to promptly deliver the Coupon Bonds or Registered Certificates in exchange, dollar for dollar, for any of the United States six per cent Bonds or Registered Stocks, known as *Five-Twenties*, or for Gold Coin at the par value of the New Loan, and accrued interest from the first of May. When this amount, to which preference is given, is taken up, the remainder of the Five per Cents, $300,000,000, embraced in the Act will be offered in connection with $500,000,000 Four and one-half per Cents, and any part of $700,000,000 of Four per Cents, the one running fifteen years and the other thirty years.

The following is a copy of the New Five per Cent. Bond, under and pursuant to the Act of Congress:

FORM OF FIVE PER CENT. BOND.

INTEREST | FUNDED LOAN OF 1881. | FIVE PER CENT.

UNITED STATES OF AMERICA.

ARE INDEBTED TO THE BEARER IN THE SUM OF ..... DOLLARS.

THIS BOND is issued in accordance with the provisions of an Act of Congress entitled "An Act to authorize the refunding of the National Debt," approved July 14, 1870, amended by an Act approved January 20, 1871, and is redeemable at the pleasure of the United States after the first day of May, A. D. 1881, in coin of the standard value of the United States on said July 14, 1870, with interest in such coin from the day of the date hereof, at the rate of FIVE PER CENTUM per annum, payable quarterly, on the first day of February, May, August and November in each year. The principal and interest are exempt from the payment of all Taxes or Duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority.

WASHINGTON, ..., 18....

Entered ..... Recorded .....

Register of the Treasury.

Registered bonds will be issued of the denominations of $50, $100, $500, $1,000, $5 000, $10,000, and coupon bonds of each denomination except the last two. The interest will be payable in the United States at the office of the Treasurer, any Assistant Treasurer, or designated depository of the Government, quarterly, on the first days of February, May, August and November in each year.

The interest on the registered stock of this loan, it is determined by the Treasury Department, will be paid by Gold Check for the Quarterly Interest, to the Post-Office address of every holder, free of trouble or expense, dispensing with attendance, in person or by proxy, at the Treasury for the purpose of receipting for and drawing such interest.

The whole proceeds of the new loan will be applied to the payment or redemption and cancellation of the 5-20 years six per cent. bonds, and in addition to these proceeds the 5-20s are being reduced by purchases, averaging, for two years past about $10,000,000 per month.

The entire effect, therefore, of the New Loan, in connection with the existing Sinking Fund process of the Treasury, is to reduce both Principal and Interest of the Public Debt of the United States. *The Loan creates no additional supply of Government Stocks*, while the application of the surplus revenue is constantly lessening the Funded Stocks bearing six per cent. gold interest.

The policy of the Government since the close of the War in 1865, which left a debt upon the country of $2,755,000,000, and an annual taxation of $311,000.000, has been to reduce steadily both Debt and Taxes: to reduce the Principal of the Debt by actual payments, and to lessen the annual burden of Interest, and thereby the burden of Taxation, not only through such payments, but by funding the debt at the cheapest rates of interest practicable from from time to time, until it is now felt that the very cheapest rates are due to the high Credit, unblemished Public Faith, and vast and growing resources of the country. From $2,755,000,000 the Principal of the Debt has been reduced to $2,260,000,000—both sums exclusive of accrued interest—and from the heavy burden of $151,883,000 per annum, the Interest charge has been reduced to $112,780,000 per annum; while the annual taxation, under the Internal Revenue system, which the necessities of the War and the Debt thereby created rendered necessary for at least a short series of years, has been reduced from $311,000,000 in 1865-66 to about $154,000,000 per year in 1870-71, (estimating for the highest probable collections in the current month, the last of the Fiscal year), or less than one-half the first named sum. And in the year 1871-72 a further reduction of $28,000.000 will come in under the Act of July, 1870, so as to give only $126,000,000 for the year, or about two-fifths the maximum of 1865-66.

By the successful refunding of the Public Debt at moderate rates of Interest, and by continued economies in the expenditures of the Government—which in two years, from March 4, 1869, to March 4, 1871, amounted to $136,700,949, or an average saving per year of $68,350,474—it is believed that nearly the entire system of Internal Taxes can be dispensed with in a few years, or so much of it as requires the machinery of District Assessors and Collectors.

The Secretary of the Treasury has just published the Monthly Schedule of the Public Debt to June 1, from which it appears that he has further reduced the total of Funded Gold-bearing debt since May 1 by the sum of $8,000,000, by purchase of United States 5-20s for the Sinking Fund, and reduced the 5-20s by the further sum of $8,217,400 by conversion into the new 5 ⅌ Cents. The whole Funded Debt now stands $1,894,128,750, as against $2,107,846,150 two years ago, when the present Administration came into office. Adding to these sums the net Circulation of the Treasury, (that is, in Greenbacks and Greenback Certificates, after deducting Gold and Currency on hand), the following is the comparison of Debt of all kinds, at present, and at the close of the War, and in 1869:

	July, 1865.	March, 1869.	June, 1871.
United States Stocks	$2,150,784,112	$2,107,846,150	$1,894,128,750
Circulation	605,211,163	383,545,854	366,333,003
Total	$2,755,995,275	$2,491,392,004	$2,260,461,753

The following table affords a classification of the Funded Stock (in Gold) of the United States as at present outstanding:

Date.	Coupon.	Registered.	Total.
Five-Twenties, 1862	$382,958,500	$103,973,500	$486,932,000
Five-Twenties, 1864	44,752,650	55,994,100	100,676,750
Five-Twenties, 1865	123,660,150	53,552,100	177,212,250
Five-Twenties, 1865 (new)	179,369,500	70,851,450	250,220,950
Five-Twenties, 1867	241,686,550	91,325,100	333,011,650
Five-Twenties, 1868	28,009,350	11,608,000	39,612,350
Total Five-Twenties	$1,000,436,700	$387,229,250	$1,387,665,950
Sixes, 1881	93,260,400	190,417,700	283,678,100
Fives, Ten-Forties	57,379,650	137,287,650	194,567,300
Fives, 1874	13,955,000	6,045,000	20,000,000
New Fives, 1881	5,117,000	3,100,400	8,217,400
Total	$1,170,048,750	$734,080,000	$1,894,128,750
Total March 4, 1869			2,107,846,150
Reduction of Funded Debt			$213,717,400
Yearly Gold Interest charge, 1869			$124,255,350
Present yearly charge			$111,419,993
Reduction in Interest Charge			$12,835,357

The proposed further reduction of the annual interest charge upon the Public Debt by refunding is as follows:

By exchange of $500,000,000 United States six per cents for new five per cents of 1881	$5,000,000
By exchange of $300,000,000 United States six per cents for four and a half per cents of 1886	4,500,000
By exchange of $700,000,000 United States six per cents for four per cents of 1901	14,000,000
Total saving per annum by refunding	$23,500,000

BANKERS, 16 Broad St.

NEW YORK

State Railroad Bonds.

A First-Class Home Investment.

FIRST MORTGAGE GOLD BONDS
OF THE

Rondout & Oswego RR.

Principal and Interest Payable in Gold

SEVEN PER CENT SEMI-ANNUALLY.

This Road covers 100 miles of the most direct possible line between the Great Lakes and deep-water navigation on the Hudson River, the whole line of which will be completed and in operation on or before October 1, 1872, and give a new line of road to Lake Ontario and the West, 25 miles shorter than any line that can be found.

It passes through the Cement, Flag-Stone and Lumber regions of Ulster County, and the rich agricultural bottoms of Delaware and Green counties, all of which have not heretofore been reached by railroad facilities, and from which sections the formation of the country prevents the construction of a competing line.

The 36 miles of road operated for three months is already paying net earnings equivalent to 7 per cent gold on its cost of construction and equipments. The issue of Bonds is limited dto $20,000 per mile of COMPLETED ROAD, the coupons payable in gold in this city. Price of the Bonds, 90 in currency.

Full particulars of the above may be had of, and the Bonds for sale by,

EDWARD HAIGHT & CO.,
9 Wall Street,
FINANCIAL AGENTS OF THE R. & O. COMPANY.

DESIRABLE

HOME SECURITIES.

OFFICE OF

MEAD & CLARK,

BANKERS, 141 BROADWAY,

The attention of Capitalists and Investors generall is invited to the

FIRST MORTGAGE

7 Per Cent Gold Bonds

OF THE

Walkill Valley Railway Company

which we offer for sale at 90 and accrued interest, in currency. The Railway is situated on the west side of the Hudson River, and is now running for 20 miles to New Paltz, and is under contract to be in working order to Kingston next fall. The bonds are a first-class investment, and we invite the closest investigation of them. The principal and interest are

PAYABLE IN GOLD.

The coupons are paid semi-annually in this city, on the first days of April and October, free of government tax; and the issue of bonds is limited to $20,000 per mile of completed road. Any information concerning them will be given at our floe.

THE GOLD CLIQUE AND THEIR PROSPECTS.

There has been some excitement in the gold market of late, founded on the belief that a powerful clique has been formed and a large capital subscribed, with the purpose of causing a considerable rise in the premium. The general opinion seems now to be that their effort will not command much success. Still, they are reported to be very confident, and they support their scheme by several plausible arguments. First, they claim that the stock of available gold in this market has been depleted by the recent export movement, which has not ceased, though for a season it may be lessened. Secondly, they direct attention to a change of policy on the part of the Bank of England. That institution is said to have determined to increase its coin reserves to £30,000,000. Already the amount is 25 millions, and arrangements are said to be making for acquiring the remaining 5 millions sterling, which is equivalent to 25 millions of dollars. If the ordinary course of foreign exchange requires that sum to be shipped to England, a large part of it will of necessity be derived from this centre, and if special purchases have to be made on account of the Bank of England, still the drain will be felt here as much or more than in the former case. In view of these contingencies, with our heavy adverse balance of trade, and heavy importations of foreign goods, these persons argue that gold will of necessity tend to approach more nearly to its normal price, and will break loose from the forces which have heretofore tended to keep down the premium to a lower level.

Public opinion, as we said, is now adverse to this view; and the general impression is that gold will not rule much above 112, if indeed it can be sustained at that price. The reasons on which this inference are briefly these. First, the normal premium on gold is alleged to have been overestimated. Taking into the account the growth of the country, the extent to which mercantile transactions are done for cash, the hoarding and absorption of greenbacks in the South, the amazing expansion of the area in which the interior commerce of the nation is carried on, and the prodigious increase of railroads and other productive works, there is relatively very little more currency afloat now than before the war, when we were at specie payments. Hence it is argued that the natural price of gold to which the market price always tends to approach, is not very far from its present price, and consequently no large advance could possibly be permanent, if indeed it could be reached at all by some sudden spasm, some irregular speculative manipulation of the market.

Moreover, it is denied that the present condition of our foreign exchange justifies the expectation of an adverse balance of trade. The deficiency of value in our exports over our imports has been more than made up, we are told, by exporting securities of various kinds, especially United States Five-Twenties, Central Pacific and other Railroad bonds, with several large amounts of municipal securities of high credit. These securities are still in demand abroad, and their continued exportation will tend to prevent most of the evils which might otherwise be developed from any sudden demand for payment on account of the large sums we owe to foreign creditors.

Thirdly, it is denied that the anticipated export of coin, if it were to take place, offers any grounds for apprehension. The gold crop is one of our best and most remunerative products. Our currency being irredeemable, gold is not wanted as money, and we can spare a large amount for the purposes of exportation, and to restore the equilibrium of the exchanges. To export gold is to pay our foreign debts, and to stop the rapid accumulation of interest. Hence, as we can spare the gold, and it pays off and annihilates interest-bearing obligations, our people are evidently gainers by the export movement, and should welcome rather than regret any movement for the exportation of coin from this country.

Finally, it is denied that the Bank of England is actuated by any such wise and far sighted policy as has been

Digitized by Google

suggested. Now that the bullion reserves of the Bank of France are depleted and less available; the Bank of England ought, of course, to raise its cash reserves from 20 millions sterling to 30 millions, or even more. But to do this will involve a heavy sacrifice of profit on the part of the bank. There is no law to compel the bank to increase its stability and usefulness by this new method. However much, therefore, the bank officers might wish to take these precautions, there is too much reason to believe the policy would be overruled by the desire to make profits and to keep up large dividends.

It will be seen that Mr. Boutwell's new loan enters scarcely at all into these calculations relative to the foreign exchanges. The reason is that little serious anticipation is anywhere entertained of an early foreign demand for these new five per cent. bonds. The aggregate sold is about 67 millions. And although some reports have been current of foreign offers for the whole of the 133 millions still unsold, these rumors are hitherto devoid of confirmation. How much they would affect the price of gold if they should hereafter prove to be correct it is not very easy to foresee. It is said that Mr. Boutwell is about to send fifty millions of these new bonds by five special messengers to Europe, in hope of creating a demand for them and opening a new market. This announcement has not tended to increase the popularity of the loan here, and in all probability it is premature. In any case, however, the gold premium is generally regarded as less likely to advance than for some time past, and the prospects of the gold clique who are supposed to have bought up ten millions are not very promising.

RAILROAD EXTENSION AND THE LIQUIDATION OF THE DEBT.

A statistical writer tells us that in this country, with its vast undeveloped resources, and its rapid growth in productive power, every 500 miles of railroad adds to the national wealth 120 millions a year, or as much as the whole annual interest on the public debt of the United States. Perhaps these figures may be too large. But in the main the statement is substantially true. It adds a new illustration of the views which a large class of our financial men have espoused in regard to our public debt, and the best method of providing for its ultimate payment without impairing the resources of the country or hindering the progress of the nation.

The annual income of the people of the United States is estimated at 5,000 millions of dollars, or more than twice as much as the principal of their public debt. A quarter of a century ago the income of our people was little more than half as much as now. Ten years hence, by the growth of population, the increase of our productive forces, the multiplication of railroads, telegraphs, and steam engines, and the development of our mining and manufacturing industry, our national increase of annual wealth will greatly exceed its present aggregate. Perhaps it may make as much relative progress as has been realized during the past quarter of a century. In that case it will amount to 7,000 millions, and the country will thus be proportionately more able to bear the burden of the debt.

In view of the rapid growth of the national resources and of the consequent ability to bear the burdens of taxation, we have always doubted the expediency of the policy which enjoyed for some time considerable popularity, of paying off by heavy taxation a large annual sum of the public debt. Public opinion has now come round, and coincides at length almost entirely with the views we have always maintained. In March, 1869, the yearly gold interest charge of the national debt was $124,255,350. At present this annual charge is $111,419,993. To effect this yearly reduction of $12,835,357, we have redeemed bonds to the amount of $213,717,500, and these bonds we had to pay off by an oppressive taxation, which has crippled the productive energies of the people, has withdrawn very large amounts from the aggregate of the national wealth, and has caused much of the commercial and industrial depression under which our people are now suffering.

Of course few people in this country are in favor of a permanent national debt. We believe in the policy of paying it off at the earliest possible time. All we contend for is that Mr. Boutwell's method is inexpedient, mischievous and cannot be kept up. This country has twice paid of its public debt. When it has had sufficient opportunity for recuperation it will doubtless in due time repeat the same process of liquidation. But there are other claims which take precedence, and will for some years task our resources to the utmost. We have especially our system of railroads to complete. On these great national works we have already spent $2,376,010,770. With this immense outlay we have only opened 54,686 miles, and our railroad system is far from complete. Since the close of the war we have constructed more than 19,000 miles of new railroad, and we shall in all probability go on building new roads at the annual rate of at least 5,000 miles for a long time to come. These works alone will absorb more than 150 millions of dollars a year, and if our ability to build these new works for the development of our national resources is impaired by the oppressive taxation needful to keep up Mr. Boutwell's surplus, the necessity must be very urgent which shall compel us to give up our railroad progress for the sake of some supposed advantages connected with the early payment of our national debt.

If it be true that every 500 miles of railroad develops new wealth to an amount equal to 120 millions of dollars a year, the necessity is apparent for not suffering any doubtful advantages to prevent the realizing of these substantial benefits which railroad extension is conferring on our people. If we cannot pay off the national debt as rapidly as the advocates of that policy wish, without giving up some of our projects for building railroads, opening mines, constructing manufactories, or otherwise accelerating the material progress of the country, our people will not hesitate long as to which they will choose.

There is, moreover, another aspect of the case. Much has been said of late about the South and its recuperation. Some writers affect to take a very gloomy view of the situation, and claim that the prospects for the future are dark. We have never sympathized with these despondent reasoners. The South is slowly but surely recovering from the terrific consequences of the war. She will be controlled and her destiny inevitably fixed by her material interests. She is growing in prosperity and productive power. In proportion as this progress goes on will the malignant demagogues lose their power. But this needful growth cannot go forward without northern capital. We must build railroads in the South, open her mines, develop her wealth, enlarge her resources, multiply her productive power. And if we are to do this, and to carry on our great national works and improvements we must give up for a time this plan of devoting any considerable annual surplus to the payment of the public debt.

Some appear to be in constant fear lest if we fail to purchase several millions a month of the outstanding Five-Twenties the public credit will be impaired. There is no such danger. The public credit of this country rests on too ample and too permanent a foundation to be so easily disturbed. To establish the credit of the Government the

Digitized by Google

most effective means has always been to enlarge the resources of the people and to promote the public wealth. To spend 150 millions of dollars judiciously, in building new railroads where the country needs them, may do much more to build up the permanent credit of the Government than the paying off by oppressive taxation of 150 millions of the national debt.

THE INSURANCE CONGRESS.

The National Insurance Convention, to whose preliminary proceedings we lately referred, has adjourned to the 18th October, when it will meet again in this city to consider various questions which have received less attention than their importance merits. Prominent among these are the adoption of a table of mortality, the compulsory reserves for reinsurance on fire, life, and marine policies, a uniform terminology by which life insurance policies shall be known and distinguished, and some methods for preventing the sacrifice of safety and availability in the securities held, to lucrative profits, so as to compromise the stability of the insurance companies for the sake of a dangerous, brief, seductive prosperity.

Some of these points are of the very highest importance, and the insurance companies cannot afford to defer for any considerable time their thorough consideration. The magnitude of the interests represented by these corporations is great. It is little more than half a century since the first life insurance company began business in this country, and now the aggregate policies amount to 2,000 millions, or more than the whole of the funded national debt. On these policies the annual premiums paid by our people are nearly 145 millions dollars. The fire insurance aggregates are 8,000 millions. The marine risks are enormous, and the whole of the three departments of insurance were represented in the recent Congress. Delegates were present from twenty of the most important States in which insurance companies have been established. Addresses were received from the Chamber of Commerce, the National and New York Boards of Fire Underwriters, the Life and Fire Insurance Corporations, and from several leading men of experience and high reputation in the financial world. After consultation with eminent actuaries and other officers whose practical knowledge gave weight to their opinions, the Convention agreed upon three points of no small practical interest. First, they recommend the adoption of uniform blanks for the returns of fire, life and marine companies respectively; secondly, they would have one agent selected in each State by every company to receive legal process for the corporation he represents; thirdly, they are of opinion that no deposits should be required from fire and marine companies, and only a single deposit of one hundred thousand dollars from life companies. This deposit, they say, should be made in the State where the company is organized, and the certificate of the Superintendent of that State is to bear equal weight in all the States as to the responsibility of company in question. As to these last two points there has been considerable discussion, and the Convention owes much of its popularity among the companies to this fact. The argument is, that, except this claim to deposits in other States be given up, the funds of the companies would be dispersed in a very troublesome manner, and that if any other States had a right to a deposit, every one of the thirty-seven States of the Union might with propriety make the same demand. Hence every company doing business would require a gross deposit of 3 or 4 millions of dollars, to be held in inactive and dead immobility and scattered about all over the various States of the Union. There is considerable force in these objections But those who advance them are bound to suggest some equivalent or better method of guaranteeing the interests of the public. This they have not done. At the October meeting this defect ought to be supplied. It is of the highest possible moment that the relative magnitude of the assets and liabilities of the respective companies should be placed beyond doubt, and that the fullest publicity should be thrown on the safety and availability of the securities in which the assets are locked up. Some method of shedding the light of publicity can surely be contrived which shall accomplish the end in view and afford the requsite guarantees to the public with more efficiency than the deposit system, against which the various companies so loudly remonstrate. It must also be remembered that most of the evils complained of have arisen from the eager contest among the rival companies and their desire to make war on each other by influencing hostile legislation. If the companies will lay aside their hostility to each other, then there is little doubt that the absurd laws contrived by some of the States for the promotion of local interests will soon be got rid of. In the interests of the public we must demand that when the present safeguards of solvency and credit are withdrawn, something more efficient shall be substituted for the protection of the public and of insured constituency of these vast and rich corporations.

We have not the least intention to countenance the charges againt the insurance companies which thoughtlessly or of design are sometimes made by persons who, from a few exceptional failures, pretend that the position of our insurance institutions generally will not bear investigation and that if any great monetary convulsion should occur, they could not survive, but would be compelled to succumb. These unsupported charges are not worthy of serious refutation. They are likely, however, to do harm. And the plan of enlarged publicity which we recommend has the additional advantage of strangling such injurious scandals in their birth. In connection with this publicity it has been suggested as desirable that the officers should be severely punished if in any case falsified statements are made with a view to mislead. These insurance companies form an important part of the financial machinery of the country. They have consequently devolving upon them a three-fold duty — first, to themselves as corporations; secondly, to their insured constituency with whom they have made contracts; and thirdly, to the public at large, whose financial and commercial interests are dependent in a large degree on the soundness and stability of the whole complex monetary machinery of the country, both that of the insurance companies, and that of the banks, the savings institutions and other moneyed corporations, all of which, in a great monetary panic, might stand or fall together. It is no answer to our argument to say that no appearance is anywhere discernible foretokening such a financial convulsion. The reforms we contend for are salutary, if not indispensable, in any event. Before the next meeting of the insurance convention these and other important points will receive considerable attention from the press. As a practical guide to the inevitable discussions, and as a valuable repertory of facts not generally understood, the early publication of the official report of the recent congress, with its statistics and addresses, is much to be desired.

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS

The following are the changes in the Redeeming Agents of National Banks since the 1st of June, 1871. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency.

Digitized by Google

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
Pennsylvania—Coatsville.....	The National Bank of Chester Valley.	The First National Bank of Washington, D. C., approved, in addition to the First National Bank of Philadelphia.
Missouri—Jefferson City...	The First National Bank.	The Fourth National Bank of New York, and the Second National Bank of St. Louis, Mo., approved.

New National Banks.

The following national banks have been organized since the 1st of June, 1871:

Official No.

1,831—The First National Bank of Nicholasville, Ky. Authorized capital, $65,000; paid in capital, $32,750. George Brown, President; John A. Willis, Cashier. Authorized to commence business June 2, 1871.

1,832—The Northern National Bank of Big Rapids, Mich. Authorized capital, $75,000; paid in capital, $37,500. George F. Stearns, President; Charles P. Gifford, Cashier. Authorized to commence business June 5, 1871.

1,833—The First National Bank of Pueblo, Territory of Colorado. Authorized capital, $50,000; paid in capital, $30,000. John A. Fletcher, President; M. D. Thatcher, Casher. Authorized to commence business June 5, 1871.

1,834—The National Bank of Franklin, Tenn. Authorized capital, $60,000; paid in capital, $36,000. W. S. Campbell, President; J. L. Parkes, Cashier. Authorized to commence business June 7, 1871.

[From our own correspondent.]

LONDON, Saturday, May 27.

The painful news received from Paris during the week has had considerable effect upon the money market, and there are now reasons for believing that the period of extreme ease has not yet terminated. As every one interested in the matter knows, a large French loan has been threatening our market for a long time past, and it was expected that this operation would materially alter the rates of interest current on that side. As soon as the preliminaries of peace were signed and the newly elected Assembly commenced its deliberations at Bordeaux, it was anticipated that the negotiation of the loan would be immediate, and hence business in several other quarters was kept in suspense, owing to the uncertainty envelop. ing the market for money. The affair of Montmartre and the subsequent events, however, clearly indicated that the matter would be delayed; but at the same time the probability of a loan, sooner or later, as there was entire confidence in the early success of the Versailles forces, rendered the financial future equally uncertain. Up to the close of last week there was every reason to believe that the insurrection was about to collapse, and that Paris would within a few days be restored to France. This circumstance led to a hardening in the rates of discount, but the events of the current week have again delayed the introduction of the long expected loan, and to-day the prospect of its early negotiation is as uncertain as ever. The future of the money market can only be guessed at, and yet, by watching narrowly the course of events in Paris and in France, it may be anticipated with considerable accuracy. M. Thiers argues that unless union now prevails in the Assembly, and unless all lend a helping hand to restore the unprecedented losses which France has sustained, the position of the country is such as to create profound anxiety. If, however, the government is strong, and confident in its power to direct the nation in a right course, by economy and by an earnest desire to reconstruct what has been pulled down, France may soon surmount her great reverses. But will the restless spirits of France admit of such a policy? With the capture of Paris a new act in the drama will commence, and that act will not be less important than those which have preceded it.

Such is the present condition of our money market, that were it not for the expectation of French requirements, the Bank rate would certainly have been reduced to 2 per cent this week. The stock of bullion is the largest ever known, being £24,547,709, against £20,406,898 last year, and only £17,381,231 in 1869. The reserve of notes and coin amounts to £15,606,724, against £12,601,793 in 1870, and £9,834,051 in 1869. The other securities, or discounts, have fallen to £17,102,789, being about £1,000,000 less than at this period last year. These figures clearly point to a continuance of ease, but, at the same time, there are indications that the period of plethora is drawing to a close. As stated above, a French loan, which would be for a large amount, would unquestionably affect our market, and should the present prove a strong government, and command the confidence of France and of Europe, it might be introduced at an earlier date than is now expected. There are also, it must be observed, many schemes and several new loans before the public. American railways and American mines continue to be introduced to the notice of the public, and of late, there have been the Argentine, Costa Rica and Spanish loans. On account of the former a large amount of gold, in sovereigns, has already been sent away, but as regards the Spanish loan, it is more than probable that the whole amount will be retained here. The present year shows many indications of being fruitful in new loans and new undertakings, and should good government be restored to France, a speedy change in the money market is by far the more probable. The following are the quotations, compared with those of last year:

	1870. Per cent.	1871. Per cent.		1870. Per cent.	1871. Per cent.
Bank minimum....	3 @...	2½@ ..	4 months' ba'k bills	3 @3½	2½@2¾

*Nomical.

In the Stock Exchange, business has been quiet, but, on the whole, prices have ruled firm. Consols have improved since the news of the vandalism in Paris was received, and the tone of the

Digitized by Google

railway share market has continued good. Certain classes of foreign securities are weaker, but American remain firm, and without especial movement as regards government stocks. Erie railway shares have been firm. Grand Trunk of Canada securities have receded about 1 per cent, but Great Western of Canada are firm in value. The following are the highest and lowest prices of consols and the principal American securities on each day of the week:

	Monday.	Tuesday.	Wed'sy.	Thu'sy	Friday.	Sat'day.
Consols	93⅛-93⅜	93⅛-93⅛	93 -93⅛	93⅛-93⅛	93⅛-93⅜	93⅜-93⅛
U. S. 5-20's, 1882	90¼-90⅜	90⅜-90⅜	90⅜-90⅜	90⅜-90⅜	90¼-90⅜	90¼-90⅜

Erie Shares ($100)	23¾-24¼	23¼-24¼	25 -25¼	24¼-25	24¼-24⅞	23¼-24¼
Illinois shares ($100)	109½-...	109 -110	109 -110	109½ 109½	109½-....	109½-109½

Messrs. Bischoffsheim & Goldschmidt have announced a further issue of £400,000, reorganization stock of the Atlantic and Great Western Railway Company, at the price of 80. This money is to be raised for the purpose of providing against every contingency that may arise, and in order to work the line effectively when it is taken over.

The prospectus of another mine, situated in Nevada and near to the Eberhardt and Aurora properties, has appeared this week. It is that of the Great Western Silver Mining Company, limited, and the capital is only £30,000.

The weather having become more favorable, and some refreshing rains having fallen during the week, there is less firmness in the trade for cereal produce, and prices have had a drooping tendency. No change of importance, has, however, taken place. The agricultural prospect, which was fast becoming unfavorable owing to the continuance of easterly winds, has now materially improved, and there is every hope that the yield of grass will be large.

The following statement shows the imports and exports of bread and feeding stuffs into and from the United Kingdom, during last week and since the commencement of the season, compared with the corresponding periods in 1869–70:

FOR THE WEEK ENDING MAY 20.

	1870'71. Imports.	1870'71. Exports.	1869'70. Imports.	1869'70. Exports
Wheat.....cwt.	338,221	66,883	485,520	6,071
Barley	69,555	381	106,089	....
Oats	115,440	24,419	175,900	1,491
Peas	10,175	431	54,810	606
Beans	30,867	140	37,329	....
Indian corn	121,046	13	154,812	....

Flour	3,316,521	1,322,864	4,687,333	17,788

For the corresponding periods in 1868–'69 the figures were as under:

	Imports. For the week.	Imports. Since Sept. 1.	Exports. For the week.	Exports. Since Sept. 1.
Wheat.....cwt.	255,876	20,434,949	....	151,137
Barley	60,586	8,112,543	3	99,792
Oats	75,403	4,45 ,899	6,952	95,655
Peas	4,207	881,560	33	28,131
Beans	26,092	2,028,371	....	4,453
Indian Corn	195,973	9,952,147	45	940
Flour	24,498	2,885,771	895	24,567

Trade has been quiet, but a healthy tone prevails, and no important feature has presented itself during the week. The following relates to the trade of Manchester;

This market has been in an unsatisfactory state throughout the week. The business going on in cotton has been animated and extensive, while the demand here for yarn and cloth has been weak. Producers have thus found themselves in an awkward position. The offers made to them for their production have not been numerous, and only at former low prices, and at the same time they have had to face an advancing market in Liverpool. The result has been that only a limited business has been done during the week, and the sales made have not been equal to the production of the district. Buyers on their part have been quite indisposed to give out orders. Advices from China and India are anything but encouraging to merchants to go on shipping except at low prices, as even at to-day's prices in this market returns from those markets show a loss, not to mention those which have already been incurred upon shipments made at a higher range of prices than the present. The production seems again to have exceeded the demand from abroad, where goods have begun to accumulate and are difficult to sell except at low prices.

After a few days quietness in the Liverpool market, renewed activity set in again this week, and the sales are now reported to be 99,000 bales, or 20,000 bales exceeding the estimated sales. Bad weather affecting the growing crop is put down as the origin of this upward movement, but it is as yet much too early in the season to ascribe much importance to such reports. We should rather attribute the increased confidence in cotton to the fact that the end and total result of the last crop can now be seen, and that cotton is nearly 4d. per lb. cheaper than it was at this time last year. This, with the knowledge that the consumption in this country has considerably increased, gives holders confidence, and the pressure to sell which was so strong some time since has materially decreased. So far as produces are concerned, they are now in a decidedly worse position than they were only a short time ago, when cotton kept declining, while their production maintained its price very steadily. At present the reverse is the case. It is all that producers can do to maintain prices, while the tendency of cotton keeps going against them.

English Market Reports—Per Cable.

The daily closing quotations in the markets of London and Liverpool for the past week have been reported by submarine telegraph, as shown in the following summary:

London Money and Stock Market.—American securities have been rather less firm, closing with a slight decline in prices, except for 5-20s of 1867; 10-40s are ¼c. lower.

	Sat.	Mon.	Tues.	Wed.	Thur.	Fri.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show a decrease in both dry goods and general merchandise. The total imports amount to $7,671,435 this week, against $8,174,154 last week, and $7,460,904 the previous week. The exports are $4,587,762 this week, against $4,162,140 last week, and $3,473,666 the previous week. The exports of cotton the past week were 5,781 bales, against 11,718 bales last week. The following are the imports at New York for week ending (for dry goods) June 2, and for the week ending (for general merchandise) June 3.

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
Dry goods	$1,047,219	$1,903,530	$1,426,875	$2,066,085
General merchandise	3,212,121	4,169,700	5,596,586	5,605,350
Total for the week	$4,259,340	$5,432,230	$7,022,961	$7,671,435
Previously reported	101,743,795	134,905,774	123,379,582	159,271,452
Since Jan. 1	$106,003,135	$140,338,004	$130,402,543	$166,942,887

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports, for the week ending June 6:

EXPORTS FROM NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
For the week	$2,546,370	$3,587,763	$4,343,752	$4,587,762
Previously reported	75,498,590	71,594,177	71,944,349	96,028,079
Since Jan. 1	$78,044,960	$75,181,940	$76,288,101	$102,615,841

The following will show the exports of specie from the port of New York for the week ending June 3, 1871:

May 29—Brig A. B. Patterson, Porto Cabello—			Gold bars	58,145

North Missouri Railroad.—The St. Louis *Times* of June 6, states that the Missouri Railroad is about to pass into the hands of new owners, with M. K. Jesup, of New York, at the head. The plan is to bid the road off at the sale which is to take place in August under the second mortgage, and thus wipe out the third mortgage, the eight millions of stock and the floating debt, which amounts to two or three millions of dollars more. If the scheme works, the Illinois, Missouri and Kansas Association will, says the *Times*, purchase a road with $20,000,000 of capital and paying a dividend upon that sum, for seven or eight millions, or a little more than a third of its real value.

Atlantic & Pacific Railway.—This great line, of whose progress southwest from St. Louis our readers have been informed from time to time, is now finished and in operation to Seneca, on the Indian Territory line, 330¼ miles from St. Louis. Having acquired the sole right of way through the Indian Territory from east to west—as has the Missouri, Kansas & Texas road from north to south—the Company are pushing construction beyond the present terminus, so as to comply with the terms of the Land Grant Act under which they are building. This requires the completion of 50 miles additional each year, by the 28th of July thereof. From Pierce City, Mo., last year's terminus, the 50 mile point carries the road into the Indian Territory, three miles west of the Grand (Neosho) River.

The road is running two through trains each way daily, which connect with a double line of stages, both with Baxter Springs and Chetopa, and with Fort Smith (110 miles) and Sherman, Texas, 270 miles. The fare from St. Louis to Fort Smith is $30; to Sherman, $56 50.

On the Missouri section of the road and its lands, the Company have issued two mortgages, amounting to $10,250 000. The prices at which the lands are selling—an average of $6 77 per acre—will nearly, if not fully, cover the capital and interest of the above sum, represented by 20-year 6 per cent bonds of the company.

Of the total of $104,371 53 gross earnings for March, $53,282 27 were consumed in running expenses, leaving as net earnings, $51,089 26. In addition to the above there were:

Land sales, to September 1, 1870.....	$135,300 62
Land sales, September 1, 1870, to January 1, 1871.....	201,300 16
Estimated sales for 1871 (average $45,0 0 per month).....	540,000 00

—*Chicago Railway Review.*

Charlotte, Columbia and Augusta Railroad.—The earnings of this road for the fiscal year ending December 31, 1870, were $560,474 05, and the operating expenses and taxes, both Federal and State, were $289,542 70, leaving a balance of $270,931 35. From this should be deducted interest on notes and coupons paid, amounting to $129,109 77—leaving the net balance $141,821 58, which is nearly 5½ per cent on the capital stock of the company, amounting to $2,571,299 99. This balance has been expended in completing the grading on the Augusta Division of the road, the bridge across the Savannah river, enlarging and building depots, in the construction of freight cars and passenger coaches, and in paying for new locomotives. The President in his report says:

The consolidation of the two companies, making the Charlotte, Columbia and Augusta Railroad Company, was effected on the 8th of July, 1869. The Savannah river bridge was finished and used on the 1st of August, 1870. The earnings for this year being, as stated, $560,474 05, and those of 1869, $403,785 49, shows an increase of $159,688 56 for the past over the previous year.

This large increase of income, nearly forty per centum, has more than realized the expectations of the most sanguine. With the Macon and Augusta Railroad finished, and the double daily connections with Savannah and Atlanta, you can reasonably calculate on an income of $600,000 during the present year.

The entire bond debt of the company on the 1st of January, 1871, was $1,229,500, of which $786,000 were Charlotte, Columbia and Augusta bonds, and $371,500 Columbia and Augusta bonds, and $71,000 Charlotte and South Carolina bonds. On the 1st of March, 1871, after the issue of $30,000 of bonds in payment of depot lot and buildings in Augusta, this debt amounted to $1,252,000; of which $50,500 were Charlotte and South Carolina, $205,500 of Columbia and Augusta, and $996,000 of Charlotte, Columbia and Augusta bonds—showing that within two months $186,500 of the old bonds were funded or redeemed. The bonds of the two former companies have been very generally exchanged for the consolidated bonds. Under this mortgage the issue is limited to $2,000,000, leaving still for exchange and for the purpose of funding the floating debt $1,004.000. The entire floating debt on the 1st of January was $741,301 62, while on the 1st of March it was $721,118 62, to which add fractional bonds, $3,684 56 outstanding same date, makes $724,802 18. This amount deducted from the first mortgage bonds unsold, leaves $279,197 82, to be exchanged for $256,000 old bonds still outstanding, giving an excess over all liabilities of $23,197 82.

Memphis and Ohio Railroad.—The Comptroller of the State of Tennessee (Hon. E. R. Pennebaker) states that the Memphis and Ohio Railroad has retired its entire indebtedness to, and including July 1, 1871, amounting to $2,468,380, which, with the amount retired by the Nashville and Decatur Railroad, amounting to $2,709,997 20, makes a total sum of $5,188,377 20 since his last report to the Legislature.

Morris Canal and Banking Company.—REPORT FOR THE FISCAL YEAR ENDING FEBRUARY 28, 1871.—

Receipts from tolls.....		$365,585 77
" rents.....		16,690 68
" water rents.....		2,476 00
" other sources.....		6,797 31
		$891,549 76
And the disbursements were:		
Repairs of canal and works.....	$125,657 85	
Operating canal.....	57,278 82	
Salaries, law and other expenses.....	21,055 34	
Transportation expenses.....	4,481 40

Depreciation of boat stock		7,255 10
Bad debts		853 45
State of New Jersey		25,000 00
U. S. tax on surplus profits of 1869		1,263 10
Balance, February 28, 1871		82,003 69
Total, as above		$246,302 71

Compared with the previous year, the gross income shows a decrease of $39,696 04; with a decrease in expenses of $37,923 68—making the decrease in net income, $1,772 36.

At a meeting of Directors on the 20th ultimo, which was called to "consider the acceptance of the supplement to our charter, recently passed, authorizing the company to lease, &c.; and to take action in regard to leasing the canal; and any other business which may be brought before the board," an offer was received from the Lehigh Valley Railroad Company to lease to that company for nine hundred and ninety-nine years our entire works and franchises, which was accepted, subject to ratification by a majority in interest of the stock of the company as required in the supplement named.

JOHN ROUNDEY, Accountant.

OFFICE PACIFIC MAIL STEAMSHIP CO., May 18, 1871.

The Auditing Committee having made examination of the Company's books, accounts, assets and securities, find them all in order, and correct, in accordance with the above statement.

(Signed) JAS. M. BROWN, WM. DENNISTOUN, FRANCIS SKIDDY, ALLAN MCLANE, *ex-off.*, } Committee.

New Investments in Europe.—The London *Investor's Monthly Manual*, alluding to the new loans introduced on the European money markets in May, says: The new capital commitments of May have been £23,344,081, of which £3,550,300 were subscribed entirely in Great Britain, and £19,793,781 partly here and partly on the Continent. The actual money payments of the month upon these and previous subscriptions have been £8,437,397, of which £3,710,524 were provided by Great Britain alone and £4,726,873 partly on the Continent. During the first five months of 1871 the subscriptions effected solely in Great Britain have been £26,622,900 (against £16,929,200 in the same months of 1870), and those in which foreign countries participated have been £40,443,781 (against £22,020,360 in 1870). The money payments during these five months have been £13,669,871 by Great Britain alone (against £14,288,965 in the same months of 1870), and £26,653,373 (against £22,157,965) provided partly on the Continent. These comparative figures show a large increase in the subscriptions during the current year, while the money payments are as yet more evenly balanced.

—Messrs. Morton, Rose & Co. of London, brought out on Monday the Land Grant Loan of the Union Pacific Company—$3,000,000, or about £600,000, of the original loan, still in the ownership of the company—at the rate of 70 per cent sterling. The whole amount was subscribed, and the scrip (or privilege) sold subsequently at 1 per cent premium, or 71 per cent sterling for the Bonds. As heretofore intimated, Messrs. Bischoffsheim & Goldschmid and Messrs. Raphael & Son, of London, have taken an interest in this negotiation.

BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

FISK & HATCH,

BANKERS AND DEALERS IN GOVERNMENT SECURITIES,
No. 5 NASSAU STREET, NEW YORK, June 5, 1871.

THE CHESAPEAKE AND OHIO RAILROAD COMPANY are extending their line of road to the head of reliable navigation on the Ohio River, where it will meet and connect with lines now building or projected, to the principal railroad centers and five cities of the Western States. 227 miles are in operation, and the rails (steel and iron) for 100 miles additional is now being laid. The road will have, when completed, a large East and West through business, besides an immense mineral and general local traffic.

THE SIX PER CENT GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD CO. are amply secured, and very desirable for safe and profitable investment. We believe them to be of equal value and security, with the Central Pacific Bonds, negotiated by us, and must take a like rank in market value and salable character.

Holders of Five-Twenty Bonds, desiring to fund them otherwise than in the new Five Per Cent. Government Loan, may do so with entire safety, at a profit of about 20 per cent., and without reduction of interest, by an exchange for the Bonds of the CHESAPEAKE AND OHIO RAILROAD CO.

Price of the bonds, until further notice, 92, and accrued interest from May 1.

We also buy and sell Government Securities, and the Bonds of the Central Pacific Railroad Co., and as agents of the U. S. Government, will attend to the funding of Five-Twenties into the new United States Bonds.

FISK & HATCH.

BANKING HOUSE OF HENRY CLEWS & CO., 32 WALL ST., N. Y.

Our business is the same as an incorporated bank.

Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed on all daily balances. Checks upon us pass through the clearing house as if drawn upon any city bank.

We issue Circular Letters of Credit for travelers, available in all parts of the world; also Commercial Credits. We make telegraphic transfers of money to any desired point, and transact every description of foreign banking business.

We draw Bills of Exchange in sums from £1 upward on.

The Imperial Bank, and Messrs. Clews, Habicht & Co., London.

Digitized by Google

The Provincial Bank of Ireland, The National Bank of Scotland, and all their branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Government and other investment securi ties; also Gold and Exchange.

Advances made on approved collaterals and against Merchan dise consigned to our care.

We make collections of Notes, Drafts, Coupons and Dividends with promptness on all points, and are fully prepared to offer banking facilities upon either currency or gold basis.

THE NEW ORLEANS, MOBILE AND TEXAS RAILROAD COMPANY

Are building a trunk line, connecting New Orleans with Mobile on the east, and giving the only railroad connection between the former city and the great and most productive State of Texas on the west, the total distance from Mobile to Houston being 475 miles.

The company is composed of strong Northern capitalists, who have already expended nearly TEN MILLION DOLLARS of their own funds in the construction of the line. They have built about 225 miles from Mobile westward, and secured by purchase of securities and made provision for the thorough repair and equipment of the 108 miles constituting the Texas division; leaving but 140 miles to be built to complete the entire road.

It is believed that no other railroad corporation in the country has ever made so large an expenditure from its own means before offering any of its securities to the public.

The Company now offer for sale the 8 per cent mortgage bonds upon the Louisiana division of 226 2-3 miles from New Orleans to the Sabine River. This will probably be the most valuable portion of the whole line, as it will be the only rail communication by which the enormous productions of Texas can reach the Southern metropolis.

So important is this road considered to Louisiana, that the State has made very liberal grants in aid of the enterprise, by direct donations, by endorsement of its bonds, and by subscriptions to the stock of the Company, amounting in all to over eight million dollars.

The bonds now offered are of two classes: First mortgage bonds, to the amount of $12,500 per mile, and second mortgage bonds, to an equal amount, both principal and interest guaranteed by the State of Louisiana. The price of the two classes is the same, and subscribers can take their choice.

The Bonds are only in the denomination of $1,000, or £200 each, interest payable January and July, at the rate of eight per cent currency in New York, or seven per cent gold in London, at the option of the holder, at the time each coupon is due. Bonds can be registered if desired.

No better security has been offered to investors. The line is a good and important one, and the stockholders have proved their determination and ability to carry the work to an early and successful completion, by the very large amount they have themselves put into it.

The Bonds are largely profitable, as well as entirely safe. One thousand dollars invested in these eight per ceet bonds will give the purchaser *more than seventy-seven per cent* greater annual interest than the same amount invested in the new Government Five Per Cents, into which the Government Sixes are being funded by the Secretary of the Treasury.

At the same price, an eight per cent currency long bond is far cheaper than a 7 per cent gold one. Calculating a return to specie payments in three years, and taking the time that the bonds of the New Orleans, Mobile and Texas Railroad have to run—45 years—we find that by compounding the interest of each, every six months, at 7 per cent, an 8 per cent currency bond at 90 will give a return of $2,614 18 more than a 7 per cent gold bond, at the same price, or nearly three times the amount of the original investment.

While the purchaser of the 8 per cent bonds of this Company can realize this special profit, he also holds the option of taking advantage of any temporary advance in gold, as he has choice, at every separate coupon day, of gold interest at 7 per cent, or currency interest at 8 per cent.

The bonds are dated May 1, 1871. The first coupon will, therefore, be a fractional one, running from May 1 to July 1. The price is 90, and accrued interest at 8 per cent currency from May 1 to date of remittance. Bonds will be sent free of cost and Government, and all other marketable securities will be taken in exchange at their best market rates, without charge for selling.

Information concerning the company and the Road, and pamphlets containing map and full details of the enterprise, can be obtained of the undersigned or any of the Company's advertised agents.

W. B. SHATTUCK, Banker,
and Financial Agent N. O., M. & T. R. R. Co.,

Chicago & Northwestern, common	5	June 30	June 14 to July 1.
do do preferred	5	June 30	June 14 to July 1.

FRIDAY EVENING, June 9, 1871.

The Money Market.—There has been no change worthy of note in the money market, and quotations remain at the same low figures previously given. Most of the week's business has been done at 3 and 4 per cent on government and miscellaneous collaterals, while the large government bond houses have frequently had balances urged upon them at 2 per cent. The same extraordinary ease which has now been the feature of our market for several months past is also observable in London, and the last statement of the Bank of England showed a further increase in its large specie reserve, so that there appears to be little apprehension now entertained that the re-establishment of order in France will be followed by any serious disturbance of the London money market.

So long as the difference between gold and our currency continues, the London and New York markets are necessarily independent of each other, although the causes for easy money at the present period are to some extent the same in both cities.

As to the future course of money there are at present no indications of any material hardening in rates, and it appears as if the demand for moving the wool clip will be so easily met as to have less than the usual effect upon the market.

The last city bank statement of Saturday, 3d inst., showed a further increase of $382,622 in the legal tender reserve over the 25 per cent legal requirement, the whole excess being $16,602,653. The following changes in the several items were shown compared with the previous week: Loans, increase, $360,510; specie, decrease, $1,500,234; circulation, decrease, $102,521; deposits, increase, $2,892,759; legal tenders, increase, $2,670,415.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	June 3, 1871.	June 4, 1870.	June 5, 1869.
Loans and discounts	$291,502,148	$279,500,000	$275,900,000
Specie	13,789,380	30,900,000	19,900,000
Circulation	30,968,723	33,300,000	33,900,000
Net deposits	241,383,515	226,200,000	199,100,000
Legal Tenders	70,900,883	61,300,000	58,300,000

For Commercial Paper the demand is very good, and generally much beyond the supply. The chief demand for money on notes at the present time comes from the wool trade, but the supply of first-class paper from this quarter is not sufficient to put up the rates, and quotations remain at former figures.

Quotations are as follows:

		per cent.
Commercial, first class endorsed	60 days.	4½@ 5
" " "	4 months.	5 @ 6
" " "	6 months.	5½@ 6½
" " single names	60 days.	6 @ 7
" " "	4 to 6 months.	6 @ 9
Bankers.-first class foreign	60 days.	4½@ 5
" domestic	3 to 4 months.	5 @ 6

United States Bonds.—The week has been unusually dull in all Government Bond business, prices hardly varying more than ⅛@¼ per cent. The lists of Board sales show smaller transactions than in any previous week for some months past, the market having been almost stagnant. Prices are steady, and there seems to be no special reason for the small business referred to, other than a temporary lull in the demand from home investors, the smaller purchases by Government this month, and a check upon foreign bankers in consequence of the unsettled gold market. On Thursday the Treasury bought $1,000,000 at prices between 111.40 and 111.63; the total offerings being only $1,964,400. In regard to the new loan there have been no further developments, and the balance of $133,000,000 Five Per Cents continues to be offered for subscriptions.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, June 3.	Monday, June 5.	Tuesday, June 6.	Wednesd'y June 7.	Thursday, June 8.	Friday, June 9.

Railroad and Miscellaneous Stocks.—The stock market has been variable and unsettled, with an important break in two of the leading speculative favorites—Lake Shore and Rock Island—forming the principal feature of the week. Both these stocks advanced during the early part of the week, Rock Island selling up to 125⅜ and Lake Shore to 116¼, but broke down on Thursday, the former to 120¼ and the latter to 113½ and to-day down to 112⅝. The advance in each stock has been made on the report of stock distributions to be made in one shape or other; in Lake Shore the proposition is to issue $15,000,000 new stock to shareholders, upon which only a certain per cent of cash will be called; the proposition to increase the capital is to be submitted to the stockholders at Cleveland July 27; a dividend of 4 per cent, payable August 1, has also been declared.

In Rock Island the rumored plan consists in extinguishing the debt of $9,000,000 with the present assets, viz.: Cash, $2,800,000; 625,000 acres of land, valued at $5,500,000, and sundry other assets, $1,000,000. A stock dividend of 100 per cent is then to be declared, making the whole capital $32,000,000. Other stocks have been variable, with prices generally maintained. Coal stocks continue to rise on the reports of consolidating the Maryland companies. Western Union Telegraph closes at 58⅝ against 56½ last Saturday.

At the semi-annual session of the Board of Directors of the Company a report was submitted by the President, of which the following is a synopsis:

The net profits from July 1, 1869, to July 1, 1870, were $2,227,045. The net profits for the year ending June 1, 1871, were $2 547,854. For the six months ending June 1, 1871, the net profits were $1,216,459. The resources of the treasury have been applied to the purchase of the capital stock, which has been reduced from $41,000,000 to $35,000,000. The bonded debt is about $4,000,000. In 1866 the company had 97,000 miles of wire; in 1870 120,000 miles; in 1867 3,061 offices; in 1870 4,200 offices; in 1867 the company transmitted 4,000,000 of messages; in 1870 8,000,000, exclusive of press messages; the gross receipts in 1867 were $6,643,000; in 1870 $7,321,000; net profits in 1867 $2,477,200; in 1870 $2,352,750; construction of new lines cost in 1867 $415,000; in 1868 $355,000; in 1879 $678,000; in 1870 $400,000. The average of tolls on messages in 1867 was $1 64, and the average expense for each message was $1 03. In 1870 the average of tolls on messages was 93 cents, and the average expense of each message 64 cents.

In consequence of the break in leading stocks as above noticed, the confidence in a strong market has been shaken to some extent, and the "bear" interest increased; though it is reported that the decline was purposely effected by the cliques, with the object of getting more stock into their own hands.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

State and Railroad Bonds.—Southern State Securities have been comparatively dull, without important fluctuations in prices. Tennessees have advanced about 1 per cent from the reaction of last week. The Comptroller reports that the Memphis and Ohio Railroad has retired its entire indebtedness to, and including July 1, 1871, amounting to $2,468,380, which, with the amount retired by the Nashville and Decatur Railroad, amounting to $2,709,997, makes a total sum of $5,188,377, since his last report to the Legislature.

South Carolinas have been in better request on the advertisement that the interest of the State due July 1 will be paid in gold as usual, and that the bonds maturing at that time amounting to some $200,000 will also be paid.

Railroad Bonds are in good demand from investors, as the rates for money on call encourage investments in those standard bonds which are entirely safe, pay a good interest, and are readily saleable at any time; in consequence of the increased demand prices are generally higher. The North Missouri Railroad, which is advertised for sale on the 26th of August next, under the Second Mortgage Bonds, will probably pass into new hands, either at the sale or by negotiations made previously thereto.

The closing quotations for Pacific Railroad Securities were as follows: Central Pacific Bonds, 102¼@102½; Union Pacific Firsts, 91½@92; Land Grants, 85⅛@85⅜; Incomes, 83½@84.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week;

	Saturday, June 3.		Monday, June 5.		Tuesday, June 6.		Wednesd'y, June 7.		Thursday, June 8.		Friday, June 9.

The Gold Market.—The clique to which we made reference last week, as having been formed to carry up the price, has since operated with some effect and succeeded in putting gold up to 112¼ on Thursday, and in making cash gold so scarce that borrowers paid on Tuesday as high as ¼ per cent for the use of gold for one day, and on Wednesday up to ⅛ per cent. The result of making cash gold so scarce was immediately seen in the checking of exports, as shippers preferred to hold their coin and lend it at the enormous rates obtainable. With the increased supply from this cause, and the receipt of $1,000,000 from the Treasury sale on Thursday rates for borrowing have since declined, and were to-day only 1 per cent to "flat" while 2, 1, 3 and 4 per cent were paid for carrying. From this sharp turn, however, it would appear that the "clique" had either abandoned their schemes, or relaxed the market temporarily to suit their own purposes. Exports so far this week amount to $900,000. Bankers who had double-eagles could not lend their gold with the prospect of getting small coin in payment, and therefore had no object in keeping it. At the Treasury sale on Thursday bids amounted to $6,623,500, but only $1,000,000 was sold. Custom receipts for the week amount to $2,636,000

The following table will show the course of the gold premium each day of the week past:

	Quotations. Opening.	Lowest.	Highest.	Closing.	Total Clearings.	Balances. Gold.	Currency.
Saturday, June 3	112¼	111⅞	112¼	112⅛	$48,825,000	$2,395,818	$2,808,970

Francs	19 @ 19¼
English silver	4 80 @ 4 85
Prussian thalers	71 @ 72
Specie thalers	1 04 @ 1 06
Mexican dollars	1 04 @ 1 04¼
Spanish dollars	2@3 p.c. premium.
South American dollars	par.

Foreign Exchange.—The exchange market has been quite unsettled by the speculation in gold, and business for the time being has been materially impeded. The high rates paid for the use of gold have prevented its shipment, or the purchase of bills, and under these influences prime 60 day sterling declined to 110½, and short sight to 110⅝, with a concession from these rates by some drawers. To-day the market was a shade firmer, with a prospect of return to previous rates unless a new movement in gold should be developed. In the cotton market prices have ranged higher and been unfavorable to purchases for export; the shipments for the week from all ports, representing, of course, engagements previously entered into, have been 42,323 bales against 22,962 bales in the same week of 1870.

Quotations are as follows:

	60 Days.	3 Days.
London prime bankers	110¾@	110¾@
" commercial	109¾@ 110	110¾@ 109¾

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3. The Table of Railroad, Canal and Other Stocks, on another page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column x=*extra*; s=*stock or scrip*.

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately arter the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q.—J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name

---

Milwaukee & St. Paul Railway Company.—REPORT FOR THE YEAR ENDING DECEMBER 31, 1870.—The railway owned and operated by the Company is in length, exclusive of side or double tracks, 1,018 miles. On the 31st of December, 1869, they had 917 miles, showing an increase of 101 miles during the year 1870.

The average number of miles in operation during the year was 950; in 1869 the average was 858 miles.

The Company owns the following lines of Railroad:

	Miles.
Milwaukee to St. Paul, via Prairie du Chien	405
Milwaukee to La Crosse, via Watertown	196
Milwaukee to Portage, via Horicon	95
Horicon to Berlin and Winneconne	58
Watertown to Madison	37
Milton to Monroe	42
Calmar to Algona	126
Conover to Decorah	10
Austin to Mason City	40
Mendota to Minneapolis	9
Total	1,018

In addition to the above 1,018 miles of railroad, the Company own $2,001,000 of the capital stock of the Western Union Railroad, being a majority of the capital stock of that Company.

The present (March 1, 1871) cost of the Milwaukee and St. Paul Railway, 1,018 miles, represented by bonds and shares, is:

Mortgage bonds		$18,183,500
Preferred stock	$10,825,103	
Common stock	11,822,878	22,647,981
		$40,831,481
Deduct cost of Western Union R. R. Stock		$1,500,750
Cost of 1,018 miles		$39,330,731
Cost per mile	$38,650	

The increase in stock and bonds during the year has been made for the following purposes:

BONDS.

For purchase of railroad in Iowa, from Nora Springs to Algona, 63 miles		$1,008,000

PREFERRED STOCK.

For purchase of railroad, Nora Springs to Algona	$504,000	
For purchase of railroad from Austin to State Line, 11 miles	176,000	
For purchase of railroad from State Line to Mason City, 29 miles	400,000	
Prairie du Chien railway stock	835	$1,080,835
		$2,088,835

COMMON STOCK.

Dividend on earnings of 1869	$828,900	
For purchase of railroad, Nora Springs to Algona, 63 miles	504,000	
For purchase of railroad from Austin to State Line, 11 miles	176,000	
For purchase of $2,001,000 of stock of the Western Union railroad, it being a majority of that stock at 75 per cent in St. Paul common stock	1,500,750	
Dividend on earnings of 1870	747,291	
Purchase of Railroad, Mason City to State Line, 29 miles	400,000	
Prairie du Chien stock	833	
		4,157,774
		$6,246,609

Comparative statement of earnings and operating expenses for the years 1869 and 1870:

EARNINGS.

	1869.	1870.	Increase.	Decrease.	Total increase.
From freight	$4,909,525	$5,148,355	$238,830	$.....	$.....
From passengers	1,781,134	1,735,153	.....	45,980	.....

Second-class passenger cars	10	....	..	10
Sleeping cars	9	....	....	9
Baggage, mail and express cars	54	4	....	58
Box, freight and caboose cars	2,273	100	....	2,373
Flat and stock cars	480	100	....	580

NOTE.—No rolling stock in process of construction is included in the above table.

[A statement in detail of the stock and bonds of the Company is given in the financial tables of the CHRONICLE.]

Lands of the Chicago, Rock Island & Pac. R., in Iowa.—An interesting and comprehensive pamphlet has recently been issued, (with accompanying map), setting forth in detail the situation and eligibility of 600,000 acres of choice farming lands in Iowa, offered for sale by this Company, from which we condense the following:

LOCATION.

The lands are in a parallelogram, bounded east by the Des Moines river, north by the Iowa branch of the C. & N. W R.R., west by the Missouri river, and south by the Bur. & Missouri R.R., and this Company's main east and west line runs directly through the centre.

GENERAL CHARACTERISTICS.

Western Iowa is generally a prairie country and its surface, (especially that portion of it herewith concerned), consists mostly of a succession of gentle undulations, rising gradually from one watercourse and falling to the next.

THE CLIMATE

is much the same as that of States on the same latitude—such as central Illinois, Indiana and Ohio.

SOIL.

The fertility of Iowa soil is proverbial and well known. On account of it, Iowa has in less than one generation, risen to the rank of the first agricultural State, in proportion to its population, in the Union. In this respect, no part of the whole State is superior to that in which the lands now offered are situated.

PRODUCTIONS.

A statement of the main staple products of the State, has been taken from the State census of 1869:

Wheat, spring	bush.	16,823,520	Sorghum Syrup	galls.	2,592,393
Wheat, winter	"	1,140,035	Butter	pounds.	22,065,794
Corn	"	76,507,575	Cheese	"	1,188,546
Oats	"	18,596,625	Wool, (1868)	"	4,478,934
Barley	"	1,144,454	Hay—tame grass	tons.	677,907
Rye	"	496,347	Hay—wild grass	"	1,059 117
Potatoes	"	4,417,858	Value of farm produce (1868)		$69,471,525
Apples	"	666,148	Value of Stock sold (1868)		20,549,977
Grapes	pounds.	2,128,472			

FUEL.

It is pretty fairly supplied with timber in the groves which border the larger streams and are occasionally met with on the uplands. But even were timber fuel much scarcer, nature has made ample provision for the wants of mankind, in the inexhaustible supplies of coal, with which the State is underlaid.

LAND DEPARTMENT TICKETS.

At the principal stations and railroad junctions, the ticket agents are provided with "Land Department Tickets," which they sell to persons wishing to examine the lands at the usual rates of first-class passenger fare.

These tickets have attached a receipt for the fare paid (to be retained by the purchasers), which is allowed on the purchase money of land bought from the company, in accordance with conditions thereon printed.

PRICES.

The prices of the land varies, of course, according to situation and quality. The general range of prices is from $5 to $10 per acre, with some faw tracts in very favorable locations, or near the larger towns, at figures somewhat higher. The average price of the more desirable tracts is about $8 per acre. The agents at the stations on the railroad are provided with maps and lists of prices, which they are instructed to exhibit to all applicants.

TERMS OF SALE.

To suit the requirements of various classes of purchasers, the company has adopted three plans of sale:

1. Cash.—When the entire consideration is paid at once, a discount of ten per cent on the credit price is allowed.

2. Short Time.—The purchaser pays a quarter of the purchase money down, and the remainder in three equal annual payments, with interest at the rate of six per cent per annum, payable annually. He receives a warranty deed upon making the cash payment, and gives notes, secured by mortgage on the land, for the other payments.

The notes given under this plan must be punctually paid when due, or the interest will be charged at the rate of ten per cent instead of six. Renewals or extensions of payment will not be granted.

The purchaser to pay the expense attending the mortgage.

Digitized by Google

3. Long Time.—This plan is suited for those who wish to earn the purchase money out of the land itself. On payment of two years' interest at ten per cent in advance, the company gives its contract to convey the land by warranty deed, upon the payment of six annual payments, commencing two years after date, thus offering seven years to complete the purchase.

Louisiana & Missouri River.—In his Annual Report President Block states the terms of the contract entered into July 5, (approved July 27) 1870, with the Chicago & Alton RR. Company, by which the latter is to complete the main line and south branch, furnishing the superstructure and necessary equipments, depots, water stations, &c., and ferry boats at the crossings of the Miss. & Mo. rivers, in consideration of which the Company was to issue its securities as follows:—First mort. bond $16,000, pref. stock $10,000, and com. stock $5,000 per mile, of which $1,000 per mile of first mort. bonds is retained by this Company, and the balance is placed in the hands of a trustee to be paid to the C. & A. Co. as the work progresses and materials are purchased and all delivered. By the terms of this contract a lease was executed on the 1st of August to the C. & A. RR. Co. of the road and branch for one thousand years, at a rental of 35 per cent of the gross earnings, and at the same date a mortgage of the entire property of the Company was executed to Morris K. Jesup and John A. Stewart, trustees, securing the first mortgage bonds.

The report then refers to the contract of the C. & A. RR. Co. to build a branch of their Jacksonville Division (now under construction) from Roodhouse to Louisiana; on the completion of which the main line of this road will be finished to Mexico, and connection made with the North Missouri Railroad, with which a favorable contract has been made for running through trains to Kansas City.

Over the Missouri, Kansas & Texas Railway the track will be laid to Mexico July 1, iron for 46 miles being on hand, and the balance *en route;* and between Mexico and Glasgow grading is progressing rapidly, and is so far advanced that nothing stands in the way of its completion by Sept. 1.

On the South Branch the road will be ready for the iron before the rails are laid on the main line to Mexico.

The total amount charged to construction to March 31 is $1,196,957 72, of which about one-half has been expended on the South branch. The securities provided for in the contract of July 5th have been issued and placed in the hands of trustees. In January Messrs. M. K. Jesup & Co., of N.Y., were appointed transfer agents, and the U. S. Trust Co. Registrars of Transfer. All transfer business will hereafter be transacted with M. K. Jesup & Co

Central Pacific Railroad.—The following are the earnings of the Central Pacific Railroad Company for the month of May:

1871	$917,760
1870	768,720
Increase	149,040

Earnings first five months:

1871	$3,310,445
1870	2,693,090
Increase	$612,355

The *New York Times* has the following: "One of the causes of the firmness and estimation with which the Central Pacific Gold Bonds are held in our own markets and those of Europe, is found in the excellent general management of the company. Every department of the great enterprise seems to be conducted with efficiency and success. Another cause, undoubtedly, is the wonderful and steady growth of its traffic, which it enjoys exempt from competition. The earnings for the month of May last are at the rate of $11,000,000 per annum, and compared with the same month in the previous years since the road was opened throughout, show a remarkable prosperity, viz.:

May, 1869.	May, 1870.	May, 1871.
$568,270.	$768,720.	$917,760.

There are but few railroads on this continent enjoying a larger gross revenue, and of the number, scarcely anywhere the ratio of net earnings is equal to that of the Central Pacific."

Walkill Valley Railway.—At the annual election of directors of this road, recently held at New Paltz, the following gentlemen were elected for the ensuing year: Seth M. Capron and John C. Scofield, of Walden; Edmund Bruyn, of Shawangunk; Abner Hasbrouck, Floyd S. McKinstry and A. D. Deyo, of Gardiner; A. V. N. Eltinge and Jacob Le Fevre, of New Paltz; I. Schoonmaker, of Rosendale; C. S. Kiersted, R. Bernard and J. E. Ostrander, of Kingston, and Erastus F. Mead, of New York. F. S. McKinstry was re-elected President, Abner Hasbrouck Vice-President, H. D. Deyo Secretary, A. V. N. Eltinge Treasurer, James G. Graham re-appointed counsel to the Board, and R. Bernard was appointed associate counsel; Levi D. Bruyn reappointed Chief Engineer. The road is expected to be opened to Rosendale July 1, and work is being rapidly pushed forward for the extension to Kingston.

Baltimore and Ohio Railroad Stock.—BALTIMORE, Md., June 5.—Messrs. Fisher & Sons, of this city, to-day purchased from the proper State authorities between 5,000 and 5,500 shares of common stock of the Baltimore and Ohio Railroad, being the entire interest of the State in the common stock of the road, at $140 per share. The sale was made under an act of the last session of the Legislature to meet indebtedness of the State on bonds matured in January last. By this sale the State will lose two directors of the company, and the amount realized by the sale of common stock being insufficient to pay the bonds matured, a further sale of preferred stock owned by the State will probably be necessary, when the State will lose more directors of the company.

Consolidation of Georgia Roads.—The railroad consolidation policy is being adopted in the South. An arrangement has been effected, which went into force on the 1st inst., by which the Macon and Western Railroad Company leases its line from Macon to Atlanta, for the period covered by its charter, to the Central Railroad Company, the latter engaging to operate the same, and in the score of dividends place its stockholders on the same footing with its own. This effects the consolidation of two of the most important railroad lines in the State of Georgia, and the transfer, it is understood, carries with it the interests of the Macon and Western road in the line westward, generally known as the Savannah, Griffin and North Alabama road, and now completed and in operation to Newman.—*Daily Bulletin.*

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, June 9, 1871.

The feverishness of speculation still pervades the market for leading staples, although combinations for higher prices seem for the present to have culminated, especially as regards Cotton and Breadstuffs. In Provisions rapid fluctuations are the rule. Foreign Goods are for the most part dull, and an immediate revival of trade in them does not appear to be looked for. Cotton, having advanced to 19¼c for middling uplands, has reacted, and closed at 19⅜c. Breadstuffs have been firmer, but close dull; extra State, $6 35@$6 60; new Spring Wheat, $1 54@$1 55. Prime mixed Corn, 75c. Groceries have been dull for some days.

Provisions have been unusually active in all descriptions. Not only was there a brisk speculation, but a large export and a very active home trade. Pork declined on Monday to $15 for mess, $13 50 for prime mess, and $13 for prime; but from those prices there has been a gradual advance, speculators having taken about 35,000 bbls., and the closing prices are $15 37½ for mess, and $13 50@$13 75 for prime mess. Lard, having declined to 10¼c for prime Western steam, has since been very active for export and speculation, and closed at 10⅜c. Bacon has been selling moderately for export, mainly on the basis of 8c for short rib, and there have been large sales of pickled hams at 11½@12½c, according to weight. Beef has been taken moderately for export at private prices. Butter, in consequence of the drought in many parts, has advanced, but Cheese shows some depression, closing at 12½c for prime factories. Tallow has been active for export at 9⅛@9¼c.

In Foreign Fruits the chief business has been in layer Raisins, of which some 50,000 boxes changed hands at about $2 30@$2 40 per box. Yesterday there were sales by auction of some 27,000 boxes fresh Sicily Fruit, which brought satisfactory prices.

Hops continue in demand for export. Hay is firmer, and Whiskey shows a slight improvement.

Tobacco shows some further improvement in Kentucky Leaf, with a brisk export and home demand. The sales of the week foot up 1,300 hhds., including 800 hhds. for export, mainly for account of Italian contracts, and 500 hhds. to dealers and cutters, prices ruling very strong and ranging from 5½c. to 6½c. for Lugs and 7@11c. for common to fine Leaf. The receipts and stocks are moderate, and prices very firm. Seed Leaf has also been fairly active at very full prices, but it is impossible as yet to do anything for export. The sales embrace 337 cases Ohio new crop; 45 cases Connecticut Fillers and Seconds, new crop; 104 cases Connecticut Seconds, new crop; 150 cases Pennsylvania, new crop (all on private terms), and 150 cases Connecticut and Massachusetts Wrappers, 1869 crop, at 36@50c. Spanish Tobacco has been less active, and the sales include only 400 bales Havana at 88c.@$1 05.

Freights have been dull, owing to reduced receipts of grain and the speculative values at which much of it was held. Rates have declined to 6½d. by sail and 7½d. by steam to Liverpool, with scarcely anything doing for other ports.

Rosin has been firm throughout the week, but closes quiet at $2 60 for strained. Spirits Turpentine, with free receipts of the new crop, has been declining, and closes to-day at 45½@46c. Petroleum has advanced, attended with a fair degree of activity, and closes at 26½c for refined on the spot, and 15½c for crude in bulk.

Iron has remained very firm, and American Pig is scarce; Russia Sheet has been active, and closes at 11¾c, gold. Tin is firmer, owing to an advance in foreign markets, but prices or business have not improved. Oils have been generally quiet; Sperm closes at $1 26, Northern Whale 56c, and Linseed Oil, from crusher's hands, 94c. Wool has been quiet, awaiting the arrival of the new clip.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles from the port of NewYork since January 1, 1871, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show *total values*, including the value of all other articles besides those mentioned in the table.

COTTON.

FRIDAY, P. M., June 9, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening June 9. From the figures thus obtained it appears that the total receipts for the seven days have reached 28,136 bales against 36,402 bales last week, 40,178 bales the previous week, and 45,007 bales three weeks since, making the total receipts since the first of September, 1870, 3,821,180 bales against 2,792,879 bales for the same period of 1869–70, showing an increase since September 1 this year of 1,028,301 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	7,376	6,840	Florida bales.	95	45
Mobile	1,724	2,0 0	North Carolina	788	763
Charleston	2,332	1,185	Virginia	8,794	937
Savannah	3,813	2,339			
Texas	4,604	1,033	Total receipts	28,136	17,995
Tennessee, &c	3,111	2,123	Increase this year	10,141	

The exports for the week ending this evening reach a total of 42,323 bales, of which 23,107 were to Great Britain, 12,465 to France, and 6,751 to rest of the Continent, while the stocks as made up this evening, are now 235,508 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Week ending June 9.	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans	11,991	13 021	25 012	12,299	74,373	101,717
Mobile	3,201	713	3,914	....	16 136	34,598
Charleston	....	466	466	....	7,531	9,302
Savannah	3,699	5,009	8 648	8,872	10,353	20,485
Texas	1,135	....	1,135	1,223	56,916	28,974
New York	2,802	....	2,802	5,471	57,2 0	48,000
Other ports	49	7	56	100	13,000	14,000
Total	23,107	19,216	42,323	22 982	235,508	263,886
Total since Sept. 1	2,233,670	749,176	2,982,844	1,982,341	....	....

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 19,361 bales, while the stocks to-night are 28,378 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to June 2, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1. 1870.	1869.	EXPORTED SINCE SEPT. 1 TO— Great Britain	France	Other For'gn	Total.	Northern Ports.	Stock.

The upward movement in prices which has been in progress the past two or three weeks has been further stimulated this week by continued unfavorable crop reports from a considerable section of the South and a favorable response from Liverpool, middling uplands reaching on Tuesday 19⅞c against 17⅞c at the close of last Friday. On the next day, Wednesday, there was a reaction, natural on the rapid rise, middling uplands falling off ⅛c, and the following day a further decline of ⅛c. This retrograde movement was more the result of a temporary lull in the demand than of any actual pressure to sell on the part of holders. The same firmness which they had hitherto exhibited was shown, very little being offered at the decline, and that only by parties desirous of realizing the advance. To-day, with a return of the spinners into the market, picking up a few lots to supply their more pressing wants, prices recovered again, middling uplands closing to-night at 19⅛c, and after change some brokers quoting as high as 19⅛c, with a fair inquiry and few sellers. For forward delivery prices have also advanced again this week, attended on Tuesday with great excitement, but afterwards they fell off largely, and recovering, though not quite to the same extent as spot cotton. For the later months September and October quotations are lower. Low Middling closed to-night at 18½c. for June, 19c. for July, 18⅝c. for August, and 18c. for September. The total sales of this description for the week are 78,250 bales, including —— free on board. For immediate delivery the total sales foot up this week 21,852 bales, including 1,437 for export, 9,635 for consumption, 2,428 for speculation, and 8,352 in transit. Of the above —— bales were to arrive. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	15 @....	15½@....	15½@....	15½@....
Good Ordinary	17⅜@....	17⅜@....	17⅜@....	17⅜@....
Low Middling	18½@....	18⅜@....	18⅜@....	19 @....
Middling	19⅜@....	19⅛@....	19⅜@....	20 @....
Good Middling	20⅜@....	20⅛@....	20⅜@....	21 @....

Below we give the total sales of cotton and price of *Uplands* at this market each day of the past week:

	Total sales.	Ordinary.	Good Ordinary.	Low Middling.	Middling.
Saturday	3,830	14⅛@....	16⅛@....	17⅛@....	18⅛@....
Monday	6,841	15⅛@....	17⅛@....	19⅛@....	19⅛@....
Tuesday	3,937	16 @....	17⅜@....	19 @....	19⅛@....
Wednesday	4,828	15⅜@....	17⅜@....	18⅜@....	19⅜@....
Thursday	448	15 @....	17⅜@....	18⅛@....	19⅜@....
Friday	1,973	15 @....	17⅜@....	18⅜@....	19⅜@....

For forward delivery the sales (including —— free on board) have reached during the week 78,250 bales (all low middling or on the basis of low middling), and the following is a statement of the sales and prices:

For June. bales.	cts.	For July. bales.	cts.	For August. bales.	cts.	bales.	cts.

WEATHER REPORTS BY TELEGRAPH.—Our telegrams to-night indicate that in some sections of the South the weather has been extremely unfavorable, and in others that it has been only partially so, while in still others it has been entirely satisfactory. The rains appear to have been confined to the Gulf and Atlantic States, and to have been more severe at some points than at others. Beginning with New Orleans, we have two rainy days reported, with the prevailing temperature warm and sulty. Passing up through the lower half of Mississippi, the storms appear to have increased in violence and extent, three days of rain being reported in Alabama at Mobile, Selma and Montgomery, though at Montgomery our correspondent speaks more hopefully of the crop, while at Selma the contrary is stated, grass and weeds becoming very troublesome. As the storm approached Georgia it is reported to have been more disastrous; at Columbus our correspondents state that it has rained heavily five days, and much damage has been done; at Macon it has rained six days, and the weather is still unsettled; the telegram from Macon also states that the crop is completely overrun with grass, that in the wet places the cotton is dying, and on account of the grass and wet some land will have to be abandoned; at Augusta complaints of the rain and grass are also made, though the telegram is less full. Leaving Georgia, the storm passed into South Carolina, it having rained every day at Charleston, but we should judge less severely; and from thence going up into North Carolina, where it became of a less serious character. On the other hand, from Memphis and Nashville we have very favorable reports of the weather. It has rained one day at Nashville, but the crop is reported as progressing satisfactorily in Middle Tennnessee, while at Memphis it has been warm and dry all the week, so that the cotton is growing fast; the Uplands need rain. The thermometer has averaged at Memphis and Charleston 79, at Columbus and Macon 78, at Mobile 80, at Selma 84, and at Montgomery 85. Our correspondent at Montgomery telegraphs that the second cotton bloom of the season was sent to Messrs. Norton, Slaughter & Co. to-day.

FUTURE PROSPECTS.—Some of the principal facts in the problem as to the future of cotton are now clearly established, and in forecasting the future of the market the two agencies ever at work affecting prices should be carefully considered, for they are not unfrequently opposite in their influence.

1. In our issue of May 20th we pointed to one of these agencies by giving a statement of the very small remnant of this crop left in this country. At that date, on the basis of a crop of 4,185,000 bales, we showed that there was remaining (after deducting the foreign engagements and our own consumption for the year) only about 300,000 bales for stock at the end of the year and for future purchases on foreign account, while the growing plant promised but poorly. This indicated a very short supply this year and a somewhat restricted supply next year, and we intimated to our readers that the tendency of the market must be upwards. Since then prices have advanced from 15¾c for middling uplands to 19⅞c on Tuesday last, closing to-night at 19⅝c. This has been a very rapid advance, and some reaction would not be unnatural. But for spot cotton is it safe to operate for any material and permanent decline, even at that price? Is not the available supply between now and September 1 so very small as to make it hazardous? A tight twist is an easy work when the amount to be handled is so limited.

2. Again, is not the increasing consumption all over the world, taken in connection with our own unfavorable crop reports, sufficient to justify a higher range of prices for the next crop than have ruled during late months? We see that with a yield of considerably over four million bales the visible supply is now only 500,000 bales in excess of last year. There can be no doubt but that the next yield will be less than the present one by more than that amount. The facts we have published the past two weeks settle that point. On the other hand, Europe has during the year been preparing to increase its spindles, and unless prices go so high as to check it, her consumption will be larger than during this year. In view of these two facts, even if there were no others, it is not reasonable to expect during the coming season the very low figures which have ruled during the past season.

3. Yet, notwithstanding these facts, are not prices nearing a point when other agencies must come into play and check further advance? Of course, if crop reports continue bad, higher rates the will be established. But it is well not to discount too rapidly the unfavorable crop accounts, and also to remember that there is a considerable crop in India at present held back which high prices will move, and further that there is great difference to the consumer between 9d per lb. and 7d per lb., especially when we find that goods in the Eastern markets have of late found poor sale.

GUNNY BAGS, BAGGING, &C.—The market for foreign Cloth is very dull, and favors buyers. There are free sellers at 18c., but no one with confidence enough to make a bid. The only sale made known is 50 bales Borneo in Boston at 12c., gold, in bond. There has been a fair trade done in Domestic, which, on account of its evenness, is much preferred to Foreign, and we note sales of 3,000 rolls here and in Boston at 19¼c, 60 days. Bags are quoted at 14@14¼c. for 440s, without sales. In empty Linseed Bags a large movement has been in progress, with sales of 400,000, all this year's delivery, at 20¼c. Hemp has ruled rather quiet, but is held rather firmly; sales are 500 bales Manila at 10¾c., and 250 bales at 11¼c, gold; also 933 bales Sisal on private terms. Jute is dull, the only transaction being 100 bales rejections at 5¼c., currency. Jute Butts are fairly active, and the market is very steady. The sales are 2,100 bales in Boston at 4c., cash and time; in this market 1,025 bales at 4¼c., and 450 bales to arrive per Dinapore and Cherwell, on private terms.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	Week ending June 9, 1871.			Week ending June 9, 1870.		
	Receipts.	Shipments	Stock.	Receipts.	Shipments.	Stock.
Augusta.....	601	1,633	4,334	302	567	11,555
Columbus.....	347	348	2,596	106	714	5,616
Macon.....	231	227	2,524	113	532	6,673
Montgomery....	292	405	4,096	89	696	4,456
Selma.....	278	394	1,201	71	96	8,200
Memphis.....	2,131	4,278	5,648	2,103	3,684	12,044
Nashville.....	1,287	1,060	1,112	331	241	4,780
	5,167	8,345	21,511	3,115	6,530	48,324

The above totals show that the interior stocks have decreased during the week 3,178 bales, and are to-night 26,813 bales *less* than at the same period last year. The receipts, however, have been 2,052 bales in excess of same week last year.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons:

	1871.	1870.
Stock in Liverpool.....bales.	914,000	603,000
Stock in London.....	85,048	26,690
Stock in Glasgow.....	600	400
Stock in Havre.....	20,670	137,070
Stock in Marseilles.....	14,319	9,400
Stock in Bremen.....	61,188	21,061
Stock rest of Continent.....	30,000	50,000
Afloat for Great Britain (American).....	206,000	155,000
Afloat for France (American and Brazil)...	49,000	33,109
Afloat for Bremen (American).....	38,223	12,847
Total Indian Cotton afloat for Europe*....	415,147	328,180
Stock in United States ports.....	235,508	263,886
Stock in inland towns.....	21,511	48,324
Total.....	2,091,214	1,688,967

* This item includes all India cotton afloat for Europe, and also all cotton afloat for Liverpool other than American.

These figures indicate an *increase* in the cotton in sight to-night of 402,247 bales compared with the same date of 1870.

The exports of cotton this week from New York show a decrease since last week, the total reaching 5,781 bales, against 11,718 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

EXPORTED TO	WEEK ENDING May 13.	May 20.	May 27.	June 3.	Total to date.	Same time prev. year.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 33,945 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in THE CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night:

	Total bales.
NEW YORK—To Liverpool, per steamers China, 229....Wyoming, 1,553....Pennsylvania, 1,033....Batavia, 58....Oceanic, 156....City of London, 376....Italy, 1,700....Nebraska, 400	5,505
To Bremen, per steamer Rhein, 200	200
To Hamburg, per steamer Cimbria, 76	76
NEW ORLEANS—To Liverpool per bark Geo. Peabody, 1,905	1,905
To Queenstown, per bark Suez, 1,723	1,723
To Havre, per ships Itasca, 3,685....Belle Morse, 4,104	7,789
To Barcelona, per barks Providence, 725....Ynes, 379	1,104
MOBILE—To Barcelona, per bark Filomena, 490....per brig Nicasia, 475..	965
CHARLESTON—To Liverpool, per ship Remington, 2,943 Upland and 338 Sea Island....per bark Othere, 2,216 Upland	5,497
To Barcelona, per brig Sebastian, 270 Upland	270
SAVANNAH—To Liverpool, per ships S. Curling, 4,684 Upland and 3 Sea Island....John Mann, 1,146 Upland and 195 Sea Island	6,028
To Bremen and Gottenburg, per bark Alamo, 1,250 Upland	1,250
TEXAS—To Havre, per bark Granton, 1,211	1,211
To Narva, Russia, per brig Alpha, 415	415
BOSTON—To other foreign ports, 7	7
Total	33,945

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 111⅞ and 112½, and the close was 112½. Foreign Exchange market is steady. The following were the last quotations: London bankers', long, 110½@——; short, 110⅝@——, and Commercial, 109⅞@110. Freights closed at ¼d. by steam and 3-16d. by sail to Liverpool.

BY TELEGRAPH FROM LIVERPOOL.—

LIVERPOOL, June 9, 5 P. M.—The market opened steadier and closed firmer, with sales of the day footing up 15,000 bales, of which 6,000 bales were taken for export and speculation. The sales of the week have been 144,000 bales, of which 20,000 bales were taken for export and 47,000 bales on speculation. The stock in port is 914,000 bales, of which 579,000 bales are American. The stock of cotton at sea bound to this port is 481,000 bales, of which 206,000 bales are American.

	May 19.	May 26.	June 2.	June 9.
Total sales	106,000	99,000	83,000	144,000

	Imports. This week.	To this date 1871.	To this date 1870.	Total. 1870.	Stocks. This day.	Same date 1870.	Dec. 31, 1870.
American.....	45,233	1,496,401	876,822	1,655,991	559,960	384,370	109,710
Brazilian.....	4,474	190,645	183,879	390,564	114,680	65,370	28,150
Egyptian.....	3,938	137,250	87 676	191,737	93,690	52,040	39,760
W. Indian, &c.	89	39,299	20,427	84,720	35,940	7,800	20,550
East Indian...	36	239,632	217,258	902,139	109,180	96,440	180,550
Total.....	53 795	2,044,952	1,407,450	3,252,282	913,450	606,380	378,720

Of the present stock of cotton in Liverpool 61.25 per cent is American against 62.25 per cent last year. Of Indian cotton the proportion is nearly 12 per cent, against nearly 16 per cent.

LONDON, May 27.—There is a good demand for cotton and prices are rather higher. The following are the particulars of imports, deliveries and stocks:

	1869. bales.	1870. bales.	1871. bales.
Imports, January 1 to May 25	116,187	55,374	100,457
Deliveries	186,199	150,928	89,104
Stocks, May 25	75,217	36,690	85,048

ALEXANDRIA, May 12.—Good and fine cotton is scarce, but other kinds are dull at about late rates. Fair cotton is quoted at 7⅞d to 7¾d; good fair, 8¼d to 8½d; fully good fair, 8½d to 8¾d per lb. The shipments since November 1 have been:

	Great Britain. bales.	Continent. bales.	Total. bales.
From Nov. 1, 1870, to May 11, 1871	165.805	50,493	216,298
Same period 1869-70	133,972	38,809	172,781
" 1868-9	127,169	42,007	169,176
" 1867-8	156.946	39,750	196.696
" 1866-7	147,700	28,423	176,123

BREADSTUFFS.

FRIDAY P. M., June 9, 1871.

We have had a small but pretty general improvement in the market for Breadstuffs during the week, the result, mainly, of reduced receipts here and at the West and some decline in ocean freights, closing strong.

Flour has arrived but moderately, and the demand has not been brisk, but the relative dearness of Wheat has made holders unwilling sellers, and the low grades of State and Western brands, the good supers and common extras from new wheat, have brought some advance, while the medium grades have shown a little weakness. To-day there were buyers of mixed to prime extra State at $6 25@$6 40, but the demand was not generally met, but favorite Western in round hoop sold at $6 50@$6 60.

Wheat has improved 4@6c. per bushel. The receipts have been materially reduced and holders have offered sparingly, insisting daily upon a slight advance, which a decline in ocean freights and an advance in gold have enabled shippers to pay to a moderate extent, but the business shows a great falling off as compared with the previous few weeks. The accounts from Liverpool are barely steady, and show the arrival of large quantities of other than American Wheat in that market, for the first time in many months. To-day, this market opened weak, but recovered and slightly improved; New Spring selling at $1 54@1 55½, to arrive and on spot.

Corn has shown a gradual improvement on reduced supplies, better quality of the offerings, and a decline in ocean freights with the development, towards the close, of some speculative feeling, based on the fact that the increased receipts at the West bear no proportion to the increased demand. At to-day's market prime and choice mixed sold at 75@76c.

Rye has declined and closes unsettled; some Canadian has sold for export at about 95c. in bond. Barley Malt has advanced. Oats have been in active request and close firm at 66@68c. for good to prime cargoes.

The following are the closing quotations:

Flour—		Wheat, Spring, new, bush	$1 50@ 1 56
Superfine	$ bbl. $5 65@ 6 00	Red Winter	....@ ....
Extra State	6 35@ 6 60	Amber do	1 64@ 1 67

GROCERIES.

FRIDAY EVENING, June 9, 1871.

The general market does not appear to have undergone any very decided change for the period intervening since our last publication. The firmness on Teas and Sugars is still quite noticeable, while Molasses and Coffee find no open inquiry, and are the source of considerable trouble to owners. The distribution of goods to the interior is comparatively small, but probably not any more so than usual at this season, and has been a little retarded by an advance in freights. It is thought, however, that the cautious policy of the small dealers has kept them in small stock, and that should they merely buy for current consumption they must keep a few goods moving throughout the summer. Any ordinary selection can be made without much difficulty, but the assortment in first hands is not extravagant by any means, and some of the best lots are withdrawn for the present.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black	4,845 pkgs.	Laguayra	191 bags.
Green	6,796 pkgs.	Other	1,289 bags.
Japan	2,134 pkgs.	Sugar, Cuba	6,061 boxes.
Various	1,990 pkgs.	Cuba	8,899 hhds.
Coffee Rio	7,858 bags.	Porto Rico	1,388 hhds.
Java	4,650 mats.	Other	1,258 hhds.
Maracaibo	2,511 bags.	Sugar, Brazil	.... bags.
		Manila, &c.	75,884 bags.
		M'las's, Cuba	895 hhds.
		Port Rico	1,420 hhds.
		Demerara	37 hhds.
		Other	558 hhds.

*Hhds. include bbls. and tcs. reduced

Imports this week at this port have included 12,700 bags of Rio, 2,469 do of Maracaibo, and 1,019 do St. Domingo. The receipts of Sugar are 24,969 boxes and 19,980 hhds. Of Molasses 5,813 hhds have arrived. In Tea the imports are 110,975 pounds of Black and 442,881 pounds of Green.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at date. 1871.	1870	Imports at leading ports since January 1, 1871.	1870

Molasses.....hhds.	11,057	18,515	181,697	196,189

TEA.

The volume of business has not been very large, nor did dealers apper to expect it, but the market has gained rather than lost tone, and a general feeling of much confidence is expressed. The accumulations are moderate as compared with the expectations of the early portion of the season, and the withdrawals are liberal in part on back purchases, to be sure, but still tending to reduce stock. Greens are still considered the most desirable goods, as there is but little probability of any further arrivals of magnitude, most of the supplies having been sent through early in the year. Fine Oolongs and Japans, however, are well supported, and of all kinds a good many parcels have been taken off the market entirely for the present, owners feeling assured of much more profitable returns later in the season. Sales of 8,355 Greens, 1,900 Japans and 2,800 Oolongs.

The imports this week include 110,975 pounds of Black Tea, per "Stephen Bishop," from Hong Kong, and 442,881 pounds of Green Tea, per "Witch," from Shanghae.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871	13,232,335	13,776 897	6,315,769	32,927,301
1870	12,296 139	12,653,083	6,044,418	30,995,589

The indirect importations, including receipts by Pacific Mail steamers via Aspinwall, have been 11,490 pkgs. since January 1, against 31,496 last year.

COFFEE.

It would probably be difficult to find a market so entirely destitute of animation as that for all kinds of coffee during the greater part of the past week, and there are really few if any new features to advice. Bothbuyers and sellers express about the same feelings as before, the one refusing to take goods because there are no consumptive distribution, and the other refusing to encourage business by allowing further important concessions, as the losses are already very heavy, and it is deemed better to hold on and take the hances of a reaction. The stock of Brazils has considerably increased, the arrivals including one large parcel per steamer, and there is now a liberal aggregate from which to make selections, with the assortment fair, though still running rather too much into the finer grades. Importers have continued to offer their supplies at about former rates, but refused to submit to a further decline. Mail advices from the points of production are encouraging for holders of stocks in view of the reported material decrease of the crop, and there is a growing determination to exhibit a firm front, and resist all declining tendencies with as much tenacity as possible, the accrued losses already being quite heavy. The outports have also shown dullness, and are commencing to accumulate stocks. Java is seldom inquired after, either in first or second hands, and is somewhat nominal. West India styles have been greatly neglected, and continue in a nominal sort of state, though on a great many parcels holders are anxious to realize, and would concede something from quoted figures to secure buyers. The crop prospects are very encouraging on some of the West India islands—St. Domingo in particular. Sales of 6,686 bags Rio, 800 bags Costa Rica, 500 bags Laguayra, 750 bags Maracaibo, 1,200 Eighth, and 1,200 quarter bales Mocho, and shipped to Europe from first hands about 1,000 bags St. Domingo.

The imports this week have included 12,700 bags of Rio by the "Humboldt," 2,469 do. Maracaibo by the "Recruit," and 1,019 do. St. Domingo by the "Port au Prince."

The stock of Rio June 8, and the imports since Jan. 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.
Stock	92,712	....	42,175	8,546	10 468	4,000	157,921
Same date 1870	96,043	....	22,141	2,000	8,000	....	68,184
Imports	313,034	14,805	242,821	119,102	44 819	11 000	742,841
" in 1870	267,961	....	200,448	81,602	20,902	3,045	573,959

Of other sorts the stock at New York, June 8, and the imports at the several ports since January 1, 1871, were as follows:

In bags	New York stock.	New York import.	Boston import.	Philadel. import.	Balt. import.	N. Orle's import.	Total imports at all the ports
Java and Singapore	47	*46,887	*48,525	*1,962	....	....	
Ceylon	7,280	6,6'0	...	....	....	....	
Maracaibo	11,650	29,266	....	....	....	....

SUGAR.

For a day or two following our last there was a pretty heavy movement in Raw Sugars, partly grocery stock, but largely refining grades, with selections made from good qualities whenever they could be obtained, a few of the best lots even commanding a slight advance. These purchases, however, appeared to satisfy the most urgent wants of buyers, and with current arrivals more than balancing the outlet, greater caution was subsequently, with some little tameness in values, developed with a dropping off in the demand. There was also at times a considerable amount of stock offering from pier with an occasional moderate pressure to realize on odd lots, and this contributed to turn the balance slightly on the downward scale. But buyers have not secured any decided advantage, and holders seem little inclined to allow them any at present. This is the commencement of a dull season, to be sure, and the supplies in first hands are accumulating, while there is to be expected some shading in price now and then, but the short crop of Cuba, the hopes of an European out let, and a good home call in regular season infuses a general feeling of confi dence in the future, and the disposition is to hold supplies in store with much firmness. Refined goods have met with a very fair distribution, and on some grades higher rates were obtained, with a pretty firm tone prevailing, but refiners have little inclination to allow their production to accumulate, and most outlets were willingly met. Sales of 6,122 hhds. Cuba; 1,794 hhds. Porto Rico; 239 hhds. St. Croix; 900 hhds. Martinique; 647 hhds. English Island, about 100 hhds. Scotch Clarified; 30 hhds. New Orleans, and 1,783 boxes Havana.

Imports at New York, and stock in first hands, June 8, were as follows:

	Cuba, bxs.	Cuba, *hhds.	P. Rico, *hhds.	Other *hhds.	Brazil, bags.	Manila, bags.	&c, Melado hhds.

MOLASSES.

The demand for foreign descriptions continues extremely moderate from all sources, and we have again to record a very dull and tame market. The grocers generally are distributing very slowly, and require scarcely any stock, even in the ordinary jobbing way, and refiners have an ample accumulation on hand from direct importation, not only to satisfy the small amounts necessary to work up to meet the prevailing distribution of their production, but a few can be found with a surplus which they are willing to place upon the market. Importers' stocks on hand are not large, but have increased slightly, and are found to be somewhat inconvenient, with no outlet at present or in the immediate future. The condition of business renders values somewhat nominal, but easy terms would undoubtedly be allowed on any grade, while inferior or distilling qualities could be bought very low. Domestic has sold to some extent in job lots, but without freedom, and the large stock is costing something to carry, but holders refuse to concede, and prices remain nominally as before. Syrups are plenty and dull. Sugar house molasses moves very slow, and the market is weak at 19c in hhds. and 23c in bbls. Sales of 100 hhds. Cuba muscovado, 75 hhds. Cuba clayed, 550 hhds. Porto Rico, 200 hhds. English Island, and 300 bbls. New Orleans.

The receipts at New York, and stock in first hands, June 8, were as follows:

*Including tierces and barrels reduced to hhds.

SPICES.

The market has improved in tone somewhat since our last, and there have been some very fair sales of invoices from first hands consummated, prices ruling strong and in some instances a shade higher, with a little speculative feeling developed. Nutmegs were for a long time under fair control and most of the outside lots are now understood to have been picked up with a view to a more thorough concentration. Ginger, both Calcutta and African, has attracted considerable attention, and of Cloves the purchases are said to cover pretty much everything likely to come to hand for several months. Other styles did not sell with much freedom, but show more strength in sympathy. Jobbers have made about an average distribution, and in some cases were pretty busy, with full prices insisted upon and paid without much apparent hesitation.

FRUITS, &c.

The market for Foreign dried has been, as a whole, quiet during the past week. One large movement, embracing 42,000 boxes layer Raisins, has taken place, but the terms we did not learn. There has been no perceptible change, however, prices being quoted as before, $2 40 for jobbing lots. Sardines at a shade easier prices, have been fairly dealt in, but closed quiet. Currants have moved very slowly, and are without change in prices, though they rather favor the buyer. Prunes are quiet and sales are small, mostly at 8@8¼c for Turkish. Nuts are selling moderately in lots at easy prices.

Foreign Green are in good demand and firm for West India kinds. Oranges repacked selling at $5 50@6 50 per box, and Lemons $5@6 per box. West India kinds are in large supply, but sell rapidly at $8@12 per hundred for Pine Apples; $1 50@2 50 per bunch for Bananas, and $30@35 per thousand for Cocoanuts. At auction to-day Palermo Oranges brought $3 80@5 per box, and do Lemons $3 50@3 80 per box.

Domestic Dried Apples are in light demand. The sales are confined to lots for the wants of jobbers, generally at low prices. Peaches are nominal. Blackberries are firm. Pitted Cherries are scarce and wanted. Peanuts are less active and hardly so firm.

Domestic Green are in full supply, but meet with a good demand. Strawberries, 15@30c per quart. Cherries, 15@25c per lb. Georgia Peaches, in good order, $12@$15 per crate, and Virginia Apples, $2@$3 80 per crate.

ADVICES FROM PRODUCING MARKETS.

Tea.—Messrs. Aug. Heard & Co.'s telegram, dated Hong Kong, May 25, is as follows: Tea market for England opened at Hong Kong 5 per cent higher than last year. Quality of black tea crop generally inferior to that of last year.

Rio Coffee.—From Messrs. Boje & Co.'s market report of May 6, 1871, we learn that during the previous fortnight there had been a very active market; purchases were largely for the United States; aggregate sales, 114,000 bags. The demand was mostly for low and medium grades, and for these descriptions the market closed very firm, while for highest grades the quotations were lower. Stock at date, 120,000 bags; daily arrivals averaged 6,000 bags.

Cuba Sugar.—HAVANA, June 2.—CLAYED.—The late advance of prices in the leading foreign markets has not been felt here by a corresponding improvement, although there is certainly more firmness on the part of holders, many of whom are entirely adverse to sell at present, in the hopes that still higher values will be established ere long, on account of the comparatively small stock in the United States, in Europe and here. Our receipts of sugar from the interior have greatly diminished, as may be seen by the statement at foot; and the stocks, compared with those at this date in 1870, are much smaller, the desirable sorts especially being scarcer than in previous years. The sales which have been reported during this week amount to about 15,000 boxes.

MOLASSES SUGAR.—In spite of the decided reluctance of buyers to operate, holders sustain firmly their high pretensions; and though the number of transactions have been comparatively limited, prices have undergone no decline.

CENTRIFUGALS.—The demand is also encalmed for these sorts of sugars; but owing to the same motive reported above we reproduce our previous quotations.

MUSCOVADOS.—In spite of the unfavorable news received from the United States at the beginning of the week, our market continued firm and rates steady. Owing to better news received from New York at the close, more decision is noted on sellers' side, many of whom, especially those who are better informed of the situation of foreign markets, are endeavoring to obtain better rates.

THE DRY GOODS TRADE.

FRIDAY, P. M., June 9, 1871

The market has been excited during the past week over the advance in raw cotton and cotton goods, and a large trade has been done by package dealers. In their anxiety to lay in stocks before the advance in prices, buyers have cleared the market of many cotton fabrics, and are buying largely to arrive, although few commission men will take orders for goods to be made accept at value. The jobbing trade is unimportant in all fabrics, the demand not extending beyond a few cotton goods suited to the immediate wants of consumers. A few buyers from the interior have been in the market during the week for goods to replenish stocks, but the distribution does not appear to be progressing actively enough to reduce stocks materially, and the prospects for a June trade with wholesale dealers is not very encouraging.

Collections are made freely in nearly all sections, the complaints of a scarcity of money not being unusually numerous, while failures are of very rare occurance, and are generally unimportant.

DOMESTIC COTTON GOODS.—The continued firmness in the raw material has had the effect of advancing several lines of cotton goods, and a general rise is likely to occur. Low grade brown cottons are in active demand, and some of the most prominent makes are entirely sold out of the market. The advance in these goods has been general, and nearly all brands of medium grades have also been marked up ¼c during the week. Standards are higher in a few instances, and the revision will doubtless be general. Bleached goods have moved more freely during the present week, and higher prices have been established on the fine and medium qualities. There are some prominent brands still selling at the old figures, but these are likely to advance at any time. The movement in colored cottons has been heavy, and favorably known makes of stripes and ticks are sold to arrive in several instances. An advance of 1c. per yard has been established on some makes, while others are only selling to arrive and at value, the agents not deeming it prudent to advance quotations, although no orders for future delivery would be taken at the present prices. Canton flannels have sold freely to full package buyers at prices a trifle below those current last year. Rolled jaconets continue very scarce, and the recently advanced quotations are easily obtained. Other cotton goods are firm and unchanged.

DOMESTIC WOOLEN GOODS.—The principal feature of the trade in woolen fabrics has been a revival of the demand for flannels, which are again moving freely. As was the case some weeks since, the demand is chiefly for the lower grades, both in white and colored goods. Scarlets are selling well at present, while gray mixed goods also find a ready market at full prices. No advance has been made since our last report, but the market continues very firm with an upward tendency. Fine flannels are not in demand, and no sales are reported. Fancy cassimeres sell in limited amounts to supply the wants of clothiers, but are not in general demand, and sales are confined to the lower grades. Overcoatings sell moderately, the demand being chiefly for fine goods, which are taken freely by large buyers at full prices, as an advance is expected soon. Cloths are in moderate demand, with quotations unchanged.

FOREIGN GOODS.—There are no new features to report of any branch of the foreign goods trade. In first hands the business is about over for the season, and importers are closing out the small stocks they still hold through the auction houses. Jobbers have been doing a moderate business in small lots of summer dress goods for immediate distribution. Liberal concessions are offered as is usual at the close of a season to close out stocks. The high prices which manufacturers are paying for wool abroad will, of course, enhance the cost of Winter fabrics, but we do not learn that goods are likely to open here at a material advance on last year's prices. The advices from foreign buyers are meagre as yet, however, and later reports may indicate a decided advance.

We annex a few particulars of leading articles of domestic manufacture, our prices quoted being those of leading Jobbers:

BROWN SHEETINGS AND SHIRTINGS are in good demand and are held in very small supply. Prices have advanced in many instances and are firm. Amoskeag A 36 12 do B 36 11 Atlantic A 36 12¼, do D 36 11, do H, 36 12 Appleton A 36 12, Augusta 36 11, do 30 9½, Bedford R 30 8½ Boott O 34 10, Commonwealth O 27 6½, Grafton A 27 7½, Great Falls M 36 10½@11 do S 33 9½, Indian Head 36 12½ do 30 10, Indian Orchard, A 40 12½, do C 36 10½, Laconia O 39 12½ do B 27 11, Lawrence A 36 10½, Lyman C 36 10½, do E 36 11½, Medford 36 11½, Nashua fine O 33 11½, do R 36 13, do E 40 14½ Newmarket A 36 10, Pacific extra 36 12, do L 36 11, Pepperell 7-4 22½, do 8-4 25, do 9-4 27½, do 10-4 32½, do 11-4, 37, Pepperell E fine 39 12½, do R 36 11½, Pocasset F 30 8½, Saranac fine O 33 11½, do R 36 12½, Stark A 36 12, Swift, River 36 8½, Tiger 27 8.

BLEACHED SHEETINGS AND SHIRTINGS are selling fairly in full packages and prices are stiff, with some advances since our last report. Amoskeag 46 16½, do 42 15, do A 36 15, Androscoggin L 36, 16. NEW YORK, March 15, 1871.

Publication.

THE NEW YORK DAILY BULLETIN,

A First-Class Daily Commercial and Financial Journal.

The BULLETIN furnishes—

1st. The most complete FINANCIAL REPORT published in any daily paper, embracing:

The daily sales and quotations of every Security dealt in at the Stock Exchange and the Mining Board.

The quotations of Securities not on the Stock Exchange list, including Southern Stocks and Bonds.

A transcript of the official register of the Gold Room, showing every quotation from the formal opening to the formal closing of the Room—published in no other paper.

A summary of the daily transactions at the SUB-TREASURY, the GOLD EXCHANGE BANK, and the CLEARING-HOUSE.

A full table of quotations of STERLING and CONTINENTAL EXCHANGE.

THE CHANGES IN THE REDEEMING AGENTS OF THE NATIONAL BANKS, AND THE OFFICIAL PERIODICAL STATEMENTS OF THE NATIONAL BANKS IN EACH STATE, as furnished by the Comptroller of the Currency—published by no other daily paper.

2d. The most accurate and the ONLY DAILY report of the DRY GOODS MARKET, including a full PRICE CURRENT of staple and domestic fabrics, which is corrected daily.

3d. A carefully prepared report on the PRODUCE MARKETS, much fuller in its details than that of any other daily journal, embracing a full Price Current semi-weekly.

4th. A daily statement of the RECEIPTS OF PRODUCE, the IMPORTS FROM FOREIGN PORTS, and the MANIFESTS OF VESSELS CLEARED AT THE CUSTOM HOUSE.

5th. Its CITY COMMERCIAL and FINANCIAL NEWS is fuller than that of any other journal.

6th. In its EDITORIAL DEPARTMENT the BULLETIN gives a fuller discussion of current commercial and financial topics than any other journal in the United States; and in this especially its influence ranks second to that of no other paper in the country.

7th. Its PRICE IS ONLY ABOUT ONE-HALF that of other leading commercial papers, and yet its information is fuller and in all respects as valuable.

GREAT NATIONAL LOAN.

$133,000,000 NEW FIVE PER CENTS.

PRINCIPAL AND INTEREST PAYABLE IN COIN.

INTEREST QUARTERLY, FEBRUARY, MAY, AUGUST AND NOVEMBER.

BONDS FREE OF ALL TAXES, LOCAL OR NATIONAL.

The Treasury Department having already received subscriptions to the amount of $67,000,000 to the first two hundred millions of the New Loans authorized by the Act of Congress of July 14, 1870, for refunding the Public Debt, bearing five per cent per annum interest, now offers to popular subscription the remaining $133,000,000 of this particular Loan, and is prepared to promptly deliver the Coupon Bonds or Registered Certificates in exchange, dollar for dollar, for any of the United States six per cent Bonds or Registered Stocks, known as *Five-Twenties*, or for Gold Coin at the par value of the New Loan, and accrued interest from the first of May. When this amount, to which preference is given, is taken up, the remainder of the Five per Cents, $300,000,000, embraced in the Act will be offered in connection with $300,000,000 Four and one-half per Cents, and any part of $700,000,000 of Four per Cents, the one running fifteen years and the other thirty years.

The following is a copy of the New Five per Cent. Bond, under and pursuant to the Act of Congress:

FORM OF FIVE PER CENT. BOND.

INTEREST | FUNDED LOAN OF 1881. | FIVE PER CENT.

UNITED STATES OF AMERICA.

ARE INDEBTED TO THE BEARER IN THE SUM OF ..... DOLLARS.

THIS BOND is issued in accordance with the provisions of an Act of Congress entitled "An Act to authorize the refunding of the National Debt," approved July 14, 1870, amended by an Act approved January 20, 1871, and is redeemable at the pleasure of the United States after the first day of May, A. D. 1881, in coin of the standard value of the United States on said July 14, 1870, with interest in such coin from the day of the date hereof, at the rate of FIVE PER CENTUM per annum, payable quarterly, on the first day of February, May, August and November in each year. The principal and interest are exempt from the payment of all Taxes or Duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority.

WASHINGTON, ..., ..., 18....

Entered ..... Recorded .....

.....

Register of the Treasury.

Registered bonds will be issued of the denominations of $50, $100, $500, $1,000, $5 000, $10,000, and coupon bonds of each denomination except the last two. The interest will be payable in the United States at the office of the Treasurer, any Assistant Treasurer, or designated depository of the Government, quarterly, on the first days of February, May, August and November in each year.

The interest on the registered stock of this loan, it is determined by the Treasury Department, will be paid by Gold Check for the Quarterly Interest, to the Post-Office address of every holder, free of trouble or expense, dispensing with attendance, in person or by proxy, at the Treasury for the purpose of receipting for and drawing such interest.

The whole proceeds of the new loan will be applied to the payment or redemption and cancellation of the 5-20 years six per cent. bonds, and in addition to these proceeds the 5-20s are being reduced by purchases, averaging, for two years past about $10,000,000 per month.

The entire effect, therefore, of the New Loan, in connection with the existing Sinking Fund process of the Treasury, is to reduce both Principal and Interest of the Public Debt of the United States. *The Loan creates no additional supply of Government Stocks*, while the application of the surplus revenue is constantly lessening the Funded Stocks bearing six per cent. gold interest.

The policy of the Government since the close of the War in 1865, which left a debt upon the country of $2,755,000,000, and an annual taxation of $311,000 000, has been to reduce steadily both Debt and Taxes: to reduce the Principal of the Debt by actual payments, and to lessen the annual burden of Interest, and thereby the burden of Taxation, not only through such payments, but by funding the debt at the cheapest rates of interest practicable from from time to time, until it is now felt that the very cheapest rates are due to the high Credit, unblemished Public Faith, and vast and growing resources of the country. From $2,755,000,000 the Principal of the Debt has been reduced to $2,260,000,000—both sums exclusive of accrued interest—and from the heavy burden of $151,832,000 per annum, the Interest charge has been reduced to $112,780,000 per annum; while the annual taxation, under the Internal Revenue system, which the necessities of the War and the Debt thereby created rendered necessary for at least a short series of years, has been reduced from $311,000,000 in 1865-66 to about $154.000.000 per year in 1870-71, (estimating for the highest probable collections in the current month, the last of the Fiscal year), or less than one-half the first named sum. And in the year 1871-72 a further reduction of $28,000,000 will come in under the Act of July, 1870, so as to give only $126,000,000 for the year, or about two-fifths the maximum of 1865-66.

By the successful refunding of the Public Debt at moderate rates of Interest, and by continued economies in the expenditures of the Government—which in two years, from March 4, 1869, to March 4, 1871, amounted to $126,700,949, or an average saving per year of $63,350,474—it is believed that nearly the entire system of Internal Taxes can be dispensed with in a few years, or so much of it as requires the machinery of District Assessors and Collectors.

The Secretary of the Treasury has just published the Monthly Schedule of the Public Debt to June 1, from which it appears that he has further reduced the total of Funded Gold-bearing debt since May 1 by the sum of $8,000,000, by purchase of United States 5-20s for the Sinking Fund, and reduced the 5-20s by the further sum of $8,217,400 by conversion into the new 5 per Cents. The whole Funded Debt now stands $1,894,128,750, as against $2,107,846,150 two years ago, when the present Administration came into office. Adding to these sums the net Circulation of the Treasury, (that is, in Greenbacks and Greenback Certificates, after deducting Gold and Currency on hand), the following is the comparison of Debt of all kinds, at present, and at the close of the War, and in 1869:

	July, 1865.	March, 1869.	June, 1871.
United States Stocks	$2,150,784,112	$2,107,846,150	$1,894,128,750
Circulation	605,211,163	383,545,854	366,333,003
Total	$2,755,995,275	$2,491,392,004	$2,260,461,753

The following table affords a classification of the Funded Stock (in Gold) of the United States as at present outstanding:

Date.	Coupon.	Registered.	Total.
Five-Twenties, 1862	$382,958,500	$103,973,500	$486,932,000
Five-Twenties, 1864	44,752,650	55,924,100	100,676,750
Five-Twenties, 1865	123,660,150	53,552,100	177,212,250
Five-Twenties, 1865 (new)	179,369,500	70,851,450	250,220,950
Five-Twenties, 1867	241,686,550	91,325,100	333,011,650
Five-Twenties, 1868	28,009,350	11,603,000	39,612,350
Total Five-Twenties	$1,000,436,700	$387,229,250	$1,387,665,950
Sixes, 1881	93,260,400	190,417,700	283,678,100
Fives, Ten-Forties	57,279,650	137,287,650	194,567,300
Fives, 1874	13,955,000	6,045,000	20,000,000
New Fives, 1881	5,117,000	3,100,400	8,217,400
Total	$1,170,048,750	$724,080,000	$1,894,128,750
Total March 4, 1869			2,107,846,150
Reduction of Funded Debt			$213,717,400
Yearly Gold Interest charge, 1869			$124,255,350
Present yearly charge			$111,419,993
Reduction in Interest Charge			$12,835,357

The proposed further reduction of the annual interest charge upon the Public Debt by refunding is as follows:

By exchange of $500,000,000 United States six per cents for new five per cents of 1881	$5,000,000
By exchange of $300,000,000 United States six per cents for four and a half per cents of 1886	4,500,000
By exchange of $700,000,000 United States six per cents for four per cents of 1901	14,000,000
Total saving per annum by refunding	$23,500,000

WINSLOW LANIER & Co,
NO. 27 PINE STREET, NEW YORK,
OFFER FOR SALE
THE FIRST MORTGAGE 7 PER CENT GOLD BONDS
OF THE
Evansville, Terre Haute and Chicago
RAILWAY COMPANY.

This road, 55 miles long, of which 44 are completed extends from Terre Haute, Indiana, northerly to Danville, Illinois, forming part of the great through route from Chicago to Terre Haute, Evansville, Nashville and the South.
The remaining 11 miles will be finished in August, and it is expected that the entire line from Chicago to Nashville will be completed about the same time.
The Capital Stock of the Co is $450,000
payable in cash at par, and nearly all paid in.
The Bonded Debt is - - - $775,000,
of which but THREE HUNDRED THOUSAND remain unsold, and are offered at NINETY per cent and accrued interest. The principal and interest are
PAYABLE IN GOLD COIN.

Coupons are due May and November, in New York The bonds will be registered if desired.
The character of the managers of this road, among whom are CHAUNCEY ROBERTS, Esq., of Terre Haute, and other successful and experienced railroad men, and its prospective business in coal, iron and the agricultural products of the rich Wabash Valley, justify us in recommending these bonds as a good investment.

PORT HURON & LAKE MICHIGAN
SEVEN PER CENT GOLD BONDS,
Having the Endorsement of two Railways,
GREAT WESTERN OF CANADA,
DETROIT & MILWAUKEE, Michigan

A Limited number of the bonds of this road have been placed in our hands FOR SALE at NINETY AND ACCRUED INTEREST. To those desiring a safe paying investment we have no hesitation in offering them as equal to anything in the market. For particulars, maps, pamphlets &c., send to, or call upon
DRAKE BROTHERS,
BANKERS, 16 Broad St.

NEW YORK
State Railroad Bonds.
A First-Class Home Investment.
FIRST MORTGAGE GOLD BONDS
OF THE
Rondout & Oswego RR.
Principal and Interest Payable in Gold
SEVEN PER CENT SEMI-ANNUALLY.

This Road covers 100 miles of the most direct possible line between the Great Lakes and deep-water navigation on the Hudson River, the whole line of which will be completed and in operation on or before October 1, 1872, and give a new line of road to Lake Ontario and the West, 25 miles shorter than any line that can be found.
It passes through the Cement, Flag-stone and Lumber regions of Ulster County, and the rich agricultural bottoms of Delaware and Green counties, all of which have not heretofore been reached by railroad facilities, and from which sections the formation of the country prevents the construction of a competing line.
The 36 miles of road operated for three months is already paying net earnings equivalent to 7 per cent gold on its cost of construction and equipments. The issue of Bonds is limited to $20,000 per mile of COMPLETED ROAD, the coupons payable in gold in this city. Price of the Bonds, 90 in currency.
Full particulars of the above may be had of, and the Bonds for sale by,
EDWARD HAIGHT & CO.,
9 Wall Street,
FINANCIAL AGENTS OF THE R. & O. COMPANY.

DESIRABLE
HOME SECURITIES.
OFFICE OF
MEAD & CLARK,
BANKERS, 141 BROADWAY,

The attention of Capitalists and Investors generall is invited to the
FIRST MORTGAGE
7 Per Cent Gold Bonds
OF THE
Walkill Valley Railway Company
which we offer for sale at 90 and accrued interest, in currency. The Railway is situated on the west side of the Hudson River, and is now running for 20 miles to New Paltz, and is under contract to be in working order to Kingston next fall. The bonds are a first-class investment, and we invite the closest investigation of them. The principal and interest are
PAYABLE IN GOLD.
The coupons are paid semi-annually in this city, on the first days of April and October, free of government tax; and the issue of bonds is limited to $20,000 per mile of completed road. Any information concerning them will be given at our office.

JUDGE RICHARDSON AND THE NEW BONDS.

Some doubt was expressed regarding our announcement last week that special agents were about to be sent to Europe to represent the Treasury there in the negotiation of the new five per cent bonds. But the fact that Judge Richardson, the Assistant Secretary of the Treasury, with several colleagues, sailed on Wednesday on this business, has set all doubts at rest. Several offers are said to have emanated from banking houses in England and on the Continent, and to meet the views of these firms Mr. Richardson has ample powers within the conditions prescribed by the act of Congress. As to the probability of any useful object being served by this special effort on the part of the Treasury opinions are divided. Most of the agents who have already been appointed seem to be of the opinion that certain pending negotiations which they have instituted are likely to be compromised thereby. But the loan has been so long offering in the market that the Secretary evidently supposed that the time had arrived for some new movement. As to the amount of bonds entrusted to the Assistant Secretary no positive information has transpired. The intention was at first to place in his hands fifty millions of various denominations. But it is probable that only a part of these securities have actually been sent out. The favorable condition of the loan market, and the uncertainty as to how long the plethora of unemployed funds may continue, suggest argument for the opinion that now is the time to make all the efforts possible for the success of this funding loan. There is no doubt that if the past methods of negotiation had not been discarded in putting it on the market, the whole of the first series of 200 millions would long ago have been placed, and that the remaining 300 millions would by this time have been almost absorbed. The Secretary of the Treasury is evidently of the opinion that in this market there is little hope of any new demand, and that he must look to Europe as the chief theatre of his future operations.

It is somewhat singular that with such a large accumulation of idle money here a Government loan offering such palpable advantages should have been permitted to be so sluggish in its movements. Our banks hold large deposits from the country, showing that there is a very large surplus of money which cannot find employment in ordinary business. Between seasons this is a usual phenomenon. But a part of these funds are only lying here temporarily. As soon as the activity of the coming season opens, most of these accumulated balances will be drawn for by the banks of the interior, and this fact prevents any movement for locking up such funds in bonds of a new description such as those which Mr. Boutwell is now offering. But in addition to these temporary funds which our banks have attracted by the mischievous practice, which is too common, of paying interest on the deposits of their country correspondents, there is a very large amount of deposits held in our banks which would undoubtedly be invested in these bonds but for two reasons.

In the first place, the negotiation of the bonds has been so conducted that some of the intending investors have been led to believe that they would not soon rise to a premium; but might possibly, under a pressure of tight money, recede slightly from their present price. Although this opinion is not supported by any very obvious reasons, and although the five per cent bonds of the United States, having such privileges as attach to the new loan, are undoubtedly cheap at the regulation price, still the popular feeling has received a check, and the enthusiasm has abated. Hence the unemployed funds in our banks and elsewhere flow into other channels. Among the methods for their employment, one is to lend to the stock-brokers in Wall street. From this source has proceeded the excitement which has inflated some of the speculative securities at the Stock Exchange for several weeks past. Another party have lent their money on gold, and have thus facilitated the manœuvres of the gold clique, which are now becoming

Digitized by Google

more active after their late check. The gold dealers have succeeded in inducing some of the banks to lock up the parcels of gold deposited as security; and by this device, for several days past, they have made it possible for the speculators to make a new kind of corner in it, so that borrowers are forced to pay ⅛ to ¼ per cent a day, or at the rate of 40 to 80 per cent a year. When a large "short" interest has been developed, these "bull" speculators call in their loaned gold, after first contriving to lock up the major pnrt of the 10 or 12 millions which is usually floating in Wall street. A more legitimate method of employing these idle funds is commercial loans, which are in somewhat increased demand. The inordinate accumulation of money here has thus one advantage, that it is stimulating legitimate business and restoring the activity of industrial enterprise.

There is, however, an uneasy feeling in some quarters arising our of the spasmodic movements of foreign exchange. Since the fact was established that the next cotton crop will be light, the condition of the foreign balance against this country has been anxiously scrutinized, and an increasing number of our financial men are inclined to anticipate a European demand for gold and a flow of capital from here across the Atlantic. This apprehension has received a new impulse since the announcement that the bullion in the Bank of France has fallen to 22 millions of francs, or less than 5 millions of dollars. The usual reserve held by that institution was nearly 200 millions of dollars, and that of the Bank of England about 100 millions. In any crisis the heavy reserve of the Bank of France was just as available for the exigencies of European commerce as that of the Bank of England, and the two institutions held together an aggregate of 300 millions. This reserve gave a much greater stability to the foreign exchanges of Europe than can be procured with the 125 millions of dollars, which is the amount of specie reserve now held by the Bank of England. These arguments have their weight with a large class of persons who are apprehensive that a tight money spasm is inevitable here in the fall of every year. It must be remembered, however, that we have lately been exempt from this periodical spasm which was partly due to the demand for currency and capital in the South after the war. For several years 50 or 60 millions of currency were absorbed in the Southern States and did not return, but were absorbed in the current of the circulation there. Under the influence partly of the new banks lately organized, and partly of other changes connected with the reviving industrial and commercial system of the South, a return current of capital and of greenbacks has been developed; and this new movement has tended, with other causes, to guard our money market from some of the forces which produced trouble and advanced the rate of interest. This whole question is, however, sufficiently obscure and uncertain to hold large amounts of funds idle, or to induce them to prefer call loans instead of investing themselves in new bonds or in the various railroad securities of undoubted credit which pay a higher rate of interest.

RAILROAD MONOPOLIES.

Can anything be done to check the growth of huge railroad corporations? And if so is it for the public interest to prevent that growth? Or can the evils incident to such monopolies be safely left to exhaust themselves and to work their own cure? Such are some of the questions which have long been agitating the minds of our thoughtful men, and they have been stirred up anew by the recent gigantic operations of the Pennsylvania railroad. In 1861 this company had a capital of $31,224,415. Last year its capital had augmented to $71,572,823, and it is now the richest and most powerful corporation on this continent. The development of its resources has been unexampled. In 1868, the Erie road, jealous of the progress of the Pennsylvania Central, sought to cut off its Western connections and confine it to its own State. These efforts, after a temporary success, were at length overcome, and the Pennsylvania Central now owns by perpetual lease a far reaching network of roads, which radiate to all points in the West and Southwest. By one of these it reaches Chicago, by another St. Louis, by another Cincinnati; and the report was lately started that it has almost perfected its arrangements for a permanent control of the rich traffic with the Pacific coast and with China and Japan.

The most recent achievement of this enterprising corporation is the lease of the roads and canal of the United Companies of New Jersey. The Pennsylvania road thus perfects its complete control of one of the great routes of commerce between New York and the West, and gets possession of our chief means of communication with the South. The main line of the Pennsylvania road from Philadelphia to Pittsburg is 344·9 miles. The branch lines are about 50 miles and the leased lines 197 miles. These lines amount to 601·6 miles, and the total track they have in operation is 1,136·5 miles. The leased lines, whose capital and operating accounts are not included in the returns of the Pennsylvania Company, amount to 1,947·2 miles, and their total track to 2,311·7 miles. This company also owns a majority of the stock of the Cumberland Valley and Northern Central Railroad Companies, as well as 16,545 shares of the Harrisburg and Lancaster Company; 25,547 shares of the Connecticut Company; 31,636 shares of the Philadelphia and Erie Company; 70,251 shares of the Pennsylvania Canal Company, and a considerable amount of other railroad and municipal stocks andbonds. The total amount standing on the books of the Company, as representing these investments, was, Jan. 1, 1860, $20,055,741 93.

In May, 1871, the Pennsylvania Company took a lease of the works of the United Companies of New Jersey, for the term of 999 years, agreeing to take the property and franchises of these companies and to assume all their obligations, and pay 10 per cent per annum on their share capital. The United Companies comprise the New Jersey and Railroad and Transportation Company, the Camden and Amboy Railroad Company, the Philadelphia and Trenton Railroad Company, and the Delaware and Raritan Canal Company. Their leased lines, which will also pass under the control of the Pennsylvania Company, extend over nearly every county in the southern half of New Jersey; and the extensive improvements at Harsimus Cove in Jersey City will be resumed and finished on a larger and more complete scale.

The net revenue of the road has risen from 3½ millions in 1861 to 5¼ millions in 1868, 5 millions in 1869, and 6¼ millions in 1870. The dividends were in 1861 6 per cent; in 1862 8 per cent; in 1863 9 per cent; in 1864 10 per cent; in 1865 10 per cent; in 1866 9 per cent; in 1867 6 per cent; in 1868 8 per cent; in 1869 10 per cent, and in 1870 10 per cent. How far these earnings may be increased or sacrificed by the recent union with the New Jersey roads remains to be seen. These corporations consist of a union of the Delaware and Raritan Canal, the Camden and Amboy Railroad and the New Jersey Railroad. The first two were united forty years ago, and all are now parts of this grand Titanic confederation of railroads, which aims at no distant day to hold in its grasp the whole of the through route of transportation from New York to San Francisco, and thence to control the vast lucrative commerce of India and the Orient.

Digitized by Google

There have been some threats of opposition to the absorbtion the New Jersey roads into this union. And there is no doubt that the stockholders of these companies could give trouble if they so desired. One objection which has been raised to the lease is that there is no penalty for its violation. If the Pennsylvania company, like so many other great overextended corporations, should become impoverished and fail to fulfill its obligations to pay 10 per cent interest on the capital stock, the stockholders complain that they have no redress.

The chief objections to the new arrangement come, however, from the rival companies, or are made on behalf of the interests of the public. Already a rival combination is spoken of which will prove, if carried out, a formidable competitor for the most lucrative part of the business, of which the Pennsylvania Central seems to aim at obtaining the monopoly. In this competition, indeed, is one of the chief safeguards of the public against the evils of single huge confederations. These evils are twofold—first, political; secondly, commercial. How great the political evils may prove to be, we can as yet but faintly perceive. It is easy to see that a great rich corporation, controling millions of dollars and thousands of voters in several States, can be so managed by shrewd men as easily to obtain, if unchecked, an influence in the State Legislatures, and even in the National Administration, hostile to the public interests and destructive of good government. The history of this country, however, is full of examples of the elasticity with which our free institutions adapt themselves to circumstances, and of the fertility of resource with which our national life protects itself and controls or avoids the most formidable dangers. These political evils, therefore, must, like so many others, be left to evoke their own cure; and they will, in all probability, prove much less formidable than has been anticipated.

As to the commercial evils of these great railroad menopolies, they are more obvious and admit of more certain treatment. If a railroad has the absolute control of any route of travel it will certainly charge extortionate rates. But rival lines will be created by the very extortion, and in any case our railroad system is too far completed to allow of this monopoly on the chief through routes. It will be confined to local traffic, and will then have but a short-lived career. As a partial preventive of these and other classes it has been proposed to compel the railroads to publish weekly a full and trustworthy statement of earnings. This is done by the English railroads. If it were enforced here, the light of public would offer a partial but valuable check to some of the evils to which we have referred. It is very fortunate that this outcry against monopolies and the growth of vast corporations which has provoked it, did not spring up till our railroad system was sufficiently extensive to render impossible many of the the worst evils of monopolies. And, morever, the concentration of large masses of capital in a few hands, is both a result and an indispensable condition of that rapid material progress which is now in its incipient stages, and is destined in its fuller maturity to render monopolies more difficult and competition more free.

THE MAYOR'S MESSAGE AND THE ADVANCE IN OUR CITY BONDS.

Two question of financial importance have been raised in the discussions elicited by Mayor Hall's message, which is a very elaborate document; and, in conformity with his promise, contains full details of the financial condition of the municipal government at the end of the first year of his administration under the new charter. These points refer first to our present municipal debt and the necessity for its proposed increase; and scoondly to the existing system incidence and pressure of our municipal taxation. As to the debt, we learn that the total amount of the city and county obligations is over 80 millions, while the value of the property owned by the city is 267 millions. The figures are given elsewhere in detail, and they seem to explain a part of the reasons why the credit of the city is so good, notwithstanding the able and vigorous attacks which have from some quarters been recently made upon it. If the Mayor and Comptroller shall find it needful, they will have no difficulty in negotiating at home or abroad, in large or in small amounts, such of the bonds authorized by the last Legislature as may be needed for any authorized works of indispensable usefulness. A number of European firms, it is said, are ready to take at a fair premium 5 millions or more of our city stocks, if any should be allotted to them. One of the shrewdest banking houses on the Continent has just invested in several millions. The bonds have recently sold as high as 107, and all this has been accomplished without any manipulation of the market, and without any speculative purchases of bonds with a view to make them scarce. Such temporary artificial manœuvres for causing an advance have never, we believe, been resorted to by our municipal authorities or their financial agent. On the contrary the movement has been carried on in face of the prospective issues of new bonds for various projects of great cost; such as the viaduct railroad, the East River bridge, the new piers and warehouses. These last mentioned works will absorb an immense capital, but the investment is likely to create new wealth more rapidly still. The time has indeed come when these improvements can no longer be delayed. The exigencies of our commerce imperatively demand new facilities.

The plans adopted for the piers contemplate a bulkhead wall of solid masonry, so constructed as to form an avenue of 250 feet in width on the North river side and 200 feet on the East river side. Above Thirty-first street this bulkhead avenue will be 175 feet wide, except around Corlaers Hook From this avenue piers of 500 feet will stretch into the river, being built on the most solid and approved model. On these will be constructed warehouses, in design something like the magnificent works constructed at its Oakland terminus by the Central Pacific Railroad, where the largest ships and steamers unload alongside the railroad cars. We shall have the advantage that our warehouses here are known to be of solid material and will be two, three and four stories high. A clear passage will be left for the flow and ebb of the tide. Elevators and the most modern mechanical contrivances will be erected to facilitate the cheap, quick and easy handling of freight. The paramount necessity of these and the other proposed works, Mayor Hall argues, with great force. In this discussion which is prominent throughout his message he gives us some valuable statistics, showing the extent of the government and the magnitude of the work it has to do. New York Island, with its area of 22 square miles, has 29 miles of water front; of this three-fourths are on the East and North rivers; and the remaining one-fourth on Harlem river and Spuyten Duyvil creek. The island averages about ten miles long and two miles broad. On this area are 460 miles of streets, of which 291 miles are paved, and 169 miles unpaved. The lighting of the streets is provided for by 19,000 gas lamps at the public expense, and the water supply drainage and sewerage by 340 miles of water pipe and 275 miles sewers. The population was 942,252 by the last federal census. To these figures must be added a business population of 500,000, who live in the suburbs. One thousand horse railway cars, 267 omnibuses, 1,200 licensed carriages, and an equal number of private vehicles continually travel

Digitized by Google

the streets. From 14 to 20 thousand vehicles exclusive of omnibuses traverse Broadway every day. In the ten months preceding May 1, 284 millions of dollars' worth of goods were imported, while the exports were 251 millions and the customs duties 120 millions. Such are some of the statistics which the Mayor brings forward to show how great a city he has to care for, sustain by taxation and protect by efficient police, fire and sanitary regulations.

This duty which we owe to the future, Mayor Hall very prominently insists upon. It must inevitably be done, and every year delay increases the expense. If twenty millions could be spent during the next three years on these important improvements, New York, he says, would be wholly renovated; and the increased valuation thus given to assessable property would lighten the burden of taxation by distributing it over a wider area. The amount of fixed valuation for the real and personal property of the city is now 1,075 millions, and the taxes for the year 23 millions. The value of property would not only be enhanced by the projected improvements, but moreover there would be, he thinks, such an impetus given to the commerce and industry of our metropolitan population as to render the immediate construction one of the best investments which the city could make. Among the improvements the most important are the draining and sewering of the city, the opening and grading of new streets, the completion of the viaduct railroad. A graphic sketch of these projected works is given from a contemporary, as follows:

"When this (viaduct) road supplies us with the means of rapid transit, as it will within five years at the farthest; when a seawall of solid granite encircles the island and is adorned with rows of piers and docks unequaled in the world; when an avenue of from one hundred and fifty to two hundred and fifty feet in width begirts the city, and affords the noblest opportunies for imposing architectural effects as well as for commercial uses; when the East River bridge unites New York in closest bonds to her Brooklyn 'bedroom,' and the bridge across the Highlands completes our railroad system; with the large facilities given to our foreign commerce by the opening of the Hell Gate channel to navigation by large steamers; with the completion of our facilities for transshipment at Harlem, and with all the other incidental growths in the business accommodations of the metropolas—who will be bold enough to set limits to the wealth or the population that will be concentrated within fifteen minutes' ride from the Battery in 1881?

Then we shall just begin to realize what an unequalled position for the site of a metropolis has been given New York. The development of the beautiful will accompany that of the useful, and from Westchester to the Battery there will be more to please the eye and fill the mind with wonder and delight than can be seen in the same territory anywhere else on the face of the earth. Before Paris can regain her lost beauty New York will offer to the traveler more attractions, even in the way of architectural art, than when presented by these Parisian structures which had not become invested with the peculiar charms of historical associations."

The practical objection to all these schemes is, of course, that we shall have to run into debt for them. Can the city afford it? Mayor Hall thinks we can afford it and ought to afford it. This view is urged by several reasons. In the first place we can easily borrow the money now. The credit of the city is good. Our city debt, as we have seen, is over 80 millions, while the property owned by the city is valued now at 267 millions, and will be greatly enhanced in value by the proposed improvements. It is true that the greater part of this city property is not likely to be sold; but it gives an additional security to the bondholders, whose claim constitutes a lien on the whole of this property whose value exceeds threefold the amount of their claim.

A second reason is connected with the sinking fund. The capital of this sinking fund for the redemption of the debt amounts to $18,215,741, besides a balance of $126,886 for the payment of interest. Now there is an ordinance of the municipal government which forbids the canceling of any city stocks for the purchase of which any part of the sinking fund may have been invested. These stocks have to be held until the final redemption of the stocks, and meanwhile the interest is regularly paid, and contributes to swell this fund. Now the Comptroller shows by an elaborate calculation that when the last bonds of the city, which are now outstanding, shall mature on the 1st of August, 1911, the operation of the sinking fund will have extinguished the whole debt, besides leaving a surplus of $27,235,039. We have not much faith in such distant views of contingent accumulations, such as that of a sinking fund. Still it is well to know that its provisions are sufficiently ample to meet all the claims for the payment of the principal of the bonds, and that if faithfully kept up it will fulfill all the purposes for which it was designed.

The argument then amounts to this, that as the city debt is amply secured by real estate worth thrice as much; and as the whole aggregate of outstanding bonds are amply covered by a sinking fund, it will be a safe and good policy to venture on an increase to the city debt, which we can negotiate on favorable terms. Our people have as yet given no positive answer to this question. But there is no doubt that if the money be economically used and judiciously expended, and if no scandalous corruption throw discredit on the work, they will approve it, notwithstanding any occasional outcry from political partizans against corruption and jobbery. Such charges are too common, and unless they be sustained by facts and proved by unimpeachable witnesses deceive scarcely any one. Our new city government is on its trial, however. Its lease of power will be short, except it fulfil the pledges of economy, efficiency and amenableness to public opinion, which it so freely gave when its present vast powers were granted to it a year ago.

How favorable is the estimate which has been formed of our municipal administration by the magnates of the financial world at home and abroad may be inferred from the high premium and rising credit of the city bonds. Still it must be remembered that an increased debt means an increase of the burdens of taxation. And although, as the Mayor observes, the rate of taxation here has never been so heavy as in Boston, Albany, Philadelphia, and other large cities, still there are some dangers and important inequalities in our New York taxation which demand adjustment before any increase of the pressure will be compatible with a judicious policy. We shall probably recur to this part of the subject next week.

RAILROAD EARNINGS IN MAY, AND FROM JANUARY 1 TO JUNE 1.

The most conspicuous increase in gross traffic in the month of May, compared with the same month of last year, is shown by the Central Pacific road—$149,041, and by the Toledo, Wabash & Western—$112,117. There is no uniform increase in earnings, however, and several of the old roads show a decrease of more or less importance. It is frequently stated on the stock market that a particular road has made a very large increase in its earnings during a certain month, but as these statements are always made in regard to those companies which do not make public their earnings, there is little reliance to be placed on them, the fact of an increase in one month, if true, would have little significance, as it would show nothing, unless taken in connection with other months and with the operating expenses.

There has not been much heard during the month of any new consolidation of roads, although the negotiations previously noticed have been carried on.

The lease of the New Jersey roads to the Pennsylvania Central is regarded as certain. Nothing further has been said of the lease of Lake Shore to the New York Central & Hudson River. The North Missouri road is advertised for for sale under the second mortgage bonds in August, and will probably pass into new hands. The Michigan Central

Digitized by Google

road is now operating a considerably increased mileage. The annual meeting of the Rock Island road was held on the 7th instant, we condense the following from the report for the year ending March 31, 1871:

Gross earnings	$6,028,287 29
Operating expenses and taxes	3,405,459 06
Net receipts	$2,622,828 23
Rent on Peoria and Bureau Valley Railroad	$135,000 00
Interest on bonds	617,751 75
Dividends, including taxes	1,239,466 00
Total	$1,972,217 75
Surplus	$650,610 48

It will be interesting to compare this with the statement for the previous year, which was as follows:

Gross receipts	$5,995,266 30
Expenditures	3,456,791 24
Net earnings	$2,538,474 96
Interest on bonds, dividends and Peoria & Bureau Valley rental	2,066,951 57
Surplus	$471,582 39

This shows an increase of little more than one half of one per cent in earnings, a decrease of 1½ per cent in expenses, and an increase of $84,353 27, or about 3½ per cent in net earnings.

RAILROAD EARNINGS IN MAY.

	1871.	1870.	Increase.	Decrease.
Chicago & Alton	$465,780	$408,685	$57,094	$.....
Central Pacific	917,760	768,719	149,041	.....
Cleveland, Col., Cin. & Indianapolis	291,491	287,487	24,004	.....
Illinois Central	695,445	684,538	10,907	.....
Marietta & Cincinnati	119,550	110,213	9,437	.....
Michigan Central	480,847	406,283	74,564	.....
Milwaukee & St. Paul	662,367	730,789	.....	68,422
Ohio & Mississippi	222,363	246,366	.....	24,003
Pacific of Missouri	284,732	292,996	.....	8,264
Toledo, Wabash & Western	453,009	340,892	112,117	.....
Union Pacific	711,815	802,586	.....	90,771
Total	$5,295,159	$5,049,454	$437,164	$191,460

For the first five months of the year railroad earnings generally compare favorably enough with last year, but there is no great increase in traffic and the earnings *per mile* on those roads which have added materially to their mileage, are in some cases not as large as in 1870. The general tendency of railroad earnings in this country is unquestionably towards a steady increase, but this increase must be gradual and cannot be expected to proceed by strides, nor to be shown every year without some intervening periods of decreased traffic. In the year 1869 railroads were generally prosperous, and increased their gross earnings considerably, but since that time there has been no uniform increase on the Western roads, and where heavy profits have been shown they have in most cases been the result of an economical administration and a large saving in operating expenses.

EARNINGS FROM JANUARY 1 TO JUNE 1.

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS

The following are the changes in the Redeeming Agents of National Banks since the 8th of June, 1871. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
Illinois. Warren	The Farmers' National Bank	The First National Bank of Chicago, approved in place of The Fifth Nat'l Bank of Chicago.
Alabama. Montgomery	The First National Bank	The National City Bank of New York, approved.
Kentucky. Richmond	The First National Bank	The Ocean National Bank, of New York, approved in place of the Central National Bank of New York.

New National Banks.

The ollowing is the only national bank organized during the past week, viz:

Official No.

1,835—The Commercial National Bank of Versailles, Kentucky. Authorized Capital $100,000; paid in capital, $100,000. D. Thornton, President; E. K. Thornton, Cashier. Authorized to commence business June 15, 1871.

[From our own correspondent.]

LONDON, Saturday, June 3.

Were it not for the uncertainty which envelopes the future of the money market, the bank authorities would unquestionably have reduced their minimum rate of discount to 2 per cent, but taking into consideration the fictitious condition of affairs and also the probability of a sudden and immediate change in the course of the money market there is no doubt of the fact that they have pursued the safer, and, it may be assumed, therefore, more prudent course. The position of the bank is now one of unusual strength. The reserve is as much as £15,500,000, and the stock of bullion £24,840,000, while the other securities, or advances, are only £17,295,000. Comparing the present position with that of the corresponding week in 1868, when the official minimum was only 2 per cent, it will be noticed that the bank, assuming that the future could be predicted with more certainty, would be quite justified in adopting a similar quotation. The reserve in that year was nearly £3,000,000 less than it is now, and the stocks of bullion was £21,969,888 against £24,840,000 at the present time. In addition to these figures, wheat was quoted at 72s. 3d., and middling upland cotton at 11¼d. per lb. It is very probable, however, that the position of affairs will be speedily altered. Many persons are already making preparations for returing to Paris, and it is considered probable that as soon as the gates are reopened, and greater security exists, many of the more venturesome will enter the city. At the same time, many French families who, since the outbreak of the war, have resided in this country, will return and take their wealth with them. The question of the French loan has not received much attention during the week, but it can scarcely be doubted that the negotiations will soon be commenced for raising funds to supply French wants. In the course of a few days, we shall ascertain what course the French Government will adopt with regard to the tariff, it having been already intimated that a large increase in the duties on imports has been rendered necessary.

The principal feature in the discount market during the week is an indisposition to take three-months' and longer-dated bills. This is naturally due to the expectation that money will advance in price. The demand for money is only moderate, and very little change has taken place in the quotations. The rates of discount, compared with those of last year, are as under:

	1870. Per cent.	1871. Per cent.		1870. Per cent.	1871. Per cent.
Bank minimum	3 @...	2½@..	4 months' ba'k bills	3 @3¼	2¾@2¾
Open-market rates:			6 months' ba'k bills	3¼@3½	2¾@...
30 and 60 days' bills	2½@3	2½@..	4 and 6 trade bills	3¼@4	3 @3¼
3 months bills	3 @....	2½@..			

The rates of interest allowed by the joint stock banks and discount houses for deposits are subjoined:

	1870.	1871.
Joint stock banks	2	1½
Discount houses at call	2	1½
Discount houses with 7 days' notice	2¼	1¾
Discount houses with 14 days' notice	2¾	1¾

The following are the quotations for money at the leading Continental cities:

	B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.
At Paris	2½	6	2¼	—
Vienna	5	6	5	5
Berlin	4	4	3½	3¾

Turin	5	6	5	6
Brussels	2½	4	2¼	3¾
Madrid	5	5	5	5
Hamburg	—	—	2¼	2¼
St. Petersburg	5	8	5	7

Digitized by Google

There has been a fair average demand for foreign bills of exchange, and no material change has taken place in the quotations. Gold continues to arrive in large quantities, and the accumulation in this market has been uninterrupted. For silver and dollars, however, there has been a better inquiry, and prices are rather firmer. The following prices of bullion are from Messrs. Pixley & Co.'s circular:

GOLD

		s.	d.		s.	d.
Bar Gold	per oz. standard.	77	8½	@	77	9
do fine	do	—	—	@	—	—

*Price May 25.

The stock markets have been fairly active during the week. A prominent feature is that foreign government stocks have attracted considerable attention. Turkish, Spanish and Italian being decidedly firmer in price. A new loan for Turkey for about £6,000,000 or £7,000,000 is spoken of, to be secured upon the Egyptian tribute. Notwithstanding the favorable traffic returns, railway shares are weaker owing to realizations. Erie railway shares have been dull, and Illinois Central are rather flatter, but Atlantic and Great Western railway securities remain firm. In the market for United States Five-Twenty bonds, there has been no especial movement. The following are the highest and lowest prices of consols and the principal American securities on each day of the week:

	Monday.	Tuesday.	Wed'ay.	Thu'ay	Friday.	Sat'day.
Consols	Holiday	93⅜-93⅝	93⅜-93⅝	93⅜-93⅝	*91⅛-91⅜	*91⅛-91⅜

Illinois shares ($100)		109⅛-109⅜	109⅛-110	109⅛-....	109⅛-109⅜	109⅛-....

* Ex dividend.

Respecting the growing crop of wheat on light soils, the accounts are of a favorable character; but on clay soils. The crop does not at present promise to be an average one. The weather during the present week has been changeable, and has fluctuated between heat and cold within very short periods. Warm days have been succeeded by cold nights, the prevailing wind being from the east. Fruit, which at one time promised an abundant yield, may now prove to be somewhat deficient, as a good deal of injury has been created by blight. The grass crop promises to be about an average, and not so heavy as was at one time expected, the young plant having been much injured by the protracted drought of last year, and by the severity of the winter. Taken altogether, however, the agricultural prospect cannot be considered to be unsatisfactory. The trade for cereal produce has been dull during the week, and the tendency of prices has been somewhat in favor of buyers, but no actual changes can be quoted.

The following statement shows the imports and exports of bread and feeding stuffs into and from the United Kingdom, during last week and since the commencement of the season, compared with the corresponding periods in 1869–70:

FOR THE WEEK ENDING MAY 27.

	1870'71. Imports.	1870'71. Exports.	1869'70. Imports.	1869'70. Exports.
Wheat cwt.	575,031	74,980	539,951	9,651
Barley	123,131	3,243	103,198	2,000
Oats	230,550	25,967	316,221	429
Peas	47,831	1,673	62,655	131
Beans	63,728	278	12,456	220
Indian corn	221,268	5,381	160,285	....
Flour	79,487	2,016	70,959	1,091

SINCE THE COMMENCEMENT OF THE SEASON (AUG. 23).

Wheat cwt.	23,781,644	2,818,643	30,485,875	262,024
Barley	5 963 136	107,090	6,170,765	21,007
Oats	5,938,333	1,353,021	7,596.999	66,304
Peas	651,581	51,700	1,108,428	11,918
Beans	1,387,674	17,155	1,379,858	2,263
Indian corn	10,587,013	64,089	13,732,529	14,044
Flour	3,396,008	1,324,880	4,758,292	18 809

For the corresponding periods in 1868–'69 the figures were as under:

	Imports. For the week.	Imports. Since Sept. 1.	Exports. For the week.	Exports. Since Sept. 1.
Wheat cwt.	237,937	20,672,906	84	151,221
Barley	37,783	8,150,326	8	99,800
Oats	48,503	4,501,402	3,946	99,601
Peas	9.378	890,938	44	23,175
Beans	19,338	2,047,709	....	4,453
Indian Corn	156,068	10,108,215	....	940
Flour	41,785	2,927,556	1,490	26,057

Owing to the Whitsuntide holidays, business has been somewhat restricted in the manufacturing districts, but the tone is healthy. The following relates to the trade of Manchester: This market continues to be animated by a firm tone, although there is very little business going on owing to the holidays, and many firms have closed their offices for the week. Compared with last Friday, prices are now dearer in most departments. A fair business has been done for the India markets, and spinners now decline to take the prices which they would have accepted on Tuesday.

Annexed is a statement showing the imports and exports of cotton into and from the United Kingdom, from September 1 to May 11, compared with the corresponding period in 1869–70.

	1870–1. Imports.	1870–1. Exports.	1869–70. Imports.	1869–70. Exports.
American bales	1,976,786	303 139	1,155,478	55,328

Total	3,525,057	785,049	2,767,603	546,383

The traffic receipts of railways in the United Kingdom for the week ending May 28 amounted, on 13,908 miles, to £921,755, against £817,779 last year on 13,665 miles, showing an increase of 243 miles and of £103,976. The receipts for goods on the fourteen principal lines were £421,348, against £390,535, showing an increase of £30,813.

For the third series of London sales of Colonial wool, which are to commence on the 22d of June, the following quantity has arrived up to date: 43,395 bales Port Phillip, 36,640 Sydney, 29,007 New Zealand, 7,303 Adelaide, 6,887 Van Dieman's Land, 2,330 Swan River, 18,874 Cape; total, 143,936 bales. There is no change in the market; the demand for wool continues active, and a fair amount of business is being done at rates which are always fully up to, and sometimes even above, the level of last sales quotations.

It is announced by Messrs. M'Calmont Bros. & Co. that of the £1,400,000 bonds of the Philadelphia & Reading Railroad Company recently offered, fully £800,000 has been applied for in this country. The balance will be offered for subscription in America.

English Market Reports—Per Cable.

The daily closing quotations in the markets of London and Liverpool for the past week have been reported by submarine telegraph, as shown in the following summary:

London Money and Stock Market.—The market for American securities closes steady with a slight advance in quotations.

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show a decrease in dry goods and an increase in general merchandise. The total imports amount to $7,410,146 this week, against $7,671,435 last week, and $8,174,154 the previous week. The exports are $3,998,129 this week, against $4,587,762 last week, and $4,162,140 the previous week. The exports of cotton the past week were 2,727 bales, against 5,781 bales last week. The following are the imports at New York for week ending (for dry goods) June 9, and for the week ending (for general merchandise) June 10.

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
Dry goods	$1,206,766	$1,146,426	$1,368,466	$1,618,883
General merchandise	3,806,319	4,479,424	3,417,605	5,791,263
Total for he week	$5,013,085	$5,625,850	$4,785,471	$7,410,146
Previously reported	106,003,135	140,338,004	130,402,543	166,942,887
Since Jan. 1	$111,016,220	$145,963,854	$135,188,014	$174,353,033

In our report of the dry goods trade will be found the imports of dry goods for one week later.

The following is a statement of the exports (exclusive of specie) from the port of New York to foreign ports, for the week ending June 13:

EXPORTS FROM NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
For the week	$2,359,561	$4,353,182	$3,827,468	$3,998,129
Previously reported	78,044,960	75,181,940	76,288,101	102,615,841
Since Jan. 1	$80,404,521	$79,535,422	$80,115,569	$106,613,970

The following will show the exports of specie from the port of New York for the week ending June 10, 1871:

1869	8,862,650	1867	1,462,224

More Three Per Cent Certificates Called in.—The Secretary of the Treasury has called in another portion of the Three Per Cent certificates, the interest on which will cease on July 31st next. These certificates bear date December 16th, 1867, to March 16th, 1868, of the denomination of $5,000, between the numbers 1,374 and 1,710 inclusive, and of the denomination of $10,000 between the numbers 1,585 and 1,738 inclusive.

—The Evansville, Terre Haute and Chicago Railway Company's First Mortgage 7 per cent Gold Bonds are offered for sale by Winslow, Lanier & Co., 27 Pine street, at 90 and interest. The road is 55 miles long, and nearly finished. It extends from Terre Haute, Indiana, northerly to Danville, Illinois, forming part of the great through route from Chicago to Terre Haute, Evansville, Nashville and the South.

The character and standing of the managers of this road, among whom are Chauncey Rose, Esq., and other successful and experienced railroad men, and its prospective business in coal, iron and the agricultural products of the rich Wabash Valley, give promise of success and justify the recommending of these bonds to the attention of investors.

—The National Trust Company, 261 and 263 Broadway, has declared a semi-annual dividend of four per cent, free of government tax, payable July 3. The transfer books will be closed from June 20 to July 3.

BANKING AND FINANCIAL.

THE NEW ORLEANS, MOBILE AND TEXAS RAILROAD COMPANY

Are building a trunk line, connecting New Orleans with Mobile on the east, and giving the only railroad connection between the former city and the great and most productive State of Texas on the west, the total distance from Mobile to Houston being 475 miles.

The company is composed of strong Northern capitalists, who have already expended nearly TEN MILLION DOLLARS of their own funds in the construction of the line. They have built about 225 miles from Mobile westward, and secured by purchase of securities and made provision for the thorough repair and equipment of the 108 miles constituting the Texas division; leaving but 140 miles to be built to complete the entire road.

It is believed that no other railroad corporation in the country has ever made so large an expenditure from its own means before offering any of its securities to the public.

The Company now offer for sale the 8 per cent mortgage bonds upon the Louisiana division of 226 2-3 miles from New Orleans to the Sabine River. This will probably be the most valuable portion of the whole line, as it will be the only rail communication by which the enormous productions of Texas can reach the Southern metropolis.

So important is this road considered to Louisiana, that the State has made very liberal grants in aid of the enterprise, by direct donations, by endorsement of its bonds, and by subscriptions to the stock of the Company, amounting in all to over eight million dollars.

The bonds now offered are of two classes: First mortgage bonds, to the amount of $12,500 per mile, and second mortgage bonds, to an equal amount, both principal and interest guaranteed by the State of Louisiana. The price of the two classes is the same, and subscribers can take their choice.

The Bonds are only in the denomination of $1,000, or £200 each, interest payable January and July, at the rate of eight per cent currency in New York, or seven per cent gold in London, at the option of the holder, at the time each coupon is due. Bonds can be registered if desired.

No better security has been offered to investors. The line is a good and important one, and the stockholders have proved their determination and ability to carry the work to an early and successful completion, by the very large amount they have themselves put into it.

The Bonds are largely profitable, as well as entirely safe. One thousand dollars invested in these eight per ceet bonds will give the purchaser *more than seventy seven per cent* greater annual interest than the same amount invested in the new Government Five Per Cents, into which the Government Sixes are being funded by the Secretary of the Treasury.

At the same price, an eight per cent currency long bond is far cheaper than a 7 per cent gold one. Calculating a return to specie payments in three years, and taking the time that the bonds of the New Orleans, Mobile and Texas Railroad have to run—45 years—we find that by compounding the interest of each, every six months, at 7 per cent, an 8 per cent currency bond at 90 will give a return of $2,614 18 more than a 7 per cent gold bond, at the same price, or nearly three times the amount of the orginal investment.

While the purchaser of the 8 per cent bonds of this Company can realize this special profit, he also holds the option of taking advantage of any temporary advance in gold, as he has choice, at every separate coupon day, of gold interest at 7 per cent, or currency interest at 8 per cent.

The bonds are dated May 1, 1871. The first coupon will, therefore, be a fractional one, running from May 1 to July 1. The price is 90, and accrued interest at 8 per cent currency from May 1 to date of remittance. Bonds will be sent free of cost and Government, and all other marketable securities will be taken in exchange at their best market rates, without charge for selling.

Information concerning the company and the Road, and pamphlets containing map and full details of the enterprise, can be obtained of the undersigned or any of the Company's advertised agents.

BANKERS AND DEALERS IN GOVERNMENT SECURITIES,
No. 5 NASSAU STREET, NEW YORK, June 5, 1871.

THE CHESAPEAKE AND OHIO RAILROAD COMPANY are extending their line of road to the head of reliable navigation on the Ohio River, where it will meet and connect with lines now building or projected, to the principal railroad centers and river cities of the Western States. 227 miles are in operation, and the rails (steel and iron) for 100 miles additional is now being laid. The road will have, when completed, a large East and West through business, besides an immense mineral and general local traffic.

THE SIX PER CENT GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD CO. are amply secured, and very desirable for safe and profitable investment. We believe them to be of equal value and security, with the Central Pacific Bonds, negotiated by us, and must take a like rank in market value and salable character.

Holders of Five-Twenty Bonds, desiring to fund them otherwise than in the new Five Per Cent. Government Loan, may do so with entire safety, at a profit of about 20 per cent., and without reduction of interest, by an exchange for the Bonds of the CHESAPEAKE AND OHIO RAILROAD CO.

Price of the bonds, until further notice, 92, and accrued interest from May 1.

We also buy and sell Government Securities, and the Bonds of the Central Pacific Railroad Co., and as agents of the U. S. Government, will attend to the funding of Five-Twenties into the new United States Bonds.

FISK & HATCH.

GERMAN BANK OF LONDON (Limited).
DIRECTORS
George Albrecht, Bremen.

FRIDAY EVENING, June 16, 1871.

The Money Market.—Money has continued very easy throughout the week, with nearly all the business done at 3@4 per cent on miscellaneous collaterals, though large amounts have frequently been pressed upon the leading government dealers at 2 per cent. There are no indications of any immediate improvement in the rates for money, and the periods of spasmodic stringency when money has commanded 1-16 or ⅛ per cent a day seem now almost like a matter of history. The demand from the wool trade has apparently been as large as usual this year, but so easily supplied from the plethora of loanable funds on hand that not even a temporary effect has been produced by it. The comptroller has called upon the national banks for a statement of their condition on the 10th of June, which is unusually close to the time of their previous statement made on the 29th of April. It is probable that the Comptroller intends to have these statements made more frequently than heretofore, and it has been suggested in the financial columns of one of our leading newspapers that he may intend to call for them every week, and thus carry out to its fullest extent the spirit of the law which intended that these public statements should be a check upon all irregularities. The condition of the National banks of the United States on the 29th of April is shown in the following table:

RESOURCES.	
Loans and discounts	$776,008,591
Overdrafts	3,318,286
United States bonds to secure circulation	354,427,200
United States bonds to secure deposits	15,286 500
United States bonds and securities on hand	22,187,950
Other stocks, bonds and mortgages	22,414,659
Due from Redeeming and Reserve Agents	85,061,016
Due from other National Banks	38,382,679
Due from State Banks and Bankers	11,478,174
Real estate, furniture and fixtures	29,242,762
Current expenses	6,764,159
Premiums	4,414,755

Specie	22,732,027
Legal Tender Notes	108,512,555
Clearing House Certificates	21,581,571
Three Per Cent Certificates	15,060,000
Total	$1,694,440,912

LIABILITIES.	
Capital stock	$446,925,493
Surplus fund	97,620,099
Undivided profits	44,776,030
National Bank Notes outstanding	306,131,593
State Bank Notes outstanding	1,982,580
Dividends unpaid	2,235,248
Individual deposits	611,025,174
United States deposits	6,521,572
Deposits of United States Disbursing Officers	3,757,873
Due to National Banks	128,037,469
Due to State Banks and Bankers	86,118,290
Notes and bills re-discounted	3,573,723
Bills payable	5,740,964
Total	$1,694,440,912

The last statement of the city banks show a decline in legal tenders and specie and a consequent falling off of $1,634,745 in the excess of legal tender reserve, the several items showed the following changes as compared with the previous week: Loans, increased $2,008,013; specie, decreased $1,073,727; circulation, decreased $228,312; deposits, increased $510,817; legal tenders, decreased $490,392.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	June 10, 1871.	June 11, 1870.	June 12, 1869.
Loans and discounts	$283,810,163	$276,400,000	$272,000,000
Specie	12,716,153	28,500,000	19,000,000
Circulation	30,740,411	33,100,000	34,100,000
Net deposits	240,894,356	230,700,000	193,900,000
Legal Tenders	70,410,441	60,100,000	50,800,000

The demand for commercial paper has not been quite as active as last week, though rates are not quotably higher. Lenders are able to obtain better rates for money in this way than they can obtain on call loans, and the expectation that money will continue easy for some time to come, encourages them in purchasing first-class paper.

Quotations are as follows:

	per cent.

" " " .....4 months.	5 @ 6
" " " .....6 months.	5½@ 6½
" " single names.....60 days.	6 @ 7
" " " .....4 to 6 months.	6 @ 9
Bankers, first class foreign.....60 days.	4½@ 5
" domestic.....3 to 4 months.	5 @ 6

United States Bonds.—The government bond market has been dull on steady prices. There is an absence of inquiry for large amounts from any quarter, and the sales recorded at the government stock board are of noticeably small amounts. To-day there was an improved demand from foreign bankers on higher quotations from London, and prices improved about ⅛@¼ per cent. On Wednesday the treasury purchased $1,000,000 five-twenties at prices between 111.12 and 111.46, the total amount offered was $3,571,250. The new loan continues to be offered for subscriptions on the same terms as heretofore, and no further negotiations in regard to it are reported.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, June 10.	Monday, June 12.	Tuesday, June 13.	Wednesd'y June 14.	Thursday, June 15.	Friday June 16.

Railroad and Miscellaneous Stocks.—The stock market has been dull and prices irregular, business having been limited very

Digitized by Google

much to specialties. The upward movement in the market which was for some time very confidently anticipated has not yet taken place, and in consequence of the absence of any decided turn in that direction, there has been a larger "short" interest created, so that there is now a considerable division in the stock market where a few weeks ago there was hardly a "bear" to be found. Money is easy beyond precedent with the prospect of continuing so for some time to come; the financial statements of many leading companies are also quite favorable, as for instance—Rock Island, North Western, Lake Shore, Union Pacific, &c., and so far as these circumstances have influence they favor high prices. On the other hand, it is urged that prices have already advanced 10 to 20 per cent. and that all the leading stocks are largely held by cliques and cannot be unloaded upon outside buyers at any higher prices. Rock Island sold down to 118¼ on Wednesday but quickly rallied and closed to-day at 122. Lake Shore closes at 118⅞ after selling up to 114⅝ to-day. Union Pacific broke from 31½ to 29½, under large sales. New York Central and Hudson closes at 98; the following telegram from Washington was received to-day in regard to the tax:

"The Secretary of the Treasury this afternoon decided that he has power to hear the appeal of the New York Central Railroad Company from the recent decision of the Commissioner of Internal Revenue, but that it is not necessary to do so for the due administration of the law or the protection of the rights of the company. If, therefore, the company shall not pay the amount already assessed, there will be a levy on their property. They, however, have the right to institute suit against the Collector, and the Government will thus be enabled to defend the decision."

Notice has been given at the Stock Board that on June 22, the New York and Harlem Railroad Company will sell at the first board ten thousand shares of its new stock (recently authorized) for the account of the company. It is now said that the preliminaries are arranged for merging the American and the Maryland Coal Companies into the Consolidation Coal. The two former are valuable dividend paying properties.

The market closed heavy on nearly the whole list.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

State and Railroad Bonds.—Southern State Bonds have generally been firm on a moderate business, but to-day there were very large transactions in Tennessees with an advance at one time to 73¼. This movement is generally attributed to speculative manipulation based upon the "short" interest which has been made in these bonds during the past few weeks. There has been for some time a strong party in Tennessee bonds, very confident in regard to their ultimate value, in consequence of the progress made in the State towards a sound financial basis.

Railroad bonds are in good demand from investors, as they pay a high interest and offer attractions as an investment while money is loaning at 2@4 per cent on call. In regard to the Central Pacific Securities, some sensation was created by the discovery of a counterfeit bond, but there is good reason to believe that it has been issued within ten days, and the whole amount sold does not exceed the small sum of $14,000, as the prompt action of the financial agents in giving notice to the public prevented the issue or sale of more. The *Daily Bulletin* gives the following description of the counterfeit:

"The counterfeits are not dangerous, the paper on which they are printed being whiter and thicker than the genuine. The words 'of the' are omitted in the thirteenth line of the body of the bond. The width of the engraved part of the counterfeit is one-fourth of an inch narrower than the genuine bond of the same series. The coupons are also a trifle shorter. The signatures are fairly done, but are not calculated to deceive experts. The counterfeits, as far as known, are all in the series lettered 'I.'"

The price of Central Pacifics has been very little affected, and they close at 102@102¼; Union Pacific Firsts, 91⅛@92; Land Grants, 83½@83¾; Incomes, 82@82½.

The following is an official statement of the business of the Land Department of the Union Pacific Railroad Company:

The Gold Market.—The gold market has been very irregular in consequence of the manipulations of the clique or "pool" operating for a rise. After the partial failure of last week it appears that a new party was organized, and on Monday they succeeded in making cash gold scarce enough to command ¼ per cent for one day's use, and bid up the premium to 112¼ as the highest point. On Tuesday the pool seemed to break, and from 1 to 4 per cent was paid for carrying. Wednesday was dull without feature of importance, but on Thursday the "pool" began operating again, and frightened those "short" of gold into bidding 3-64s for its use to-day. To-day, however, there was another break in the party, with reports of bad faith among themselves and the selling out by most of the members, so that the rates paid for carrying were 2, 1, 3 and 4 per cent, and for borrowing 1 and 2 per cent to flat.

The impression prevails that no further attempts to control the market will be made, and the operations thus far are generally considered to have been a complete failure.

The export of gold has been checked, and the total this week to date is only about $400,000, with $400,000 more known to be engaged for to morrow. The Treasury sold $2,000,000 on Thursday, the total bids being $8,567,500, under the impression that more than $2,000,000 might be accpted. Customs receipts this week amount to $2,558,000

It is anticipated the July interest on Government Bonds may at any time now be ordered to be paid without rebate.

The following table will show the course of the gold premium each day of the week past:

	Quotations. Open-ing.	Low-est.	High-est.	Clos-ing.	Total Clearings.	Balances. Gold.	Currency.
Sat'day, June 10	112¼	112¼	112⅜	112⅜	$80,469,000	$1,908,668	$2,204,941
Monday, " 12	112¼	112⅜	112¼	112⅜	105,818,000	6,899,563	8,283,150
Tuesday, " 13	112¼	112⅜	112⅜	112⅜	86,167,000	5,267,726	5,937,064

Patriot doubloons	15 50	@ 15 70	Spanish dollars	2@3 p. c. premium.	
American silver (new)	97¼	@ 98	South American dollars	par.	

Foreign Exchange.—The market has been unsettled by the speculative manipulations in gold. Rates declined to 110 for sixty days sterling, but bills could be bought at 109¾@109¾ on Monday, when cash gold was loaning at ¼ per cent a day. Since that time rates have been 110@110⅛ without much firmness until to-day, when leading drawers advanced this afternoon to 110¼ in consequence of the easier rates for cash gold and the belief that the gold speculation had been, for the present, abandoned; unless a further disturbance occurs in gold, higher rates of exchange are again expected. Double eagles are now quoted at 1-16 premium Cotton shipments from all ports amount to 20,970 bales against 40,332 bales in the same week of 1870.

Quotations are as follows:

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES.

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3. The Table of Railroad, Canal and Other Stocks, on another page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column x=*extra*; s=*stock or scrip*.

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q.—J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name

---

New York City and County Finances.—CITY FINANCES.—Expenditures.—The amount of expenditures on city account, for which warrants were drawn and duly registered in 1870, was.....$18,904,806 14
Deduct amount refunded to various accounts..... 140,011 90

Total.....$18,764,764 24

The amount stated above was expended as follows:

For general expenses of the City Government	$6,953,139 75
For Board of Education	2,607,(00 00
For Department of Public Charities and Correction	1,355,615 23
For Health Department	823,353 73
For Fire Department	951,300 00
For Department of Public Parks	603,713 58
For interest on the city debt	2,106,904 58
For intercst on the city debt for war purposes	183,655 00
For redemption of the city debt	725,420 69
For Police Department	2,454,691 68
Total	$18,764,794 24
Balance unexpended, December 31, 1870	1,155,810 91

THE REVENUES.

The necessary means to defray the ordinary expenses of the city government are derived from the following sources:

1. The General Fund, which comprises all the revenues of the corporation, except such as have been specially appropriated and pledged to the Sinking Fund.

2. The Annual Taxes, which are included in the general tax levy made by the Board of Supervisors for State, county and city purposes.

I.—The General Fund.

The balance to the credit of this fund, December 31, 1869, was.....$84,256 20
The receipts into the treasury to the credit of this fund during the year 1870 were.....$2,490,058 35
The amount debited this fund for the payment of appropriations was..... 5,093 707 82

Balance to the debit of this fund, December 31, 1870.....$2,603,649 47

II.—Taxes.

Valuations of Property.—By the annual return of the Commissioners of Taxes and Assessments to the Board of Supervisors, the aggregate valuations of property within the city and county, as assessed for taxes in and for the year 1870, were as follows:

Real Estate		$742,103,075
Personal Estate, viz.:		
Belonging to residents	$196,389,202	
" non-residents	33,829,175	
Shareholders of bank stock	75,066,997	
		305,285,374
Total		$1,047,388,449

A detailed statement of the aggregate valuations, as returned by the Commissioners, and of the action of the Board of Supervisors thereon, is given in the Comptroller's annual (county) report for 1870. A comparison of the footings is shown by the following table:

	Real estate.	Personal estate.	Total.
As returned by the Commissioners	$742,134,350	$305,292,697	$1,047,427,049
As adopted by the Board of Supervisors	742,103,075	305,285,374	1,047,388,449
As corrected on extending items of tax.	742,202,525	305,317,699	1 047,520,224

Rate and Amount of Taxes.—The amount required to be raised by tax in 1870, as authorized and directed by the legislature, was as follows:

For State purposes, viz.:		
For Common Schools	$1,089,839 16	
For Canals and general purposes	1,744,612 06	
		$2,834,501 22
For County purposes		7,050,390 12
For City purposes, including amounts for the various Departments		18,187,665 13
Amount required for the payment of appropriations		$23,072,556 47
To supply deficiences in the product of the Levy		493,683 63
Total amount levied (ordinance of Board of Supervisors, Sept. 19, 1870)		$23,566,240 10

DEBT, DECEMBER 31, 1870.

Temporary Debt.	
Revenue bonds, of 1870-1871	$8,886,200

Respectfully submitted,
RICHARD B. CONNOLLY, Comptroller.

Galveston, Houston and Henderson —This railroad, which extends from Galveston northwestward 50½ miles, to Houston, and connects the other railroads of Texas with Galveston, has been for many years in the courts. Holders of bonds brought suit in 1861 for foreclosure, and for some years the road has been operated by Mr. N. A. Cowdrey, of New York, the representative of the bondholders, as receiver. These bondholders also brought suit for the earnings from 1860 to 1867, against the Junction Railroad Company, which was a short line 13½ miles long, connecting the Galveston road with the Houston & Texas Central, and against the Real & Personal Estate Association, which has the title to certain depot grounds, it being claimed that the property of the last two companies was procured with the earnings of the Galveston road. The suit was finally decided by the United States Supreme Court on the 1st inst. The Galveston *News* states its effect as follows:

"The decision validates the bonds, and will, in effect, cause the road to be sold for the benefit of Cowdrey, James and others, or, in other words, give them the road; for, holding the bonds, no other party could afford to bid against them. But it is not a lien on the Junction road, nor on the Real & Personal Estate Association.

"The bonds under which Cowdrey claims were:

1st. Mortgage of 6 per cent due them, including sterling exchange, say	$750,000
2d. Mortgage of 10 per cent, principal $750,000, due them, including interest, say	1,450,000
3d. Mortgage of 8 per cent, principal say $2,000,000, with interest, say	3,500,000
Total	$5,700,000

"Now, in addition to these claims held by the bondholders and parties to this suit there are others:

1st. A fourth mortgage to Robert Pulsford, on which there is due, say	$150,000
2d. The Houston, Tyler & Trinity Railroad Company have a mortgage which is a first lien on about two miles of the Houston end of the Galveston, Houston & Henderson Railroad, say	40,000
3d. At the commencement of the suit the city of Galveston owned the bridge, but this is now the personal property of Cowdrey and James, say	100,000
4th. The Real & Personal Estate Association own the depot and grounds at Galveston, which are said to have cost	40,000
Total	$330,000

"If we understand the decision, it gives to the plaintiffs the 52 miles of railroad with all its equipments, and a claim against the State of Texas for 512,000 acres of land subject to the Pulsford mortgage, the Houston, Tyler & Trinity mortgage and the ownership by the Real & Personal Estate Association of the Galveston depot and grounds."

Vicksburg & Meridian Railroad Report.—The tenth annual report of the company has just been published. The company operates 140 miles of road, from Vicksburg east to Meridian, where connection is made with the Mobile & Ohio and Alabama & Chattanooga railroads. The earnings of the road for the past fiscal year, are as follows: Passengers, $220,059 04; freight, $295,483 94; mails, $14,152 47; incidentals, $10,270 71; total, $530,966 22. The increase of gross earnings over the previous year is $56,429 57. The total of expenses is $415,019 06—equal to 76 8-10 per cent. The expenditures are in excess of those of the previous year, $24,902 15. This increase of expenditure is attributable to two causes, the advance in the price of labor, and the heavier purchases of new rails, new cars and new locomotives—these items of extra expense summing up a total of $76,357 42.

During the fiscal year just closed, the conversion of the past due bonds has been continued successfully. There have been issued of the new 7 per cent mortgage bonds, due in 1890, a total of $2,798,000. There are about $140,000 of the bonds and other obligations, including interest, yet to be converted. The interest on the debt of the road has been promptly met. The floating debt of the company has, during the past year, been reduced $17,106 78, leaving the amount due on Feb. 28, 1871, $81,310 57. The amount of floating debt due March 1, 1868, was $281,015 35, showing that since that date there has been paid $199,704 78.

During the year four miles of track have been laid with new iron, 44,938 cross-ties have been placed upon the track, and 39 trestle-bridges were renewed.

"Under reasonably favorable circumstances," says the President, "we hope to bring the operating expenses to a figure not exceeding 66 per cent of the gross earnings."

The through passenger business shows an increase of 5,486 passengers—nearly doubling the number of the previous year—amounting in earnings to $47,267 67, showing an increase of $12,559 28.

The Alabama and Chattanooga Railroad Company.—On June 8th, the Company was placed in bankruptcy by Judge Busteed, of the United States District Court of Alabama. The petition was made by W. A. C. Jones, an Alabama creditor, whose claim is about $15,000. C. H. Grandian and John F Bradley are appointed temporary custodians pending the election of an assignee by the creditors.

A Georgia Consolidation.—The Savannah *Republican* of the 27th ult. gives the particulars of the consolidation of two of the most important lines of railroad in the State—the Central of Georgia and the Macon and Western. The Central Company takes the Macon Company's works, agreeing to operate them, "and on the score of dividends places its stockholders on the same footing with its own." The Central was before the most important railroad corporation of the State. It owned the railroad from Savannah west by north to Macon, 192 miles, leased a branch to Augusta, 53 miles, and one through Milledgeville to Eatonton, 39 miles, and the lines of the Southwestern Company of Georgia, and one from Macon southward to Eufaula, Ala., 143 miles, with a branch from Fort Valley to Columbus, 71 miles, one from Southville to Albany, 23½ miles, and one from Cuthbert to Fort Gaines, 20 miles. This includes, altogether, 541½ miles of road. The Macon and Western extends from Macon northwestward to Atlanta, 102½ miles. It is the only road entering Savannah which has connections beyond Georgia.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, June 16, 1871.

General trade has been dull, except in the leading staples of domestic produce—Cotton, Breadstuffs, Provisions and Tobacco—for which there has been either export or speculation sufficient to keep up a pretty liberal movement. In other articles of merchandize, and especially in imported goods, there is, with here and there an exception, inactivity almost amounting to stagnation. Still the impression prevails pretty generally in business circles, that a revival of trade may be looked for immediately, after the approaching national holiday.

Cotton has been excited and closes at 20⅝c. for Middling Uplands. Breadstuffs have varied considerably; shipping extra Flour closed at $6 25@7 45: No. 2 Spring Wheat, $1 51, and Prime Mixed Corn 77c. Groceries continue dull, and nearly nominal, except for Sugars, which have sold freely at and on the basis of 9½c. for good refining. Coffee sold more freely to-day at easier prices.

In Provisions, there have been large sales for export in nearly the whole list, and there has been much speculation at constantly varying prices, but the closing figures are in some particulars the lowest of the season. Mess Pork $15 for spot and the next two months; Prime Mess $13@13 50; Lard, 10¾ for Prime Western Steam; Bacon, 7¾@8c for Long Clear; Pickled Hams, 10½@12½c. for light and heavy. Beef very firm. Butter advanced early in the week, owing to supplies being held back at interior markets, but with more liberal arrivals the close is weak. Cheese rather stronger, with Prime Factories 12½@12¾c.

Metals have shown little change, except a decline in Iron of all kinds, the supply being increased and the demand less active. In East India goods, the movement has been very moderate, except some 4,000 bales Manila Hemp at 11@11¼c. gold, a movement due to advices of reduced shipments from Manila.

Hides have been fairly active at the late decline. Leather in good demand. Whiskey, a better supply and lower. Hay firm.

Wool has been much excited, especially at the interior markets, where fine fleece is opening 10c. higher than last clip. Supplies at all the principal markets are very low.

Freights have declined, owing to small arrivals of grain, and its better quality permitting shipments by sail. The closing rate for Liverpool by steam is 6d. Several vessels have been chartered to load Deals at St. John's at 68s. 3d. and Pleorphates on the Northern Coast at 30s.

Tobacco has been generally more active, and prices show some improvement. There has been an active demand for Kentucky Leaf, to fill contracts with European Governments, and the sales of the week amount to 2,700 hhds., of which about 2,300 hhds. were for export. Prices are higher at 6@6¼c. for Lugs, and 7@12c. for Leaf. In the Western markets much speculative excitement prevails, and prices are above the parety of this market. Seed Leaf shows a fair amount of business, but has not shared the activity and buoyancy of Kentucky; the demand has been almost entirely for home use, and the sales reported are 250 cases 1869 crop, Connecticut and Massachusetts, at 37½@55c; 80 do. do. Pennsylvania, private terms; and the following from the crop of 1870—27 cases New York, 25c.; 80 do. low grade Ohio, 16c.; 400 do. Wisconsin, 100 do. Pennsylvania, and 100 do. Ohio, all on private terms. Spanish Tobacco in fair demand, with sales of 500 bales Havana at 88@105c.

Petroleum has declined, and closes at 25¾c. for Refined, and 15c. for Crude, in bulk. Rosin declined to $2 50 for strained, but recovered to-day to $2 60. Spirits Turpentine active at 46½c. Tar has advanced to $3 50 for Wilmington. Oils have been dull, and Linseed Oil reduced to 90@91c. Tallow very active, mainly for export to France, at 9⅛@9½c. Hops sold fairly for export at 7@13c. for New and 3@5c. for Old.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles from the port of New York since January 1, 1871, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show *total values*, including the value of all other articles besides those mentioned in the table.

Articles.	Great Britain.	France.	Holland & Belg.	Germany.	Other N. Europe.	Spain.	Other S. Europe.	China & Japan.	Australia.	Br. N. A. Colonies.	Cuba.	Hayti.	Other W. Indies.	Mexico.	British Guiana.	Brazil.	Other S. American.	All oth. Ports.	Total this week.	Total since January 1, 1871.	Same time 1870.

COTTON.

FRIDAY, P. M., June 16, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening June 16. From the figures thus obtained it appears that the total receipts for the seven days have reached 24,046 bales against 28,136 bales last week, 36,402 bales the previous week, and 40,178 bales three weeks since, making the total receipts since the first of September, 1870, 3,845,176 bales against 2,800,478 bales for the same period of 1869-70, showing an increase since September 1 this year of 1,044,698 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	6,199	5,774	Florida bales.	71	73
Mobile	1,627	1,831	North Carolina	1,009	231
Charleston	2,475	1,228	Virginia	3,273	1,176
Savannah	1,861	2,714			
Texas	3,710	859	Total receipts	24,046	15,526
Tennessee, &c	3,522	2,237	Increase this year	8,520	....

The exports for the week ending this evening reach a total of 20,970 bales, of which 12,755 were to Great Britain, *5,948 to France, and 2,267 to rest of the Continent, while the stocks as made up this evening, are now 224,851 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Week ending June 16.	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans*	8,378	6,104	14,482	19,260	59,298	87,436
Mobile	....	....	....	8,039	15,141	31,027

New York	2,282	....	2,282	6,572	57,600	49,000
Other ports	....	....	...	149	13,000	14,665
Total	12,755	8,215	20,970	40,332	224,851	229,277
Total since Sept. 1	2,246,850	737,882	3,009,732	2,022,824	....	....

* Exports to France this week are from New Orleans 3,837 bales and from Galveston 2,111 bales.

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is a decrease in the exports this week of 19,362 bales, while the stocks to-night are 4,426 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to June 9, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1. 1870.	1869.	EXPORTED SINCE SEPT. 1 TO— Great Britain	France	Other For'gn	Total.	North-ern Ports.	Stock.

The market the past week has continued its upward course without interruption, prices having advanced almost daily. No new influences have been apparent; the little surplus we have of the present crop is the basis of the movement, and the decreased acreage in cotton, together with the unfavorable weather which has prevailed, have served to stimulate the speculative feeling. Liverpool also has added strength to the market by her quick response to the rise here; last Friday the cable quoted middling uplands at 8¼d, while to-day the quotation is 8¼@8⅜d. The principal purchasers have been the spinners, with very little doing for export (except in transit), as our prices are above the parity of Liverpool. To-day the report of the Agricultural Bureau has been an additional influence upon the market, containing, as it does, confirmation of our figures published several weeks since with regard to the decreased land under cotton this year, and also some statements showing the unfavorable condition of the crop. These facts, however, having been made known to the trade some weeks previously through our columns, had been mostly discounted, and yet about ¼c advance was established to-day, middling uplands closing at 20⅜c against 19⅝c last Friday. For future delivery (this crop) prices have also advanced to about the same extent, but for the next crop there is comparatively little doing. Low Middling closed to-night at 19½c. for June, 20¼c. for July, 20⅝c. for August, 19⅝c. for September, 18¾ for November and 17¾ for December. The total sales of this description for the week are 74,700 bales, including —— free on board. For immediate delivery the total sales foot up this week 20,832 bales, including 764 for export, 9,712 for consumption, 3,147 for speculation, and 7,209 in transit. Of the above —— bales were to arrive. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	15¼@....	16 @....	16¼@....	16¼@....
Good Ordinary	18¼@....	18¾@....	18¾@....	18¾@....
Low Middling	19¼@....	19¾@....	20 @....	20¼@....
Middling	20⅜@....	20¾@....	21 @....	21¼@....
Good Middling	21⅜@....	21¾@....	22 @....	22¼@....

Below we give the total sales of cotton and price of *Uplands* at this market each day of the past week:

	Total sales.	Ordinary.	Good Ordinary.	Low Middling.	Middling
Saturday	2,096	15¼@....	17¾@....	18¾@....	19¾@....
Monday	4,832	15¾@....	18¾@....	19¾@....	20¼@....
Tuesday	4,108	15¾@....	18¾@....	19¾@....	20¼@....
Wednesday	2,516	15¾@....	18 @....	19¾@....	20¼@....
Thursday	4,733	15¾@....	18 @....	19¾@....	20¾@....
Friday	2,545	15¼@....	18¾@....	19¾@....	20¾@....

For forward delivery the sales (including —— free on board) have reached during the week 74,700 bales (all low middling or on the basis of low middling), and the following is a statement of the sales and prices:

For June. bales.	cts.	bales.	cts.	bales.	cts.	For October. bales.	cts.

WEATHER REPORTS BY TELEGRAPH.—Our telegrams to-night indicate an improvement in the weather the past week. The first three days, more or less rain fell in the Gulf States. On Saturday

Digitized by Google

last it rained at New Orleans, and in Mississippi as high up as above Vicksburg, at which latter point the fall of rain was excessive. Rain has also fallen two other days at New Orleans, and on three days of the week at Selma and Macon, and on two days at Columbus. We understand the storm, however, to have been less severe, since the most of our telegrams speak more favorably of the condition of the crop. At Memphis the progress continues to be satisfactory. They have had this week two days on which they were visited with delightful showers which were needed, but the rest of the time it has been pleasant. At Nashville, also, it has rained one day. The thermometer has averaged at Memphis, 78; Charleston and Macon, 81; at Columbus, 79 and at Selma, 84.

OUR WEATHER REPORTS AND THE SIGNAL SERVICE REPORTS.—Did it ever occur to those who attempt to show a discrepancy between our weather reports and those of the Signal Service Bureau that it would be better to strive to find out the reason for the difference than to charge all Southern correspondents with misrepresentation. The Signal Service Bureau in their telegrams give the State of the weather *simply at the moment of telegraphing*—not for the day. Both reports, therefore, may be strictly accurate. Our correspondents are all of them men well known in New York, and not one of them would stoop to a mis-statement. Errors in telegraphing (as parts of our despatches come in cipher) are possible, and it may be that last week our Charleston dispatch was inaccurate in the *number* of days it stated rain had fallen. With, however, that one exception, (and we are not sure with regard to that one) we know the telegrams were right, and if any one will take the trouble to verify them they will be satisfied of their accuracy. We wish we had the space to give proof with regard to them all, but we must confine ourselves to the first dispatch referred to, which was from New Orleans, and can only give one extract in reference to that. The *N. Y. Bulletin* states the matter thus:

At New Orleans, the *Chronicle* reports two rainy days; the Signal Service only "light rain" on Friday.

Here we are told is a discrepancy, and our report, therefore, must be erroneous. The New Orleans *Prices Current*, of last Saturday, however, in speaking of the weather, says:

The weather has been warm, cloudy and unsettled, with showers on Wednesday and yesterday. A heavy rain on Thursday in the upper part of the Parish.

With this extract from a well known paper published at New Orleans before us, which will we conclude is correct, the *Chronicle* or the Signal Service report, or both?

AGRICULTURAL DEPARTMENT'S STATEMENT.—We have to-day received the statement with regard to the cotton crop issued from the Agricultural Bureau.

According to it the decrease in acreage is about 1,300,000 acres, and yet it says the total acreage is "between seven and a half and eight millions of acres." Last year it gave the total at 8,885,545 acres. These two statements leave just sufficient uncertainty to enable the writer to creep either way according to results. A wise precaution, perhaps, and yet not desirable in an official report.

As to the condition of the crop planted we learn from the bureau that the present condition is below an average, as follows: North Carolina, 10 per cent; South Carolina, 8 per cent; Georgia 18 per cent; Alabama, 17 per cent; Mississippi, 16 per cent; Louisiana, 10 per cent; Texas, 7 per cent; Arkansas, 17 per cent; Tennesee, 10 per cent. After thus giving a decreased average of 15 per cent, and a falling off in condition of say about 15 per cent average, the writer reaches the conclusion that we cannot expect a crop exceeding 3,500,000 bales. If his premises are correct his conclusion should have stated that the crop was to be under 3,000,000 bales.

As to weather, the report is dated the first of June, and it tells us that the spring was unusually cold and wet but "that recently the weather has been more favorable." This valuable information must, we presume, have been obtained from the signal service bureau—made up most likely from its statements of probabilities. At all events it is new and interesting.

GUNNY BAGS, BAGGING &C.—The market for cloth is again very dull and business is restricted to small lots of domestic. Foreign is quoted nominally firm, but a bid a trifle below quotations would without doubt be accepted by almost any seller. We quote 17 for native and 18½ for Borneo.

Bags have ruled very dull and without improvement in prices; sales very small at 14c for 440. Manila hemp early in the week was quiet and some parties had rather less confidence in the market, but later, with advices from Manila reporting an advance a good demand sprung up and the close is very firm. Sales are 1,000 bales on spot here on private terms, 712 bales per "Horatio Harris" at 11¼c.; 1,633 bales to arrive per "Cora Linn" at 10¾c. all gold; 1,000 bales per "Mindora" at 11c.; 725 per "White Swallow" at 11c.; 300 per "Bunker Hill" at 11⅛c. cash; 500 per "Chaska" at 11⅛c. cash and 300 per do. at 11⅛c., 60 days, all gold, closing at the highest price, cash. Jute is dull and nominal in price, quoted at 5½@6¼c. gold, do. rejection 5¼c. currency, with sales of 250 bales to arrive in Boston. Jute butts have been rather quiet and prices are steady. Sales are 525 bales, here at 4⅛c. currency, cash, and in Boston 2,000 bales at 4c. cash, or time with interest added.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870:

	Week ending June 16, 1871.			Week ending June 16, 1870.		
	Receipts.	Shipments	Stock.	Receipts.	Shipments.	Stock.
Augusta.....	419	840	3,913	332	1,471	10,416
Columbus.....	246	831	2,011	159	790	4,985
Macon.....	145	185	2,484	206	563	6,268
Montgomery....	214	1,706	2,307	127	268	4,315
Selma.....	206	428	979	186	196	3,190
Memphis.....	2,147	1,925	5,871	1,900	1,307	12,637
Nashville.....	444	897	659	298	383	4,695
	3,821	6,812	18,224	3,208	4,978	46,506

The above totals show that the interior stocks have decreased during the week 3,287 bales, and are to-night 28,282 bales *less* than at the same period last year. The receipts, however, have been 613 bales in excess of same week last year.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons:

	1871.	1870.
Stock in Liverpool.....bales.	945,000	628,000
Stock in London.....	83,701	24,872
Stock in Glasgow.....	600	400
Stock in Havre.....	23,490	143,000
Stock in Marseilles.....	14,319	9,400
Stock in Bremen.....	62,925	21,100
Stock rest of Continent.....	30,000	50,000
Afloat for Great Britain (American).....	132,000	115,000
Afloat for France (American and Brazil)...	41,000	35,003
Afloat for Bremen (American).....	33,417	11,748
Total Indian Cotton afloat for Europe.....	471,955	355,446
Stock in United States ports.....	224,851	229,277
Stock in inland towns.....	18,224	46,506
Total.....	2,081,482	1,669,752

These figures indicate an *increase* in the cotton in sight to-night of 411,730 bales compared with the same date of 1870.

The exports of cotton this week from New York show a decrease since last week, the total reaching 2,727 bales, against 5,781 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

Digitized by Google

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 55,821 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in THE CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night:

	Total bales.
NEW YORK—To Liverpool, per steamers Minnesota, 382 ....Virginia, 837....per ships H. Fish, 535....Resolute, 973.....	2,727
NEW ORLEANS—To Liverpool, per ships Record, 2,666....Wyoming, 2,411....Ivanhoe, 4,080 ..Rival, 2 834.....	11,991
To Havre, per ships Alice Buck, 4,248....General Butler, 3,689....per bark Victoire, 309....per brig Essex, 773.....	9,019
To Bremen, per barks Jonathan Chase, 1,314....Frank Marion, 1,310	2,624
To Hamburg, per bark J. Loring, 1,378.....	1,378
MOBILE—To Liverpool per ship Bucephalus, 2,367. per bark Indiana, 834.....	3,201
To Amsterdam, per bark Wm. Shillito, 713.....	713
CHARLESTON—To Barcelona, per brigs Hortensia, 300 Upland....Recurso Segundo, 166 Upland.....	466
SAVANNAH—To Liverpool, per ship Merom, 3,519 Upland, and 120 Sea Island.....	3,639
To Havre, per ship Charlotte, 3,446 Upland.....	3,446
To Barcelona, per bark Marieta, 450 Upland... per brigs Amable Teresa, 397 Upland....Lealtad, 616 Upland....Paquita, 100 Upland	1,563
TEXAS—To Liverpool, per ships Isaac Webb, 3,836, and 45 Sea Island.... Orion, 3,719....per bark Tiger, 2,850.....	10,450
To Cork for orders, per ship Sunrise, 3,430.....	3,430
To Amsterdam, per brig H. Virden, 1,125.....	1,125
BALTIMORE—To Liverpool, per ship South America, 49.....	49
Total.....	55,821

The particulars of these shipments, arranged in our usual form are as follows:

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 112 and 112⅝, and the close was 112⅝. Foreign Exchange market is steady. The following were the last quotations: London bankers', long, 110@110⅛; short, 110⅛@——, and Commercial, 109⅞@109⅞. Freights closed at ¼d. by steam and ⅛d. by sail to Liverpool.

BY TELEGRAPH FROM LIVERPOOL.—

LIVERPOOL, June 16, 5 P. M.—The market has ruled firm to-day, with sales of the day footing up 18,000 bales, of which 7,000 bales were taken for export and speculation. The sales of the week have been 133,000 bales, of which 26,000 bales were taken for export and 36,000 bales on speculation. The stock in port is 915,000 bales, of which 615,000 bales are American. The stock of cotton at sea bound to this port is 436,000 bales, of which 132,000 bales are American.

	May 26.	June 2.	June 9.	June 16.

Of the present stock of cotton in Liverpool 63 per cent is American against nearly 62 per cent last year. Of Indian cotton the proportion is 11 per cent, against 17.50 per cent.

LONDON, June 3.—The demand for cotton has ruled active, and prices have advanced ⅛d to ¼d per lb. The following are the particulars of imports, deliveries and stocks:

	1869. bales.	1870. bales.	1871 bales
Imports, January 1 to June 1.....	117,286	57,460	104,093
Deliveries.....	191.944	154,832	88,087
Stocks, June 1.....	71,171	24,872	83,70

BREADSTUFFS.

FRIDAY P. M., June 16, 1871.

The market the past week has been variable, and closes with a very unsettled tone.

Flour has arrived less freely, and in view of this fact, as well as the high cost of production, holders have been very firm, but with a decline of 6d. in Liverpool the demand has been limited, both for export and home use, and for two or three days the common brands, including low Extras, have had a downward tendency, and prices have given way 5@10c. per barrel, especially in flour, from Spring wheat; that from Winter wheat has been comparatively firm, though there has been very little doing. The close was depressed, and prices somewhat nominal.

Wheat has been in limited supply, and ocean freights have declined, but the shipments eastward have been materially increased, and the receipts at the Western markets have continued to exceed 25,000 quarters, or 200,000 bushels per day, while Liverpool has declined 4d. under liberal arrivals from all quarters. The demand in this market from the Continent has been materially curtailed, though still continued to some extent. Under these circumstances prices have given way, with sales to-day of No. 2 Spring at $1 51@$1 52½, closing at the lower figure, with Amber Winter nominal.

Corn has been scarce, while the home demand has been large. Shippers have been favored with a decline in ocean freights, but have been met with a decline in Liverpool. Prices have advanced about 3c. The receipts at Chicago are liberal, but at other Western markets the quantity coming forward is comparatively small, so that there is very little more than is required for home use, and if any considerable export is to be kept up, prices must be paid that will bring supplies from the hands of the farmer. The weather is generally too cool for the growing crop of corn. To-day prime mixed sold freely at 77c. on the spot, and to arrive. White Southern sold yesterday at 87c.; now held at 90c.

Rye quoted at 90c. for Canadian, in bond. Oats have been active to-day, and closed firm at 67@68c. for prime cargoes of Western and Ohio.

The following are the closing quotations:

Flour—		Wheat, Spring, new, bush	$1 45@ 1 53
Superfine	$ bbl. $5 f0@ 5 90	Red Winter	....@ ....
Extra State	6 30@ 6 50	Amber do	1 63@ 1 64

GROCERIES.

FRIDAY EVENING, June 16, 1871.

This is always more or less a dull season in the grocery market, and the continued moderate movements of goods, dealers claim to be as large as could be reasonably expected, though an increased outlet would afford some relief in a few instances, on Coffee and Molasses in particular, as stocks have continued to increase and carrying expenses are heavy. Values have undergone scarcely any change other than an occasional slight shading when business could be quickened thereby, and holders seem to be about as low in their views as they can be worked for the present. Some complaints are made that the railroad companies show greater favors to neighboring cities in the way of freight charges, etc., but this is of little account while the interior distribution continues so small.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black	6 536 pkgs.	Laguayra	978 bags.	Sugar, Brazil	.... bags.
Green	6,291 pkgs.	Other	619 bags.	Manila, &c.	.... bags.
Japan	2,217 pkgs.	Sugar, Cuba	2,597 boxes.	M'las'es, Cuba	1,511 hhds.
Various	854 pkgs.	Cuba	6.450 hhds.	Porto Rico	928 hhds.
Coffee Rio	7,258 bags.	Porto Rico	958 hhds.	Demerara	281 hhds.
Java	2,850 mats.	Other	1,768 hhds.	Other	51 hhds.
Maracaibo	2,028 bags.				

*Hhds. include bbls. and tcs. reduced

Imports this week at this port have included 5,143 bags of Rio and Santos, 2,900 do of Maracaibo, 3,050 do Laguayra, and 1,977 do. of sundry kinds. The receipts of Sugar are 7,910 boxes, 20,434 hhds., and 3,465 bags. Of Molasses 7,156 hhds. have arrived. There have been no arrivals of Tea.

The stocks in New York at date, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at date.		Imports at leading ports since January 1.	
	1871.	1870	1871.	1870
Tea lbs.	....	....	32,927,801	32,246,475

Sugar hhds.	79,766	98,959	382,601	345,219
Sugar bags.	283,381	399,101	512,505	393,489
Molasses hhds.	10 2 3	20,406	197,174	208,540

TEA.

There has been very little general business doing, the market at times falling into a condition of positive dullness, and we find nothing interesting to report. Some few considerable lots under negotiation a long time have finally been closed, but fresh orders for invoices amounted to little, and were easily filled from the supply and assortment offering. Prices are quoted as before and may be called steady at least, while in many cases sellers talk extremely firm and are unwilling to operate just now, their stocks being placed in store to await further developments. The line trade moderate and at somewhat irregular figures. Sales of 1,700 Greens, 5,950 Oolongs, 700 Souchong and 1,600 Japans.

There have been no imports of tea this week.

The following taule shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871	13,232,235	13,775 897	6,215,769	32,927,801
1870	12,296 139	13,705,157	6,245,179	32,246,475

The indirect importations, including receipts by Pacific Mail steamers via Aspinwall, have been 11,724 pkgs. since January 1, against 31,595 last year.

COFFEE.

It has been pretty much the same old story on this market throughout the period under review, the demand from all quarters proving extremely moderate, business in a most decidedly flat and uninteresting condition and values in many cases altogether nominal. The few buyers who are occasionally to be seen "looking around" do not appear to object greatly to the cost of goods, or to make any complaint of the assortment available, but refuse to enter into negotiations on large parcels for the reason so long given, viz.: a slow and uncertain demand from the interior, and nothing indicating an early improvement in this respect. Importers of Brazils have received rather favorable telegrams from Rio Janerio, and this further strengthens them in their determination to resist a concession from the already losing rates, but in the meantime stocks are gradually accumulating on their hands. The demand amounts to comparatively nothing, and it is evident that the movement is slow simply because the coffee is not wanted. The varieties offering are still in the main upper grades, but there is enough ordinary here for local wants, and the large interior buyers, should they require any of the latter quality, are well aware that neighboring cities have an assortment, and can probably offer some additional inducements in the way of cheap freights. East India styles have sold very moderately, and though quoted as unchanged the feeling is very weak. West Indias are held at about former rates which may be taken as fair enough in the absence of any expression from buyers, but there is no doubt that a free outlet would be met on very easy terms. Sales of 7,975 bags Rio; 1,005 bags Santos; 1,0 0 bags Maracaibo; 250 bags Jamaica; 250 bags Laguayra; 120 bags Curacoa; 47 bags Java; 111 eighth bales and 120 quarter bales Mocha; and 347 bags St. Domingo shipped from first hands to Europe. Sales at Baltimore of 8,185 bags Rio.

The imports this week have included 5,143 bags of Rio and Santos by the "Royal Blue Jacket" and the "Romeo;" 2 900 do Maracaibo by the "Spring Bird;" 3,050 do Laguayra, and 1,977 do by the "Emma L. Porter," "P. Blake," "City of Mexico," and "Henry Chauncey."

The stock of Rio June 15, and the imports since Jan. 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.
Stock	88 591	....	62,13	11,871	8 919	3,500	175,094

* Includes mats, &c., reduced to bags.

SUGAR.

Raw Sugars have shown a pretty even tone, and the market was without many features of interest not previously noted in this column. The wants of both Refiners and the Trade appeared to be comparatively moderate, and neither class of buyers were willing to take more goods than they could use to immediate advantage, while holders were not greatly inclined to urge business.

Digitized by Google

and preserved the general range of values at about the previous level. As might be expected on a dull market, there was some little tameness here and there, common grades on pier paying better to work off at a slight concession than to increase expenses by placing them in store, but good lots have been quietly laid away to await events; and though the stock is thus increased, owners have the same feeling of confidence in the future heretofore noticed. The selections of Refiners during the week have included a fair proportion of English Island grades, while clarified sugar of the same growth are commencing to attract a share of attention from grocers who can use them as a good substitute for refined. Box sugars are a little slow just now, but held in sympathy with other styles. Refined have sold somewhat irregularly, but not very freely, and the production has been moderated accordingly. The latter fact has prevented any great accumulation of stock and given sellers a slight advantage, notwithstanding which, however, prices gradually worked off on nearly all styles. At the close the general market is fairly active and firm. Sales of 4,569 hhds. Cuba, 1,183 hhds. Porto Rico, 644 hhds. Barbadoes, 153 hhds. Demerara, 185 hhds. Martinique, 527 hhds. Guadaloupe, 293 hhds. St. Croix, 2,787 boxes Havana, and 610 hhds. Melado.

Imports at New York, and stock in first hands, June 15, were as follows:

	Cuba, bxs.	Cuba, *hhds.	P. Rico, *hhds.	Other *hhds.	Brazil, bags.	Manila, &c, bags.	Melado hhds.

MOLASSES.

Grocers have been in the market picking up a few odd lots for special use, and one or two purchases were made for boiling, but neither the trade or refiners displayed any greater anxiety than before, and the position on foreign has again shown a dull and sluggish tone. The arrivals have been fair and the supply increased in the hands of both, the regular importers and refiners bringing in goods on their own account; and there is no difficulty in finding an assortment when it is looked for. Prices are very unsettled and difficult to decide upon, but there is no doubt that sellers are disposed to deal liberally, and concessions could be obtained by free buyers. The stock of domestic has diminished very little, as buyers at the best did not want anything more than retail parcels, and holders failed to stimulate the demand by offering easier terms. The tone, however, is weak. Syrups have sold to some extent, but at much lower prices, and the purchases were in the main speculative, the consumptive trade wanting nothing. Sugar house molasses meets with an export demand occasionally and has been more steady, though the supply on hand is fair and owners anxious to part with it. We quote at 18c. in hhds., and 22c. in bbls. Sales of 80 hhds. Cuba muscovada, 1,060 hhds. Porto Rico, 150 hhds. Demerara, and 475 bbls. New Orleans.

The receipts at New York, and stock in first hands, June 15, were as follows:

*Including tierces and barrels reduced to hhds.

SPICES.

The trade generally agree in calling the market a firm one, and all the quotations made are at full former rates, with a slight advance in some instances. The strength, however, is not from an increase of the demand for invoices, as the movement has been quite moderate, but is due mainly to the bringing under control of nearly all the desirable goods here, and the indifference about realising on the part of holders. Nutmegs and Cloves are probably the best sustained. The jobbing trade is fair, and former prices ruling, though no advance, and some dealers are still enabled to sell a trifle under the asking wholesale rates.

FRUITS, &c.

The market the past week for Foreign Dried kinds, as a whole, has been more active than for some time past. The trade are gaining more confidence in prices, and for most kinds the feeling is that the bottom has been reached. Raisins have not moved to any extent this week, but they are rather stronger. The advices from Europe are favorable to an advance, but they would have to be pretty strong to create a speculative feeling here, with our present large stock. Jobbing parcels are changing hands at $2 40@2 45. French Prunes have been fairly active; the trade prefer them to Turkish, and holders of them are firm, and in some instances an advance is reported to have been obtained. Turkish have moved slowly, and the feeling among holders is not buoyant. Currants have been very sparingly dealt in; jobbers seem to have a sufficient stock to meet all wants at present, and what few sales are being made are to fill country orders. Prices have shown no decline, but quite small lots can be bought at them, other than for cash. Sardines sell slowly, and any but the smallest fish can be shaded. Nuts are dull and generally off in price. Firecrackers have sold well to our city trade, and with the stock in the hands of one party, firm prices rule.

Foreign Green box fruits have met with a steady demand and prime stock is held firmer, best Oranges selling at $6@7 per box, and Lemons at $5@6. West India kinds sell fairly, and maintain their value well. Sales of Pine Apples at $10@18 per hundred; Bananas at $1 75@1 87½; Cocoanuts at $30 per thousand; Limes at $10@12 per barrel.

Domestic Dried rule quiet for all kinds. Reports have been current of a short apple crop, and it has caused holders to appear a little more firm, but given no one courage enough to buy except at very low prices. The market may be called very dull, both buyers and sellers waiting for further information. Peaches entirely nominal. Cherries could be sold in a small way to be shipped to the West, and a few would bring good prices. Other kinds are without price or demand.

Domestic Green are in good supply and generally low prices rule, compared with former seasons. Strawberries sell at 12@15c per quart for best; Cherries at 6@9c per lb; Southern Apples, at $2 75@3 50 per crate; North Carolina and Georgia Peaches, at from $3 to $8 per crate, for best selections, and Black Cap Raspberries at 8@10c per quart.

ADVICES FROM PRODUCING MARKETS.

Tea.—Messrs. Aug. Heard & Co.'s telegram to Messrs. Everett & Co., dated in China, May 12, and Japan, May 22, gives no quotation for tea at either port, the market being inactive, awaiting the arrival of new crop teas. From Messrs. Oliphant & Co.'s circular we note nothing of interest in regard to season of 1870-'71. The last vessel had sailed, and the export to Great Britain shows a decrease of nearly 8,000,000 lbs., compared with last season. The reports from Canton and Foochow give accounts of favorable weather for the new leaf, but nothing beyond this is known of its probable quality. About 500 boxes of new Congou's were going by the English mail steamer of April 20th to the London market, but this shipment was considered unimportant.

The following shows the quantity of Tea afloat for the United States at latest dates (not including San Francisco), and which has not yet arrived:

Date of sailing 1870-71.	Name of Vessel.	From.	Cargo. Black. lbs.	Cargo. Green. lbs.	Cargo. Japan. lbs.	Total. lbs.
Feb. 5.....	Solent.....	Yokohama..	....	....	805,522	805,522

THE DRY GOODS TRADE.

FRIDAY, P. M., June 16, 1871.

There has been less activity during the past week than was noted at the time of our last report, although the market has been excited in first hands, and sales have been heavier than is usual so early. The advance in prices checked trade somewhat, but the market has been well cleared of goods, and the agents' quotations in some lines are entirely nominal. In such instances we notice that agents name a quotation somewhat above the last prices obtained on their goods, and take orders for future delivery, chiefly at value. While the latter is eminently proper, the plan of naming a quotation which could not be obtained if the goods were in the market, is not regarded with favor, for, although it may strengthen the market at the moment, it cannot probably be maintained, and a lower price when the goods begin to accumulate would have all the bad effects of an actual break in values. Jobbers have already laid in very fair supplies of domestics for the Fall trade, and since the advance have held off until their wants required their purchasing more liberally. Out-of-town houses have purchased more freely than city dealers, although the latter have been ready buyers of staple goods, and are still placing orders for goods to arrive. The retail trade is fair for this season of the year, and retail dealers are purchasing moderate amounts to maintain assortments, but are, of course, not buying any amounts beyond their actual wants. Collections are comparatively easy in all localities.

DOMESTIC COTTON GOODS.—Brown cottons continue very firm, with a further upward tendency, and a second advance of ¼c. has already been established in some makes. There are very few goods in first hands, and transactions are principally in goods to be delivered later in the season. On these prices are not generally named, orders being taken "at value." Bleached goods are very firm, and are also sold close to the production, but are without general change since our last report. Wide goods are 2½c. higher, and are firmly held, with a moderate supply. Standard brown drills are entirely sold out of agents' hands, and are nominally ¼c. higher, but the jobbing quotation remains at 13c. Rolled Jaconets are sold to arrive, and orders are taken at firmer figures. Canton Flannels have sold freely from first hands, and an advance of 1c. per yard has been established by agents. Jobbers have opened small lines of prominent makes at full prices. Printing cloths are reported very firm by brokers here, and we learn that holders refuse to sell at less than 7¼c. for full standards and 6¼c. for 56x60, although the quotations in the Eastern markets are about ¼c. under this. The sales are said to be almost wholly into consumption, and there are but few goods available for immediate delivery, as the production of nearly all of the mills goes to fill orders placed by printers early in the season. There is a moderate inquiry for light and medium prints, and some sales of staples are reported, but the trade lacks spirit and the movements are light in the aggregate. Agents are not showing dark work to any extent, but are holding off until higher prices are established. The prevailing opinion seems to be that the Fall prices will be ½@1c. above those now current, but nothing definite can be told, as no one has named a quotation.

DOMESTIC WOOLEN GOODS. Heavy woolens do not improve very rapidly, and the sales continue small. The high prices will doubtless tend to check operations in fine goods until the distributing trade require them, and the demand for low grades is confined to clothiers who are already well supplied with goods for their early trade. Flannels are selling well at an advance of 5@15 per cent on the different makes over the prices current last year. This is on the lower grades, to which the present demand is confined, but the finer qualities will probably also open somewhat above the prices of last fall. The hosiery trade is fairly active, and goods are selling at full prices, with an upward tendency in the medium and fine qualities of good.

FOREIGN GOODS.—The foreign goods market remains dull and shows no notable features not previously reported. The current trade is confined wholly to thin dress fabrics, some styles of which are scarce and are held at full prices. Ribbons of suitable shades for summer wear, and in Nos. 9, 12 and 16, meet ready sale, either in a private way or through the auction houses, and are bringing full prices. The prospects are that nearly all imported goods will be higher during the coming season than they were last fall. All classes of goods are bringing more in the foreign market, and with a better demand from the Continental markets, there is not likely to be any accumulation of stocks. Manufacturers are piled up with orders already, and on some fabrics orders are refused.

We annex a few particulars of leading articles of domestic manufacture our prices quoted being those of leading Jobbers:

BROWN SHEETINGS AND SHIRTINGS are in active demand, with small stocks and prices still tending upward. The revised quotations are as follows: Amoskeag A 36 12 do B 36 11 Atlantic A 36 12½, do D 36 11, do H, 36 12 Appleton A 36 12½, Augusta 36 11, do 30 9½, Bedford R 30 8½ Boott O 34 10, Commonwealth O 27 6½, Grafton A 27 7½, Great Falls M 36 11 do S 33 9½, Indian Head 36 13, do 30 11, Indian Orchard, A 40 13½, do O 37 12, Laconia O 39 12½ do B 27 11, Lawrence A 36 10½, Lyman O 36 10½, do E 36 12, Medford 36 11½, Nashua fine O 33 12, do R 36 13½, do E 40 15 Newmarket A 36 10, Pacific extra 36 12, do L 36 11, Pepperell 7-4 25, do 8-4 27½, do 9-4 35, do 10-4 30, do 11-4, 40, Pepperell E fine 39 13, do R 36 12, Pocasset F 30 8½, Saranac fine O 33 11½, do R 36 13, Stark A 36 12, Swift, River 36 8½, Tiger 27 8.

BLEACHED SHEETINGS AND SHIRTINGS sell freely in all grades, the finer qualities being sold ahead. Prices are stiff, with several changes since our last. Amoskeag 46 16½, do 42 15½, do A 36 15, Androscoggin L 36, 16, Arkwright WT 36 18½, Ballou & Son 36 13, Bartletts 36 14½, do 33 13½, Bates XX 36 19, Blackstone AA 36 14 Boott B 36 14, do O 30 10, do R 26 9, Clarks 36 17½, Dwight D 40 18, Ellerton 10-4 35, Fruit of the Loom 36 16, Globe 27 7, Gold Medal 36 12½, Great Falls Q 36 16 Hill's Semp. Idem 36 15½, Hope 36 13, James 36 15, Lonsdale 36 16, Masonville 36 16½, Newmarket C 36 12, New York Mills 36 21 Pepperell 6-4 25, do 10-4 40, Tuscarora XX 36 18, Utica 5-4 25 do 6-4 82½, do 9-4 47½, do 10-4 52½, Waltham X 33 11, do 42 15½, do 6-4 22½, do 8-4 27½, do 9-4 32½, do 10-4 37½, Wamsutta 36 20.

PRINTING CLOTHS are in active demand and are selling to arrive at 7½@7⅝c for full 64x64s. The stock is small, and transactions are almost wholly in futures.

PRINTS sell moderately in small lots of light and medium work, but the demand is not spirited, and agents are holding dark work for higher prices. American 10½, Albion solid 10½, Allens 10½, do pinks 11 do purples 10½, Arnolds 8½, Atlantic 5½, Dunnell's 11, Hamilton 11, London mourning 9½, Mallory pink 11½, do purples 10½, Manchester 10½, Merrimac D dk. 11, do W pink and purple 12½ do W fancy 12, Oriental 10½, Pacific 11, Richmond's 10½, Simpson Mourning 10, Sprague's pink 11½, do blue and White 11, do shirtings 10, Wamsutta 7½.

SEVEN-THIRTY GOLD LOAN

OF THE

NORTHERN PACIFIC RR.

RAPID PROGRESS OF THE WORK.

The building of the Northern Pacific Railroad, (begun July last), is being pushed forward with great energy from both extremities of the line. Several thousand men are employed in Minnesota and on the Pacific Coast. The grade is nearly completed **266** miles westward from Lake Superior; trains are running over **130** miles of finished road, and track-laying is rapidly progressing toward the eastern border of Dakota. Including its purchase of the St. Paul & Pacific Road, the Northern Pacific Company now has **413** miles of completed road, and by September next this will be increased to at least **560**.

A GOOD INVESTMENT.—Jay Cooke & Co. are now selling, and unhesitatingly recommend, as a Profitable and perfectly Safe investment, the First Mortgage Land Grant Gold Bonds of the Northern Pacific Railroad Company. They have **30** years to run, bear Seven and Three-Tenths per cent gold interest (more than 8 per cent currency) and are secured by first and only mortgage on the ENTIRE ROAD AND ITS EQUIPMENTS, and also, as fast as the Road is completed, on

23,000 ACRES OF LAND to every mile of track, or **500** Acres for each $1,000 Bond. They are exempt from U. S. Tax; Principal and Interest are payable in Gold; Denominations: Coupons, $100 to $1,000; Registered, $100 to $10,000.

LANDS FOR BONDS. Northern Pacific 7-30's are at all times receivable at TEN PER CENT ABOVE PAR, in exchange for the Company's Lands, at their lowest cash price. This renders them practically INTEREST-BEARING LAND WARRANTS.

SINKING FUND. The proceeds of all sales of Lands are required to be devoted to the re-purchase and cancellation of the First Mortgage Bonds of the Company. The Land Grant of the Road exceeds Fifty Million Acres. This immense Sinking Fund will undoubtedly cancel the principal of the Company's bonded debt before it falls due. With their ample security and high rate of interest, there is no investment, accessible to the people, which is more PROFITABLE OR SAFE.

EXCHANGING U. S. FIVE-TWENTIES. The success of the New Government 5 per cent Loan will compel the early surrender of United States 6 per cents. Many holders of Five-Twenties are now exchanging them for Northern Pacific Seven-Thirties, thus realizing a handsome profit, and greatly increasing their yearly income.

OTHER SECURITIES. — All marketable Stocks and Bonds will be received at their highest current price in exchange for Northern Pacific Seven Thirties. EXPRESS CHARGES on Money or Bonds received, and on Seven-Thirties sent in return, will be paid by the Financial Agents. Full information, maps, pamphlets, etc., can be obtained on application at any agency, or from the undersigned.

Six per cent interest on the outstanding certificates of profits will be paid to the holders thereof, or their legal representatives, on and after Tuesday, the Seventh of February next.

The outstanding certificates of the issue of 1867 will be redeemed and paid to the holders thereof, or their legal representatives, on and after Tuesday, the Seventh of February next, from which date all interest thereon will cease. The certificates to be produced at the time of payment and cancelled. Upon certificates which were issued (in red scrip) for gold premiums, such payment of interest and redemption will be in gold.

A dividend of THIRTY-FIVE Per Cent is declared on the net earned premiums of the Company, for the year ending 31st December, 1870, for which certificates will be issued on and after Tuesday, the Fourth of April next.

By order of the Board,

J. H. CHAPMAN, Secretary.

GREAT NATIONAL LOAN.

$133,000,000 NEW FIVE PER CENTS.

PRINCIPAL AND INTEREST PAYABLE IN COIN.

INTEREST QUARTERLY, FEBRUARY, MAY, AUGUST AND NOVEMBER.

BONDS FREE OF ALL TAXES, LOCAL OR NATIONAL.

The Treasury Department having already received subscriptions to the amount of $67,000,000 to the first two hundred millions of the New Loans authorized by the Act of Congress of July 14, 1870, for refunding the Public Debt, bearing five per cent per annum interest, now offers to popular subscription the remaining $133,000,000 of this particular Loan, and is prepared to promptly deliver the Coupon Bonds or Registered Certificates in exchange, dollar for dollar, for any of the United States six per cent Bonds or Registered Stocks, known as *Five-Twenties*, or for Gold Coin at the par value of the New Loan, and accrued interest from the first of May. When this amount, to which preference is given, is taken up, the remainder of the Five per Cents, $300,000,000, embraced in the Act will be offered in connection with $300,000,000 Four and one-half per Cents, and any part of $700,000,000 of Four per Cents, the one running fifteen years and the other thirty years.

The following is a copy of the New Five per Cent. Bond, under and pursuant to the Act of Congress:

FORM OF FIVE PER CENT. BOND.

INTEREST | FUNDED LOAN OF 1881. | FIVE PER CENT.

UNITED STATES OF AMERICA.

ARE INDEBTED TO THE BEARER IN THE SUM OF ..... DOLLARS.

THIS BOND is issued in accordance with the provisions of an Act of Congress entitled "An Act to authorize the refunding of the National Debt," approved July 14, 1870, amended by an Act approved January 20, 1871, and is redeemable at the pleasure of the United States after the first day of May, A. D. 1881, in coin of the standard value of the United States on said July 14, 1870, with interest in such coin from the day of the date hereof, at the rate of FIVE PER CENTUM per annum, payable quarterly, on the first day of February, May, August and November in each year. The principal and interest are exempt from the payment of all Taxes or Duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority.

WASHINGTON, ..., 18....

Entered ..... Recorded .....

.....Register of the Treasury.

Registered bonds will be issued of the denominations of $50, $100, $500, $1,000, $5 000, $10,000, and coupon bonds of each denomination except the last two. The interest will be payable in the United States at the office of the Treasurer, any Assistant Treasurer, or designated depository of the Government, quarterly, on the first days of February, May, August and November in each year.

The interest on the registered stock of this loan, it is determined by the Treasury Department, will be paid by Gold Check for the Quarterly Interest, to the Post-Office address of every holder, free of trouble or expense, dispensing with attendance, in person or by proxy, at the Treasury for the purpose of receipting for and drawing such interest.

The whole proceeds of the new loan will be applied to the payment or redemption and cancellation of the 5-20 years six per cent. bonds, and in addition to these proceeds the 5-20s are being reduced by purchases, averaging, for two years past about $10,000,000 per month.

The entire effect, therefore, of the New Loan, in connection with the existing Sinking Fund process of the Treasury, is to reduce both Principal and Interest of the Public Debt of the United States. *The Loan creates no additional supply of Government Stocks*, while the application of the surplus revenue is constantly lessening the Funded Stocks bearing six per cent. gold interest.

The policy of the Government since the close of the War in 1865, which left a debt upon the country of $2,755,000,000, and an annual taxation of $311,000.000, has been to reduce steadily both Debt and Taxes: to reduce the Principal of the Debt by actual payments, and to lessen the annual burden of Interest, and thereby the burden of Taxation, not only through such payments, but by funding the debt at the cheapest rates of interest practicable from from time to time, until it is now felt that the very cheapest rates are due to the high Credit, unblemished Public Faith, and vast and growing resources of the country. From $2,755,000,000 the Principal of the Debt has been reduced to $2,260,000,000—both sums exclusive of accrued interest—and from the heavy burden of $151,832,000 per annum, the Interest charge has been reduced to $112,780,000 per annum; while the annual taxation, under the Internal Revenue system, which the necessities of the War and the Debt thereby created rendered necessary for at least a short series of years, has been reduced from $311,000,000 in 1865-66 to about $154,000,000 per year in 1870-71, (estimating for the highest probable collections in the current month, the last of the Fiscal year), or less than one-half the first named sum. And in the year 1871-72 a further reduction of $28,000,000 will come in under the Act of July, 1870, so as to give only $126,000,000 for the year, or about two-fifths the maximum of 1865-66.

By the successful refunding of the Public Debt at moderate rates of Interest, and by continued economies in the expenditures of the Government—which in two years, from March 4, 1869, to March 4, 1871, amounted to $126,700,949, or an average saving per year of $63,350,474—it is believed that nearly the entire system of Internal Taxes can be dispensed with in a few years, or so much of it as requires the machinery of District Assessors and Collectors.

The Secretary of the Treasury has just published the Monthly Schedule of the Public Debt to June 1, from which it appears that he has further reduced the total of Funded Gold-bearing debt since May 1 by the sum of $8,000,000, by purchase of United States 5-20s for the Sinking Fund, and reduced the 5-20s by the further sum of $8,217,400 by conversion into the new 5 ⅌ Cents. The whole Funded Debt now stands $1,894,128,750, as against $2,107,846,150 two years ago, when the present Administration came into office. Adding to these sums the net Circulation of the Treasury, (that is, in Greenbacks and Greenback Certificates, after deducting Gold and Currency on hand), the following is the comparison of Debt of all kinds, at present, and at the close of the War, and in 1869:

	July, 1865.	March, 1869.	June, 1871.
United States Stocks	$2,150,784,112	$2,107,846,150	$1,894,128,750
Circulation	605,211,163	383,545,854	366,333,003
Total	$2,755,995,275	$2,491,392,004	$2,260,461,753

The following table affords a classification of the Funded Stock (in Gold) of the United States as at present outstanding:

Date.	Coupon.	Registered.	Total.
Five-Twenties, 1862	$389,958,500	$108,973,500	$486,932,000
Five-Twenties, 1864	44,752,650	55,924,100	100,676,750
Five-Twenties, 1865	123,660,150	53,552,100	177,212,250
Five-Twenties, 1865 (new)	179,369,500	70,881,450	250,290,950
Five-Twenties, 1867	241,686,550	91,325,100	333,011,650
Five-Twenties, 1868	28,009,350	11,603,000	39,612,350
Total Five-Twenties	$1,000,436,700	$387,229,250	$1,387,665,950
Sixes, 1881	93,260,400	190,417.700	283,678,100
Fives, Ten-Forties	57,279,650	137,287,650	194,567,300
Fives, 1874	13,955,000	6,045,000	20,000,000
New Fives, 1881	5,117,000	3,100,400	8,217,400
Total	$1,170,048,750	$724,080,000	$1,894,128,750
Total March 4, 1869			2,107,846,150
Reduction of Funded Debt			$213,717,400
Yearly Gold Interest charge, 1869			$124,955,350
Present yearly charge			$111,419,993
Reduction in Interest Charge			$12,835,357

The proposed further reduction of the annual interest charge upon the Public Debt by refunding is as follows:

By exchange of $500,000,000 United States six per cents for new five per cents of 1881	$5,000,000
By exchange of $300,000,000 United States six per cents for four and a half per cents of 1886	4,500,000
By exchange of $700,000,000 United States six per cents for four per cents of 1901	14,000,000
Total saving per annum by refunding	$23,500,000

WINSLOW LANIER & Co.,

NO. 27 PINE STREET, NEW YORK,

OFFER FOR SALE

THE FIRST MORTGAGE 7 PER CENT GOLD BONDS

OF THE

Evansville, Terre Haute and Chicago

RAILWAY COMPANY.

This road, 55 miles long, of which 44 are completed extends from Terre Haute, Indiana, northerly to Danville, Illinois, forming part of the great through route from Chicago to Terre Haute, Evansville, Nashville and the South.

The remaining 11 miles will be finished in August, and it is expected that the entire line from Chicago to Nashville will be completed about the same time.

The Capital Stock of the Co is $450,000

payable in cash at par, and nearly all paid in.

The Bonded Debt is - - - $775,000,

of which but THREE HUNDRED THOUSAND remain unsold, and are offered at NINETY per cent and accrued interest. The principal and interest are

PAYABLE IN GOLD COIN.

Coupons are due May and November, in New York The bonds will be registered if desired.

The character of the managers of this road, among whom are CHAUNCEY ROSE, Esq., of Terre Haute, and other successful and experienced railroad men, and its prospective business in coal, iron and the agricultural products of the rich Wabash Valley, justify us in recommending these bonds as a good investment.

New Orleans Cards.

EDWARD P. BARKER,
Secretary.

By authority of the Board of Directors of The New York Railway Company, and in conformity with the terms of the Act of Incorporation in that respect, the undersigned Commissioners on Stock Subscriptions, give public notice for and on behalf of the Directors, and of such Company, that Books of Subscription for the Capital Stock thereof will be opened on Wednesday the twenty-eighth day of June, instant, at the following places in this City, viz.:

At the Banking House of Duncan, Sherman & Co., No. 11 Nassau Street.

At the Banking House of the Bank of the Metropolis, No. 31 Union Square

The Company is authorized to construct two Viaduct Railways or branches through the City of New York, on the east and west sides thereof, from a common starting point at or near Chambers Street, between Broadway and Chatham; also across the Harlem River and through Westchester County; with power to build additional lines of railway or branches, from time to time, in any part of the City, or Westchester County. The property acquired by the Company is exempted from taxes and assessments during the period allowed for the final completion of the railway in the city. The Mayor, Aldermen, and Commonalty of New York are authorized and directed, with the approval of the Commissioners of the Sinking Fund, to subscribe for five millions of dollars of the stock of the Company, whenever one million of dollars thereof has been subscribed for by private parties. This conditional amount of stock has been wholly subscribed for and taken by the Directors of the Company. On the completion of either of the lines of railway to the line of Westchester County the the Supervisors of that County are authorized to issue the bonds of the County to such amount as the Supervisors shall deem expedient, to aid in the construction and extension of the railway in and through that County. For the proper equalization of the interest of shareholders who may subscribe and pay in moneys at different times, the Directors are authorized to issue scrip for interest on such payments, payable out of the earnings.

The terms of subscription will be as follows:

Ten per cent of the amount of Stock subscribed for to be paid in cash at the time of subscription. The residue to be paid as called for by the Board of Directors on a notice of thirty days, but no call at any one time to exceed ten per cent.

Scrip for interest at the rate of seven per cent per annum will be issued by the Company, payable out of the first earnings of the Railway on all instalments paid on Stock subscribed for within thirty days after the Subscription Books shall be opened.

The Company reserves the right to close the Subscription Books at any time after the twenty-ninth day of July, 1871.

By order of the Board of Directors.

ALEXANDER T. STEWART,
JOHN JACOB ASTOR,
LEVI P. MORTON,
Commissioners on behalf of the Company.

NEW YORK

State Railroad Bonds.

A First-Class Home Investment.

FIRST MORTGAGE GOLD BONDS

OF THE

Rondout & Oswego RR.

Principal and Interest Payable in Gold

SEVEN PER CENT SEMI-ANNUALLY.

This Road covers 100 miles of the most direct possible line between the Great Lakes and deep-water navigation on the Hudson River, the whole line of which will be completed and in operation on or before October 1, 1872, and give a new line of road to Lake Ontario and the West, 25 miles shorter than any line that can be found.

It passes through the Cement, Flag-Stone and Lumber regions of Ulster County, and the rich agricultural bottoms of Delaware and Green counties, all of which have not heretofore been reached by railroad facilities, and from which sections the formation of the country prevents the construction of a competing line.

The 36 miles of road operated for three months is already paying net earnings equivalent to 7 per cent gold on its cost of construction and equipments. The issue of Bonds is limited to $20,000 per mile of COMPLETED ROAD, the coupons payable in gold in this city. Price of the Bonds, 90 in currency.

Full particulars of the above may be had of, and the Bonds for sale by,

EDWARD HAIGHT & CO.,

The attention of Capitalists and Investors generall is invited to the

FIRST MORTGAGE

7 Per Cent Gold Bonds

OF THE

Walkill Valley Railway Company

which we offer for sale at 90 and accrued interest, in currency. The Railway is situated on the west side of the Hudson River, and is now running for 20 miles to New Paltz, and is under contract to be in working order to Kingston next fall. The bonds are a first-class investment, and we invite the closest investigation of them. The principal and interest are

PAYABLE IN GOLD.

The coupons are paid semi-annually in this city, on the first days of April and October, free of government tax; and the issue of bonds is limited to $20,000 per mile of completed road. Any information concerning them will be given at our office.

HOW WILL THE JULY DIVIDENDS BE INVESTED?

One hundred and fifty millions of dollars will in a few days be paid out on account of the July dividends, and the prominent topic of discussion in the financial circles is what direction this large sum will take, and in what securities it will invest itself. In former years a large part of the aggregate was regarded as certain to seek investment in Government bonds, because these securities were regarded as both the safest and the most lucrative the market could offer. In consequence, however, partly of Mr. Boutwell's purchases and partly of the foreign demand, Five-Twenties are now scarce, and as they pay barely 5 per cent on the capital they attract, they have had for some time past a diminishing power to draw off our floating funds, and the result has been a division of the tide of capital into several streams, some of which have chosen various railroad securities, while of late business speculations have attracted an increasing current of surplus money, and the Stock Exchange has received more than its fair share, in consequence of the accumulation of capital at this centre which could not safely be employed except in demand loans, or in some other way which allowed of its being called in at short notice without risk. Hence it has happened that call loans are offering at 3 to 5 per cent, while on mortgages and other investments at long dates much higher rates have been firmly demanded and readily paid. The events of the past week, if the money market had been less plethoric, would doubtless have caused a much greater effect on the rates of interest than has taken place, and we should now have had money ruling at 6 and 7 per cent on call. But after a temporary and partial rise of about 1 per cent on Wednesday and Thursday owing to the changing of loans, the rates of money subsided to their old grooves, and there was an abundant supply at 3 to 4 per cent where the collaterals and the borrowers were approved.

This state of things is extremely favorable to the negotiation of the new loan, and notwithstanding the reports to the contrary, Mr. Boutwell is said to be sanguine that at the beginning of July a decided impulse will be given to the subscriptions. Early in that month he expects also to have communications from Mr. Spinner, the Treasurer of the United States, who has for some time been in Europe, and from Mr. Douglas, the Assistant Secretary, who has just gone there. If the news from these gentlemen is satisfactory, Mr. Boutwell thinks that the investors here who have been waiting for some such development will hasten to invest in the new loan. When this is done and the other circumstances are favorable, he contemplates calling in 55 millions of registered Five-Twenties of 1862, now owned by the banks and held in Washington as security for the national bank notes. If this movement be attended by the desired results, a further call will follow for the remainder of these registered Five-Twenties, which are in the hands of the public, and are most of them held in Germany. By that time the calculation is that the whole loan of 200 millions will be absorbed, and the Secretary will proceed at once to make arrangements for the marketing of his 4, 4½ and 5 per cents. Such is the rumored programme which is under discussion at Washington.

In Wall street this plan does not seem to command much approval. The new French loan, which seems just now to be rapidly winning its way to European favor, will be in the way of Mr. Boutwell's success on the other side of the Atlantic, especially as there is just now some distrust of American securities in consequence of various unfavorable circumstances, particularly the Erie scandals, and the failure of the Rockford and Rock Island Railroad Company to pay their interest. On these grounds it is supposed—perhaps without sufficient reason—that Mr. Boutwell will be disappointed in his expectations of a market from abroad, and that if he were to call in the five-twenties of 1862 under the five years' option, he would only add to the disfavor and incertitude under which American securities have been of late suffering in Europe.

Digitized by Google

As to the prospects here the opinions are more conflicting. For the most part they are not, however, much more favorable. In August, it is expected that the plethora of the money market will begin to disappear, and as the Treasury balance of greenbacks has been suffered to run down to a very low point, it will not be possible, as usual, to furnish the currency to prevent the consequences of a sudden drain to the interior, if such a drain should be developed. In anticipation of this the banks and financial institutions will act very cautiously, and keep a large part of their funds under complete control by simply lending them out on call. On the other hand those funds which are not so held as to be realizable at a moment's notice, will, it is supposed, be disposed to seek investments where they can command a larger rate of interest than is offered by the new loan. Multitudes of railroad bonds and other securities of high credit can be had, which will produce 7 or 8 or 10 per cent. These it is argued will spoil our market for the Secretary's purpose, just as in Europe his plans will be compromised by the French loan. This latter loan is offered on very favorable terms. The price is 82.50 payable in 17 instalments.

It is only due to Mr. Boutwell to add that there are a considerable number of persons of considerable experience who are equally sanguine with himself. They acknowledge, however, that there is no room for delay, and that some faults of management have diminished the chances of eventual success. When the monetary activity of the fall season sets in there will be still less prospect of placing the loan satisfactorily. The arguments in favor of Mr. Boutwell's views are founded partly on the fact that money received for interest on Five-Twenties and other bonds has usually showed a disposition to invest itself anew in government bonds. This conceded, it is shown that the July dividends on government bonds will amount to $29,848,350, on State debts to $7,560,870, on city debts to $4,158,570, on railroad stocks to $20,000,000, on railroad bonds to $24,000,000, on banks, savings institutions, and insurance companies to $17,500,000, on manufacturing and shipping companies to $7,500,000, and on mercantile business to $5,000,000. Total, 115 millions of dividends to be paid in July on 5,044 millions of capital. In going over this list we concede at once that there are 50 millions of dollars at least which a few years ago could be relied upon as almost certain to find their way sooner or later into government bonds. Whether this amount, or any considerable part thereof, will do so under the changed monetary conditions we have above referred may well be doubted.

THE ROCK ISLAND EXPLOSION.

The last Wall street sensation furnishes a conspicuous instance of the methods by which certain speculative evils work out their own cure. The Rock Island "cornering" party were defeated on Wednesday at the very moment when they were most confident of success. Treachery in their own ranks is said by some persons to have been the cause of the mischief. Others affirm that the fatal blow was struck by the "bears," who proved the best warriors, and fairly came out victorious from the fight. At any rate, the collapse appears to have ruined the leading "bull" speculator, who has carried with him several brokers. He was prominent in the gold speculation in September, 1869, and is reported by his treachery on that occasion to have crushed the projects of the ring, the members of which, perhaps, have taken the opportunity of punishing and ruining him for his want of fidelity. Another theory is that the explosion of Wednesday was intended and planned by Mr. Woodward himself, and that this speculative genius, who has four times failed before, has now thrown his last *coup*, and means to retire rich from the arena of the Stock Exchange. Against this last theory it is urged that he has always been prompt and honorable in his previous settlements after failing, and his friends are confident that the cloud which obscures him will soon pass away. To the general public these discussions are of little account, as the persons in interest are very few. What is of more general importance is the struggle itself and the effect which its failure will probably have in preventing similar outbreaks in the future.

Ever since the summer of 1866 there has been a want of confidence in the management of Rock Island in consequence of the secret issue at that time of 49,000 shares of stock, and the subsequent confession, on oath, of the president of the company, that he had himself personally speculated in the shares at the Stock Exchange, and in consequence of his secret knowledge of the intended issue, had sold the stock "short" to a very large extent; without, however, realizing any profit, as the bulls were too strong for him, and notwithstanding the inevitable decline, they contrived to keep up the price of the stock to a higher point than he had conceived possible. Considerable sensation was produced by this sworn acknowledgement on the part of the president of the road that he had been trying to make gain and to put money into his own pocket by breaking down the market price of the very securities which, as president, he was bound to protect. No proof has transpired of any similar misconduct since on the part of the president. And, indeed, the secret issue of further stock was prohibited both by the rules of the Stock Exchange, which require notice of 30 days, and by the laws of the State of Illinois, which forbid the issue of more stock after the authorized capital is filled up. Some such rule as this would be of no small advantage in other States. Many of the grossest abuses in Erie and New York Central would by such an enactment have been prevented. The memory of the secret issue of stock and of the speculations of the officers of the road has long survived and has ever since tended to give to the stock a lower position in the market than its intrinsic value as a ten per cent security would justly warrant.

Still of the Rock Island shares a considerable proportion had fallen into the hands of small investors along the line of road. A few were floating in Wall street, and sundry large capitalists held the remainder. In April last the price was 102, and in view of the annual meeting in June a clique was formed to put up the price of the stock. The hope was that the known reputation of the road would cause heavy "short" sales, and would thus place the "bears" at the mercy of the "bull" speculators, who could charge as high a price as they chose. The plan worked like a charm. The price went higher and still higher. But trouble began. The more prices rose the more stock came offering itself for sale. In vain did the overburdened "bulls" circulate stories of a scrip dividend. In vain did they resort to the unusual expedient of sending to private holders of Rock Island stock, whom they had taken pains to trace out all over the country, and dazzling these men with the prospect of getting 150 for their stock if they would only wait patiently and not be too hasty to realize. These small holders and a formidable proportion of the larger owners of the stock refused to wait and determined to sacrifice their stock at the ruinous price of 120 or 125. At length, on Tuesday evening, the bull leader found himself a million of dollars short of what he wanted to pay for the stock coming in on Wednesday. He tried to get the money. Report says the Erie men stood in his way. Anyhow, he failed. His stock was sold out under the rule. And in the crash of his fall

Digitized by Google

a dozen brokers of more or less reputation were crushed. It is scarcely possible as yet to discover the precise extent of the losses, or how widely they are distributed. But the belief is that the sufferers are few. Almost all the leading houses in the street, who possessed capital and standing are reported to have declined to be used in the speculation. Hence the business was thrown into the hands of younger firms, several of which were gaining a very good position, and in an evil hour were tempted into an operation which lured them to their ruin.

It is the experience of several years, and this catastrophe adds another illustration to the long previous list, that no cornering operation, no clique movement for putting up the price of stocks or gold, has since 1865 paid a profit to its promoters. Outside parties frequently gain by such movements, the principals never. The only exception to this rule is in the Vanderbilt stocks, and the general belief is that the final success of this movement is not so well assured as its friends suppose. The public then have this safeguard to protect their interests against most of the combinations of capitalists for such speculative purposes as might compromise the usefulness and lessen the value of our railroads. And it is a noteworthy fact that the only combinations which have succeeded so far in regard to railroad financiering are almost without exception such as diminish the rates while enlarging the facilities of railroad transportation.

METROPOLITAN TAXATION AND THE GROWTH OF COMMERCE.

Who can tell how far the future of New York may be controlled by the right solution of the problem of metropolitan government and municipal taxation, which are now commanding so large a share of the public attention? We omitted for separate notice the consideration of some of these points in our review last week of the finances of New York and of the recent message of the Mayor. It is the chief characteristic of the new Charter that all responsibility for civic expenditures is centralized in a single board of apportionment, instead of being distributed as formerly among a score of independent officials who acted without much concert and devolved much of their responsibility upon the Legislature of the State. This fundamental change in the method of fixing the municipal expenditure has some advantages, the most prominent of which is that it places the responsibility clearly and without doubt. If there be extravagance and corruption we know whom to call to account and whom to blame. There is, however, the plain objection that too much power is likely to be concentrated in the four members of the new Board, who hold the purse of the city; and who are the Mayor, the Comptroller, the Commissioner of Public Works, and the President of the Department of Parks. Twenty-three millions of dollars a year is a stupendous sum to be put into the hands of four men to collect and disburse every year. Knowing the corrupting influence of power, especially of money-power, the Legislature thought it wise to impose certain restrictions on the prerogatives of this Board of Apportionment. These restrictions were two. First, the year's assessment was limited to two per cent to which sum the taxes were to be confined. And, secondly, this two per cent tax was to be on a fixed valuation made by another Bureau, that of the Commissioners of Taxes and Assessments, who had always fixed it before and had already approximately ascertained it before the new law was proposed. These limitations on the power of the new Board were the more important as the assessment-controlling bureau is by law composed of an equal number of members of both political parties, and is, therefore, intended to be raised above the troubled atmosphere and warping temptations of politics How they will do their duty it is impossible to say. The Mayor speaks with some dissatisfaction of the system as a whole. He argues that the limitation of responsibility by the two per cent bill was impolitic for several reasons. First it is almost sure to make somebody unpopular. It singles out certain individuals for public reprobation, should there be any trouble, because it concentrates responsibility for expenditure, which hitherto has been shared in undefinable proportions by the members of the Legislature, the Governor, the Supervisors, the Common Council, and a number of city officials. The new method, by fixing the responsibility and confining it to four persons, now holds these party leaders to the strictest accountability. But the present time, he says, was not so favorable to economy as to render the experiment safe. During the last fifteen years the extravagance of some of the irresponsible departments, and the mistaken economy of others in the city government, had developed deficiencies, claims and jobs, and had postponed necessary improvements. Hence there is an indispensable demand for a large outlay to accomplish certain long deferred improvements, which in justice to our successors and to posterity must be undertaken at once. Such costly works and the new burdens they involve can scarcely fail to be unpopular, and in these days of retrenchment and revenue-reform the enhanced expenditure may meet with some opposition. Hence the Mayor hints that it was not a judicious policy, though it might be a bold and needful one, to invite the popular dislike, if any should arise, towards any special individuals. Secondly, however, the Mayor thinks the difficulty may be met by borrowing a part of the means required for the movements he is contemplating. "The people are willing," he says, "if they see available results of the expenditure, to incur a larger debt in order to improve the water front, repave streets, finish boulevards, supply deficits in sewerage and drainage, and by means of widening, cutting and extending streets to adapt thoroughfares to the future demands of the great American metropolis.

In spite of Mayor Hall's protest, we think the restrictions on the power of taxation which the Legislature imposed on the new Board of Apportionment were necessary, and that a sound policy demanded their being made even more stringent. "Good government," it has been said, "is mainly a question of taxation." The power to tax is certainly one of the highest prerogatives of a people. And where, as in this case, the tax prerogative is deputed to a few persons, the responsibility of each man should be so clear that there can be no doubt raised should a necessity arise for bringing him to account. The history of cities, equally with the rise and fall of nations, combine to show that among the social forces hostile to the growth of commerce and wealth and power, one of the most formidable is a wasteful, oppressive, bad system of taxation, together with that corruption of the fountains of justice, that spirit of faction, that depravity of public morals, and that impaired security of property which have usually followed in its train. It was because of its superior concentration of responsibility for uprightness and integrity in collecting and disbursing the taxes that the new charter claimed to be preferred before our old system of municipal government.

Moreover, the expenditure and annual revenue of our city government is too large to be intrusted to any set of men, except under the most careful restrictions and the most perfect safeguards. Its aggregate exceeds the amount which the whole of the National Government raised by taxation as late as 1845. In Europe, at the present time, there is more than one proud ancient monarchy whose annual revenue is less than that of New York city. There

Digitized by Google

is Portugal, for example, with only 25 millions of revenue. She still contrives to keep up armies, mans a royal fleet, manages extensive colonies, and holds her place among the proud rich old dynasties of Europe. We trust no attempts will ever be made to remove the responsibility from the shoulders of those of our city functionaries who preside over its tax system and manage its finances. We must rather increase than lessen their amenableness to public opinion. And if the present methods are defective, others more perfect and more effective must be contrived.

As an example of this increased responsibility we may refer to the selling of the property owned by the city and the use made of the cash proceeds. It is intended to sell off during this year a considerable part of the city property, such as plots and buildings heretofore used by city departments, as well as market and pier property. It is believed by the Commissioners of the Sinking Fund that at least five millions of dollars can be realized to the fund for extinction of the city debt by such a sale. Within the next year the intention of the Commissioners of the Sinking Fund will assume a practical and serviceable shape. It is desirable that the property now used for markets should continue to be so used, but in the hands of individuals or companies. It has not been the wish of the city authorities to embarrass market privileges or property, but only to disincumber themselves of the trouble and expense of publicly maintaining markets after developments of public economy have shown that individuals or private corporations can better discharge market duty than can a municipal corporation. This policy is undoubtedly sound, but only on this condition, that the sales be openly made to the highest bidder, and that the cash proceeds be placed in the Treasury or so used as to afford direct relief to the burdens of taxation.

Another example may be taken from the Sinking Fund. The people wish to have a more complete statement than has yet been published of the management of this fund. They wish to know, for example, what price is paid for the bonds which are purchased, and in what way the funds which flow into the Sinking Fund are disposed of. These details, with a cash statement covering the whole of the receipts and expenditures such as is yearly given by the Federal Government and by most of the governments of the several States are much desired, and should be furnished, that the light of publicity may reach every department of our municipal administration.

A short time ago we printed an elaborate discussion of the chief defects of our city tax system. We need only say here in addition, that the sum to be raised this year is $23,300,000, of which $6,741.956 will be for State taxes, 6 millions for interest, 2½ millions for education, 3 millions for police, a million for public charities and a million for the Fire Department.

The Mayor enters into an elaborate calculation to show how much greater is the national taxation than that of this city. The national taxes he estimates at 50 millions of dollars a year, and he thinks that the mechanics of the city are taxed about eight times as much by the National Government as by the city. He also says that while the city taxation as a rule falls heavy on capital, great incomes and stately mansions, the Government taxes fall solely on the labor of the country, and in a small degree upon opulence and wealth. Mr. Hall is not alone in this opinion. Some of the friends of the income tax sustain it on this very plea. We do not care in this place to dispute his statements, which are, some of them, obviously incorrect. Believing, as he does, in the oppressive character of the national taxes, Mayor Hall will see the necessity of making our municipal taxes as light as possible. New York has lost many thousands of its inhabitants during the past five years. High taxes and other causes have driven them to the suburbs. This port has also lost some of its commerce from similar destructive causes.

We are by no means of the opinion advocated by some alarmists, that there is any imminent danger of an early transfer to any other city on this continent of the sceptre of metropolitan power, but if bad taxation has driven away our commerce and population, we would have the fiscal system amended. We are in favor of doing all that light taxation and improved piers and wharves, and elevators and warehouses can accomplish to enlarge the commerce of the port. Of the 166 piers on our water front, no less than 105 are owned by the city. If these can be made more available by proper warehouses, no other city in the world has such facilities for commerce; and if our unrivalled harbor and dock facilities be duly improved and developed no other city is so likely in the westward movement of the grand centres of commerce of the world, to become the future metropolis of the Eastern as well as the Western hemisphere.

RAILROADS AND CANALS OF NEW JERSEY.

A Statement of their Capital, Bonds, Debts, Length, Cost, Earnings, Expenses, Dividends, &c., for the year ending December 31, 1870. Compiled from the Annual Reports of Companies made to the State Comptroller.

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS

The following are the changes in the Redeeming Agents of National Banks since the 15th of June, 1871. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
Illinois. Aurora	The Union National Bank	The Third National Bank of New York, approved in addition to the Second National Bank of Chicago.
Pennsylvania. Wilkesbarre	The First National Bank	The National Bank of the Republic, Philadelphia, approved in addition to The First National Bank of New York.
Massachusetts. Plymouth	The Old Colony National Bank	The Commonwealth National Bank of Boston, approved in place of the National Bank of Redemption, Boston.

New National Banks.

The following is the only national bank organized during the past week, viz:

Official No.

1,836—The First National Bank of Atlantic, Iowa. Authorized capital, $50,000 paid in capital, $25,000. F. H. Whitney, President; John B. Gerberich, Cashier. Authorized to commence business June, 21, 1871.

[From our own correspondent.]

LONDON, Saturday, June 10.

Cold and unseasonable weather, combined with the uncertainty hanging over the future of the money market, have during the week produced caution in all departments of business, and in securities especially, large transactions are avoided. A bill has been laid before the French Assembly to authorize a loan of £100,000,000, and there is still much discussion as to the effect this large sum will have upon our money market. Some think it will be considerable, while others believe that the effect will be very much less than is expected. I think that an exaggerated notion of its effect has taken hold of the public. For a time there will certainly be some disturbance, and that perhaps only slight; but as soon as the Germans have received their money in the form prescribed in the treaty the whole of the £200,000,000 will have been converted into paper possessing a market value, fluctuating in the same way and from causes similar to those which affect the national bonds of other nations. As soon as that point is arrived at the £200,000,000, added to the French debt, will affect us but little; the only parties who will feel its burden will be the French people, who will have to be taxed, at least, to pay the interest, and possibly to redeem the debt. But the question of the redemption of the French debt is less serious than might be supposed. In course of time, but not in this century, the railways in France will become the property of the State. When the construction of railways was commenced in France the French Government, in order to encourage it, granted concessions for 99 years, guaranteed a certain rate of interest, and provided that at the close of the period of 99 years the railways should, under certain conditions, revert to the State. In most cases the State is to participate in the profits at certain dates, and I find that such will be the case with some of the earlier constructed lines in 1872. These advantages and the reversions, which, although distant, are clearly of value to a Government about to borrow an unprecedented sum of hard cash, may be made use of by that now in power. The future of France, in a financial point of view, would indeed look gloomy, for, with the addition of the German indemnity and of their own expenses incurred during the war, the national debt can be little, if at all, short of £1,000,000,000 (sterling). The State, however, holds a large proportion of the national wealth, and it is increasing naturally year by year. A future generation will, therefore, be in a position to materially reduce the present amount of debt, unless in the meantime France should again be overwhelmed as in 1870.

In the money market, there has been continued quietness during the week, and the rates of discount remain extremely easy. In this department there is no fresh feature. An uncertainty continues to envelope the future, and it is partly from this cause that so much quietness prevails. The following are the present quotations compared with those of last year:

	1870. Per cent.	1871. Per cent.		1870. Per cent.	1871. Per cent.
Bank minimum	3 @...	2½@ ..	4 months' ba'k bills	3 @3¼	2⅞@2½
Open-market rates:			6 months' ba'k bills	3½@3⅝	2⅞@...
30 and 60 days' bills	2¾@ 3	2¼@ ..	4 and 6 trade bills	3¾@4	3 @3¼
months bills	3 @...	2¼@2⅜			

The rates of interest allowed by the joint stock banks and discount houses for deposits are subjoined:

	1870.	1871.
Joint stock banks	2	1½
Discount houses at call	2	1½
Discount houses with 7 days' notice	2¼	1¾
Discount houses with 14 days' notice	2½	1¾

Advices from Paris state that the leading financial establishments are taking first-class paper at 3½ to 4 per cent, but this quotation must be considered exceptional. At Amsterdam the rate of discount has been reduced ½ per cent.

The following are the quotations for money at the leading Continental cities:

	B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.		B'k rate 1870.	B'k rate 1871.	Op. m'kt 1870.	Op. m'kt 1871.
At Paris	2½	6	2¾	*3¾-4	Brussels	2½	4	2¾	3¾
Vienna	5	6	5	5	Madrid	5	5	5	5
Berlin	4	4	3½	3¾	Hamburg	—	—	2¾	2¾-½
Frankfort	3½	3½	2¾	3	St. Petersburg	6	8	5	7
Amst'd'm	3½	3	3½	2¾					
Turin	5	6	5	6					

* Exceptional.

There has been a better demand for bills of exchange, and the rates are lower. Three months' Paris bills, which have been as high as 25.90, are now negotiated at 25.70 to 25.85. Excepting for sovereigns for transmission to South America on account of the Brazilian and Argentine loans, there is no demand for gold for export, and the accumulation of bar at the bank has again been very considerable during the week. For silver there is a fair demand, and old Mexican dollars are firm in values. The following prices of bullion are from the circular of Messrs. Pixley, Abell, Langley & Blake:

GOLD	s.	d.	s.	d.
Bar Gold ..... per oz. standard	77	8¾	@77	9
do fine ..... do	—	—	@—	—
do Refinable ..... do	77	11	@—	—
Spanish Doubloons ..... per oz.	—	—	@—	—
South American Doubloons ... do	74	0	@—	—
United States gold coin ..... do	76	3	@—	—

SILVER.	s.	d.	s.	d.
Bar Silver, Fine ..... per oz. standard	5	0¾	@—	—
do do containing 5 grs. gold per oz. standard	5	0¾	@ 5	1
Fine Cake Silver ..... per oz.	no price.		@—	—
Mexican Dollars ..... per cz last price	4	10¾	@ 4	11⅛

Annexed is a statement showing the present position of the Bank of England, the Bank rate of discount, the price of Consols, the average quotation for English wheat, the price of Middling Upland Cotton, and of No. 40 Mule Yarn, fair, second quality, compared with the four previous years:

	1867. £	1868. £	1869. £	1870. £	1871. £
Circulation, including bank post bills	23,219,902	24,603,665	23,306,718	23,245,021	24,642,972

Price of wheat	65s. 4d.	70s. 8d.	45s. 5d.	46s. 3d	60s. 0d.
Mid. Upland cotton	11⅛d.	11d.	11⅜d.	10⅝	*7⅞d.
No 40 mule yarn	1s. 5¼d.	1s. 3d.	1s. 3⅛d.	1s. 3¼d.	*1s. ⅛d.

*Price June 1.

In the stock markets business has been quiet during the week, and the tone dull. Realizations have been numerous, and in the value of British railway shares a decided fall has taken place. The railway traffic receipts, however, continue good, the increase for the United Kingdom, for last week, compared with 1870, being £72,842. The increase for goods traffic on the 14 principal lines was £2,977. The markets have been affected not only by the expectation of a French loan, but also by the cold and unseasonable weather, and by a fear that the question of the temporal power of the Pope may be reopened. As regards American securities, there have been but few features. Erie railway shares

Digitized by Google

are firm, but dealing in these securities is limited to the few, the public having for a long time past feared to venture their savings in so uncertain an investment. American mines continue to be brought forward extensively, and scarcely a week passes by without the appearance of at least one advertisement relating to the mining properties of Nevada. Capital, however, is very shy at the present time, and I have reason to believe that many subscribers to American railway bonds have already regretted the course they have taken, as the bonds have already fallen in many cases to a discount, there being no actual market for them. It is quite certain that the affairs of the Erie Railway Company have had an important effect here against the successful introduction of American railway and other similar loans in the London market. It is argued, of course, that it is not good reasoning to assert that the American railway system is rotten because so many scandals have transpired in connection with the Erie railway company any more than the whole English railway system is unsound because several English railways have been sadly mismanaged. To a certain extent the argument is sound; but it must be borne in mind that America is a distant country; its State laws are not understood by the majority of the English public, and that shareholders in England are placed in a difficulty of obtaining information respecting their property, and of the character and position of the gentlemen who form the board of directors. The contradictory decisions of the judges in the Erie railway have been a puzzle to many regarding the administration of the law in the United States, and the result is that the large body of the public decline to invest in American railway mortgage bonds. The following have been the highest and lowest prices of consols and the principal American securities on each day of the week:

	Monday.	Tuesday.	Wed'day.	Thu'day	Friday.	Sat'day.
Consols	91⅛-91⅜	91⅛-91⅜	91⅛-91⅜	91⅛-91⅛	91⅛-91⅜	91⅜-91⅛
U. S. 5-20's, 1882	90⅛-90⅜	90⅛-90⅜	90⅛-....	90⅛-90⅜	90⅛-90⅜	90⅛-90⅜

U. S. 10-40s, 1904	88⅛-89	88⅜-....	88⅛-88⅜	88⅜-89	88⅛	88⅛-88⅜
Atlantic & G't West. consol'd mort. b'ds	42 -43	42 -43	42 -43	42 -43	42 -43	42 -43
Erie Shares ($100)	23¾-24	23¾-23⅞	23¾-23⅝	24 -24⅛	24⅛-24⅝	24⅛-25
Illinois shares ($100)	109¼-....	109¼- ..	109¼-109¼	109 -110	109¼-109⅝	109¼-110

Advices from Frankfort state that the market has been peculiarly strong for American Mortgage Bonds. Oregon have risen to 78, while the new emissions of California, Oregon, Omaha Bridge, St. Louis, Southeastern and New York Midland sell well, and are almost all taken up by investors. The default of the Rockford Company was expected, and made no impression on other bonds, although they have been offered at 49, without finding buyers. The promoters of the Northern Pacific Railroad have made an arrangement with the Union Bank of Vienna to bring out their bonds.

Although the weather is unseasonable, and although the harvest promises to be late, millers have not been anxious to purchase breadstuffs to any great extent during the week. A good business has, however, been transacted, and prices have been well maintained. Hay making has been commenced in the Southern countries, and a good crop is being secured. To-day, however, the temperature has greatly changed. During the afternoon rain has fallen heavily, and the atmosphere is close and oppressive. A few days of sunshine will work a great change in the agricultural prospect.

The following statement shows the imports and exports of bread and feeding stuffs into and from the United Kingdom, during last week and since the commencement of the season, compared with the corresponding periods in 1869–70:

FOR THE WEEK ENDING MAY 28.

	1870'71. Imports.	1870'71. Exports.	1869'70. Imports.	1869'70. Exports.
Wheat.....cwt.	575,031	74,980	529,951	9,651
Barley	123,131	3,243	103,198	2,060
Oats	230,550	25,967	316,221	429
Peas	47,831	1,673	62,655	131
Beans	63,728	273	12,456	220
Indian corn	221,268	5,381	160,285	....
Flour	79,487	2,016	70,959	1,021

SINCE THE COMMENCEMENT OF THE SEASON (AUG. 28).

Wheat.....cwt.	23,781,644	2,818,643	30,485,875	262,024
Barley	5 963 136	107,090	6,170,765	21,007
Oats	5,938,323	1,858,021	7,596,999	86,304
Peas	651,581	51,700	1,108,428	11,913
Beans	1,387,674	17,155	1,379,858	2,963
Indian corn	10,587,013	64,089	13,732,529	14,044
Flour	3,396,008	1,324,880	4,758,292	18 809

For the corresponding periods in 1868–'69 the figures were as under:

	Imports. For the week.	Imports. Since Sept. 1.	Exports. For the week.	Exports. Since Sept. 1.
Wheat.....cwt.	237,957	20,672,906	84	151,221

Indian Corn	156,068	10,108,215	....	940
Flour	41,785	2,927,556	1,490	26,057

The following relates to the trade of Manchester:

The same firmness which has characterized this market during the week has continued to-day, although the demand has been far from active, and the actual business done has been limited. The activity in the cotton market in the early part of the week compelled producers to advance their quotations. On Tuesday a fair business was done. Those spinners who had sold little or nothing for the previous ten days, finding that they could get an advance upon last week's prices, did not hold out for very extreme rates, and sold rather freely. Others, again, who were already well sold, declined to sell unless they could obtain the full advance asked, and have done little business during the week. Owing to the sales made in the early part of the week, prices have become more uniform and regular, and to-day full rates have been demanded by spinners all round. This has had the effect of limiting business very materially, and, although the sales during the week have been considerable, and some producers have sold largely, the business done during the week has scarcely been an average one. Buyers have mostly confined themselves to giving out orders which they had on hand, and which they were afraid to keep back any longer, but few transactions on a large scale have occurred. Occasionally, where a buyer could meet with a spinner or manufacturer who was satisfied to sell at a small advance, he has given out orders for as much cloth or yarn as he could get delivered within a moderate time, but stocks have been light in producers' hands, and consequently the advance has been of very little use to them, as the price of cotton has risen more rapidly.

The cotton market has been unusually active this week, and, as prices have been almost continually hardening, spinners and manufacturers have been placed in a puzzling and awkward position. They were afraid to sell, lest the cotton market should go still further against them, and if they missed selling there was the danger that a sudden check in Liverpool might deprive them of the opportunity of doing so. This was the case yesterday. The Liverpool market was reported quieter, and prices rather lower, and buyers here could with difficulty be found to repeat offers which they had previously made and which had been rejected. To-day the cotton market has been more active again, or at least reported so, and spinners have insisted upon getting full prices. The sales of cotton for the week amount to 144,000 bales, or 31,000 bales above the estimate. Of this enormous amount spinners have taken 77,000 bales, which is not a very large proportion. As the imports have been comparatively light, amounting to 42,000 bales, the stock has been reduced, but still amounts to 914,000 bales.

Annexed is a return showing the quantities of cotton in stock, the quantities imported, exported, and forwarded inland for consumption:

	American Bales.	American Cwt.	Brazilian Bales.	Brazilian Cwt.	East Indian Bales.	East Indian Cwt.
Cotton in stock on Apr. 30, 1871	447,555	1,803,204	144,912	209,019	258,211	648,441
Do. imported during May, 1871	281,543	1,096,006	38,700	58,0 9	56,093	176,635
Do. forwarded from inland towns to ports during May, 1871	803	3,830	3	6	105	611
Total	729,900	2,903,040	183,615	267.074	314.409	825,687
Cotton exported during May, 1871	51,662	201,033	9,080	13,620	50,257	157,930
Do. forwarded inland for consumption during May, 1871	199,585	741,365	21,378	33,915	29,235	100,182

*Pickings.

The Board of Trade returns which have been issued to-day, show that the declared value of the exports of British and Irish produce and manufactures during the month of May, amounted to £19,099,880 against £16,786,940, and £16,316,540, and during the five months ending May 31 to £82,379,737 against £79,801,184 and £74,744,620 in 1870 and 1869, respectively. The exports of cotton yarn during the five months, ending May 31, were 76,204,978 pounds against 74,733,104 pounds, and 66,324,915 pounds.; of cotton piece goods, 1,339,574,880 yards against 1,248,841,406 yards, and 1,145,426,352 yards; of cotton thread, 2,663,166 pounds against 2,623,399 pounds, and 2,724,802 pounds on the corresponding period of the two previous years. The exports of woolen cloth in the five months were 13,780,645 yards against 12,747,020 yards, and 10,846,515 yards; and of worsted stuffs, 115,839,203 yards against 105,198,798 yards, and 103,251,729 yards. During the five months, 373,139 tons of railroad iron were sent away, against 437,235 tons in the corresponding period in 1870, and 320,745 tons in 1869.

English Market Reports—Per Cable.

The daily closing quotations in the markets of London and Liverpool for the past week have been reported by submarine telegraph, as shown in the following summary:

Digitized by Google

London Money and Stock Market.—Consols have declined ¼d. since a week ago. In American securities prices have been generally firm, with the exception of Five-Twenties of 1867, which are ½c. lower.

	Sat.	Mon.	Tues.	Wed.	Thur.	Fri.
Consols for money	92¾	92⅝	92	92⅛	92	91⅞

COMMERCIAL AND MISCELLANEOUS NEWS.

IMPORTS AND EXPORTS FOR THE WEEK.—The imports this week show an increase in both dry goods and general merchandise. The total imports amount to $8,423,330 this week, against $7,410,146 last week, and $7,671,435 the previous week. The exports are $4,976,521 this week, against $3,998,129 last week, and $4,587,762 the previous week. The exports of cotton the past week were 2,284 bales, against 2,727 bales last week. The following are the imports at New York for week ending (for dry goods) June 16, and for the week ending (for general merchandise) June 17.

FOREIGN IMPORTS AT NEW YORK FOR THE WEEK.

	1868.	1869.	1870.	1871.
Dry goods	$960,023	$861,435	$1,165,846	$1,698,459

1870	$7,016,220	1868	$3,754,046
1869	8,904,140	1867	1,554,989

North Carolina Railroad.—In the case of Anthony H. Swazey vs. The North Carolina Railroad Company, and David A. Jenkins, Public Treasurer of North Carolina, Judge Bond, of the Circuit Court of the United States, Fourth Circuit, and District of North Carolina, has made a decision that the act of 1849 creates a lien upon the stock in favor of bondholders, and upon dividends declared, or to be declared, upon the stock; and that no subsequent legislation of the State could constitutionally impair this lien.

That the North Carolina Railroad Company, its officers and directors, be restrained by the injunction from paying to the defendant, David A. Jenkins, or to any person or persons, who may, on behalf of the State of North Carolina, demand the same, any and all moneys accrued or to accrue as dividends upon the stock held by the State of North Carolina in the said North Carolina Railroad Company, and that S. F. Phillips, of the City of Raleigh, be appointed receiver, to take and receive into his possession all moneys now or hereafter to be paid by the North Carolina Railroad Company as dividends upon the said stock, and especially moneys heretofore ordered by the said Company to be paid on and after March 1, 1871, as a dividend upon the said stock.

The bonds referred to were issued by the State of North Carolina to aid in the construction of said road. Samuel Phillips was appointed receiver on giving bonds for $200,000.

The Pacific Railroad Claims.—WASHINGTON, June 23.—Attorney-General Akerman has rendered an opinion to Secretary Delano in the case of the Atchison branch of the Pacific Railroad, adverse to the claims of that company to lands and to bonds for the extension of their road beyond 100 miles from Atchison. This is the road known as the Pomeroy Branch Union Pacific. The lands and bonds asked for amount to from $5,000,000 to $7,000,000.

—Messrs. E. H. Gibbs & Co. advertise in another column for a loan of $50,000 to be secured by mortgage on valuable iron mines, etc., in Tennessee, the attention of capitalists and investors is directed to the advertisement.

—The semi-annual interest coupons of the First Mortgage Bonds of the Central Pacific Railroad Company, the Western Pacific Railroad Company and the California and Oregon Railroad Company, all now consolidated under the former title, are announced to be paid in gold, free of Government tax, as heretofore, at the banking house of Messrs. Fisk & Hatch, No. 5 Nassau street. Schedules of coupons will be received for examination after to-day, for which checks will be given July 1.

BANKING AND FINANCIAL.

HARVEY FISK. A. S. HATCH.

FISK & HATCH,

BANKERS AND DEALERS IN GOVERNMENT SECURITIES,
No. 5 NASSAU STREET, NEW YORK, June 21, 1871.

HOLDERS OF FIVE-TWENTY BONDS, DESIRING TO fund them otherwise than in the new Five Per Cent. Government Loan, may do so with entire safety, at a profit of about 20 per cent, and without reduction of interest, by an exchange for the GOLD BONDS OF THE CHESAPEAKE AND OHIO RAILROAD CO.

The Chesapeake and Ohio Railroad Company are extending their line of road to the head of reliable navigation on the Ohio River, where it will meet and connect with lines now building or projected, to the principal railroad centres and river cities of the Western States. The greater part of the Road is in earning operation, and the rails (steel and iron) are now being laid on the remainder. The road will have, when completed, a large East and West through business, besides an immense mineral and general local traffic.

Price of the bonds, until further notice, 92, and accrued interest from May 1.

We also buy and sell Government Securities, and the Bonds of the Central Pacific Railroad Company, receive money on deposit, and do a general banking business.

FISK & HATCH,

FRIDAY EVENING, June 23, 1871.

The Money Market.—The extraordinary operations in the stock market, which are noticed at length hereafter, gave rise to an extensive shifting of loans held on stock collaterals, and caused a pretty general advance of 1@2 per cent. in the rates for loans of that class. After the decline of Wednesday and Thursday, many loans were called in and others were reduced in amount to correspond with the lower prices of the stocks held as collateral security, while much more caution has since been exercised as to the character of stocks offered as collateral for loans. It will probably be some time before lenders will again place their money in such large amounts as they have recently done, upon miscellaneous and even doubtful securities. As the difficulty of lending money safely on stocks increased, there was a corresponding desire to lend it on Government bonds, and dealers in Governments have been pressed to take balances at 2@3 per cent. There has been no cause for higher rates on money, aside from the stock operations above mentioned, and there is every prospect of continued ease in the market for some time to come.

Cable dispatches to-day report an increase of £483,000 in the bullion reserve of the Bank of England; and from Paris the price of the French loan at 82.50—to be payable in seventeen instalments.

The last City Bank statement showed an increase of $1,616,404 in the excess of reserves above the legal requirement, the whole excess being $16,684,312; details are as follows compared with the previous week: Loans, decrease, $675,629; specie, increase, $273,757; circulation, decrease $78,313; deposits, increase, $1,381,814; legal tenders, increase, $1,768 523.

The following statement shows the present condition of the associated banks, compared with the same date in the last two years:

	June 17, 1871.	June 18, 1870.	June 19, 1869.
Loans and discounts	$283,134,582	$276,689,004	$265,341,906
Specie	12,939,910	23,895,971	19,026,444
Circulation	30,662,096	33,072,643	34,196,899
Net deposits	243,276,150	219,932,852	186,244,110
Legal Tenders	72,178,964	56,120,211	49,612,466

Commercial paper seems to have been very little affected by the influences operating upon call loans, and rates are nearly the same as last quoted. Lenders of money are glad to purchase choice names at 4½@5 per cent. on 60 days, or 3 or 4 months time, as the most profitable method of using their funds.

Quotations are as follows:

		per cent.
Commercial, first class endorsed	60 days.	4½@ 5½
" " "	4 months.	5 @ 6
" " "	6 months.	5½@ 6½
" " single names	60 days.	6 @ 7
" " "	4 to 6 months.	6 @
Bankers.-first class foreign	60 days.	4½@ 5
" domestic	3 to 4 months.	5 @ 6

United States Bonds.—Government securities show continued firmness in prices, on a limited business. The gold bearing bonds have now advanced quite steadily for a month past, and 5-20s of 1862 are quoted at 112¾ against 111¼ May 26, 5 20s of 1867 114¼ against 113¼, and 10-40s 110⅝ against 109¼. The foreign bankers have recently been among the principal purchasers, as the quotations abroad have at times admitted of shipments to some advantage. With the large disbursements of July interest and dividends, beginning with the interest on Government bonds, payable June 26, without rebate, the demand for Governments from home and foreign investors should increase and a more active market in the early part of July is now anticipated. On Wednesday the Treasury bought $1,000,000 five twenties at prices between 111.94¼ and 111.59, the total offered was only $2,975,000, showing that there is a comparatively small amount of floating stock on this market.

The following were the highest and lowest prices of leading government securities at the Board on each day of the past week:

	Saturday, June 17.	Monday, June 19.	Tuesday, June 20.	Wednesd'y June 21.	Thursday, June 22.	Friday June 23.

Railroad and Miscellaneous Stocks.—The whole interest of the market has been absorbed by the panic in Rock Island, which broke on Tuesday from 130¾ to 110, with the natural result of depressing to a greater or less extent the whole list of speculative favorites. The excitement which prevailed in the market on Tuesday was beyond description, and brought to mind very forcibly the scenes which transpired in the famous gold panic of

Digitized by Google

September, 1869. There have been many different accounts given of the causes which led to this important break in a stock which has generally resisted the temporary fluctuations of the market with more than ordinary firmness, the facts, however, seem to be substantially as follows: When the stock was selling at 114¼@115, about the first of April last, a combination was formed to advance the price, including among its members one very prominent speculator, who has formerly been successful in some large transactions of similar character. To advance the price the report was circulated that a scrip dividend would be declared, and the funded debt all paid off, according to a schedule previously noticed in this column, and while this report induced many holders not to sell their stock, the clique continued to buy very heavily, increasing the "short" interest, until the price was forced up to 125 on Monday last. On Tuesday the stock jumped to 130⅛, closing at 130, and after opening on Wednesday at 130¼, sold up to 130⅞. and then declined rapidly to 110, under enormous sales at the Board, of which a considerable portion was for the account of parties unable to meet their contracts, and who were sold out under the rule of the Exchange. The immediate cause of the break is not precisely ascertained; one report is that the leading operator had purchased enormously on Tuesday, outside of his interest in the clique and had the promise of $1,000,000 for margins, but the promise not being fulfilled he was unable to receive his stock next day, and was also unable to get his clique to take the stock, and thus precipitated the panic; another report states that there was bad faith among the parties to the clique among themselves, and that the leading operator referred to was the victim of fraud on the part of his associates; all reports agree that the "short" interest created was enormous, and that the contracts for future delivery amounted to 50,000 to 100,000 shares more than the whole capital stock of the company, so that if the clique had not failed, their "corner" of the market would have been complete, and the price might have been advanced to almost any figure. The precise details of this operation, however, are not so important as its consequences, the immediate result being seen in the failure of a number of respectable firms of stock brokers, and immense losses to all parties interested in Rock Island, while the general market has received a shock, of which the effect will be felt throughout the season. A fall of 20 per cent on $17,000,000 of Rock Island stock amounts to just $3,400,000, though it must be remembered that a large part of the previous advance was as fictitious as the decline. The general list was not so much depressed on the day of the panic as on Thursday, when a decline of several points was made on many of the leading stocks with a sharp rally at the close. To-day the market was unsettled and fluctuating, with a weak feeling at the close and prices near the lowest point of the day. Hannibal and St. Joseph common sold down to 82 and preferred to 86. The coal stocks have declined in consequence of the failure of negotiations in regard to consolidating the Maryland companies. As to the future, the prospect of any general advance in stocks is greatly injured by the break in Rock Island, which will shake the confidence of outsiders most severely, and cause them to leave the market to the cliques who control most of the leading stocks. On the other hand, there seems to be no good reason for anticipating a general downward movement, so long as money is easy and the interest of cliques is all on the side of high prices until their stocks are worked off.

The following were the highest and lowest prices of the active list of railroad and miscellaneous stocks on each day of the last week:

State and Railroad Bonds.—State bonds have been generally steady on a limited business. The market has been devoid of speculative interest and without any sensational reports from the Southern States, so that there is little to notice of these securities beyond the record of prices given below. Railroad bonds are generally firm, and there is a fair demand for nearly all the first mortgages of good character. From various reasons, noticed by us from time to time, this class of investment has grown very much in favor, and each successive disturbance in the stock market has the effect of directing the funds employed in speculation, into the safer channel of bond investments. The Pacific railroad bonds close as follows: Central Pacifics, 102½@102¾; Union Pacific, firsts, 91½@92; Land Grants, 84½@84¾, and Incomes, 83½@83⅞.

The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

	Saturday, June 17.		Monday, June 19.		Tuesday, June 20.		Wednesd'y, June 21.		Thursday, June 22.		Friday, June 23.

The Gold Market.—Gold has been comparatively steady between 112¼ and 112⅝, and the market generally devoid of interesting features. On Wednesday and Thursday cash gold was made scarce, and rates for borrowing forced up to 1.64@1.16, but the notice of prepayment on Monday of the Government July interest without rebate will probably terminate, for a time at least, the operation of the party locking up gold. The rates paid for carrying to-day were 1, 2 and 3 per cent. to flat. Exports of the week will be large, probably exceeding $2,000,000. At the Treasury sale of $1 000,000 on Thursday, the bids amounted to $3,985,000. Custom House receipts for the week foot up $2,405,000.

The following table will show the course of the gold premium, each day of the week past:

	Quotations. Opening.	Lowest.	Highest.	Closing.	Total Clearings.	Balances. Gold.	Currency.
Sat'day, June 17	112¾	112¾	112¾	112¾	$37,469,000	$1,871,995	$2,102,274

The following are the quotations in gold for foreign and American coin:

American gold (old coinage)	4 p. c. premium.	American silver (old coinage)	1@2 p. c. premium.
Sovereigns	$4 88 @ $4 92	Dimes and half dimes	96 @ 97
Napoleons	3 87 @ 3 90	Five francs	95 @ 96
German X thalers	7 80 @ 7 95	Francs	19 @ 19¼
Prussian X thalers	8 05 @ 8 15	English silver	4 80 @ 4 85
German Kronen	5 40 @ 5 60	Prussian thalers	71 @ 72
X guilders	3 90 @ 4 00	Specie thalers	1 04 @ 1 06
Spanish doubloons	16 10 @ 16 40	Mexican dollars	1 04 @ 1 04¼
Patriot doubloons	15 50 @ 15 70	Spanish dollars	2@3 p.c. premium.
American silver (new)	97¼@ 98	South American dollars	par.

Foreign Exchange.—The market has been firm and advancing, closing at 110⅝@110½ for 60 days sterling against 110½@110¼ last week. Leading drawers advanced ¼ to-day, though one prominent house was drawing at ¼ lower than others for both 60 days and short sight, and sold in consequence a large amount of bills, supposed to be drawn against bonds recently negotiated on the Continent, the particulars in regard to which have not yet been made public. The high prices of cotton have checked exports and thus diminished the supply of exchange from this principal source, and unless some unforeseen circumstance arises to influence the market, still higher rates are looked for. Exports of cotton from all United States ports have been 38,944 bales, against 19,898 bales in the same week of 1870.

Quotations are as follows:

	60 Days.	3 Days.

The Railway Monitor.

☞ EXPLANATION OF THE STOCK AND BOND TABLES

1. Prices of the Active Stocks and Bonds are given in the "Bankers' Gazette" *ante*; quotations of other securities will be found on the preceding page.

2. Bank and Insurance Stocks, Mining, Petroleum, City Railroad and Gas Stocks, and Southern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3. The Table of Railroad, Canal and Other Stocks, on another page, comprises all Companies of which the stock is sold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Company was last published. A star (*) indicates *leased roads*; in the dividend column x=*extra*; s=*stock or scrip*.

4. The Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given under the name of Consolidated Corporation. The date given in brackets immediately after the name of each Company, indicates the time at which the statement of its finances was made. In the "Interest Column" the abbreviations are as follows: J. & J.=January and July; F. & A.=February and August; M. & S.=March and September; A. & O. April and October; M. & N.=May and November; J. & D.=June and December Q —J.=Quarterly, beginning with January; Q.—F.=Quarterly, beginning with February. Q.—M.=Quarterly, beginning with March.

5. The Table of State Securities will be published monthly, on the last Saturday of the month.

6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each city are given on the same line with the name

General Mahone's Railroads.

The Legislature of Virginia, by an act passed and approved June 17, 1870, authorized the consolidation of the Norfolk & Petersburg, the South Side, the Virginia & Tennessee, and the Virginia & Kentucky Railroad Companies into one corporation. Such consolidation was consummated November 12, 1870, and ratified by the several companies, which from that date took the title of the "Atlantic, Mississippi & Ohio Railroad Company;" and these railroads are now operated respectively as divisions of the A., M. & O. Railroad, all under the Presidency of Gen. Wm. Mahone, the distinguished railroad financier and manager of Virginia.

Norfolk & Petersburg Railroad.—The revenues and expenses of the Norfolk & Petersburg Railroad for the fiscal years ending September 30, 1869 and 1870, are compared in the following statement:

Revenue from—	1869.	1870.
Passenger traffic	$52,506 07	$61,966 16
Freight traffic	251,696 85	286,900 61
Other sources	324 45	216 82
Gross revenue	$304,527 37	$349,083 59
Expenses, taxes, &c	183,357 02	200,166 21
Net revenue	$121,170 35	$148,917 38

The increase in gross revenue in 1870 over that of 1869 is $44,556 22, or 14.6 per cent.; and in expenses $16,809 19, or 9 per cent. The net revenue has increased $27,747 03, or 23 per cent. In 1861 the gross revenue of the road was only $96,621 74.

At the close of 1870 the company had 10 locomotives, being an increase of one, and 194 cars, being an increase of 30 during the year. The car equipment is now as follows (all four wheeled): passenger cars, 10; mail and baggage, 2; box freight, 114; stock, 2; platform, 64; and timber trucks, 2.

The stock and bonds are given in the tables of the CHRONICLE.

South Side Railroad.—The revenues and expenditures resulting from operating the road in the years ending September 30, 1869 and 1870, compare as follows:

Revenues from—	1869.	1870.
Passenger traffic	$82,294 49	$99,643 24
Freight traffic	345,791 42	395,788 30
Mail service	6,649 92	6,649 92
Express service	2,394 26	4,619 03
Other sources	3,790 85	6,181 14
Gross earnings	$440,920 96	$512,876 63
Operating expenses	337,795 58	332,724 70
Net revenue	$103,125 38	$180,151 93

The increase in gross revenue was $71,955 67, or 16.3 per cent.; in expenses, $5,070 88, or 1.5 per cent., and in net income, $77,026 55, or 74 7 per cent.

This large increase in gross revenue and decrease in current expenses has resulted in a net revenue sufficient to meet every demand for interest on the funded debt, and in a surplus of $71,853 80 as against $23,555 38 for that of the preceding year.

The present stock of cars on the road consists of 5 passenger, 5 mail and baggage, 142 box freight, 72 flat, and 15 cattle—total, 237. The motive power consists of 17 engines, viz: 3 passenger, 7 tonnage, 5 material and 2 switching,

Virginia & Tennessee Railroad.—The revenue and expenditures for the two years ending September 30, 1869 and 1870, compare as follows:

Revenue from—	1869.	1870.
Passenger traffic	$309,596 16	$335,760 93
Mail service	20,500 00	20,500 00
Express service	28,333 56	24,917 20
Tonnage traffic	566,650 77	679,336 85
Miscellaneous sources	4,104 36	3,308 01
Gross earnings	$929,184 85	$1,063,822 29
Operating exp., taxes, etc	610,496 88	636,785 59
Net revenue	$318,687 97	$427,036 70
Gross revenue per mile	$4,341 99	$4,971 13
Operating exp. per mile	2,852 79	2,975 63
Net revenue per mile	1,489 20	1,995 50

The increase in 1869–70 over the previous year was: gross revenue, $134,637 44, or 14.5 per cent.; operating expenses, $26,288 71, or 4.3 per cent., and net revenue $108,348 73, or 34.1 per cent.

These results surpass those of any previous year, and evidence the solidity of the foundation on which the business of this road is based and the wise policy under which it has been conducted.

The expenses of the road department afford the most gratifying evidence of the value of the improvements made. For the year 1869–70 these have been $117,859 58 as against $139,922 80 for the previous year, showing a decrease in the very respectable sum of $22,063 22, or 15.8 per cent., and when considered with reference to the units of measure, stand for the year now passed at $554 74 per mile of road, 22.77 cents per mile run by revenue trains, and 20.11 cents per mile run by all trains as against the corresponding results of the previous year, which were $653 85 per mile of road; 29.68 cents per mile run by revenue trains, and 25.42 cents per mile run by all trains; a reduction in favor of the past year's operations of 23 per cent. for revenue trains and 21.5 per cent. for all trains.

The rolling stock owned by the company at the close of 1869–70 consisted of 42 locomotive engines, and cars—18 passenger, 4 mail and baggage, 105 box freight, 73 stock, 89 platform and 29 caboose—total 309 cars, being an increase during the year of 36 cars; 86 have been retired and 120 placed in service.

The following statement compares the funded debt at close of the two last years:

	1868–69.	1869–70.
1st mortgage bonds	$494,000 00	$494,000 00
2d mortgage bonds	6,000 00	4,000 00
3d or enlarged mortgage bonds	990,000 00	990,000 00
Income mortgage bonds	119,000 00	113,000 00
4th mortgage bonds	778,000 00	846,000 00
Registered certificates	112,449 76	116,129 11
Interest funding bonds		204,200 00
Interest past due and unfunded	329,189 37	131,940 00
Total	$2,828,639 13	$2,899,269 11

From a comparison of these statements it will be seen that there has been an increase in this class of indebtedness, of $70,629 98, of which, however, $86,659 60 is for interest, which had accumulated on the past due coupons, heretofore reported as out standing, mainly at the outset of the present administration, and then unfunded, of which no account has been taken, because of the impossibility of estimating at that date the amount thus due.

The floating debt is given gross at $688,891 22, of which $506,201 34 is by notes and acceptances and $182,689 94 by open accounts.

The resources of the company as an offset to this class of debt consist of $154,000 eight per cent. bonds rated at 80, $123,200; open accounts, $243,847 04; storehouse supplies, $57,457 73, and cash, $12,343 77—total, $436,848 54.

The net floating debt is therefore $252,042 74.

Mobile & Ohio Railroad Report.—The Mobile & Ohio Railroad extends from Mobile, Ala., northward to Columbus, Ky., 472 miles. It has a branch from Narkeeta, 163 miles north of Mobile, northeastward to Gainesville, Ala, 21 miles; a branch from Artesia, 219 miles north of Mobile, northeastward to Columbus, Miss., 14½ miles; and a third branch from Muldon, 240 miles north of Mobile, northeast to Aberdeen, Miss., 10 miles. The total mileage is thus 517½ miles. From the annual report for the year 1870 we extract the following:

DIRECTORS' REPORT.

The receipts for the year 1870 were	$2,559,340 92
Expenses, ordinary and extraordinary	1,910,008 65
Leaving net	$649,332 27

With all connecting roads our relations are of the most friendly character. Since your last meeting the New Orleans, Mobile & Chattanooga road has been completed between New Orleans and Mobile, and the connection through the city at your depot enables us to transfer freight and passengers without change of car, thus giving us all rail connection between the great cities of the West and New Orleans, via Mobile.

The Alabama & Chattanooga road is rapidly approaching completion.

The St. Louis & Iron Mountain road has formed a connection at Columbus, Ky., by which freights are now taken without change of bulk, between Mobile and St. Louis.

The Mississippi, Gainesville & Tuskaloosa road, commencing at Gainesville Junction, on your line, and running to the town of Gainesville, on the Tombigbee river, twenty-one miles, with all its property and franchises, was sold on the 20th of October last, and has been purchased by this company and incorporated into your line as the Gainesville Branch.

The importance of this purchase will be appreciated when it is remembered that by it you not only control a line running to the river, but that by an extension to the town of Eutaw, a distance of only sixteen miles, through a country peculiarly favorable for the construction of a cheap road, a junction is formed with the Alabama & Chattanooga road, and giving us the shortest line from the West to Selma, Montgomery and Western Georgia, by thirty-five miles.

The steady increase in your receipts since 1868,

Showing in 1869 an excess over 1868 of	$264,685 34
and in 1870 an excess over 1869 of	444,058 99
and larger by	110 054 83
than in any former year—while the first three months of the present year show an excess over the corresponding months in 1870, of	180,427 09

is convincing proof of the steady improvement of the country tributary to your line.

Digitized by Google

CHIEF ENGINEER'S REPORT.

From the report of L. J. Fleming, Chief Engineer, and the accompanying tables we extract the following:

The earnings for the year were:

Passengers	$695,224 16
Freight	760,072 29
Mail	49,294 47
Express	54,750 00
Total	$2,559,340 92

The expenses were:

Repairs of roadway and bridges	$535,502 32
Repairs of machinery	449,326 10
Constructing transportation	925,180 23
Total	$1,910,008 65

Nashville & Decatur Railroad.—We recently gave an abstract of the lease of this road to the Louisville & Nashville Railroad (see CHRONICLE of May 27), and of the agreement on the part of the latter to furnish funds for the completion of the North and South (Ala.) Railroad to form a continuous through route from Louisville to all points in the South. Instead of furnishing funds to pay contractors, the L. & N. Company have assumed positively the obligation to complete the North and South road within a year, and in other respects the terms of agreement heretofore given remain substantially correct. With the completion of this road from Decatur, Ala., to Montgomery there will be a new and most important line of railway opened from the Ohio river at Louisville to New Orleans and the Gulf ports, as well as to all parts of Georgia and Alabama—a through route, which, under good management, can hardly fail to do a very large business.

By the terms of the lease the L. & N. road guarantee and assume the payment of interest, sinking fund and principal of the bonds of the N. & D. Company, and guarantee a dividend of not less than 6 per cent. on the capital stock of the company.

The first mortgage sinking fund bonds of the Nashville & Decatur road are now dealt in at the stock board, and considering that they are secured by a first mortgage of less than $17,000 per mile on a first class road, with the additional guarantee of the L. & N. road as above stated, we think they are worthy of special attention from investors, at the price for which they can now be obtained.

Cleveland, Columbus, Cincinnati & Indianapolis Railway.—The annual report for the year ending December 31, 1870, shows the following:

EARNINGS.

From Passengers	$843,830	
" Freight	2,269,038	
" Express	72,993	
" Mail	61,993	
" Rents	56,218	
" Interest and Dividends	19,481	
" Miscellaneous sources	4,725	
		$3,328,281
Add Surplus December 31, 1869		152,347
		$3,480,628

EXPENSES.

For operating road and repairs to equipment	$1,687,322	
For repairs track and structures	598,416	
		$2,285,738
		$1,194,889
State and National Taxes	147,772	
Interest on Bonds	210,000	
		357,772
		$837,117
Dividends—Two of 3½ per cent each		742,528
Surplus December 31, 1870		$94,588

The assets and liabilities of the company, as shown on its books, are as follows:

ASSETS.		LIABILITIES.	
Cost of road depots, shops and equipment	$12,694,416	Capital stock	$11,620,000
Materials on hand.		Less amount, owned and held by this company	859,100
For repairs track and fences	90,072		$10,760,900

Bills receivable	12,592		
	$796,822		
	$14,518,760		

$34,500 of above bonded debt, past due, and not yet presented for payment.

The Indianapolis & St. Louis Railroad Company (of which this company owns one-half of the capital stock), opened its railroad for business July 11, 1870, and its earnings for the remainder of the year were very satisfactory, being at the rate of over $8,000 per mile per annum, with the local traffic almost entirely undeveloped.

The necessity having arisen for this company to have an independent connection with the city of Cincinnati under its own control, to enable it, at all times, to furnish its eastern railroad connections a through route satisfactory to them, your Board of Directors concluded a contract which will secure that result at an early day, and submitted the same to a special meeting of the stockholders, on the 25th day of January, 1871, at which meeting it received their unanimous approval.

The Missouri-Pacific Railroad—Second Mortgage Bonds.—ST. LOUIS, MO., June 18.—At a meeting of the stockholders of the Missouri-Pacific Railroad yesterday the following propositions were unanimously adopted: First—To issue three millions in second mortgage bonds for the purpose of increasing the equipment of the road, funding the floating debt, laying a double track where necessary, and extending the road to the river bank. Second—To take possession of the Lexington and St. Louis road, assume nine hundred thousand of the bonds, complete the track and operate the road as a branch line. Third—To allow a vote for each share of stock instead of the graduated scale as now.

The Commercial Times.

COMMERCIAL EPITOME.

FRIDAY NIGHT, June 23, 1871.

The market for leading staples of domestic produce have shown feverish excitement and irregularity during the past week; continuing unsettled to the close; while in foreign merchandise, to maintain prices, is the most that has been found possible; and there is less confidence respecting the early future.

Cotton has been dull and lower; Middling Uplands closing at 20¼c. Breadstuffs lower, but closing with some reaction; Flour, $6 25 for Extra State; Wheat, $1 48 for No. 2 Spring, and Corn 75c. for Prime Mixed. Groceries more steady for Coffee at the late decline, but Sugars drooping.

Provisions have been very unsettled, but close almost uniformly with a stronger tone. Pork, with large speculative transactions, closes at $14 75 for Mess, on the spot, and $15 @$15 25 for August to October delivery; Prime Mess, $13 @$13 50, and Prime, $12 50@$13. Lard after several days dullness, closes firmer at 10⅝c. for Prime Steam, on the spot, and 11c. for August delivery. Bacon and Cut Meats are very unsettled; prices varying widely, according to packing (whether Western or City) or weight; the light bringing 1@2c. more than the heavy. Latest transactions embrace Light City Ice Cured Bacon at 8¼@8¾c.; Western do., 8c, Short Rib. Beef of all kinds has ruled firm. Butter rules steady, and Cheese has sold moderately, for export, at 12¼c. for Prime and Choice Factories.

Freights have improved, on the more liberal supply of Grain at this market, which, having declined in price, has been shipped more freely, especially Corn. The business today was moderate at 6½@7½d., by sail and steam to Liverpool, 8d. by steam to Glasgow, and 7½d. by sail to London, and vessels have been chartered to Cork for orders at 5s. 6d. Petroleum charters have been active at full rates. Deal charters from St. Johns to Liverpool have been made at 65s.

Tallow has slightly improved on an export demand. Hay is scarce and firmer. Whiskey has ruled more steady, with an improving demand.

Hides and Skins have been more salable, but for Leather prices have been barely supported; the better qualities only bringing full prices.

Petroleum has been rather quiet, and closes dull and weak at 25¼@25⅜c for Refined on the spot, and 14½@15c for Crude in bulk. Spirits Turpentine has been declining for the last two or three days, and closes with a downward tendency at 46c. Rosin has been very firm for low grades, owing to the scarcity of this grade, and there were sales to-day of good strained at $2 80. Tar has advanced, but closes dull and somewhat unsettled at $3 50@4. Hops have been moderately active and firm, but at the close, with less encouraging advices from abroad, the market was dull.

Metals have been generally quiet; prices, however, are firmly sustained on all kinds, and Copper is higher and active.

Tobacco has been less active, but has ruled firm at the late advance. In Kentucky Leaf a less active export demand has been partially made good by increased inquiry from cutters and dealers. Of the sales of 1,300 hhds for the week, 800 hhds were taken for export, mostly to fill contracts with foreign governments, but including some general export, and 500 hhds were taken for home use. Prices remain as last quoted—6@6¾c for Lugs and 7@12c for Leaf. In Seed Leaf we have very little business to note, and prices are unsettled and nominal. Sales 200 cases new crop Ohio private terms, 100 cases old crop Connecticut and Massachusetts Wrappers 35@43c, 100 do Sundries 35@55c. Spanish Tobacco has been more active, the sales including 1,000 bales for home use at 88c@$1 05. Manufactured Tobacco quiet. Wool has shown less buoyancy and activity. East India goods are generally quiet, the demand for hemp having subsided. Linseed Oil has declined to 85@87c for whole and jobbing parcels. Fish oils have slightly declined.

Exports of Leading Articles from New York.

The following table, compiled from Custom House returns, shows the exports of leading articles from the port of New York since January 1, 1871, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show *total values*, including the value of all other articles besides those mentioned in the table.

ARTICLES.	Great Britain.	France.	Holland & Belg.	Germany.	Other N. Europe.	Spain.	Other S. Europe.	China & Japan.	Australia.	Br. N. A. Colonies.	Cuba.	Hayti.	Other W. Indies.	Mexico.	British Guiana.	Brazil.	Other S. American.	All oth. Ports.	Total this week.	Total since January 1, 1871.	Same time 1870.

COTTON.

FRIDAY, P. M., June 23, 1871.

By special telegrams received by us to-night from the Southern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening June 23. From the figures thus obtained it appears that the total receipts for the seven days have reached 22,664 bales against 24,046 bales last week, 28,136 bales the previous week, and 36,402 bales three weeks since, making the total receipts since the first of September, 1870, 3,869,044 bales against 2,813,323 bales for the same period of 1869–70, showing an increase since September 1 this year of 1,055,721 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

RECEIPTS Rec'd this week at—	1871.	1870.	RECEIPTS Rec'd this week at—	1871.	1870.
New Orleans bales	7,831	3,572	Florida bales.	36	8
Mobile	826	1,028	North Carolina	597	277
Charleston	2,072	1,42	Virginia	1,925	965
Savannah	1,987	3,207			
Texas	4,944	831	Total receipts	23,664	12,817
Tennessee, &c	8,436	1,009	Increase this year	11,817	....

The exports for the week ending this evening reach a total of 38,944 bales, of which 30,546 were to Great Britain, *8,109 to France, and 289 to rest of the Continent, while the stocks as made up this evening, are now 204,593 bales. Below we give the exports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to-night:

Week ending June 23.	Exported to— G. Brit	Contin't	Total this week.	Same w'k 1870.	Stock. 1871.	1870.
New Orleans*	12,087	6,613	18,699	5,718	41,045	82,207
Mobile	3,036	....	3,036	1,639	11,863	25,031
Charleston	1,697	....	1,697	1,406	4,956	5,670
Savannah	2,100	....	2,100	3,618	9,111	16,739
Texas*	10,518	1,615	12,133	449	58,618	13,080
New York	1,089	171	1,260	7,088	66,000	45,000
Other ports	19	....	19	....	13,000	14,500
Total	30,546	8,398	38,944	19,898	204,593	206,227
Total since Sept. 1	2,281,135	765,780	3,016,915	2,042,153	....	....

* Exports to France this week are from New Orleans, 6,494 bales and from Galveston, 1,615 bales.

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 19,046 bales, while the stocks to-night are 2,234 bales *less* than they were at this time a year ago. The following is our usual table showing the movement of cotton at all the ports from Sept. 1 to June 16, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

PORTS.	RECEIPTS SINCE SEPT. 1. 1870.	1869.	EXPORTED SINCE SEPT. 1 TO— Great Britain	France	Other For'gn	Total.	Northern Ports.	Stock.

The market the past week has fluctuated considerably, and yet the sales have been very small, operators waiting for something decisive to happen which will indicate whether prices have reached their highest point and are to react, or whether there is to be further progress in the upward movement. All reports with regard to the weather are, therefore, strictly watched and weighed; while holders, in view of the limited amount of the present crop left for disposal, and the possibility of a tight squeeze when the July contracts are covered, remain pretty firm, notwithstanding the less favorable accounts from Liverpool the last half of the week, and the more favorable crop accounts, the close here being at 20¼c. for Middling Uplands, only ⅛c. lower than last Friday. In the forward delivery sales there have been no special features, prices having fluctuated in the main to correspond with the changes in the quotations for spot cotton, but with about ⅛c. decline during the week for the Summer and early Autumn months. Low Middling closed to-night at 19c. for June, 19¼c. for July, 19⅝c. for August, 18⅝c. for September, 18¼ for November and 17¾ for December. The total sales of this description for the week are 83,950 bales, including —— free on board. For immediate delivery the total sales foot up this week 10,596 bales, including 98 for export, 4,213 for consumption, 1,684 for speculation, and 4,601 in transit. Of the above —— bales were to arrive. The following are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinary per lb.	15 @....	15¼@....	15¼@....	15¼@....
Good Ordinary	17⅜@....	17½@....	17⅜@....	17⅜@....
Low Middling	19⅜@....	19½@....	19⅜@....	19⅜@....

The following exchanges have been made during the week:

⅝c. paid to exchange 100 July for 100 August.

WEATHER REPORTS BY TELEGRAPH.—Although there has been a considerable fall of rain during the week in some portions of the South, still we should judge from our telegrams that the condition of the crop has everywhere improved somewhat during the seven days. At Galveston the weather has continued warm and dry, and cotton in Texas is progressing finely. But at New Orleans it has rained on two days with the weather all the week warm and sultry. The same description of weather appears to

Digitized by Google

have extended inland, as our telegram from Vicksburg states that it rained there Wednesday, Thursday and to-day. Passing over to Selma, two days rain are reported, with the crop at the close of the week in a somewhat more favorable condition than last week. From Mobile our telegram states that it rained the latter part of the week, but the number of days is not given. At Montgomery, it has been warm and dry, except that it rained on one day, but not so severe, our dispatch says, as to do injury; on the contrary, crop reports at that point are becoming more favorable. At Columbus and Macon it has rained portions of three days, and our Macon dispatch states that it is raining now, and that the crop is still grassy. Passing farther North, we have no mention of storms severe enough to interfere materially with crop work, and from Charleston we learn that the plant in that vicinity is now developing promisingly. At Nashville it has rained on two days and at Memphis one day, but our reports from both places state that cotton looks strong and healthy, and farm work is progressing very favorably. The thermometer during the week has averaged at Galveston, 84; Montgomery, 83; Macon and Columbus, 82; Mobile, 84; and Charleston and Memphis, 82.

OUR WEATHER REPORTS BY TELEGRAPH.—We referred last week to the criticisms which had been made upon our telegraphic weather report for the week ending June 9, (to the effect that it did not agree with the Signal Service report), and showed, as far as our space would allow, that they were unjust. A further similar attack made from another quarter upon the same report has induced us to return to the subject, giving it a further examination, as we are more anxious than any of our critics can be to know the whole truth of the matter. To test it we had at first proposed to give affidavits of citizens at the various points in the South, but on reflection we felt that the best of all evidence is the newspapers published at the points where the question has arisen. If, for instance, a newspaper published at Augusta states that it rained at that point one or more days during the week ending June 9 it is pretty good evidence that it did; and if we find that other newspapers in the vicinity assert the same fact, may we not rely with entire confidence upon the information obtained—at least until some better evidence than the Signal Service reports (which do not pretend to state the weather except at the moment the telegraph is sent) is brought to oppose it. With this explanation let us look into the facts a moment. (See CHRONICLE of June 10, "Weather Reports by Telegraph.")

New Orleans.—The CHRONICLE stated that two rainy days were reported for the week, with the prevailing temperature warm and sultry. The Signal Service report, for the week, noticed rain only once and that slight on Saturday. The New Orleans *Price Current*, of June 10, states that "the weather has been warm, cloudy and unsettled, with showers on Wednesday and yesterday. A heavy rain on Thursday in the upper part of the parish, &c." The previous Wednesday's paper also states that there was a heavy storm on Saturday. The *Picayune*, in referring to the latter (Sunday's paper, June 4), states that "for forty-eight hours or more the rain has been almost incessant, the streets are flooded, and the atmosphere is dense and damp." Again the *Picayune* of the 18th says: "The rainfall at New Orleans during the last four weeks has been 11.368 inches. There have been only nine fair days during that time. For the corresponding four weeks of last year the rainfall was 3.385 inches, and there were seventeen fair days. The rainfall this year has therefore been over three times as great as last year. The New York *Bulletin* compares the statement of the CHRONICLE with the Signal Service reports for the week ending the 10th, concerning the weather at this point. * * There was rainfall during four days of that week. * * It is very common to see the clear weather card over New Orleans on the weather map at the Cotton Exchange when it is pouring down rain." The New Orleans *Times* of June 8th says that "a flying visit to the country, gives a very unfavorable idea of the growing crops, both of cane and cotton. Such continuous, drenching rains have not been known for many years, and the plants, both of cotton and cane, have a sickly hue." Notwithstanding all this the Signal Service report only gives us a slight rain on Saturday. Our correspondent reported two rainy days, the showers on the other days referred to by the *Picayune* probably being slight.

Mississippi.—The CHRONICLE, in its report, next stated that the storms "passing through the lower half of Mississippi appear to have increased in violence and extent." The Meridan *Gazette*, of the 13th of June, says: "It is useless to say anything about rain. We have had so much this year and slept so sweetly by the music of falling waters that the subject is quite threadbare. And still it comes in profusion." The West Point *Citizen* of June 11 states, that "the rains have been so frequent and in such quantities that the crops could not be cultivated." In the same paper a farmer writes, that he has been farming thirty years in that county and he never saw such unfavorable weather. "The rain is now falling in torrents and it has been raining every two or three days for months." The Natchez *Courier* of the 7th and the Natchez *Democrat* of the 6th speak of the excessive rains continuing at that point, "seriously injuring the growing crop;" while the Vicksburg *Herald*, of the same date, also speaks of the rains being continous and heavy. We could multiply these extracts indefinitely, but, we think, all will admit that our report is much more than justified by the above.

Alabama.—The CHRONICLE further stated that three days rain were reported at Mobile. Selma and Montgomery. The Mobile *Register*, of the 10th June, says: "Rains continue and as yet planters have been unable to work out the grass," &c. The Montgomery *Mail*, of the 9th inst., says: "Never before in the history of Alabama have we had such discouraging accounts. * * * * And still the rains continue to fall. In the Northeastern portion of Jefferson county the heaviest rain of the season fell last Monday night. The creeks were raised by it a height greater by four feet than was ever known before. Wednesday night a small flood fell in the centre of the county. It is hardly an exaggeration to say that averaging all the days together, there has not been three successive days of drv weather in Jefferson county during the last two months." Want of space compels us to omit numerous other extracts to precisely the same import. If our critics want any more on the same subject we will give them the balance next week.

Georgia.—As to this State our report affirmed that the storms were even more severe, rain falling six days at Macon, five days at Columbus, &c. A correspondent of the New York *Times*, dated Macon, June 10, writes as follows: "Rain, rain, pittiless, ceaseless rain, says Washington Irving, describing a 'wet spell.' * * * If the cotton planters of Georgia were asked to describe the rains which for weeks have deluged their crops * * * they would certainly call them pittiless and ceaseless." The Albany *News* of the 9th states: "We have had rains every day since the 1st inst. On Monday the heaviest ever witnessed here deluged a vast extent of country." The Augusta *Chronicle* of the 9th says: "For the past two weeks there has been no scarcity of rain. Nearly every day there has been long and heavy rain, sometimes two or three of them." The Augusta *Constitutionalist* of the 9th inst. says that "the traditional personage 'the oldest inhabitant' scarcely remembers so long a period of wet weather at this season of the year." This is *the very week that the signal service reports Augusta "clear and fair each day except one, which was cloudy, and one light rain."* A correspondent of the Macon *Telegraph* at Wooten's Station (on the S. W. Railroad about ninety miles from Macon) writing under date of the 12th of June, says: "The prospect for the cotton planter is extremely gloomy. * * * * * We have had nearly an average of two showers a day for more than two weeks, and now the windows of the heavens are open and we have every prospect of the continuation of rain for two weeks longer."

South Carolina.—The CHRONICLE report with regard to South Carolina was as follows:—"Leaving Georgia the storms passed into South Carolina, it having rained every day at Charleston, but we *should judge less severely.*" We had intended to give extracts from newspapers in the State to confirm the above, but a letter received to-day from our correspondent at Charleston is so entirely to the point that we think our critics will be satisfied without anything further. Our correspondent writes under date of June 19th: "I now reiterate what I telegraphed you under date of 9th inst., that it *did rain every day during the week.* I do not mean, of course, that it rained continuously, but there was not a day, or twenty-four hours, from the 2d to the 9th of June that more or less rain did not fall, sometimes very heavy showers, and at other times light showers, sufficiently hard, however, to inconvenience and delay considerably, workmen engaged on out-door work. What made me more particular in my observations in respect to the weather during the week in dispute was the fact that some workmen were engaged in repairing a house in a measure under my direction, the work of which was delayed by the daily rains or showers." What *more exact description of the weather for the week at Charleston could have been given than the very words in our report quoted above?*

We think it is hardly necessary to pursue this matter further. It must be evident to every reader that our weather report of June 10 was *less* than the truth rather than an exaggeration as has been charged, and that the Signal Service report is no indication of the weather through the week, and we suppose does not pretend to be. We congratulate ourselves and our friends upon this new proof of the reliability of the information which the CHRONICLE always furnishes the Cotton trade.

GUNNY CLOTH.—The Cloth market has been remarkably quiet since our last. We attribute the present dullness in the article to the absence of a consumptive demand, and to the unfavorable reports in circulation as to the cotton crop. The improving accounts current with regard to the crop during the past ten days have resulted in a correspondingly firmer feeling in cloth, and though without any sales to report, we still note a little better feeling among holders. We quote Domestic Rolls at 19@20c. cash; Borneo Bales, 18¼c.; India Bales, 16¼@17c. Bags have ruled very dull for some time past, owing to the failure of consumers to take the regular supply offering for Western demand; substitutes for the regular gunnies have been largely used in shape of "Machine" Linseed bags, but the stock of this material is being rapidly reduced, and as Linseed is now coming from Calcutta in the old style of bags, it would appear as if the two bushel gunnies would come into use very soon, especially as they can be brought below prime cost. We note sales of 150 bales on spot at 18¼c. cash. Hemp is still in steady, fair demand and rules very firm. Sales are in Boston 4,300 bales per Great Admiral at 11c. gold; 1,000 bales per Archer at 11c. gold both sixty days. In this market 300 bales sold on spot at 11¼c. gold, and 1,000 bales to arrive on p. t. Jute is quiet; 300 bales sold in Boston at 5c. gold. We also hear of sales of 250 bales rejections to arrive per Florence at 5c., and 650 do. per Cheswell at 5c., both currency and sixty days, and 700 bales on p. t, For Jute Butts there is but a limited inquiry. Prices, however, are steady. Sales are 200 bales in Boston at 4c. currency.

MOVEMENTS OF COTTON AT THE INTERIOR PORTS.—Below we give the movements of cotton at the interior ports—receipts and shipments for the week, and stock to-night and for the corresponding week of 1870;

Digitized by Google

	Week ending June 23, 1871. Receipts.	Shipments	Stock.	Week ending June 23, 1870. Receipts.	Shipments.	Stock.
Augusta	508	981	3,440	278	1,320	8,731
Columbus	81	146	1,946	87	510	4,562
Macon	102	572	2,014	205	683	5,790
Montgomery	240	292	2,255	163	328	4,158
Selma	102	108	973	179	850	2,668
Memphis	2,118	2,560	5,427	1,256	1,656	12,237
Nashville	281	48	892	632	672	4,655
	3,432	4,707	16,947	2,800	6,019	42,801

The above totals show that the interior stocks have decreased during the week 1,277 bales, and are to-night 25,854 bales *less* than at the same period last year. The receipts, however, have been 632 bales in excess of same week last year.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past seasons:

	1871.	1870.
Stock in Liverpool.....bales.	909,000	642,000
Stock in London	79,239	24,374
Stock in Glasgow	600	300
Stock in Havre	28,300	144,700
Stock in Marseilles	16,480	9,900
Stock in Bremen	62,730	24,079
Stock rest of Continent	40,000	50,000
Afloat for Great Britain (American)	102,000	100,000
Afloat for France (American and Brazil)	38,000	35,891
Afloat for Bremen (American)	32,613	8,373
Total Indian Cotton afloat for Europe	481,285	350,033
Stock in United States ports	204,593	206,827
Stock in inland towns	18,642	42,801
Total	2,013,482	1,640,078

These figures indicate an *increase* in the cotton in sight to-night of 373,404 bales compared with the same date of 1870.

The exports of cotton this week from New York show a decrease since last week, the total reaching 2,284 bales, against 2,727 bales last week. Below we give our table showing the exports of cotton from New York, and their direction for each of the last four weeks; also the total exports and direction since September 1, 1870; and in the last column the total for the same period of the previous year:

Exports of Cotton (bales) from New York since Sept. 1, 1870

EXPORTED TO	WEEK ENDING May 27.	June 3.	June 10.	June 17.	Total to date.	Same time prev. year.

SHIPPING NEWS.—The exports of cotton from the United States the past week, as per *latest mail* returns, have reached 18,191 bales. So far as the Southern ports are concerned, these are the same exports reported by telegraph, and published in THE CHRONICLE last Friday, except Galveston, and the figures for that port are the exports for two weeks back. With regard to New York, we include the manifests up to last Saturday night:

	Total bales
NEW YORK—To Liverpool, per steamers Idaho, 466....Humbolt, 639 City of Antwerp, 238....England, 291....per ships J. Foster, Jr., 200....Pleiades, 96....Southampton, 73 J. Bryce, 352	2,284
NEW ORLEANS—To Liverpool, per steamer Fire Queen, 2,040....per ships C. H. Soule, 3,021....Northampton, 3,317	8,378
To Havre, per ship Anna Camp, 3,837	3,837
To Bremen, via Havana and Southampton, per steamer Hannover, 67	67
To Barcelona, per steamer Argos, 1,800 ...per bark Angela, 400	2,200
TEXAS—To Liverpool, per bark Caroline Lemont, 1,425	1 425
Total	18,191

The particulars of these shipments, arranged in our usual form are as follows:

	Liverpool.	Havre.	Bremen.	Barcelona.	Total
New York	2,284	....	....	....	2,284
New Orleans	8,378	3,837	67	2,200	14,482
Texas	1,425	....	....	....	1,425
Total	12,087	3,837	67	2,200	18,191

GOLD, EXCHANGE AND FREIGHTS.—Gold has fluctuated the past week between 112⅛ and 112⅜, and the close was 112¼. Foreign Exchange market is strong and higher. The following were the last quotations: London bankers', long, 110⅞@110½; short, 110⅝@111, and Commercial, 109¾@110¼. Freights closed at ¼d. by steam and 5-32d. by sail to Liverpool.

BY TELEGRAPH FROM LIVERPOOL.—

LIVERPOOL, June 23, 5 P. M.—The market opened firm and closed quiet, with sales of the day footing up 15,000 bales, of which 7,000 bales were taken for export and speculation. The sales of the week have been 137,000 bales, of which 19,000 bales were taken for export and 38,000 bales on speculation. The stock in port is 909,000 bales, of which 595,000 bales are American. The stock of cotton at sea bound to this port is 416,000 bales, of which 102,000 bales are American.

	June 2.	June 9.	June 16.	June 23.
Total sales	82,000	144,000	133,000	137,000
Sales for export	19,000	20,000	26,000	19,000
Sales on speculation	17,000	47,000	36,000	38,000
Total stock	967,000	914,000	945,000	909,000
Stock of American	611,000	579,000	615,000	595,000
Total afloat	432,000	481,000	436,000	416,000
American afloat	188,000	206,000	132,000	102,000

The following table will show the daily closing prices of cotton for the week:

	Sat.	Mon.	Tues.	Wed.	Thurs.	Fri.

BREADSTUFFS.

FRIDAY P. M., June 23, 1871.

The market generally has had a downward tendency, but closes firmer, though not very active.

Flour has arrived more freely, and prices have slightly declined for nearly all descriptions, though being below the cost of production, holders have not readily made any concessions. The market has, therefore, been stagnant, a reduction being made on the limited business done, but full prices necessary to free purchases. When good shipping extras touched $6.20@6.25 delivered, a better demand sprung up, and some lines were sold; the medium extras for the West Indies, made partly from Winter Wheat, have brought full prices; but family flours have been dull. Some of the latter from new wheat have arrived from St. Louis, and will be coming along soon very freely, as the yield of Winter Wheat in that quarter is much larger than last year. To-day with 6d. advance reported from Liverpool, holders were firm with the trade more disposed to buy, but the export demand not pressing and no decided advance established in prices.

Wheat has been dull and drooping. Early in the week quotations from Liverpool showed a decline; the receipts at this market were more liberal, and there was an advance in Ocean freights, under which No. 2 Spring declined to $1.46@1.47, and Amber Winter Ohio to $1.56@1.57, all afloat; even at this decline there was little demand, but holders withdrew samples, and to-day with a penny advance in Liverpool, Prime No. 2 Spring brought $1.48, and Amber Winter $1.57½ afloat, the latter being taken for the Continent, whence there is some renewal of inquiry. The receipts of Wheat at Chicago show a considerable falling off as compared with last year, but at other receiving ports the receipts are a full average. New Winter Wheat has begun to arrive here from Delaware and Maryland, where the crop has been harvested in good condition, and is much greater than last year.

Corn has arrived more freely, and has met with a good demand, both for home use and export, but an advance in Ocean freights has rather weakened prices. Good to prime boat loads Western Mixed sold at the close at 74½@75c. afloat.

Rye has been dull, but we notice at the close some demand for the Continent. A small boat of Canadian sold to-day at 91c. on bond.

The following are the closing quotations:

Flour—		Wheat, Spring, new, bush	$1 40@ 1 49
Superfine	₱ bbl. $5 40@ 5 80	Red Winter	....@ ....
Extra State	6 20@ 6 40	Amber do	1 55@ 1 58

GROCERIES.

FRIDAY EVENING, June 23, 1871.

The movement of goods has continued moderate and uncertain, the majority of buyers taking only enough for immediate wants, not so much, apparently, because the cost was considered high, as from want of a distributive outlet, the previous pretty free purchases in some cases and a reduced consumption in others giving the small dealers a very good supply. Again, this is a season of the year when preparations are making to take inventory, settle up six-monthly accounts, etc.; and there is not much desire to accumulate any great amount of stock until the above matters are over with. Prices have fluctuated somewhat, but the changes are not very decided, and the disposition among importers is evidently to resist all futher declines, as sales in many cases are now possible only at a decided loss, though stocks are increasing and charges accumulating to such an extent that, even with the ease in money, it now and then becomes necessary to realize on odd lots in order to meet current expenses, and with forced sales some shading in rates is unavoidable. Late foreign advices contain nothing calculated to have any decided effect upon the various commodities covered by our review.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea, black	7,864 pkgs.	Laguayra	293 bags.	Sugar, Brazil	3,857 bags.
Green	6,772 pkgs.	Other	399 bags.	Manilla, &c.	.. bags.
Japan	3,731 pkgs.	Sugar, Cuba	8,829 boxes.	Muscovado, Cuba	591 hhds.
Various	1,428 pkgs.	Cuba	6,864 hhds.	Porto Rico	857 hhds.
Coffee Rio	8,425 bags.	Porto Rico	1,156 hhds.	Demerara	74 hhds.
Java	6,360 mats.	Other	2,433 hhds.	Other	419 hhds.
Maracaibo	1,840 bags.				

*Hhds. include bbls. and tcs. reduced

Imports this week at this port have included 26,201 bags of Rio and Santos. The receipts of Sugar are 6,571 boxes, 10,510 hhds., and 3,800 bags. Of Molasses 1,166 hhds. have arrived. There have been no arrivals of tea except 836 packages by indirect importation.

The stocks in New York at late, and imports at the five leading ports since Jan. 1, 1871, are as follows:

	Stocks in New York at date.		Imports at leading ports since January 1.

TEA.

There has been some demand for invoices during the week, but nothing very extensive, and business can only be called moderately active. Buyers know just what they require before entering the market and operate closely to their wants, and the transactions embrace a great many small chops, from which jobbers can obtain a sufficient quantity to meet the distribution for a week or two at least, as the movement of lines is also quite moderate. This condition of the market, however, appears to have been expected by the trade generally, and there is no great loss of confidence. A dull slow movement always brings with it something of a tame feeling on values, where odd and irregular lots of goods are to be disposed of, but the majority of holders are now quite as firm as early in the month, and have largely withdrawn their supplies to await the revival of a demand. Choice grades in particular—either Green, Black, or Japan—are looked upon with confidence, though all qualities are thought likely to warrant holding, as the aggregate imports are but a trifle in excess of last year. Sales of 3,800 Greens, 1,100 Oolongs, 950 Souchongs, and 1,400 Japans.

There have been no imports of Tea this week. The receipts indirectly have been 777 half chests by steamer and 59 by rail overland.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871	13,232,335	13,775 897	6,215,769	32,927,801
1870	12,782,988	13,705,137	6,245,179	32,733,274

The indirect importations, including receipts by Pacific Mail steamers via Aspinwall, have been 12,560 pkgs. since January 1, against 31,703 last year.

COFFEE.

There is no very decided change to note on the general position for the past week, buyers still operating with moderation and caution, and holders of the stocks finding nothing to induce them either to further concede or to ask an advance for the present. There is no doubt, however, of a firmer and more confident feeling on Brazils grades, and a belief not only in an ultimate full recovery from the present stagnation, but a considerable reaction in values, which are now very much below the cost of importation. The late telegrams and mail advices from Rio Janeiro were all of a very stimulating character, announcing extremely moderate shipments to the United States and prices strong, with almost a certainty of a decided falling off in the crop raised, and holders here carry their supplies more hopefully. The general accumulation here and along the seaboard just at the moment is large, and tends to increase rather than diminish; and this, with a very slow distribution, has the effect to counteract stimulating influences to a certain extent; but with hopes centered more in the future than the present, sellers really seem to feel greater indifference than for many weeks. The ontports show a dull tone also, but prices generally are reported as firm. Java has been quiet beyond a moderate amount distributed from second hands. The West India styles continue very slow and irregular on the demand, and have no fixed prices, though the disposition of holders is to work off a portion of their stock, and low prices would be accepted on many lots. Sales of 11,540 bags Rio, 500 bags Maracaibo, 550 bags Savanilla, and 500 bags Costa Rica; at Baltimore, sales of 3,000 bags Rio.

The imports this week have included 26,201 bags of Rio and Santos by the "Templar," "John Shay," "Merrimack" (steamer), "Julia" and "David Owen."

The stock of Rio June 22, and the imports since Jan. 1, 1871, are as follows:

In Bags.	New York.	Philadelphia.	Baltimore.	New Orleans.	Savan. & Mobile.	Galveston.	Total.
Stock	106,359	...	59,497	11,871	8 919	8,000	189,646

SUGAR.

The market for raw sugars has again failed to develop any decided change, though there has been a slight tendency in buyer's favor for a few days, and in several instances moderate concessions were allowed on the common and inferior grades in particular. The imports have been free, in fact something in excess of calculations, and the stock accumulated to the largest aggregate of the season, and this, with buyers operating cautiously and seldom, unless compelled to, has naturally had a tendency to cause something of tameness. This feeling, however, is looked upon by holders as merely of a temporary character, and they generally consider, or at least affect to consider, the prospect for the future as full of encouragement as ever. The call has been in the main from refiners, with a few odd parcels taken by the trade, and as a rule buyers have very little to say upon the position, contenting themselves with meeting momentary necessities and quietly awaiting an increase of the distribution before they venture upon more extensive operations. For refined the market has shown a fair amount of activity, including some sales of hards for export, and though reasonably steady on desirable brands, the general tone of the market was a little tame and the changes in quotations have been mainly in buyers favor. Sales of 2,134 hhds. Cuba, 1,935 hhds. Porto Rico, 250 hhds. Demerara, 530 hhds. Martinique, 75 hhds. Barbadoes, 4,500 bags West India, 1,600 boxes Havana, and 500 hhds. Melado.

Imports at New York, and stock in first hands, June 22, were as follows:

	Cuba, bxs.	Cuba, *hhds.	P. Rico, *hhds.	Other *hhds.	Brazil, bags.	Manilla, &c, bags.	Melado hhds.

MOLASSES.

There does not appear to be any special change to advise on the market for foreign grades during the past week. The call from the interior is extremely moderate, and this keeps the purchases of grocers confined to a few small odd lots, just enough to show a fair assortment in store, while refiners, meeting with no outlet for their production, are quite indifferent, especially as nearly all are well stocked on previous receipts, largely from a direct importation. A first-class, high testing boiling cargo attracts some attention when offered, but even this class of stock fails to move with the ordinary freedom, and as with the lower grades of refining goods must be parted with on corresponding easy terms, if sold at all. Distilling qualities are not at present even mentioned by either buyer or seller, and values are simply nominal. Domestic has continued dull and nominal, though in reality the advantage is with the buyer. The stocks are immense and cost pretty full rates, and holders are of course interested in keeping values up to the highest possible point, but with the very small outlet and the continually increasing expenses, to say nothing of an occasional additional arrival, the necessity for realizing frequently induces a concession in order to draw out business. Syrups are dull, but without further decided change in value, a portion of the stock in speculator's hands helping to sustain the position. Sugar House Molasses plenty, not very active, and somewhat heavy at 18c. in hhds., and 22c. in bbls. Sales of 300 hhds Barbadoes, 245 hhds. St. Croix, 150 hhds Cuba, 175 hhds. Porto Rico, and 670 bbls. New Orleans.

The receipts at New York, and stock in first hands, June 22, were as follows

*Including tierces and barrels reduced to hhds.

SPICES.

We have again to note a quiet or in fact a very dull market, so far as the movement of invoices is concerned, and absence of stock in first hands, on spot or to arrive, and the complete concentration of all the desirable goods in second hands greatly reducing the offerings. Buyers to be sure show no great amount of anxiety, but it is probable that purchases would be made were any really attractive assortment available. We note an arrival of 100 piculs Cassia, via San Francisco and the Pacific Railroad, the first direct consignment by this route yet received. The distribution of small lots has been fair but not very active, and the market without many interesting features beyond the generally firm tone assumed by sellers on all goods. At the close there is a sudden development of a very strong speculative movement in Nutmegs and Mace, owing to reports at hand of the almost total destruction of the crop. Holders have withdrawn their stocks, and some ask $1, gold, per pound for Nutmegs, while 400 cases have sold, to arrive, at 90c. Pepper is also held higher, and there are indications of a better call for Cassia at full figures, though nothing of a positive character as yet.

FRUITS, &c.

The foreign Dried market has been quiet the past week for most kinds, but there is decidedly more tone, and a firmer feeling is apparent. There has been considerable inquiry for Layer Raisins, but has not resulted in sales of any account until at the close, when a fair business is reported, mostly at $2 40 per box. Loose Muscotels have moved to some extent, some 5,000 boxes having changed hands, and the close is very much firmer. Prunes have been less active, the stock of French being now reduced, and higher prices demanded. Turkish are steady, though quiet. Currants have sold to a moderate extent, but at prices shaded a trifle. Sardines continue quiet, and only the smallest fish in full lots will bring our quotations; large fish are considered unmerchantable. Nuts are generally quiet; some full sales were made of Brazils early in the week, and they are now held with rather more confidence. Firecrackers are easier; the trade now is confined. We quote $2 45@$2 50.

Foreign Green have been in moderate demand for box fruit, but prices have been somewhat unsettled, owing to a large auction sale advertised for to-day. This, however, has created no actual change in prices, as all lots in good order were taken at full former figures. The Sorrento Oranges brought $3@5 75 for box; Palermo do $3@5 70 per box; Messina Lemons $3 15@5 65 per box, and Palermo do $3 15@5 65 per box. West India have been in full supply, and to work off arrivals it has been necessary to shade prices. Bahama Pines sold at $5 for second cut; Baracoa Bananas $2@3 per bunch, and Baracoa Cocoanuts $30 per thousand.

Domestic Dried are without any new features, being very little wanted, and except for choice lots of Apples, prices are nominal. Peaches are inactive. Blackberries are firm, but dull, with a small supply. Cherries are scarce; new will soon arrive.

Domestic Green are in full supply for this season of the year, and prices rule comparatively low, except for choice lots. Strawberries are not arriving freely, the season being nearly over; and as there continues a demand, prices tend upward. Best quoted at 20@25c per quart. Raspberries sell fairly at 18@20c. per quart for Black Caps and 22c. for Antwerp. Cherries have sold better at 12@15c. The supply of Peaches is not large, and firm prices rule. Best bring $8@$12 per crate.

PRICES CURRENT.

THE DRY GOODS TRADE.

FRIDAY, P. M., June 23, 1871

There has been a moderate demand for piece goods since our last report, and the trade, though not heavy, has been fair, in the aggregate, for this period of the season. Retailers are not inclined to purchase any class of goods in greater amounts than are required for their immediate trade, although there is every indication that both cottons and woolens will bring better prices before the fall season closes. Jobbers have succeeded in reducing their stocks materially, and now hold no more goods than they usually do at this time of the year. These dealers, as well as importers, are now making preparations for receiving and opening their fall stocks, which will soon be coming forward. The package trade has not been spirited during the week, but the market has lost none of its firmness or buoyancy in consequence, and the tendency of prices has been steadily upward. Jobbers bought heavily previous to the rise, and a majority of them now hold enough domestic goods, with the exception of prints, to supply the wants of their early trade. Agents are taking orders for some classes of goods which have not been advanced, to be delivered later in the season "at value," but sales at a stated price are not heavy.

DOMESTIC COTTON GOODS.—The market for all cotton fabrics is excited, and the tendency of prices is steadily upward. Nearly all lines are higher than at the time of our last report, two makes of wide brown and bleached goods having been advanced an additional 2½c. per yard, making them 5c. per yard higher than they were two weeks ago. Standard browns are up ¼c., and mediums ¼@1c. on the different makes. Some makes are held at nominally unchanged prices, but this is only where the agents are entirely out of goods and only take orders "at value." Bleached goods are firm with higher prices on several makes of medium and fine 4-4 goods, but have not experienced so general an advance as brown cottons. Cotton Drills are sold close to the production at advanced quotations, and still higher prices are talked of. Cotton bags are jobbing at the old prices, but jobbers could not replace their stocks except at an advance of 2½@4c. Colored cottons suited to the fall trade are firm with an advance, in some makes, of 1c. per yard. Canton flannels are not in demand at the moment either in the piece or full package. Jobbers have supplied themselves with fair stocks which have been opened at our quotations, although it is too early for any call from retailers. Light prints are well sold out, and as the demand continues fair for small amounts the remaining stocks are likely to be closed out before the close of the month. Mediums are in moderate request, and are generally selling at ¼c. above the prices paid for light colorings, while dark work will probably open at a further advance of ¼c.

DOMESTIC WOOLEN GOODS.—The demand for flannels is active, but other woolen fabrics are rather quiet. Cloths of popular brands are selling moderately, but the demand is not so active as was anticipated, and is scarcely so large as is usual at this period of the year. Cassimeres sell slowly, the bulk of the business at the moment being on orders for fine goods to be made. Blankets of the best makes have sold freely for some time past, but are quiet at the moment, jobbers having laid in their stocks for the early trade. Flannels are advancing steadily, and the active movement has materially reduced stocks, especially of gray mixed goods.

FOREIGN GOODS.—The market for imported fabrics is unchanged in every particular. There is very little doing in any class of goods for current distribution, with the exception of ribbons, popular numbers of which still sell freely at full prices, but are very hard to get, owing to the scarcity. Woolens are in moderate request, and considerable amounts of black cloths could be placed if importers held the goods. Prices are steady on foreign woolens, but are no higher as yet, and are not likely to be. Manufacturers purchased their wool early and the recent advance in its cost will not be felt before late in the fall or the opening of the Spring season. The stock for dress goods seems to have cost more, at all events yarns are considerably higher, and the latest advices from buyers who are abroad confirm the reports previously given, that prices will be higher here than they were last Fall.

We annex a few particulars of leading articles of domestic manufacture our prices quoted being those of leading Jobbers:

BROWN SHEETINGS AND SHIRTINGS are in fair demand, with few sales in consequence of the scarcity of stock. The advance in prices are as follows: Amoskeag A 36 12½ do B 36 11 Atlantic A 36 13, do D 36 11½, do H, 36 12½ Appleton A 36 12½, Augusta 36 11½, do 30 9½, Bedford R 30 9 Boott O 34 10½, Commonwealth O 27 6½, Grafton A 27 7½, Great Falls M 36 11 do S 33 9½, Indian Head 36 13, do 30 11, Indian Orchard, A 40 14, do C 37 12½, Laconia O 39, 12½ do B 27 11, Lawrence A 36 10½, Lyman O 36 10½, do E 36 12, Medford 36 11½, Nashua fine O 33 11½-12, do R 36 13-13½, do E 40 14½-15, Newmarket A 36 10½, Pacific extra 36 12½, do L 36 11, Pepperell 7-4 24½-25, do 8-4 27-27½, do 9-4 32-32½, do 10-4 37-37½, do 11-4, 44, Pepperell E fine 39 13-13½, do R 36 12-12½, Pocasset F 30 8½, Saranac fine O 33 11½, do R 36 13½, Stark A 36 12½ Swift River 36 8½, Tiger 27 8.

BLEACHED SHEETINGS AND SHIRTINGS are quiet, both for present and future delivery, but prices are stiff with an advancing tendency. We annex the current quotations: Amoskeag 46 16½-16½, do 42 15½-15½, do A 36 15½-15½, Androscoggin L 36, 16½, Arkwright WT 36 18½, Ballou & Son 36 13-13½, Bartletts 36 14½, do 33 13½, Bates XX 36 19, Blackstone AA 36 14, Boott B 36 14, do O 30 11, do R 26 9½, Clarks 36 18 Dwight D 40 18, Ellerton 10-4 35, Fruit of the Loom 36 16½, Globe 27 7, Gold Medal 36 13, Great Falls Q 36 16 Hill's Semp. Idem 36 16, Hope 36 13½, James 36 15, Lonsdale 36 16, Masonville 36 16½, Newmarket C 36 12, New York Mills 36 21, Pepperell 6-4 24½-25, do 10-4 42-42½, Tuscarora XX 36 17½-18, Utica 5-4 24½ 25, do 6-4 32-32½, do 9-4 50, do 10-4 54½-55, Waltham X 33 11, do 42 15½, do 6-4 22-22½ do 8-4 27-27½, do 9-4 32-32½, do 10-4 37-37½, Wamsutta 36 20.

PRINTING CLOTHS are firm and advancing, with small stocks and few spot sales. Extra 64's are quoted at 7¼c, 56x60's, 6¼c.

PRINTS are firm without particular activity or notable change. American 11, Albion solid 11, Allens 10½, do pinks 12 do purples 11½, Arnolds 8½, Atlantic 5½, Dunnell's 11, Hamilton 11, London mourning 9½, Mallory pink 11½, do purples 10½, Manchester 10½, Merrimac D dk. 11, do W pink and purple 12½ do W fancy 12, Oriental 10½, Pacific 11, Richmond's 10½, Simpson Mourning 10½, Sprague's pink 11½, do blue and White 11, do shirtings 10, Wamsutta 7½.

OFFICE OF THE

ATLANTIC

Mutual Insurance Co.

NEW YORK, January 26, 1871.

The Trustees, in conformity to the Charter of the Company, submit the following statement of its affairs on the 31st December, 1870:

Premiums received on Marine Risks, from 1st January, 1870, to 31st December, 1870	$5,270,690 09
Premiums on Policies not marked off 1st January, 1870	2,155,723 64
Total amount of Marine Premiums	$7,426,413 73
No Policies have been issued upon Life Risks nor upon Fire Risks disconnected with Marine Risks.	
Premiums marked Off from 1st January, 1870, to 31st December, 1870	$5,332,738 55
Losses paid during the same period	$2,258,590 39
Returns of Premiums and Expenses	$1,063,263 57

The Company has the following Assets, viz.:

United States and State of New York Stock, City, Bank and other Stocks	$8,843,740 00
Loans secured by Stocks, and otherwise	2,377,350 00
Real Estate and Bonds and Mortgages	217,500 00
Interest and sundry notes and claims due the Company, estimated at	339,352 03
Premium Notes and Bills Receivable	2,089,915 95
Cash in Bank	316,125 45
Total amount of Assets	$14,183,983 43

Six per cent interest on the outstanding certificates of profits will be paid to the holders thereof, or their legal representatives, on and after Tuesday, the Seventh of February next.

The outstanding certificates of the issue of 1867 will be redeemed and paid to the holders thereof, or their legal representatives, on and after Tuesday, the Seventh of February next, from which date all interest thereon will cease. The certificates to be produced at the time of payment and cancelled. Upon certificates which were issued (in red scrip) for gold premiums, such payment of interest and redemption will be in gold.

A dividend of THIRTY-FIVE Per Cent is declared on the net earned premiums of the Company, for the year ending 31st December, 1870, for which certificates will be issued on and after Tuesday, the Fourth of April next.

By order of the Board,

J. H. CHAPMAN, Secretary.
